PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, FIRST SESSION

PROCEEDINGS AND DEBATES OF THE CONGRESS, SECOND SESSION

HOUSE OF REPRESENTATIVES—*Saturday, December 18, 1982*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Let the prophet who has a dream tell the dream, but let him who has my word speak my word faithfully.—Jeremiah 23: 28.

Teach us, O God, in all we do to be faithful stewards of Your gifts to us. We hope for achievement and success, but above all else may we be faithful to Your word of truth and Your message of love. May Your spirit of grace be with all who labor in this place that righteousness will be exaulted and respect and responsibility our common spirit. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. SENSENBRENNER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 256, nays 38, answered "present" 8, not voting 131, as follows:

Mr. ST GERMAIN changed his vote from "present" to "nay."

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendments of the House to bills of the Senate of the following titles:

S. 187. An act to authorize the Secretary of the Interior to convey certain lands near Miles City, Mont., and to remove certain reservations from prior conveyances; and

S. 2059. An act to change the coverage of officials and the standards for the appointment of a special prosecutor in the special prosecutor provisions of the Ethics in Government Act of 1978, and for other purposes.

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate to the bill (H.R. 2330) entitled, "An act to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House with an amendment to the bill (S. 2355) entitled "An act to amend the Communications Act of 1934 to provide that persons with impaired hearing are ensured reasonable access to telephone service."

The message also announced that the Senate insists upon its amendments numbered 9, 15, 18, 24, and 27 to the bill (H.R. 6056) entitled "An act to make" technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980", disagreed to by the House; and the Senate disagrees to the amendments of the House to the amendments of the Senate numbered 1, 10, 14, 16, 17, 26, 30, 31, 33, 34, 36, and 37 agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DOLE, Mr. PACKWOOD, Mr. ROTH, Mr. LONG, and Mr. HARRY F. BYRD, Jr., to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments numbered 2, 3, 4, to the bill (H.R. 7093) entitled "An act to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income," disagreed to by the House; and the Senate disagrees to the amendment of the House to the amendment of the Senate numbered 1 requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DOLE, Mr. PACKWOOD, Mr. ARMSTRONG, Mr. LONG, and Mr. HARRY F. BYRD, JR., to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendment of the House to the amendment of the Senate to the text of the bill (H.R. 5470) entitled "An act to amend the Internal Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness", requests a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and appoints Mr. DOLE, Mr. PACKWOOD, Mr. WALLOP, Mr. LONG, AND MR. HARRY F. BYRD, JR., to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 2623) entitled "An act to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes," agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. COHEN, Mr. GOLDWATER, Mr. ANDREWS, Mr. GORTON, Mr. MELCHER, Mr. DECONCINI, and Mr. INOUYE to be the conferees on the part of the Senate.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 4001. An act to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes;

H.R. 5002. An act to improve fishery conservation and management;

H.R. 6324. An act to authorize appropriations for atmospheric, climatic, and ocean pollution activities of the National Oceanic and Atmospheric Administration for the fiscal years 1983 and 1984, and for other purposes;

H.R. 6612. An act to provide for the settlement of land claims of the Mashantucket Pequot Indian Tribe of Connecticut, and for other purposes; and

H.R. 7173. An act to make certain changes in the membership and operations of the Advisory Commission on Intergovernmental Relations.

The message also announced that the Senate had passed bills and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 2941. An act to authorize funds for the National Oceanic and Atmospheric Administration for fiscal year 1983 to carry out the provisions of the National Ocean Pollution Planning Act of 1978;

S. 3048. An act to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm;

S. 3113. An act to make minor and technical amendments to the Job Training Partnership Act;

S. 3114. An act to amend the act of March 3, 1869, incorporating the Masonic Mutual Relief Association Co., and acts amendatory thereto;

S. Con. Res. 122. Concurrent resolution relating to the processed product share of United States agricultural exports;

S. Con. Res. 135. Concurrent resolution instructing the Clerk to make corrections in the enrollment of H.R. 2330; and

S. Con. Res. 136. Concurrent resolution providing for printing a report by the Joint Committee on Taxation.

THE FIRST MONTH OF ANDROPOV

(Mr. McDONALD asked and was given permission to address the House for 1 minute.)

Mr. McDONALD. Mr. Speaker, only 4 weeks after Yuri Andropov took power in the Soviet Union, certain things are already evident. One, Andropov has already gathered more direct power unto himself than Stalin ever enjoyed, in some respects. Andropov now possesses three portfolios. He is General Secretary of the Party, replacing Brezhnev. He has replaced Suslov as chief ideologist and overseer of foreign affairs. He also presides over the Defense Committee and supervises defense industry as General Secretary. Last, but certainly not least, he still controls the KGB via his appointee and comrade Vitaliy Fedorchuk.

It is further evident that the KGB will have an expanded mandate under Andropov. Most of the additional troops added recently recently to the Soviet forces in Afghanistan are reported to be internal security forces who already have distinguished themselves by unusual cruelty in engagements with the Afghans. And, using the pretext of "strengthening the border defenses of the Soviet Union," a new Soviet law has been enacted that will open the way for expanded KGB operations everywhere in the world. Expanded KGB operations, of course, mean bad news for the West as the Italians are finding out in their investigation of the assassination attempt against the Pope. The trail has led back to the Bulgarian Secret Service, which, in turn, is controlled by the Soviet KGB. Just recently, the former head of the Bulgarian Secret Service,

has confirmed that such an attempt in a foreign country would not be made without orders from Moscow.

Therefore, the new year may be a difficult one for the West. For those who desire additional details on Andropov and the matters I have discussed, I am placing a more comprehensive statement in the Extension of Remarks today. Also, see page E5105 of the CONGRESSIONAL RECORD of December 14, 1982.

THE JUSTICE DEPARTMENT AND THE CONGRESSIONAL CONTEMPT CITATION

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, during the debate on the contempt citation of Ann Gorsuch, I raised the issue with the gentleman from Georgia (Mr. LEVITAS), the chairman of the subcommittee, about the position of the Justice Department. The Justice Department, through an assistant attorney general, was advising Mrs. Gorsuch during the proceedings. Also, the statute says that upon a contempt citation from the House of Representatives, it is the duty of a body, that is, the U.S. district attorney from the District of Columbia, which is part of the Justice Department, to prosecute and to proceed with the contempt citation before a grand jury.

I raised this issue with the gentleman from Georgia, and he quoted to me testimony under oath, because he had put a similar question to the Assistant attorney general who was with Mrs. Gorsuch. The answer at that time was that they would proceed to do their duty on the contempt citation.

In reading this morning's paper, it is apparent that that is not so. It raises a serious question, an issue that goes to the very integrity and independence of this House. I think we should view it with great concern.

MEXICAN SENATE ASKS FOR DELAY IN SIMPSON-MAZZOLI LEGISLATION

(Mrs. SCHROEDER asked and was given permisson to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I have before me the message sent to the Speaker of the House from the Mexican Senate. It was passed in the Mexican Senate on December 8, and it was issued on December 13. It is a plea from the Mexican Senate that we please defer the Simpson-Mazzoli bill so that there will be more consultation with their new government.

I think this is a very, very, very important plea, and we should listen to them. Our interparliamentary friends in both Canada and Mexico are always chiding us for passing things that affect them without consulting them. This is just one more example of that. It will be impossible to enforce any immigration laws if Mexico is not sympathetic, unless we hire thousands more to put on the border. It seems to me that we are trivializing the whole area of immigration and relations with our neighbors by debating this bill after 10 o'clock nights using it as a filler when no one is here that is not involved in the bill and doing this on Saturday when people are focusing on other things.

I really hope that we will listen to the wishes of our brothers and sisters in the Mexican Senate and delay this bill until we consult with them.

A CONSTITUENT'S THOUGHTS ON THE MX MISSILE

(Mr. ECKART asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ECKART. Mr. Speaker, in view of this Chamber's recent passage of a $231 billion arms package, perhaps we should sit back and take stock of our constituents' thoughts and concerns relative to defense spending. With budget deficits projected to be more than $150 billion next year, and 12 million Americans out of work, it may be wise to rethink our budget priorities.

Despite our overwhelming defeat of the MX, the grandiose missile system refuses to die. I would like to insert in the RECORD at this time a piognant letter from a concerned constituent in my district. In his mind, our priorities are clear.

DEAR CONGRESSMAN ECKART: First let me congratulate you on being our new congressman. You can be assured that all of the Fularz families voted for you here in Orwell. I hope you can find time to visit Orwell sometime in the future.

I am indeed very concerned about the president's proposed MX program. It'll take one billion dollars just to start this program. With 12 million people out of work I'd like to see this money spent where it is really needed: to create new jobs.

This is the first time in my life that I see soup kitchens for the hungry. Dennis, these people want to work! Let's help them. I'm fortunate, I have a good job at Kennametal here in Orwell. We're not doing the best but we're working. I'm writing for the many who want jobs.

The MX program I'm afraid will not funnel the jobs or money to the people who need them the most. Thank you.

Yours truly,

RICHARD N. FULARZ, Sr.,
ORWELL, OHIO.

BANKRUPTCY COURT LEGISLATION: IMPENDING DISRUPTION OF BANKRUPTCY COURT SYSTEM

(Mr. RODINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RODINO. Mr. Speaker, there is emergency legislation currently pending before this body that must be acted upon before we adjourn—an article III bankruptcy court bill. No other bill pending in Congress has been placed under a similar constitutional deadline, but the Supreme Court has mandated that the constitutional informity in the bankruptcy court system be corrected by Congress by December 24.

Why should the citizens of this Nation have respect for judicial decrees or the principles embodied in the Constitution, if the lawmakers themselves pay no heed to a ruling of the Supreme Court? Failure to discharge our constitutional responsibility would certainly signal that, in the view of the Congress, judicial decrees are not to be taken seriously.

The Supreme Court has now twice afforded the Congress an opportunity to enact corrective legislation. Both stay rulings were highly unusual. The extension of the stay until December 24 was granted, in part, upon the Solicitor General's representation that the Congress would certainly act to solve the problem in the lameduck session. There has been no indication that the Solicitor General will again request such an unprecedented extension and, if requested, that it will be granted by the Supreme Court.

In the absence of legislative action prior to December 24, the bankruptcy courts will lose all judicial power. The cases pending in the bankruptcy courts involve more people, more money, more jobs, and more tax revenues than the combined total of all civil cases pending before the remainder of the Federal judiciary. The impending constitutional crisis in the judicial system is therefore an economic problem as well. A major disruption of this system in the present difficult economic period would be disastrous.

I cannot overemphasize the importance of congressional action on this matter prior to December 24 to the continued efficient functioning of the Nation's bankruptcy system. And I believe we have a serious institutional responsibility to act.

REGULATORY REFORM ACT SHOULD BE CONSIDERED NOW

(Mr. LEVITAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVITAS. Mr. Speaker, on August 19 of this year you responded to a request by President Reagan asking for consideration of the regulatory reform legislation. In your letter, you stated that you had directed your staff to scrutinize the legislation and work with others interested in it to come up with amendments necessary to achieve the objectives of regulatory reform. You said that your staff has reported that the discussions had progressed well, and that it is close to completion, and that you are optimistic that work can be completed quickly.

You further said, "I intend to schedule this matter for House consideration as soon as this work is completed."

That work was completed in September and the agreed upon work product was printed in the RECORD on September 29.

Mr. Speaker, in addition to that the distinguished chairman of the Rules Committee stated to me in front of members of the leadership that he would not be the obstacle to this bill coming to the floor.

Notwithstanding both of these commitments, the fact of the matter is, the bill has not yet been considered or scheduled for House action. This house operates on the basis of making and then keeping commitments. The time is still available for these commitments to be kept, either by a rule being granted or by the bill being placed on suspension on Monday.

I urge, Mr. Speaker, that action be completed on this legislation, which has already passed the Senate by a vote of 94 to 0, so that these commitments can be kept and the legislation enacted into law.

IMMIGRATION LEGISLATION SHOULD BE PUT OFF TO 98TH CONGRESS

(Mr. PATTERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PATTERSON. Mr. Speaker, every Member knows that we need to have immigration reform. In fact, we had 5 hours of general debate on the so-called Mazzoli-Simpson immigration reform bill. Unfortunately, we had it very late at night, with only 17 to 20 Members who may have heard that general debate. Over 400 Members were not present to see, hear, and participate in this very late hour session.

This is not the way to enact major, landmark legislation overhauling the immigration system. From the U.S. Chamber and the business community on the one side to every minority group and organized labor on the other side, all share strong opposition to parts of this legislation without significant amendments. There are 297 amendments printed in the RECORD to be considered.

I urge the leadership to take this bill, shelve it, and let us consider major immigration legislation in the 98th Congress, not in this lameduck, late hour, weekend session when the attention of Members is elsewhere on major legislation to continue Government funding, and certainly not on this immigration bill.

□ 1030

A TRIBUTE TO THE HONORABLE RICHARD C. WHITE UPON HIS RETIREMENT FROM CONGRESS

(Mr. DAN DANIEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAN DANIEL. Mr. Speaker, I count the leaving of our colleague from Texas, the Honorable RICHARD C. WHITE, as more than the loss of a valued Member of this body.

It is a personal loss to me. DICK WHITE has been one of the finest sources of good counsel it has been my pleasure to have in the 14 years I have served here. He has been consistent in his service, placing foremost the interests of the Nation in his committee work.

After awhile, we all come to realize that service in a body where there is a potential gain and loss of Members carries the cost of watching those who depart do so with varying degrees of regret, or sometimes sadness. This is indeed one of those times for me.

Mr. WHITE is possessed of the keenness of mind which permits the orderly marshaling of ideas, a quality which is in short supply in this body. No doubt as a result of this same quality, he was one of the most effective questioner of witnesses I have ever known. The result has been that the product of the Investigations Subcommittee was an effective element of the House Committee on Armed Services.

DICK WHITE will leave a void in this body we will be long in filling.

INTRODUCTION OF LEGISLATION TO GRANT FEDERAL CHARTER TO VETERANS OF THE VIETNAM WAR, INC.

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks).

Mr. NELLIGAN. Mr. Speaker, yesterday, in one of my last acts as a Member of the 97th Congress, I introduced H.R. 7443, legislation to grant a Federal charter to the Veterans of the Vietnam War, Inc.

I can think of few better actions with which to close out my service to the present Congress.

The veterans of the Vietnam war exist to promote the Constitution of the United States, to better the conditions and benefits of all veterans, to advance the social, charitable, and educational opportunities of its members, and to insure justice for all.

Therefore, I strongly believe that this organization should be recognized and honored through the grant of a Federal charter, and that this action should be taken with all possible legislative speed.

For too many years, we have refused to recognize the service of our Vietnam veterans. In my mind, the recent tributes and memorials to the Vietnam veteran are long overdue, tragically overdue.

Enactment of my legislation is one small step that this Congress can take to demonstrate its concern for the Vietnam veteran, and I urge the Judiciary Committee to quickly consider and report this bill to the floor for consideration by the full House of Representatives.

PASSAGE OF LEGISLATION TO ESTABLISH A BANKRUPTCY COURT DEEMED CRITICAL

(Mr. McCLORY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLORY. Mr. Speaker, I want to give support to the statement made earlier by the chairman of the Committee on the Judiciary on the urgent necessity to enact legislation in this Congress placing the bankruptcy court on a firm constitutional basis so it can continue to handle bankruptcy cases.

We are under compulsion from the Supreme Court of the United States to take action before we depart. The Committee on the Judiciary of the House has acted, and, if the House should pass an article III bill it is my hope that the other body will not hold this matter hostage and undertake to attach nongermane amendments that can frustrate this legislation.

Mr. Speaker, it is extremely important that both the House and the other body take action before we depart and this Congress adjourns.

CONFERENCE REPORT ON H.R. 7356, INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1983

Mr. YATES. Mr. Speaker, I call up the conference report on the bill (H.R. 7356), making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of December 17, 1982.)

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER. The gentleman from Illinois (Mr. YATES) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. MCDADE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, the committee brings to the House a good conference report. It provides a total of $7.5 billion, which is $923 million above the budget estimate but is under the continuing resolution level in both budget authority and in outlays.

I believe the Congress can justifiably be proud of the conference report we have brought to the Members. We have struck a balance between protecting this country's natural resources and exercising appropriate fiscal restraint. The choices were difficult. There are a number of worthy activities that we were compelled to leave out of the bill. We had to slow the pace of Federal land acquisitions, and we closed a few fish hatcheries.

The conference report contains $3,183,000,000 for the natural resources agencies, of which $1,532,883,000 was for the Forest Service and $1,651,000,000 was for management of the public lands, wildlife refuges, and our great national parks. The Forest Service appropriation was $47 million over the House level. The conference report also provides for abandoned mine reclamation $34,600,000 over the level agreed to by the House.

We paid very strict attention to our energy needs. We would have preferred to put more money in for energy conservation, but we feel the amount we placed in the bill will still permit those programs to proceed. The sum of $145 million was approved for low-income weatherization, and $48 million is provided for schools and hospitals to undertake measures to make their facilities more energy efficient.

Mr. Speaker, there is a provision in the conference report to restrict mineral activities in wilderness study areas. There is a provision to allow offsite disposal of oil shale. There is a provision to protect environmentally sensitive areas off the northern coast of California.

Mr. Speaker, I include at this point in the RECORD a table comparing new obligational authority recommended in the bill for 1983 and the respective recommendations contained in the House and Senate bills and comparison thereto as follows:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	New budget authority					Conference compared with—			
	Enacted	Estimates	House	Senate	Conference	Enacted	Estimates	House bill	Senate bill
TITLE I—DEPARTMENT OF THE INTERIOR									
LAND AND WATER RESOURCES									
Bureau of Land Management									
Management of land and resources	423,638,000	373,527,000	322,963,000	331,716,000	330,226,000	−93,412,000	−43,301,000	+7,263,000	−1,490,000
Construction and access	2,627,000	2,711,000	2,243,000	2,243,000	2,243,000	−384,000	−468,000

[1] Excludes accounts which were funded in Public Law 97-276, continuing appropriations, fiscal year 1983, as follows: (1) strategic petroleum reserve, −$242,118,000; (2) Smithsonian Institution, construction, −$36,500,000; and (3) Native Hawaiians Study Commission, −$190,000.

Mr. McDADE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report accompanying the bill H.R. 7356 making appropriations for the Department of the Interior and related agencies and to urge its adoption by the full House.

Mr. Speaker, the White House has indicated that the President will sign this bill. It provides $7.79 billion in new budget authority for programs contained herein. This amount is $65 million above our subcommittee's section 302 allocation and $21 million below the Senate 302. We are advised that this is acceptable to the White House.

Mr. Speaker, the conference report contains a number of gives and takes. I would be remiss if I did not say that I believe we had a better bill when the House worked on it than we have today. In the main it is acceptable to the majority of the Members of the House. It contains substantial investments in our Nation's recreational, energy, cultural, and natural resources. We deferred action on a number of construction and acquisition projects that under normal economic times we would have funded, especially in the National Park Service. Where possible we have indicated support for these actions next year.

I am pleased that we were able to rid the bill of a number of administrative provisions and legislative limits which may have hampered effective environmental management of many activities covering the various departments and agencies in this bill. I believe the Members will be pleased with these actions.

Mr. Speaker, this bill does meet the consensus of the Members of both Houses of Congress that undertake an aggressive abandoned mine reclamation program at the State and Federal level. We added funds for such activities up to the existing capability of the Office of Surface Mining. We have provided a strong workable energy conservation program. We have insured a balanced energy program through substantial investments in fossil energy R&D. We have provided the funds necessary to further research in the Bureau of Mines that will give us more energy and safer conditions under which we obtain that energy.

In short I would hope the Members can support this bill and send it up to the President where he will sign it. It is a bill we can all support and be proud of the actions contained herein. I urge its adoption.

Ms. FIEDLER. Mr. Speaker, will the gentleman yield?

Mr. McDADE. I yield to the gentlewoman from California.

Ms. FIEDLER. Mr. Speaker, I would like to make an inquiry regarding the status of Santa Monica Mountains' funds. I noted with great disappointment that the conferees did not approve the $15 million-plus funding for the Santa Monica Mountains in this report.

I am grateful to the House, however, and would like to acknowledge to my colleagues on the Interior Committee that they did fund it on the House side.

Mr. Speaker, I wonder if the gentleman can give me some further information on that issue?

Mr. McDADE. Mr. Speaker, let me say to my distinguished colleague that because of her fastidiousness and persuasiveness, we did pass this bill with $15 million in it for the Santa Monica Mountains, which I think was emanately justified. As I said, I do feel that we had a better bill when we left here than the work product we bring back, and one of the reasons is that our colleagues on the other side were adamant about striking the $15 million from the Santa Monica Mountains.

I do want to say the gentlewoman from California that on our side in the

House we were very sympathetic to the case that was presented to us by the gentlewoman, and I want to assure her that the members of the committee will look with great favor on this project, which is unfortunately stricken by the other body, in the next Congress.

Ms. FIEDLER. Mr. Speaker, I would certainly hope they would, because we have a very serious situation with the Santa Monica Mountains project in that there are three parcels of land which are about to be developed that would not be developed if this funding were in here. We have some 29 million annual visitors to the park who are part of an urban community and are very dependent upon this kind of free recreation.

So, Mr. Speaker, I am very much appreciative of the fact that the committee members are willing to look at it further in fiscal 1983.

Mr. McDADE. Mr. Speaker, I want to commend the gentlewoman from California for bringing this to our attention.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. McDADE. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I would like to ask the gentleman if the situation with regard to the Channel Islands National Park is the same as it was when the bill passed the House; namely, that money is in the bill that could be used for acquisition of land there, although it is not designated for that purpose.

Mr. McDADE. Mr. Speaker, the gentleman is correct. I think what the Secretary and the Park Service did is send up a request for reprograming. We did look with favor on it, and there is flexibility.

Mr. LAGOMARSINO. Mr. Speaker, I thank the gentleman from Pennsylvania.

Mr. YATES. Mr. Speaker, I yield myself such time as I may consume.

Mr. SHARP. Mr. Speaker, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Indiana.

Mr. SHARP. Mr. Speaker, on behalf of the gentleman from Michigan (Mr. DINGELL), chairman of the Committee on Energy and Commerce, I would like to engage in a brief colloquy with the gentleman from Illinois, (Mr. YATES) concerning a legislative provision in H.R. 7356 authorizing the Secretary of Energy to contract with a nonprofit institution for the conduct of petroleum-related research and development at the Bartlesville Energy Technology Center in Oklahoma. Is my understanding correct that the purpose of this provision is to insure the continued operation of this DOE facility for research and development purposes, that nothing in the provision authorizes the disposal or transfer of the facility to any nonprofit institution, that if the DOE is unable to enter into such a contract, nothing in this bill authorizes DOE to close this facility, that the contract should be for a limited term, such as 3 years, and not for an indefinite or extensive period, and that all R&D results will be available to the public to the same extent and in the same manner as if this were done entirely by DOE?

Mr. YATES. The gentleman is correct. This is an important facility and should be continued permanently as a DOE facility. I stress that the bill does not authorize the transfer of the title to this facility. The employees would continue to be Federal employees. The term of the contract should be reasonably short, although some renewal might be reasonable. Most importantly, all R&D information must be public.

Mr. SHARP. Is my understanding correct that this provision is not intended to authorize a sole source procurement? The DOE should solicit all possible contractors in order to obtain the best arrangement possible.

Mr. YATES. That is correct.

Mr. SHARP. There have been suggestions that the intent of this provision is for the DOE to enter a sole source contract with the Interstate Oil Compact Commission which is an organization growing out of the 1935 interstate oil compact. That organization has not in the past engaged in R&D. I understand that it is not the conferees' intent of this provision to authorize a sole source contract with the IOCC, although the competitive procurement might result in a contract with the IOCC. Am I correct?

Mr. YATES. Yes.

Mr. SHARP. Is it also the conferees' intent that the DOE consult with the appropriate legislative and appropriations committees in such contracting, including the Energy and Commerce Committee, and submit the final version to all such committees for the 30-day review? And that this consultation and review would extend to any renewal of this contract?

Mr. YATES. That is correct. The House Science and Technology Committee should also be consulted.

Mr. DINGELL. I thank the gentleman for his responses to subcommittee Chairman SHARP. They are helpful and consistent with my understandings.

Mr. Speaker, Chairman YATES also consulted our committee concerning the Fuel Use Act amendment added by the Senate which is now section 317 of the conference report. Indeed, the version adopted the conferees is identical to a provision developed by our committee and provided to Chairman YATES in my letter of December 16, 1982, which appears at the end of my remarks. In reluctantly agreeing to this narrow provision, I want to stress that we do so only because of a unique situation in Alaska and we will not be receptive to suggestions in the future for the same or a similar approach in the lower 48 States where the situation is clearly not even close to being unique. This agreement was negotiated between Senator STEVENS and Congressmen OTTINGER, SHARP, and myself. I know I speak for Congressmen OTTINGER and SHARP that we will not be so agreeable in the future to similar Senate amendments to the Fuel Use Act through this appropriation process. Also, it is not our understanding that we would be receptive to a broader exemption for Alaska in the future.

Mr. Speaker, it is with great reluctance that I support this bill. My reluctance relates solely to my concerns about several legislative provisions included in the bill, particularly those added by the other body. That is in no way a criticism of the gentleman from Illinois or his subcommittee. His subcommittee included the so-called Bartlesville provision to the House bill, noted it in the committee report on this bill, and did not seek a waiver of the rules. Unfortunately, when the bill was being considered on the House floor, I was chairing a hearing concerning my subcommittee's subpena of EPA documents and could not raise a point of order.

Nevertheless, Mr. Speaker, as my correspondence at the end of my remarks indicates, this effort to end-run my committee and other legislative committees is a growing and festering sore that must be dealt with in the House rules when the House reconvenes next year.

In regard to the Bartlesville provision, I want to make it very clear that my subcommittee is greatly concerned about this matter and will be very vigilant over DOE's contract efforts.

My correspondence follows:

COMMITTEE ON ENERGY AND COMMERCE,
Washington, D.C., December 13, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, The Capitol, Washington, D.C.

DEAR MR. SPEAKER: The Senate Committee on Appropriations recently completed consideration of H.R. 7356, which appropriates funds for FY 1983 for the Interior Department and related agencies, and which passed the House earlier this month.

A summary of the Senate Committee's action (in lieu of a Committee report) is printed in the Congressional Record of December 9, 1982 (page S 14277-S 14303). The summary indicates that the Committee added several legislative provisions to this appropriations bill that relate to matters within the jurisdiction of this Committee.

First, the Senate Committee added a provision to exempt new power and industrial facilities in Alaska from the natural gas use restraints of the Powerplant and Industrial Fuel Use Act of 1978, as amended, which originated in this Committee. In comment-

ing on this legislative proposal, the Senate Committee said (p. S 14303):

"When FUA was enacted in 1978 as part of the National Energy Act, Congress recognized the small and unique nature of Alaska's electric utilities and exempted their existing facilities from FUA's gas prohibitions. This provision recognizes the increasing abundance of isolated natural gas in Alaska, and removes an unnecessary and largely unforeseen regulatory barrier to continued local use of a clean and relatively inexpensive fuel in the State. The alternatives to natural gas in Alaska are costly coal and hydroelectric development, with attendant environmental impacts. The Committee finds this provision will reduce future State and Federal expenditures for Alaska power development."

Second, the Senate Committee adds a legislative provision transferring several facilities of the Energy Department to various universities. It also includes a provision allowing that Department to enter into an agreement which might result in the transfer of a DOE facility in Oklahoma to an unidentified entity which could be the Interstate Oil Compact Commission. The Commission is solely within our jurisdiction.

In addition, the language provides exemptions from 18 U.S.C. 208(a) for certain Federal agencies. The Committee summary states (p. S 14296):

"The Committee likewise expects the Secretary to insure, to the greatest extent possible, that the present staff at each of the centers will be retained to meet the primary staffing requirements of the centers after they are transferred. The proposed language provides that anticipated employment by either university or other organization at the transferred facilities shall not subject present staff at the centers to the restrictions of section 208(a), title 18, United States Code, with respect to their participation, as Government employees, in any contract or other arrangement for work to be performed by the centers and the Department before the transfers are completed. Section 208(a) prohibits a Government employee from participating personally and substantially as a Government employee in any particular matter in which any person or organization with whom the employee is negotiating or has any arrangement concerning prospective employment has a financial interest. To the extent that this provision would prohibit Government employees at the centers from continuing to carry out their functions with respect to contracts or other arrangements, an exemption is necessary to prevent the work from coming to an abrupt stop."

I feel certain Chairmen Ford and Rodino would be concerned about such exemptions from 18 U.S.C. 208(a).

These amendments involve matters within the jurisdiction of this Committee, as well as other Committees. They do not belong in any appropriations bill, and are another example of the other body adding legislation on appropriation bills, including continuing resolutions, to circumvent the normal legislative process and the legislative committees of jurisdiction.

I respectfully request that if H.R. 7356 includes this legislation, when it is returned to the House, and a conference is requested, the House Conferees include Members of the Energy and Commerce Committee to confer solely on this legislation. While it is not my intention to delay this needed appropriations bill, it is my view that this legislation should be stripped from this appropriation bill. I plan to work with Committee Chairman Whitten and Subcommittee Chairman Yates to achieve this objective in both this bill and the continuing appropriations bill.

With best wishes,
Sincerely,

JOHN D. DINGELL,
Chairman.

COMMITTEE ON ENERGY AND COMMERCE,
Washington, D.C., December 16, 1982.

Hon. SIDNEY R. YATES,
Chairman, Subcommittee on Interior and Related Agencies, Committee on Appropriations, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: I want to express my appreciation to you and your staff for the cooperation provided in connection with legislative provisions added by the Senate to H.R. 7356, which appropriates funds for FY 1983 to the Energy Department. As I understand it a conference on this bill will occur today. Thus, I want to indicate more precisely my concern about several provisions in H.R. 7356.

First, I continue to strongly oppose legislative amendments in appropriation bills in violation of the Rules of the House. My opposition extends to such provisions whether originating in the House or Senate. If I had been on the Floor when H.R. 7356 was considered in the House, I would undoubtedly have raised a point of order.

Second, section 316 of the bill, as passed by the Senate, indirectly amends the Powerplant and Industrial Fuel Use Act of 1978. The amendment makes titles II and III of that Act apply solely to the contiguous States, the District of Columbia, Puerto Rico, and the U.S. territories and possessions. Pursuant to section 104, the 1978 Act applies to all the States, etc., except that titles II and III (other than section 301) "only apply to powerplants and installations situated within the contiguous 48 States, Alaska, and the District of Columbia" and section 301 applies only to powerplants situated within the 48 States and the District of Columbia.

This blanket exclusion by the Senate of Alaska from these provisions of the Act is unacceptable to me. At the request of Senator Stevens, his staff and mine will today discuss his concerns and the merits of his amendment to see if any limited accommodation acceptable to you and me can be reached.

Third, included in the bill is a provision, which the Senate amended, authorizing the Energy Department to enter into a contract or other agreement with a "nonprofit institution" to conduct petroleum-related research and development. Since Chairman Fuqua and I wrote to you about this provision of this bill, I learned more about the DOE's intent concerning this provision. It is my understanding that the DOE would like to use this provision to enable it to enter into a sole source contract with the Interstate Oil Compact Commission.

As you know, this Committee has jurisdiction over the energy compact applicable to this Commission. A few years ago we raised questions about the further need for the Commission and my Subcommittee on Oversight and Investigations is currently re-examining the matter. I am concerned that such a contract could provide some permanency for this Commission. It could also broaden its powers beyond that contemplated by the Compact.

I do not want to see the Bartlesville Center closed. I was unaware, however, of the urgency of passing such legislation in this session, particularly as part of an appropriations bill. Not until two weeks did any DOE official contact our Committee concerning this matter. In fact, a few days ago when Assistant Secretary Mares visited Congressman Sharp's Subcommittee staff about similar language, he did not indicate support for the language. The Administration, in fact, has not requested it. Moreover, I believe that the DOE already has adequate authority to enter into such contracts without this provision.

On the provision itself, I believe it is vague and ambiguous. For example, it is unclear what is encompassed by the words "establish a joint and/or co-operative relationship". It also would appear to circumvent various laws applicable to DOE, including those relating to sole source procurement. It would allow the DOE to execute the contract before submitting it to Congress which makes it very difficult or impossible for the applicable committees to require a charge or even to halt it. There is no limit on the term of the contract. It could be for 50 years. Lastly, the provision does not provide that the contract be submitted to this and other House and Senate legislative committees with jurisdiction over this matter.

Although my preference is that no provision be included in this bill, I realize it was in the House bill and I did not object to it under the Rules because I was chairing a hearing when the matter was considered on the House Floor. Thus, if you believe that some provision is required on this bill in order to reach agreement, I would not object if it is revised. Enclosed is a revision that I believe would overcome many of my objections.

Fourth, the Senate has added legislation relating to the transfer of certain DOE facilities to universities. Such legislation does not belong in the bill under the House Rules. I strongly its deletion from the final version of H.R. 7356.

With best wishes,
Sincerely,

JOHN D. DINGELL,
Chairman.

PROPOSED REVISION OF BARTLESVILLE PROVISION

The Secretary of Energy may enter into a contract, agreement, or arrangement with a qualified nonprofit institution on a cost-shared basis for the purpose of carrying out petroleum related research and development at the facilities of the Department of Energy at the Bartlesville energy Technology Center in Bartlesville, Oklahoma. Any such contract, agreement, or arrangement shall reflect the interests of the Federal Government and the States in conducting such research and development, ensure that the results shall be available to the public in the same manner and to the same extent as if such research and development would be carried out by the Department of Energy, and be for a period of not to exceed three years. Any such proposed contract, agreement, or arrangement developed by the Secretary with such institution pursuant to this paragraph shall be submitted to the appropriate legislative and appropriations committees of the Senate and House of Representatives and a period of thirty days shall elapse while Congress is in session before the contract, agreement, or arrangement thereof shall be executed. In computing the thirty days, there shall be excluded the days on which either the Senate or the House is

not in session because of adjournment for more than three days to a day certain or because of an adjournment of Congress sine die. Any such contract, agreement, or arrangement shall be entered into, and all such research and development shall be carried out, only in accordance with the provisions of law applicable to the Department of Energy.

COMMITTEE ON ENERGY AND COMMERCE,
Washington, D.C, December 16, 1982.
Hon. SIDNEY R. YATES,
Chairman, Subcommittee on Interior, and Related Agencies, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Enclosed is a copy of a revised version of the Fuel Use Act amendment which my Committee staff, including the staff of Subcommittee Chairman Ottinger and Sharp, worked out in discussions with Senator Stevens' staff.

Our first preference is to resist the Senate amendment entirely because such legislation does not belong in H.R. 7356 and because we want to avoid further efforts by the Senate to legislate in this manner. However, we will not object to your offering this language in lieu of the Senate language. Senator Stevens' staff understands that you have our support in this regard.

The amendment is far more limited than the Senate language it applies to new electric powerplants only. It has a sunset date. It does not apply to Prudhoe Bay natural gas. It provides that the petitioner need not make the demonstrations required by section 212(f) of the Fuel Use Act, as those demonstrations shall be deemed by this provision to have been made. We intend that the petitioner file an acceptable petition in the same manner and to the same extent as now required by the 1978 Act and the applicable regulations, except that the petitioner would not need to make the above demonstrations as part of the petition.

We appreciate your courtesy in this matter.

Sincerely,

JOHN D. DINGELL,
Chairman

SUBSTITUTE FOR SECTION 315 OF H.R. 7356

"SEC. 316. In the case of any new electric powerplant located in Alaska for which a petition is accepted after the date of enactment of this Act, but before December 31, 1985, pursuant to section 212(f) of the Powerplant and Industrial Fuel Use Act of 1978 to use natural gas, (as that term is defined in such Act), as a primary energy source in such powerplant, the petitioner shall be deemed to have made the demonstrations required by clauses (1) and (2) of such section and such exemption, subject to the other applicable provisions of such Act, shall be granted by the Secretary of Energy. Nothing in this section shall apply to any new electric powerplant using natural gas produced from the Prudhoe Bay Unit of Alaska."

Mr. McDADE. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, when the bill went through the House, I pointed out that there is about $280 million in budget authority here which is not included in this bill because it was funded for the full year in the continuing resolution passed earlier.

I also indicated there was another $211 million which came from the redirection of receipts. When those two amounts are added to this bill, it was about $167 million over the 302(b) allocations within the committee. I do not know what has been added in this conference report. I understand it has $25 million more in total budget authority than the House bill. If that is the case, I assume this bill is about $200 million over the 302(b) allocations.

The bill actually is a pretty good one. The subcommittee has done a good job. It was given an impossibly low 3202(b) allocation so that the committee could spend more for social programs.

I do not recommend the Members vote against it, but, Mr. Speaker, I am going to vote against it, because I think we have to exercise some budget discipline at some time.

Mr. YATES. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I want to commend both sides and the conferees for arriving at a just compromise, in particular with regard to the protection of the coastline in California.

Both sides, both in the House and the Senate and both Republicans and Democrats, have acknowledged the importance of protecting that coastline. I think, as the subcommittee chairman stated, the importance of this bill is in trying to provide a balance between the development of our resources and the protection of our natural resources.

□ 1045

The compromise in this area strikes that balance. I commend both the chairman and the ranking minority member for their help and their cooperation in that effort.

Mr. McDADE. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Speaker, I would point out this is a management bill, therefore if you are going to get revenue from our public lands it is essential that we manage carefully.

This is one of the few bills that we will pass that will produce more in revenues than we provide for in expenditures. Historically, in 1981, in 1982, the revenues from the 750 million acres of public lands owned by the people of this Nation and managed by the agencies provided for in this bill produced a total in revenues of approximately $26 billion.

In that same period the total expenditures were approximately $14 billion.

So I would point out that the management provisions of this bill do give the U.S. Government revenues, but perhaps more importantly what we do in the functions provided for in this bill is build for the future.

There are many elements of the forestry provisions in this bill that will make sure that we have adequate timber in the years ahead, that will provide for an effective silviculture in our national forests.

I would urge my colleagues to support this conference report because it is a bill that provides for good management, as evidenced by the record in the past.

● Mr. OBERSTAR. Mr. Speaker, I rise in support of the conference report on H.R. 7356, Interior appropriations for fiscal year 1983.

The gentleman from Illinois, chairman of the subcommittee (Mr. YATES), once again has done an excellent job in leading this legislation to its final form.

This conference report contains appropriations of critical importance to my district. I very much wish, however, that the conference report contain the original House recommendations with respect to both Voyageurs National Park and Boundary Waters Canoe Area Wilderness programs.

The Senate, regrettably, failed to include construction funds for Voyageurs National Park. The House Interior Appropriations Subcommittee recommended that $2.7 million be appropriated for construction of a major visitor facility in the park. The full House subsequently confirmed that recommendation, which is the same amount requested in the President's budget.

The conference report, however, contains the Senate provision, and appropriates no funds for construction of this important facility for the park. The House position was responsible; unfortunately, the Senate provision, now included in the conference report, is not.

It is sadly ironic that this conference report comes to the House floor only hours after the Senate gave final approval to legislation revising the boundaries of Voyageurs National Park. This legislation, approved by the House on Tuesday, will add approximately 180 acres at Black Bay Narrows for purposes of construction of the visitor facility. Regrettably, this appropriations conference report contains no funds for this facility.

Consequently, construction of the visitor facility will be delayed, the people of the International Falls area, adjacent to the park, will be disappointed, and much-needed, long hoped-for economic benefits to the area will be lost, indefinitely.

The conference report does include $3.8 million for land acquisition within the park, the amount contained within both the House and Senate versions of

the legislation, as well as the administration budget.

The House and Senate bills were virtually identical in their recommendations for those programs authorized by the Boundary Waters Canoe Area Wilderness Act of 1978. The conference report includes the Senate recommendation of $3 million for purchases of resorts under section 5 of the 1978 act, an amount $200,000 below the House recommendation. While I would have preferred the conference report contain the $3.2 million, which I requested and which the House passed, the conference report amount is still $3 million more than the administration request of no funding.

I know that the House conferees faced very insistent Senate Conferees. The gentleman from Illinois has my appreciation and that of my constituents for his persistent efforts on our behalf.●

● Mr. PARRIS. Mr. Speaker, I wish to express my disappointment at the action of the conferees to delete funding from the Interior Appropriation for fiscal year 1983 for the acquistion of 355 acres to complete Mason's Neck National Wildlife Refuge. I realize the difficulty presented by the need to prioritize a large number of candidates for acquisition, and I respect the managers for making the difficult choices. However, I submit that there has been substantial private involvement in the protection of this unique area for 10 years. Further, it has been authorized for acquisition. Finally, if the acquisition is not made, as I have stressed many times to members of both Houses, the areas will not be able to support the present Bald Eagle habitat there because of the development which is sure to occur. I feel that the protection of our national symbol should be given the highest priority as a consideration justifying a proposed acquisition for our National Wildlife Refuge System.

I appreciate the action the House Subcommittee on Interior Appropriations took in recommending funding for the acquisition, and I am grateful to the members of the full committee in approving it. I look forward to working with these distinguished gentleman on the same project next year. With some assistance from the other body we can achieve a different end.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, at this point I would like to commend my colleagues on the Interior Appropriations Subcommittee who have worked so tirelessly to insure consideration of the conference report to accompany the Interior Appropriations bill for fiscal year 1983 during the waning hours of the lameduck session of the 97th Congress. I am particularly pleased because of its national importance. Also, the report contains several items of major importance for my home State of Arkansas.

Earlier this session, I became embroiled in the unexpected battle to save the Norfork Fish Hatchery from closure, and am delighted that the conference report before us provides for its continued operation. This hatchery was jeopardized when House subcommittee actions addded the Arkansas facility to a list of fish hatcheries to be closed nationwide. This unusual development occurred even though the Norfork Hatchery was not on the list of potential closing compiled by the U.S. Fish and Wildlife Service or the administration. Therefore, I want to extend my personal thanks to Chairman YATES, and Mr. MCDADE for their cooperation and reversal of that recommendation in the early stage of the final legislative process. Fortunately, the Senate accepted from the beginning the U.S. Fish and Wildlife agency recommendation to fund the Norfork Hatchery. Among the persuasive arguments made to the subcommittee were the multistate impact of the hatchery; the remarkable return of about $66 for every Federal tax dollar spent there; and the historic mitigation commitment to the hatchery in connection with the construction of the Norfork Dam 40 years ago. The Norfork Fish Hatchery is one of the most efficiently managed and economically productive hatcheries of its kind in the country and Congress has rightfully assured its continuance.

In addition, I would like to express my appreciation to the senior Senator from Arkansas, Mr. BUMPERS, for including an additional $2 million in this report for continuing land acquisition for the Buffalo National River and I am pleased that we in the House have agreed to that provision. As the original sponsor in the House of Representatives back in the 90th Congress of legislation to preserve this free-flowing river for the enjoyment of future generations, and as the sponsor of measures increasing the original authorization for land acquisition for this project in the past, I have a long-standing commitment to the development, protection, and maintenance of this area. This additional allocation will provide for further positive actions needed to acquire remaining property. My colleagues have heard me speak in the committee and on the floor of the beauty of the Buffalo National River being unsurpassed, and it is indeed fitting we should finish our land acquisition as well as begin development on a timely basis.

Last, of the $281 million allocated for construction costs under the Forest Service, I am pleased that $50,000 has been allotted, at Senator BUMPERS' request, for road work in the Mount Magazine area of the Ozark National Forest in Arkansas. The conferees in the House also recognized the need for increased construction funding for the Forest Service due to reductions in the timber sales program levels. I appreciate that support.

I am relieved that at least the Interior appropriations bill for fiscal year 1983 will be enacted during this lameduck session, but remain disappointed that the Congress will not be able to consider the other appropriation bills and will once again be forced to resort to the procedure of operating under an umbrella bill or continuing resolution as a stop-gap funding measure. Nevertheless, I am hopeful that the President will sign this all important measure that speaks to so many of the natural resource needs for our country's citizens.●

Mr. MCDADE. Mr. Speaker, I thank by able colleague from Ohio. I have no further requests for time.

Mr. YATES. Mr. Speaker, I have no further requests for time and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 282, nays 63, not voting 88, as follows:

[Roll No. 482]

□ 1100

Messrs. ENGLISH, RITTER, CAMPBELL and SAM B. HALL, JR. changed their votes from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

Mr. YATES. Mr. Speaker, I ask unanimous consent that amendments numbered 3, 7, 9, 15, 18, 20, 25, 30, 95, 105, and 110, to which the managers have receded and concurred, be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk designated Senate amendments 3, 7, 9, 15, 18, 20, 25, 30, 95, 105, and 110, as follows:

Senate amendment No. 3: Page 2, line 21, after "penses" insert ": *Provided*, That this appropriation may be used to correct underpayments in the previous fiscal year to achieve equity among all qualified recipients".

Senate amendment No. 3: Page 6, line 20, after "permittee" insert ": *Provided further*, That the Secretary of the Interior shall develop criteria for extending, on a case-by-case basis, the period allowed for phased livestock reductions on public rangelands administered through the Bureau of Land Management up to five years. Such criteria shall take into account available agricultural assistance programs, the magnitude of projected livestock reductions, alternative pasturage available, and ability of such public rangelands to sustain such phasing in of livestock reductions without damage do rangeland productivity: *Provided further*, That an appeal of any reductions in grazing allotments on public rangelands must be taken within thirty days after receipt of a final grazing allotment decision or ninety days after the effective date of this Act in the case of reductions ordered during 1979, whichever occurs later. Reductions of up to 10 per centum in grazing allotments shall become effective when so designated by the Secretary of the Interior. Upon appeal any proposed reduction in excess of 10 per centum shall be suspended pending final action on the appeal, which shall be completed within two years after the appeal is filed".

Senate amendment No. 9: Page 7, line 8, after "expended" insert ": *Provided*, That the only critical habitat to be designated under section 4(b)(2) of the Endangered Species Act of 1973 (Public Law 93-205), as amended, for the Northern Rocky Mountain Wolf in Idaho shall be coterminous with the boundaries of the Central Idaho Wilderness Areas, as established by Public Law 96-312".

Senate amendment No. 15: Page 9, line 17, after "Hatchery" insert ": *Provided further*, That the administrative/visitor facility at the Merritt Island NWR, Florida, for which funds were appropriated under the head "Construction and anadromous fish" in chapter VIII of Public Law 97-257 is hereby designated the Scott J. Manness-Beau W. Sauselein administrative/visitor facility and that the maintenance center not be named as provided in that account".

Senate amendment No. 18: Page 10, line 16, after "States" insert ": *Provided further*, That $85,000 shall be available for the National Park Service to assist the town of Harpers Ferry, West Virginia, for police force use".

Senate amendment No. 20: Page 10, line 16, after "States" insert ": *Provided further*, That $160,000 shall be available for operation, including maintenance and protection, of the former home of Harry S Truman at 219 North Delaware Street, Independence, Missouri, upon assumption of administrative jurisdiction thereof by the National Park Service pursuant to specific legislation similar to S. 3077, Ninety-seventh Congress, or pursuant to the general authority of the Act of August 21, 1935 (49 Stat. 666), or otherwise".

Senate amendment No. 25: Page 11, line 15, after "Memorial" insert ", $1,400,000 for the Federal share of the construction and development costs for the Alaska Interagency Visitor Centers in Anchorage, Fairbanks, and Tok, Alaska, pursuant to section 1305 of the Alaska National Interest Lands Conservation Act (Public Law 96-487)".

Senate amendment No. 30: Page 13, line 6, after "situations" insert "and conduct emergency search and rescue operations".

Senate amendment No. 95: Page 37, line 4, after "205" insert "; and $9,000,000, to remain available until expended, for final payment, subject to the execution of a final agreement between the Secretary of the Interior, the Secretary of Agriculture, and the Chugach Natives, Incorporated, for the final settlement of land claims of the Chugach Natives, Incorporated, as authorized by section 1302(h) and section 1430 of the Alaska National Interest Lands Conservation Act (Public Law 96-487) and section 22(f) of the Alaska Native Claims Settlement Act, as amended (Public Law 94-204)".

Senate amendment No. 105: Page 42, line 6, after "University" insert ": *Provided further*, That $2,000,000 appropriated under the account entitled "Alternative Fuels Production" in Public Law 96-126 (93 Stat. 970 (1979)), for project development feasibility studies, is hereby transferred to this account to be used until expended for a jointly funded feasibility study of a Western Hemisphere alternative fuels facility which would utilize coal exported from the United States".

Senate amendment No. 110: Page 43, lines 8 and 9, strike out "to continue" and insert "for program management of".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement of the amendments of the Senate numbered 3, 7, 9, 15, 18, 20, 25, 30, 95, 105, and 110, and concur therein.

Mr. McDADE. Mr. Speaker, I would like to be recognized on the motion.

The SPEAKER pro tempore. The gentleman from Pennsylvania (Mr. McDADE) is recognized for 30 minutes and the gentleman from Illinois (Mr. YATES) is recognized for 30 minutes.

Mr. McDADE. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. CORCORAN.)

Mr. CORCORAN. Mr. Speaker, the reason that I sought this time is because of my concern about magnetohydrodynamics (MHD) coal research funding for the process whereby we would attempt to convert coal directly to electricity. I have a couple of questions for my friend from Pennsylvania (Mr. McDADE) if I could engage him in a colloquy.

As I understand it, I would say to my friend from Pennsylvania, in the legislation that the House passed we provided $31 million for this MHD research program. The other body had recommended some $27 million. The conference committee recommends to the House and the Senate a compromise of $29 million. Is that correct?

Mr. McDADE. The gentleman is correct. Those are the figures that are in the conference report.

Mr. CORCORAN. Mr. Speaker, let me make one other point about that.

While I would have liked to have seen more money available to support this important project, the concern I have is that over the last 10 years we have spent from Government resources about one-half billion dollars on this very important and very valuable MHD process. Now I think we should move on to installing and operating the coal-fired combustor test in Montana with the superconducting magnet from the Argonne National Laboratory in Illinois.

As I understand it, all of the subsystems, including one in Everett, Mass., in the district of my good friend from Massachusetts (Mr. MARKEY), have proved to be very encouraging. The next step would appear to be to move forward with the coal-fired combustor test that is scheduled for operation sometime within the next 12 months, if funding is available, at the Montana facility. This also tests the use of the superconducting magnet which has been developed by Argonne National Laboratory in Illinois.

My question is whether or not within the funds available, given the fact that all of the research has really been done, are we going to be moving forward on this next level where we would get a coal burn test.

I wonder if the gentleman from Pennsylvania would respond to that inquiry?

Mr. McDADE. Let me say to my colleague that when we reported our bill on page 96 of our report dealing with this subject we stated, and I quote:

The committee is concerned about the future of the MHD program and its ultimate conclusion. Accordingly the committee has recommended that within available funds the Department should ask an institution such as the Electric Power Institute—

It is not mandatory—

to do a thorough evaluation of the program, what its prospects for the future are and what the next steps in the development of MHD should be. It is the committee's intent that the program concentrate on development at existing research industrial and DOE facilities.

The language speaks for itself.

May I say to my colleague, we would like to see a development. But we do not want to superimpose our own opinions on a very complex situation. But we have said to the Department get a good evaluation, such as the Electric Power Institute, bring it to a conclusion, go to development at existing centers that exist around the country and get on with the project.

So we are trying to speed it up as much as we can within the expertise that we know that exists in the private sector together with the DOE.

Mr. CORCORAN. Mr. Speaker, let me say to my friend from Pennsylvania I am encouraged by what he has to say. I am advised that the MHD Industrial Forum will soon be proposing to the Department of Energy that the industry join with the Government in financing the commercial scale next level of test. I would hope that the Department, which has unfortunately wanted to defund this program altogether, would recognize the opportunities inherent in this process, support the priorities to move forward with the combustor test out in Montana and to use the other remaining funds to support the only remaining equipment test that needs to be examined, and that is the super-conducting magnet developed at the Argonne National Laboratory in Illinois.

I understand our friend from Massachusetts (Mr. MARKEY) would like to engage in this colloquy.

Mr. MARKEY. Mr. Speaker, will the gentleman yield?

Mr. McDADE. I yield to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. I thank the gentleman for yielding.

I am very disappointed that more money could not be appropriated for the MHD program, that there was not more support for it forthcoming from the administration.

It is important for us to realize that this is the one opportunity that we have to demonstrate the clean use of coal.

We are the Saudi Arabia of coal in this world. Magnetohydrodynamics is a technology which the Soviet Union has invested huge sums of money in, a technology which promises to be able to produce for us an energy source that we will be able to use our greatest natural resource—coal—as a means of helping to create the energy independence which we want for the 21st century.

I congratulate the gentleman. I agree with him that we must expedite a process of putting on line a final facility which will give us the payoff for our many years of investment.

Mr. CORCORAN. Mr. Speaker, I thank the gentleman from Massachusetts for his contribution. I agree with him wholeheartedly.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 10: Page 7, line 8, after "expended" insert ": *Provided further,* That sufficient funds are included for the operation of the Pisgah Forest National Fish Hatchery through September 30, 1983".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 10 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following: ": *Provided further,* That notwithstanding any other provision of this paragraph, $2,000,000 is available to carry out the purposes of 16 U.S.C. 1535, to remain available until expended".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 36: Page 14, line 6, after "commission" insert ": *Provided further,* That notwithstanding any other provision of law, the Secretary of the Interior is authorized to make available to the Smith River Fire Protection District, California, lands within the boundary of Redwood National Park for construction of a fire station".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 36 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ": *Provided further,* That notwithstanding any other provision of law, the Secretary of the Interior is authorized to enter into a cooperative agreement with the Smith River Fire Protection District, California, for a special use permit on lands within the boundary of Redwood National Park to permit construction of a fire station".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent

that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 40: Page 17, line 5, strike out "$128,629,000" and insert "$142,162,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 40 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$143,158,000".

The motion was agreed to.

□ 1115

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 42: Page 17, line 23, strike out "$61,313,000" and insert "$63,819,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 42 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$60,356,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 43: Page 18, line 6, strike out "$126,609,000" and insert "$152,649,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 43 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$161,209,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 46: Page 19, line 13, after "$850,477,000" insert "of which $18,715,000 shall be available until expended for transfer to the State of Alaska to assist in the basic operation and maintenance of Bureau-owned schools which are transferred to the State, such sum to be in addition to assistance otherwise available under the Act of April 16, 1934 (48 Stat. 596), as amended (25 U.S.C. 452 et seq.) or any other Act to such schools on the same basis as other public schools, and".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 46 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$9,350,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 48: Page 21, line 3, strike out "$73,890,000" and insert "$69,500,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 48 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$67,250,000."

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 58: Page 24, line 22, strike out all after "Committees" down to and including "1983' in line 25.

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 58 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows: ": *Provided further,* That notwithstanding any other provision of law: The following may be cited as the "'Indian Claims Limitation Act of 1982'."

SEC. 2. (a) Subsection (a) of section 2415 of title 28 United States Code, is amended by striking "after December 31, 1982" in the third proviso and inserting in lieu the following: "sixty days after the date of publication of the list required by section 4(c) of the Indian Claims Act of 1982: *Provided,* That, for those claims that are on either of the two lists published pursuant to the Indian Claims Act of 1982, any right of action shall be barred unless the complaint is filed within (1) one year after the Secretary of the Interior has published in the Federal Register a notice rejecting such claim or (2) three years after the date the Secretary of the Interior has submitted legislation or legislative report to Congress to resolve such claim".

(b) Subsection (b) of section 2415 of title 28, United States Code, is amended by striking "December 31, 1982" in the proviso and inserting in lieu the following: "sixty days after the date of the publication of the list required by section 4(c) of the Indian Claims Act of 1982: *Provided,* That, for those claims that are on either of the two lists published pursuant to the Indian Claims Act of 1982, any right of action shall be barred unless the complaint is filed within (1) one year after the Secretary of the Interior has published in the Federal Register a notice rejecting such claim or (2) three years after the Secretary of the Interior has submitted legislation or legislative report to Congress to resolve such claim".

SEC. 3. (a) Within ninety days after the enactment of this Act, the Secretary of the Interior (hereinafter referred to as the "Secretary") shall publish in the Federal Register a list of all claims accruing to any tribe, band or group of Indians or individual Indian on or before July 18, 1966, which have at any time been identified by or submitted to the Secretary under the "Statute of Limitation Project" undertaken by the Department of the Interior and which, but for the provisions of this Act, would be barred by the provisions of section 2415 of title 28, United States Code: Provided, That the Secretary shall have the discretion to exclude from such list any matter which was erroneously identified as a claim and which has no legal merit whatsoever.

(b) Such list shall group the claims on a reservation-by-reservation, tribe-by-tribe, or State-by-State basis, as appropriate, and shall state the nature and geographic location of each claim and only such other additional information as may be needed to identify specifically such claims.

(c) Within thirty days after the publication of this list, the Secretary shall provide a copy of the Indian Claims Limitation Act of 1982 and a copy of the Federal Register containing this list, or such parts as may be pertinent, to each Indian tribe, band or group whose rights or the rights of whose members could be affected by the provisions of section 2415 of title 28, United States Code.

SEC. 4. (a) Any tribe, band or group of Indians or any individual Indian shall have one hundred and eighty days after the date of the publication in the Federal Register of the list provided for in section 3 of this Act to submit to the Secretary any additional specific claim or claims which such tribe, band or group of Indians or individual Indian believes may be affected by section 2415 of title 28, United States Code, and desires to have considered for litigation or legislation by the United States.

(b) Any such claim submitted to the Secretary shall be accompanied by a statement identifying the nature of the claim, the date when the right of action allegedly accrued, the names of the potential plaintiffs and defendants, if known, and such other information needed to identify and evaluate such claim.

(c) Not more than thirty days after the expiration of the one hundred and eighty day period provided for in subsection (a) of this section, the Secretary shall publish in the Federal Register a list containing the additional claims submitted during such period: *Provided,* That the Secretary shall have the discretion to exclude from such list any matter which has not been sufficiently identified as a claim.

SEC. 5. (a) Any right of action shall be barred sixty days after the date of the publication of the list required by section 4(c) of this Act for those pre-1966 claims which, but for the provisions of this Act, would have been barred by section 2415 of title 28, United States Code, unless such claims are included on either of the lists required by section 3 or 4(c) of this Act.

(b) If the Secretary decides to reject for litigation any of the claims or groups or cat-

egories of claims contained on either of the lists required by section 3 or 4(c) of this Act, he shall send a report to the appropriate tribe, band, or group of Indians, whose rights or the rights of whose members could be affected by such rejection, advising them of his decision. The report shall identify the nature and geographic location of each rejected claim and the name of the potential plaintiffs and defendants if they are known or can be reasonably ascertained and shall, briefy, state the reasons why such claim or claims were rejected for litigation. Where the Secretary knows or can reasonably ascertain the identify of any of the potential individual Indian plaintiffs and their present addresses, he shall provide them with written notice of such rejection. Upon the request of any Indian claimant, the Secretary shall, without undue delay, provide to such claimant any nonprivileged research materials or evidence gathered by the United States in the documentation of such claim.

(c) The Secretary, as soon as possible after providing the report required by subsection (b) of this section, shall publish a notice in the Federal Register identifying the claims covered in such report. With respect to any claim covered by such report, any right of action shall be barred unless the complaint is filed within one year after the date of publication in the Federal Register.

SEC. 6. (a) If the Secretary determines that any claim or claims contained in either of the lists as provided in sections 3 or 4(c) of this Act is not appropriate for litigation, but determines that such claims may be appropriately resolved by legislation, he shall submit to the Congress legislation to resolve such claims or shall submit to Congress a report setting out options for legislative resolution of such claims.

(b) Any right of action on claims covered by such legislation or report shall be barred unless the complaint is filed within 3 years after the date of submission of such legislation or legislative report to Congress.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 62; Page 25, line 20, strike out [$1,882,000] and insert: *$2,081,000*

MOTION OFFERED MY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 62 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,881,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 74: Page 30, line 2, after "Technology" insert "$6,210,000 for expenses necessary in carrying out the provisions of the Water Research and Development Act of 1978 (Public Law 95-467)".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 74 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$6,350,000"

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 76: Page 33, strike out lines 6 to 13, inclusive.

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 76 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

SEC. 107. No funds provided in this title may be expended by the Department of the Interior for the procurement, leasing, bidding, exploration, or development of lands within the Department of the Interior Central and Northern California Planning Area which lie north of the line between the row of blocks numbered N816 and the row of blocks numbered N817 of the Universal Transverse Mercator Grid System.

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 84: Page 35, after line 8, insert:

SEC. 109. Notwithstanding any other provision of law, section 1002 of the Alaska National Interest Lands Conservation Act (Public Law 96-487) (16 U.S.C. 3142(e)(2)(C)) is amended as follows: Insert before the period: "and: *Provided*, That the Secretary shall prohibit by regulation any person who obtains access to such data and information from the Secretary or from any person other than a permittee from participation in any lease sale which includes the areas from which the information was obtained and from any commercial use of the information unless such person compensates the permittee at fair market value for such information in accordance with such regulations as the Secretary may prescribe".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 84 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SEC. 110. Notwithstanding any other provision of law, section 1002 of the Alaska National Interest Lands Conservation Act (Public Law 96-487) (16 U.S.C. 3142(e)(2)(C)) is amended as follows: Insert before the period: "and: *Provided*, That the Secretary shall prohibit by regulation any person who obtains access to such data and information from the Secretary or from any person other than a permittee from participation in any lease sale which includes the areas from which the information was obtained and from any commercial use of the information. The Secretary shall require that any permittee shall make available such data to any person at fair cost.

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 87: Page 35, line 20, strike out "$58,770,000" and insert "$61,078,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 112 and concur therein with an amendment, as follows: In lieu of

the matter proposed by said amendment, insert the following: ": *Provided*, That $2,000,000 of the funds herein appropriated shall be available for the fuels conversion program, of which not less than $1,500,000 shall be available only for expenses in issuing prohibition orders under the Powerplant and Industrial Fuel Use Act and other related laws".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 114: Page 46, after line 23, insert:

Funds appropriated by this and subsequent Acts for fossil energy research and development activities may be used by the Secretary of Energy to enter into arrangements with the University of Wyoming, or any nonprofit corporation controlled by the university, for the purpose of encouraging research and development activities in the oil shale, underground coal conversion, and tar sands programs. In addition, the Secretary shall, subject to any terms and conditions which the Secretary may impose, transfer to the university or to such nonprofit corporation, all or any part of the Government's right, title, and interest in and to the land, buildings, improvements, fixtures, equipment and furnishings in the Secretary's custody of the Laramie Energy Technology Center at Laramie, Wyoming (including leasehold interests, buildings, improvements, fixtures, equipment and furnishings in the Secretary's custody on land not owned by the Government but which is a part of the center, where the Secretary determines that such transfer is integral to the future activities of the university): *Provided further*, That anticipated employment by the university, or such nonprofit corporation, at the transferred facilities shall not subject center employees to the restrictions of section 208(a), title 18, United States Code, with respect to participation, as Government employees, in any contract or other arrangement for work to be performed by the university entered into by the university and the Department before such transfer is completed: *Provided further*, That funds appropriated by this and subsequent Acts for fossil energy research and development activities may be used by the Secretary of Energy to enter into arrangements with the University of North Dakota, or any nonprofit corporation controlled by the university, for the purpose of encouraging research and development activities in the low rank coal program. In addition, the Secretary shall, subject to any terms and conditions which the Secretary may impose, transfer to the university or to such nonprofit corporation, all or any part of the Government's right, title, and interest in and to the land, buildings, improvements, fixtures, equipment and furnishings in the Secretary's custody of the lignite coal research laboratory established pursuant to the Act of March 25, 1948 (30 U.S.C. 401 et seq.), at Grand Forks, North Dakota. The transfer shall be deemed in furtherance of that Act: *Provided further*, That anticipated employment by the university, or such nonprofit corporation, at the transferred facilities shall not subject center employees to the restrictions of section 208(a), title 18, United States Code, with respect to participation, as Government employees, in any contract or other arrangement for work to be performed by the university entered into by the university and the Department before such transfer is completed.

MOTION OFFERED BY MR. YATES

Mr. YATES. My Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 114, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 141: Page 60, strike out lines 11 to 18, inclusive.

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 141 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

DEPARTMENT OF THE TREASURY

ENERGY SECURITY RESERVE

Notwithstanding any other law, funds made available from the Energy Security Reserve to the Secretary of Energy for alcohol fuel loan guarantees authorized by title II of the Energy Security Act, Public Law 96-294, may be used to guarantee loans up to three and one-half times the amount held in reserve.

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 143: Page 62, strike out all after line 21 over to and including line 2 on page 64 and insert:

SEC. 308. Except for lands described by sections 105 and 106 of Public Law 96-560, section 103 of Public Law 96-550, section 5(d)(1) of Public Law 96-312 and section 603 of Public Law 94-579, and except for land in the State of Alaska, and lands in the national forest system released to management for any use the Secretary of Agriculture deems appropriate through the land management planning process by any statement or other Act of Congress designating components of the National Wilderness Preservation System now in effect or hereinafter enacted, none of the funds provided in this Act shall be obligated for any aspect of the processing or issuance of permits or leases pertaining to exploration for or development of coal, oil, gas, oil shale, phosphate, potassium, sulphur, gilsonite, or geothermal resources on Federal lands within any component of the National Wilderness Preservation System or within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety-Sixth Congress (House Document numbered 96-119); or within any lands designated by Congress as wilderness study areas: *Provided,* That nothing in this section shall prohibit the expenditures of funds for any aspect of the processing or issuance of permits pertaining to exploration for or development of the mineral resources described in this section, within any component of the National Wilderness Preservation System now in effect or hereinafter enacted, any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning or within any lands designated by Congress as wilderness study areas, under valid existing right or leases validly issued in accordance with all applicable Federal, State, and local laws or valid mineral rights in existence prior to October 1, 1982: *Provided further,* That funds provided in this Act may be used by the Secretary of Agriculture in any area of National Forest lands or the Secretary of the Interior to issue under their existing authority in any area of national forest or public lands withdrawn pursuant to this Act such permits as may be necessary to conduct prospecting, seismic surveys, and core sampling conducted by helicopter or other means not requiring construction of roads or improvement of existing roads or ways, for the purpose of gathering information about and inventorying energy, mineral, and other resource values of such area, if such activity is carried out in a manner compatible with the preservation of the wilderness environment: *Provided further,* That seismic activities involving the use of explosives shall not be permitted in designated wilderness areas: *Provided further,* That funds provided in this Act may be used by the Secretary of the Interior to augment recurring surveys of the mineral values of wilderness areas pursuant to section 4(d)(2) of the Wilderness Act and acquire information on other national forest and public land areas withdrawn pursuant to this Act, by conducting, in conjunction with the Secretary of Energy, the national laboratories, or other Federal agencies, as appropriate, such mineral inventories of areas withdrawn pursuant to this Act as he deems appropriate. These inventories shall be conducted in a manner compatible with the preservation of the wilderness environment through the use of methods including core sampling conducted by helicopter; geophysical techniques such as induced polarization, synthetic aperture radar, magnetic and gravity surveys; geochemical techniques including stream sediment reconnaissance and X-ray diffraction analysis; land satellites; or any other methods he deems appropriate. The Secretary of the Interior is hereby authorized to conduct inventories or segments of inventories, such as data analysis activities, by contract with private entities deemed by him to be qualified to engage in such activities whenever he has determined that such contracts would decrease Federal expenditures and would produce comparable or superior results: *Provided further,* That in carrying out any such inventory or surveys, where National Forest System lands are involved, the Secretary of the Interior shall cansult with the Secretary of Agriculture concerning any activities affecting surface resources: *Provided further,* That funds provided in this Act may be used by the Secretary of the Interior to issue oil and gas leases for the subsurface of national forest or public land wilderness areas that are immediately adjacent to producing oil and gas fields or areas that are prospectively valuable. Such leases shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness or other nonsurface disturbing methods.

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 143, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 153: Page 66, after line 14, insert:

SEC. 313. The titles conveyed by and the easements and restrictions heretofore reserved and imposed by the Secretary of the Interior pursuant to section 506(c) of Public Law 96-487 are hereby confirmed in all respects.

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 153 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SEC. 315. The titles conveyed by and the easements and restrictions heretofore reserved and imposed by the Secretary of the

Interior pursuant to section 506(c) of Public Law 96-487 are hereby confirmed in all respects: *Provided*, That nothing herein shall be deemed to amend the Alaska National Interest Lands Conservation Act or the Alaska Native Claims Settlement Act.

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 154: Page 66, after line 14, insert:

SEC. 314. Except as expressly provided for by law, none of the funds appropriated by this Act shall be obligated to dispose, except by exchange, of any Federal land tract until such time as the agency responsible for administering the disposal of the tract has specifically identified the tract as no longer being needed by the Federal Government; inventoried the tract as to its public benefit values; provided opportunity for public review and discussion of the tract proposed for disposal; and provided 30 days advance notice of the tract proposed for disposal and of the plans for carrying out such disposal to the congressional delegation of the State or States in which the tract proposed for sale is located and to the appropriate congressional committees for immediate printing in the Congressional Record: *Provided*, That neither the Act of July 31, 1958, as amended (72 Stat. 438, as amended; 7 U.S.C. 1012a; 16 U.S.C. 478a) nor the Act of June 14, 1926, as amended (49 U.S.C. 869 et seq.) shall be subject to the provisions of this section.

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 154 and concur therein with an amendment, as follows: In lieu of the section number in said amendment insert "316".

The motion was agreed to.

□ 1130

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement:

The amendment reads as follows:

Senate amendment No. 155: Page 66, after line 14, insert:

SEC. 315. Notwithstanding any other provision of law, title II and title III of the Powerplant and Industrial Fuel Use Act, Public Law 95-620, shall apply only to powerplants and installations situated in the contiguous 48 States, the District of Columbia, and, where applicable, Puerto Rico and the territories and possessions of the United States.

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 155 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SEC. 317. In the case of any new electric power plant located in Alaska for which a petition is accepted after the date of enactment of this Act, but before December 31, 1985, pursuant to section 212(f) of the Powerplant and Industrial Fuel Use Act of 1978, to use natural gas (as that term is defined in such Act), as a primary energy source in such power plant, the petitioner shall be deemed to have made the demonstrations required by clauses (1) and (2) of such section and such exemption, subject to the other applicable provisions of such Act, shall be granted by the Secretary of Energy. Nothing in this section shall apply to any new electric power plant using natural gas produced from the Prudhoe Bay Unit of Alaska.

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER. The Clerk will designate the last amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 156: Page 66, after line 14, insert:

SEC. 316. Section 21 of the Act entitled "An Act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain", approved February 25, 1920 (41 Stat. 437, as amended; 30 U.S.C. 241), is further amended by adding the following new subsections:

"(c)(1) The Secretary may within the State of Colorado lease to the holder of the Federal oil shale lease known as Federal Prototype Tract C-a additional lands necessary for the disposal of oil shale wastes and the materials removed from mined lands, and for the building of plants, reduction works, and other facilities connected with oil shale operations (which lease shall be referred to hereinafter as an 'offsite lease'). The Secretary may only issue one offsite lease not to exceed six thousand four hundred acres. An offsite lease may not serve more than one Federal oil shale lease and may not be transferred except in conjunction with the transfer of the Federal oil shale lease that it serves.

"(2) The Secretary may issue one offsite lease of not more than three hundred and twenty acres to any person, association or corporation which has the right to develop oil shale on non-Federal lands. An offsite lease serving non-Federal oil shale land may not serve more than one oil shale operation and may not be transferred except in conjunction with the transfer of the non-Federal oil shale land that it serves. Not more than two offsite leases may be issued under this paragraph.

"(3) An offsite lease shall include no rights to any mineral deposits.

"(4) The Secretary may issue offsite leases after consideration of the need for such lands, impacts on the environment and other resource values, and upon a determination that the public interest will be served thereby.

"(5) An offsite lease for lands the surface of which is under the jurisdiction of a Federal agency other than the Department of the Interior shall be issued only with the consent of that other Federal agency and shall be subject to such terms and conditions as it may prescribe.

"(6) An offsite lease shall be for such periods of time and shall include such lands, subject to the acreage limitations contained in this subsection, as the Secretary determines to be necessa as the Secretary determines to be necessary to achieve the purposes for which the lease is issued, and shall contain such provisions as he determines are needed for protection of environmental and other resource values.

"(7) An offsite lease shall provide for the payment of an annual rental which shall reflect the fair market value of the rights granted and which shall be subject to such revisions as the Secretary, in his discretion, determines may be needed from time to time to continue to reflect the fair market value.

"(8) An offsite lease may, at the option of the lessee, include provisions for payments in any year which payments shall be credited against any portion of the annual rental for a subsequent year to the extent that such payment is payable by the Secretary of the Treasury under section 35 of this Act to the State within the boundaries of which the leased lands are located. Such funds shall be paid by the Secretary of the Treasury to the appropriate State in accordance with section 35, and such funds shall be distributed by the State only to those counties, municipalities, or jurisdictional subdivisions impacted by oil shale development and/or where the lease is sited."; and

"(9) An offsite lease shall remain subject to leasing under the other provisions of this Act where such leasing would not be incompatible with the offsite lease.

"(d) In recognition of the unique character of oil shale development:

"(1) In determining whether to offer or issue an offsite lease under subsection (c), the Secretary shall consult with the Governor and appropriate State, local, and tribal officials of the State where the lands to be leased are located, and of any additional State likely to be affected significantly by the social, economic, or environmental effects of development under such lease, in order to coordinate Federal and State planning processes, minimize duplication of permits, avoid delays, and anticipate and mitigate likely impacts of development.

"(2) The Secretary may issue an offsite lease under subsection (d) after consideration of (A) the need for leasing, (B) impacts on the environment and other resource values, (C) socioeconomic factors, and (D) information from consultations with the Governors of the affected States.

"(3) Before determining whether to offer an offsite lease under subsection (c), the Secretary shall seek the recommendation of the Governor of the State in which the lands to be leased are located as to whether or not to lease such lands, what alternative actions are available, and what special conditions could be added to the proposed lease to mitigate impacts. The Secretary shall accept the recommendations of the Governor if he determines that they provide for a reasonable balance between the national interest and the State's interests. The Secretary shall communicate to the Governor, in writing, and publish in the Federal Register the reasons for his determination to accept or reject such Governor's recommendations.".

MOTION OFFERED BY MR YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 156 and concur therein with an amendment, as follows: In lieu of the section number in said amendment insert "318".

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

GENERAL LEAVE

Mr. YATES. Mr. Speaker, I ask unanimous consent that I may revise and extend my remarks, that all Members may have 5 legislative days in which to revise and extend their remarks, and that I may be permitted to include, and they may be permitted to include extraneous material and tabular information on the conference report on H.R. 7356.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

FEDERAL OIL AND GAS ROYALTY MANAGEMENT ACT OF 1982

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 5121) to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes, do pass with a Senate amendment to the House amendment to the Senate amendment thereto, and concur in the Senate amendment with a further amendment which is at the desk.

The Clerk read the title of the bill.

The Clerk read the House amendment, as follows:

In lieu of the Senate amendment to the House amendment to the Senate amendment to H.R. 5121, insert:

NONCOMPETITIVE OIL AND GAS LEASE ROYALTY RATES

SEC. 114. (a) Subsection 17(c) of the Mineral Leasing Act of 1920 (30 U.S.C. 226(c)) is amended by inserting the words "not less than" after the words "payment by the lessee of a royalty of" and by inserting the words "nor more than 16⅔ per centum" after the word "per centum".

(b) Subsection 17(c) of the Mineral Leasing Act of 1920 (30 U.S.C. 226(c)) is amended by changing the period to a colon and adding the following: *Provided*, That the royalty rate shall be not more than 12½ per centum unless the Secretary finds that an increase in the royalty rate will not adversely affect the exploration, development or production of oil or gas or the overall revenue to the Federal Government generated by such activity.".

(c) The amendments made by subsections (a) and (b) shall take effect one year after completion and submission to Congress by the Secretary of a thorough study of the effects of a change in the royalty rate under section 17(c) of the Mineral Leasing Act of 1920 (1) on the exploration, development, or production of oil or gas and (2) on the overall revenues generated by such change. Such study shall be completed and submitted to Congress on the date one year after the date of enactment of this Act.

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

Mr. MILLER of California. Mr. Speaker, reserving the right to object, I do so because I would like to ask the chairman of the committee a couple of questions.

It is my understanding that when this legislation came back from the Senate that they had stripped out the provision that allowed for the discretion of the Secretary of the Interior to raise the royalty rates from 12½ percent to 16⅔, and that you are now putting that amendment back in?

Mr. UDALL. Mr. Speaker, if the gentleman will yield, that is correct. The Miller-Marriott amendment, which is a good amendment, is now back in the bill and will be in the bill if the request is granted here.

Mr. MILLER of California. It is also my understanding that as the amendment is written, it is the intent of the committee that that amendment will take effect 2 years from the date of enactment of this legislation? I yield to the gentleman.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Speaker, that is exactly right; without any intervening delay or trouble, it is scheduled to take effect.

Mr. MILLER of California. Further reserving the right to object, while the amendment mandates the Secretary to do a report on the impact, whether or not that report is done, this amendment will still take effect 2 years from date of enactment?

I yield to the gentleman.

Mr. UDALL. The gentleman is exactly correct. The report will not prevent the provisions of law from taking effect.

Mr. MILLER of California. Mr. Speaker, I appreciate the cooperation of the chairman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

Mr. BEREUTER. Mr. Speaker, reserving the right to object, and having heard the colloquy between the gentleman from California (Mr. MILLER) and the chairman, I would simply say that the minority is in agreement with that change, and has no objections.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

TO IMPROVE PROGRAMS FOR THE STABILIZATION OF AGRICULTURAL PRICES AND PRODUCTION

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 7439) to improve programs for the stabilization of agricultural prices and production and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. WAMPLER. Mr. Speaker, reserving the right to object, and I shall not object, I yield to the distinguished gentleman from Texas for an explanation of the bill.

Mr. DE LA GARZA. I thank my colleague for yielding.

Mr. Speaker and Members, this an attempt to enact legislation which would remove two potential obstacles for the Secretary of Agriculture to implement a new program in agriculture called payment in kind. It will have no cost at all.

More so, it has the potential of a possible savings of $4 to $6 billion.

All this does is to allow the Secretary, in the promulgation or in the proposal which he has, to take from surplus commodities that we now have, utilize those surplus commodities to give to the farmers, who would take land out of circulation rather than pay money for that.

The Secretary of Agriculture feels he has authority now, but this would be to clearly give him the authority on those two obstacles. It does not give him any authority he now does not have. It does not freeze prices, it does not tamper with the program that is

in place at this time, nor is it intended to do that. It just gives him clearance in those two areas: One, the release price on the surplus commodities; and second, an area where there is a payment limitation. This does not disrupt that but allows him to use that surplus grain that we now have in storage and are paying storage fees for.

Later in the year, next year, we will come back, take a look at the finished product. The committee would keep jurisdiction and will keep oversight. This is exactly what we need to do at this point in order to facilitate the finalization of that prospective program.

Mr. WAMPLER. Further reserving the right to object, Mr. Speaker, I yield to the distinguished gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. I thank the gentleman for yielding.

Mr. Speaker, I want to say that I support Chairman DE LA GARZA's request. I think this is a wise action to take at this time to deal with the pressing and very serious problems that are coming forward in agriculture. This program may be able to be of assistance, and I urge the adoption of the bill.

Mr. WAMPLER. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, do I understand there is no budget impact from this bill and that, in fact, the only impact might be positive in that the Federal Government would achieve a savings of several million dollars?

Mr. WAMPLER. Further reserving the right to object, I think the gentleman is correct. As a matter of fact, it is the feeling of the Committee on Agriculture that this could result in a substantial savings to the taxpayer and also help stimulate the agricultural economy of this country.

It is our belief if we can get the recovery to begin there, then the whole economy is going to recover. This is a positive step.

Further reserving the right to object, Mr. Speaker, the Secretary of Agriculture appeared before the House Committee on Agriculture on Thursday of this week and basically asked for the authority that we are granting him so that the so-called PIK program, or payment in kind, can proceed in an expeditious manner and in an orderly way so that we can get benefit during this crop year.

Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. I thank the gentleman for yielding.

Mr. Speaker, I would like to ask the gentleman from Virginia and the gentleman from Texas: This is not to be interpreted as an endorsement of the bill approved by the subcommittee in the Senate, is it?

Mr. WAMPLER. No, it is not, as far as the gentleman from Virginia is concerned.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield to me?

Mr. WAMPLER. Further reserving the right to object, I yield to the chairman of the committee.

Mr. DE LA GARZA. I thank the gentleman for yielding.

I might add further, it is not even intended to be an endorsement of the program we are speaking about. It is only to facilitate its movement so we can take a look at it in its finished or final form.

Mr. WAMPLER. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. I thank the gentleman for yielding.

In no way in this bill are we in any way modifying the support levels, target prices, or loan rates that are in existing law; is that correct?

Mr. WAMPLER. Further reserving the right to object, Mr. Speaker, the gentleman is correct.

Mr. Speaker, I yield to the gentleman from Nebraska (Mr. DAUB).

Mr. DAUB. Mr. Speaker, I rise in support of the gentleman's motion, and commend him for his insight on this matter.

Action must be taken to assist our ailing agricultural sector, and Secretary Block's payment in kind, otherwise referred to as the PIK proposal, certainly merits consideration. This motion will allow the Secretary clear discretion to further develop and possibly implement a program, subject, of course, to the Congress ultimate approval, which would assist greatly in reducing surpluses of grain.

With over 2 billion metric tons of wheat and over 1 billion metric tons of corn caried over in the reserves from 1981, we must take action soon. By giving the Secretary authority to transfer ownership of reserve grain to farmers in return for additional acreage reduction, I believe the possibility exists for greatly relieving the financial straits of farmers and raising market prices down the road.

I, therefore, am cautiously supportive of the Secretary's effort on this behalf, and look forward to hearing of more detailed development of the PIK proposal. I thank the gentleman for his efforts.

Mr. WAMPLER. Further reserving the right to object, I yield to the distinguished gentleman from California (Mr. BROWN).

Mr. BROWN of California. Mr. Speaker, I am in support of this proposal made by Chairman DE LA GARZA. I think it is a necessary and useful thing to do and I would just like to comment somewhat in response to the inquiry of the gentleman from Pennsylvania that the primary effect of this is to facilitate a process which will be beneficial to the budget.

I am not as equally convinced it is going to benefit the farmers, but I know it is going to be of benefit to the budget and I am willing to take the gamble that it will be beneficial to the farmers and allow the administration to go ahead with this, and I would urge other Members to do the same.

Mr. WAMPLER. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Louisiana (Mr. BREAUX).

Mr. BREAUX. I thank the gentleman for yielding.

Mr. Speaker, I would like to ask the chairman of the full committee: Did I understand that the legislation before us does not really establish in any kind of detail a PIK program: it just basically gives the Secretary clearer authority, on his own, to enact a program providing for Payment in Kind?

Mr. DE LA GARZA. If the gentleman would yield to me further, it does not even do that, let me say to the gentleman. It just clears two areas, clears up two areas of possible problems for them. The final enactment of the program, the final package, we insist and reserve the right to take a look at it at the end. This only facilitates the implementation to the stage where we can take a look at it.

Mr. BREAUX. Mr. Speaker, I support the efforts of the Committee on Agriculture.

I would urge that in the next session, we look at the possibility of a PIK export program for those crops for which it would be beneficial.

Mr. WAMPLER. Further reserving the right to object. Mr. Speaker, I strongly support this legislation. This is what the administration requests.

I urge my colleagues to act favorably upon it.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the bill, as follows:

H.R. 7439

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That effective for the 1983, 1984, and 1985 crops, the Agricultural Act of 1949 is amended by adding at the end thereof a new section as follows:

"EXEMPTION OF PAYMENTS IN KIND FROM PAYMENT LIMITATION AND SALES PRICE RESTRICTIONS

"SEC. 423. Any land diversion payments made by the Secretary of Agriculture to assist in adjusting the planted acreage of the 1983, 1984, and 1985 crops of wheat, feed grains, upland cotton, and rice pursuant to this Act, other than the diversion

payments mandated by sections 107B(e), 105B(e), and 101(i)(5) of this Act as amended by the Omnibus Budget Reconciliation Act of 1982, may be in kind, shall not be sales for purposes of section 110 and 407 of this Act, and shall not be payments for purposes of section 1101 of the Agriculture and Food Act of 1981."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM

(Mr. FOLEY asked and was given permission to address the House for 1 minute.)

Mr. FOLEY. Mr. Speaker, we are anticipating that we will shortly undertake to return to the immigration bill, but for the advice of Members, it is not our intention to go late tonight with respect to that legislation.

Mr. Speaker, there have been a number of Members who have expressed concern about going late this evening, considering family responsibilities and pressures of this season. I would like to give those Members assurance on behalf of the leadership that we do not intend to press the House into a late session tonight.

It is also our hope that we can proceed to some of the significant amendments with respect to the immigration bill.

□ 1145

APPOINTMENT OF CONFEREES ON HOUSE JOINT RESOLUTION 631, FURTHER CONTINUING APPROPRIATIONS, 1983

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that if and when the clerk receives a message from the Senate indicating that that body has passed the joint resolution (H.J. Res. 631) with amendments, insisted upon its amendments and requested a conference with the House, that the House be deemed to have disagreed to the amendments of the Senate and agreed to the conference asked by the Senate, and that the Speaker be deemed to have appointed conferees.

The SPEAKER. Is there objection to the request of the gentleman from Texas? The Chair hears none, and appoints the following conferees: Messrs. WHITTEN, BOLAND, NATCHER, SMITH of Iowa, ADDABBO, LONG of Maryland, YATES, ROYBAL, BEVILL, DICKS, GINN, SABO, DIXON, FAZIO, CONTE, MCDADE, EDWARDS of Alabama, MYERS, ROBINSON, COUGHLIN, KEMP, and LEWIS.

LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

(Mr. WRIGHT. Mr. Speaker, I take this time to make the following observations about our plans for the program today and tomorrow. It is anticipated that we will go into the Committee of the Whole House on the State of the Union for further consideration of the Immigration Reform Act, but that we will rise at 4 o'clock this afternoon, and that we will reconvene at 4 o'clock tomorrow, Sunday. This presumably will give the other body time to complete its action on the joint resolution, and the conferees to meet and have something ready for our consideration.

If they do not have anything ready for our consideration at that time, we at least will have a reading as to what time they may, and we can either adjourn over until Monday, if that is the sad necessity, or recess until it should be appropriate for us to reconvene, and then consider the conference committee report. We would like very much to have it concluded tomorrow night in order that the Government would not be faced with the necessity of being unable to open its doors. In any event, we would not want that necessity, if it came, to be the fault of this body of the House. For that reason, we are suggesting that we should be prepared to act tomorrow afternoon, and we hope that it will be time for us to act on the conference committee report at 4 o'clock.

Mr. FITHIAN. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield.

Mr. FITHIAN. Mr. Speaker, once we resolve into the Committee of the Whole and start the amendment process on the Immigration Act, are we then assured that there will not be other forms of proceedings which will——

The SPEAKER. If the Chair may intercede at this particular time, the chairman of the Ways and Means Committee has said that there are two or three conference reports still pending, and it would be possible for the Committee to rise at 3:30 in order that he could take up those conference reports. I think we could be out of here by 4 o'clock.

Mr. WRIGHT. In that case, I would like to amend my suggestion to the motion that the Committee would rise at 3:30, and that we might take up conference reports.

The SPEAKER. It would be to go to conference and to consider conference reports on the part of the chairman of the Ways and Means Committee.

Mr. FITHIAN. Let me proceed with further inquiry. Would there be times, then, this afternoon that we would be in a status in the House where unanimous-consent requests for other legislation than presently under consideration can be offered, or not?

Mr. WRIGHT. Not once we go into the Committee of the Whole House on the State of the Union for the consideration of the immigration bill. During that period it is not in order to make those unanimous-consent requests. Once the Committee rose and we were back in the House, of course, unanimous-consent requests can be obtained.

Mr. FITHIAN. I thank the leader.

Mr. SAM B. HALL, JR. Mr. Speaker, will the gentleman yield for a question?

Mr. WRIGHT. I yield to my friend from Texas.

Mr. SAM B. HALL, JR. When we return Sunday at 4 o'clock, will we at that time take up the continuing resolution or the immigration bill?

Mr. WRIGHT. No; it is planned that we would not work on any legislation on Sunday, none whatever, save and except for the conference committee report on the continuing resolution.

Quite conceivably, not probably, there might be a conference committee report on the transportation bill. That is the only exception I can think of.

Mr. SAM B. HALL, JR. If the gentleman will yield for one further question, if we do not take it up on Sunday afternoon, then if we come back on Monday and take it up on Monday or whatever time we do return, on the immigration bill?

Mr. WRIGHT. Well, I do not think I am in a position to answer that intelligently, because it is our plan that once the President signs the conference report for the appropriations, to adjourn sine die. There is not any plan of which I am aware, unless it conceivably might be involving the highway bill conference committee report, or a conference committee report conceivably upon the Caribbean Basin Initiative. Other than that, I do not believe the Members of the House will be asked to stay in session once that major matter is attended to.

Mr. SAM B. HALL, JR. I thank the gentleman.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the distinguished minority leader.

Mr. MICHEL. Mr. Speaker, I think we ought to tell the membership that we are really proceeding here one step at a time. There is another half of the legislation process across the Capitol. They are not altogether sure, obviously, what their scenario might be. We do know that we want to get a continuing resolution adopted before the critical hour of people coming back to work or not coming back to work on Monday. That has got to be our first priority.

The SPEAKER. The Chair would say that if it would be possible that the President on Sunday would sign the continuing resolution, we of course would have to await a resolution for sine die—derrogation, as they use in State legislatures. As soon as that would be over the House could ad-

journ. If the bill could be enrolled and the President signed it there would be a possibility of getting out on Sunday night.

If we do not get out on Sunday night, I think in fairness to the Members that we ought to meet at 12 o'clock noon on Monday. If they are within 100 miles or so it will give them time to get back.

Mr. MICHEL. I thank the Chair, and I think we owe it to the Members to let them know that is not the only consideration we have to deal with, among our own Members, but there is another situation across the Capitol, and we do not control that.

Mr. WRIGHT. Absolutely. We are at the mercy of what is done there, and the timetable by which they proceed.

Mr. BEDELL. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Speaker, I understand we are at their mercy and there are a great many variables. Will we meet at 4 o'clock Sunday regardless of what happens?

Mr. WRIGHT. I think it is necessary for us to plan that we shall meet at 4 o'clock Sunday. There is not any way to advise all the Members, scattered as they are, so let us plan that we will reconvene Sunday, tomorrow, at 4 o'clock, and we shall hope that we are able to take up the conference committee report. If we are unable to do so, we will make an announcement that we will adjourn over to 12 o'clock noon on Monday, or recess until later on Sunday evening.

Mr. BEDELL. That was really my question. Is there someplace Members could call prior to 4 o'clock?

Mr. WRIGHT. Call the cloakrooms. I think it would be useful for Members to stay in touch with their respective cloakrooms. I am sure the minority cloakroom and the majority cloakroom as well would have as much information as is available and would be able to give it to the Members.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, I would like to point out that if you do not live within 100 miles of here, you cannot scatter very far from here between now and 4 o'clock Sunday and get back.

Mr. WRIGHT. I well know.

Mr. SMITH of Iowa. Is the gentleman saying that even if we conclude this conference tonight, which I think is entirely possible, we are not going to come back until 4 o'clock tomorrow and finish the business?

Mr. WRIGHT. There has to be something definite. That is what has been cleared with the leadership on the other side. We cannot pick a time that is pleasing to everybody. A lot of people will want to go to church on Sunday morning, the Sunday before Christmas. A great many people want to be in church, and we do not want to come in Sunday morning. So, we plan to come in at 4 o'clock Sunday afternoon.

The SPEAKER. The gentleman's time has expired.

IMMIGRATION REFORM AND CONTROL ACT OF 1982

Mr. MAZZOLI. Mr. Speaker, I move that the House resolve inself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 7357) to revise and reform the Immigration and Nationality Act, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Kentucky (Mr. MAZZOLI).

The question was taken; and the Speaker announced that the ayes appeared to have it.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair will make the following statement: In fairness to the President of the United States, the Democratic Party, the leadership on this side, the majority on this side are bringing this up as a courtesy. If there are going to be votes on consideration, then there is no reason why we should go forward with the bill.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. In the opinion of the Chair, a quorum is present.

Mr. WALKER. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER. The gentleman asks for the yeas and nays. Those in favor of taking this vote by the yeas and nays will rise and remain standing until counted.

The gentleman is required to have one-fifth of those present standing. Eight Members having arisen, the yeas and nays are not ordered.

Mr. WALKER. Mr. Speaker, I demand a division.

On a division (demanded by Mr. WALKER) there were—yeas, 244; nays, 7.

So the motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 7357, with Mr. NATCHER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Friday, December 17, 1982, all time for general debate on the bill had expired.

Pursuant to the rule, the bill will be considered under the 5-minute rule by titles, and each title shall be considered as having been read.

No amendments are in order except: First, the amendments printed in the CONGRESSIONAL RECORD of December 6, 1982, by Representative PERKINS of Kentucky, which shall be considered as if they were amendments recommended by the Committee on Education and Labor, and said amendments shall not be subject to amendment except amendments printed in the CONGRESSIONAL RECORD on or before December 9, 1982, and pro forma amendments. Second, amendments printed in the CONGRESSIONAL RECORD on or before December 9, 1982; and third, pro forma amendments for the purposes of debate.

□ 1200

The Clerk will now designate section 1.

SHORT TITLE; REFERENCES IN ACT

SECTION 1. (a) This Act may be cited as the "Immigration Reform and Control Act of 1982".

(b) Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Immigration and Nationality Act.

TABLE OF CONTENTS

Sec. 1. Short title; references in Act.

TITLE I—CONTROL OF ILLEGAL IMMIGRATION

PART A—EMPLOYMENT

Sec. 101. Control of unlawful employment of aliens.
Sec. 102. Fraud and misuse of certain documents.

PART B—ENFORCEMENT AND FEES

Sec. 111. Immigration enforcement activities.
Sec. 112. Unlawful transportation of aliens to the United States.
Sec. 113. Fees.

PART C—ADJUDICATION PROCEDURES AND ASYLUM

Sec. 121. Inspection and exclusion.
Sec. 122. United States Immigration Board and establishment of administrative law judge system.
Sec. 123. Judicial review.
Sec. 124. Asylum.
Sec. 125. Effective dates and transition.
Sec. 126. Technical and conforming changes.

PART D—ADJUSTMENT OF STATUS

Sec. 131. Limitations on adjustment of nonimmigrants to immigrant status by out-of-status aliens.

TITLE II—REFORM OF LEGAL IMMIGRATION

PART A—IMMIGRANTS

Sec. 201. Labor certification.
Sec. 202. Amerasian children.
Sec. 203. G-4 special immigrants.
Sec. 204. Miscellanous changes.

PART B—NONIMMIGRANTS

Sec. 211. H-2 workers.
Sec. 212. Students.

Sec. 213. Visa waiver for certain visitors.
TITLE III—LEGALIZATION
Sec. 301. Legalization.
Sec. 302. Updating registry date to January 1, 1983.
Sec. 303. State legalization assistance.

The CHAIRMAN. Are there amendments to section 1?

If not, the Clerk will designate title I.

Title I of the bill reads as follows:

TITLE I—CONTROL OF ILLEGAL IMMIGRATION

PART A—EMPLOYMENT

CONTROL OF UNLAWFUL EMPLOYMENT OF ALIENS

SEC. 101. (a)(1) Chapter 8 of title II is amended by inserting after section 274 (8 U.S.C. 1324) the following new section:

"UNLAWFUL EMPLOYMENT OF ALIENS

"SEC. 274A. (a)(1) It is unlawful for a person or other entity after the date of the enactment of this section to hire, or to recruit or refer for a fee, for employment in the United States—

"(A) an alien knowing the alien is an unauthorized alien (as defined in paragraph (4)) with respect to such employment, or

"(B) an individual without complying with the requirements of subsection (b).

Subparagraph (B) shall not apply to a person or entity which employs three or fewer employees.

"(2) It is unlawful for a person or other entity, after hiring an alien for employment subsequent to the date of the enactment of this section and in accordance with paragraph (1), to continue to employ the alien in the United States knowing the alien is (or has become) an unauthorized alien with respect to such employment.

"(3) A person or entity that establishes that it has complied in good faith with the requirements of subsection (b) with respect to the hiring, recruiting, or referral for employment of an alien in the United States has established an affirmative defense that the person or entity has not violated paragraph (1)(A) with respect to such hiring, recruiting, or referral.

"(4) As used in this section, the term 'unauthorized alien' means, with respect to the employment of an alien at a particular time, that the alien is not at that time either (A) an alien lawfully admitted for permanent residence, or (B) authorized to be so employed by this Act or by the Attorney General.

"(b) Except as provided in subsection (c), the requirements referred to in paragraphs (1)(B) and (3) of subsection (a) are, in the case of a person or other entity hiring, recruiting, or referring an individual for employment in the United States, that—

"(1) the person or entity must attest, under penalty of perjury and on a form designated or established by the Attorney General by regulation, that it has verified that the individual is eligible to be employed (or recruited or referred for employment) in the United States by examining the individual's—

"(A) United States passport, or

"(B)(i) social security account number card or certificate of birth in the United States or establishing United States nationality at birth, and

"(ii)(I) alien documentation, identification, and telecommunication card, or similar fraud-resistant card issued by the Attorney General to aliens and designated for use for this purpose,

"(II) driver's license or similar document issued for the purpose of identification by a State, if it contains a photograph of the individual or such other personal identifying information relating to the individual as the Attorney General finds, by regulation, sufficient for purposes of this section, or

"(III) in the case of individuals under 16 years of age or in a State which does not provide for issuance of an identification document (other than a driver's license) referred to in subclause (II), documentation of personal identity of such other type as the Attorney General finds, by regulation, provides a reliable means of identification;

"(2) the individual must attest, under penalty of perjury and on the form designated or established for purposes of paragraph (1), that the individual is a citizen or national of the United States, an alien lawfully admitted for permanent residence, or an alien who is authorized under this Act or by the Attorney General to be hired, recruited, or referred for such employment; and

"(3) after completion of such form in accordance with paragraphs (1) and (2), the person or entity must retain the form and make it available for inspection by officers of the Service or of the Department of Labor during a period beginning on the date of the hiring, recruiting, or referral of the individual and ending—

"(A) in the case of the recruiting or referral (without hiring) of an individual, three years after the date of such recruiting or referral, and

"(B) in the case of the hiring of an individual—

"(i) three years after the date of such hiring, or

"(ii) one year after the date the individual's employment is terminated,

whichever is later.

A person or entity has complied with paragraph (1) with respect to examination of a document if the document reasonably appears on its face to be genuine. Notwithstanding any other provision of law, the person or entity may copy a document presented by an individual pursuant to this subsection and may retain the copy, but only (except as otherwise permitted under law) for the purpose of complying with the requirements of this subsection.

"(c)(1)(A) Within three years after the date of the enactment of this section, the President shall implement such changes in or additions to the requirements of subsection (b) as conform to the requirements of paragraph (2) of this subsection and as may be necessary to establish a secure system to determine employment eligibility in the United States. In considering possible changes or additions, the President shall consider use of a telephone verification system.

"(B) Nothing in this subsection shall be construed to authorize, directly or indirectly, the issuance or use of national identification cards.

"(2) Such changes or additions shall be designed in a manner so that—

"(A) personal information utilized by the system is available only to employers, recruiters, and referrers for employment and to Government agencies and only to the extent necessary for the purpose of verifying that an individual is not an unauthorized alien,

"(B) if the changes or additions provide a verification method to determine an individual's eligibility to be employed in the United States—

"(i) the verification may not be withheld for any reason other than that the individual is an unauthorized alien, and

"(ii) the verification method may not be used for law enforcement purposes (other than for enforcement of this section or section 1546 of title 18, United States Code), and

"(C) if the system requires individuals to present a card or other document designed specifically for use for this purpose at the time of hiring, recruitment, or referral, then such document may not be required (i) to be presented for any purpose other than under this section (or enforcement of section 1546 of title 18, United States Code) or (ii) to be carried on one's person.

"(d)(1)(A) In the case of a person or entity which has not previously been cited under this subparagraph, if the Attorney General, based on evidence or information he deems persuasive, reasonably concludes that the person or entity has violated paragraph (1)(A) or (2) of subsection (a) with respect to the hiring, or recruiting or referring for a fee, for employment of an alien, the Attorney General may serve a citation on the person or entity containing a notification that the alien's employment is not authorized and a warning of the penalties and injunctive remedy set forth in this subsection.

"(B) In the case of a person or entity which has previously been cited under subparagraph (A), which is determined to have violated paragraph (1)(A) or (2) of subsection (a), and which—

"(i) has not previously been subject to a civil penalty under this subparagraph, the person or entity shall be subject to a civil penalty of $1,000 for each unauthorized alien with respect to which the violation occurred;

"(ii) has previously been subject to a civil penalty under this subparagraph, the person or entity shall be subject to a civil penalty of $2,000 for each unauthorized alien with respect to which the violation occurred; and

"(iii) has previously been subject to a civil penalty under this subparagraph in more than one instance, the person or entity shall be fined not more than $3,000, imprisoned not more than one year, or both, for each unauthorized alien with respect to which the violation occurred.

"(2) Whenever the Attorney General has reasonable cause to believe that a person or entity is engaged in a pattern or practice of employment, recruitment, or referral in violation of paragraph (1)(A) or (2) of subsection (a), the Attorney General may bring a civil action in the United States district court for the district in which the person or entity resides or in which the violation occurred requesting such relief, including a permanent or temporary injunction, restraining order, or other order against the person or entity, as the Attorney General deems necessary.

"(3)(A) In the case of a person or entity which has not previously been cited under this subparagraph, if the Attorney General, based on evidence or information he deems persuasive, reasonably concludes that the person or entity has violated subsection (a)(1)(B) with respect to the hiring, or recruiting or referring for a fee, for employment of an individual, the Attorney General may serve a citation on the person or entity containing a notification of the requirements of subsection (a)(1)(B) and a warning of the penalty set forth in subparagraph (B).

"(B) A person or entity which has previously been cited under subparagraph (A) and which is determined to have violated subsection (a)(1)(B) shall be subject to a civil penalty of $500 for each individual with respect to which such violation occurred.

"(4)(A)(i) Before issuing a citation on, or imposing a civil penalty against, a person or entity under this subsection for a violation of subsection (a), the Attorney General shall provide the person or entity with notice and, upon request made within a reasonable time (of not less than 30 days, as established by the Attorney General) of the date of the notice, a hearing respecting the violation.

"(ii) Any hearing so requested shall be conducted before an administrative law judge. The hearing shall be conducted in accordance with the requirements of section 554 of title 5, United States Code and rules of the United States Immigration Board established under section 107. The hearing shall be held within 200 miles of the place where the person or entity resides or of the place where the alleged violation occurred. If no hearing is so requested, the assessment shall constitute a final and unappealable order.

"(iii) A person or entity (including the Attorney General) adversely affected by a final order respecting an assessment may, within 60 days after the date the final order is issued, file a petition in the Court of Appeals for the appropriate circuit for review of the order.

"(B)(i) If the person or entity against whom a civil penalty is assessed fails to pay the penalty within the time prescribed in such order, the Attorney General shall file a suit to collect the amount in the United States district court for the district in which the person or entity resides or in which the violation (with respect to which the penalty was assessed) occurred.

"(ii) In any suit described in clause (i) based on an assessment—

"(I) made after a hearing before an administrative law judge, the suit shall be determined solely upon the administrative record upon which the civil penalty was assessed and the administrative law judge's findings of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive, or

"(II) for which a timely request for a hearing was not made, the validity and appropriateness of the final order imposing the assessment shall not be subject to review.

"(5)(A) In determining the level of sanction that is applicable under paragraph (1) for violations of paragraph (1)(A) or (2) of subsection (a) and that is applicable under paragraph (3) for violations of subsection (a)(1)(B), determinations of more than one violation in the course of a single proceeding or adjudication shall be counted as a single determination.

"(B) In applying this subsection in the case of a person or entity composed of distinct, physically separate subdivisions each of which provides separately for the hiring, recruiting, or referral for employment without reference to the practices of, or under the control of, or common control with, another subdivision, each such subdivision shall be considered a separate person or entity.

"(e) In providing documentation or endorsement of authorization of aliens (other than aliens lawfully admitted for permanent residence) to be employed in the United States, the Attorney General shall provide that any limitations with respect to the period or type of employment or employer shall be conspicuously stated on the documentation or endorsement.

"(f) The provisions of this section preempt any State or local law imposing civil or criminal sanctions upon those who employ, or recruit or refer for a fee for employment, unauthorized aliens.

"(g)(1) The President shall monitor, and shall consult with the Congress every six months concerning, the implementation of this section (including the effectiveness of the verification and record-keeping system described in subsection (b) and the status of the changes and additions described in subsection (c)) and the impact of this section on the economy of the United States and on employment (including discrimination in employment) of citizens and aliens in the United States, on the illegal entry of aliens into the United States, and on the failure of aliens who have legally entered the United States to remain in legal status. For the purpose of conducting such monitoring and beginning development of the changes and additions described in subsection (c), there are authorized to be appropriated $10,000,000 for fiscal year 1983.

"(2)(A) The Civil Rights Commission shall monitor the implementation and enforcement of the provisions of this section and shall investigate allegations that the enforcement or implementation of this section has been conducted in a manner that results in unlawful discrimination by race or nationality against citizens of the United States or aliens who are not unauthorized aliens (as defined in subsection (a)(4)).

"(B) The Civil Rights Commission, not later than 18 months after the month in which this section is enacted, shall prepare and transmit to the Committees on the Judiciary of the House of Representatives and of the Senate a report describing the implementation and enforcement of the provisions of this section during the preceding period, for the purpose of determining if a pattern of such unlawful discrimination has resulted. Two more such reports shall be prepared and transmitted 36 and 54 months after the month in which this section is enacted.

"(3) The Attorney General, jointly with the Secretary of Labor and the Chairman of the Equal Employment Opportunity Commission, shall establish a task force to monitor the implementation of this section and to review and investigate complaints registered of employment discrimination which may be attributable to the operation of this section.".

(2)(A) No citation, civil or criminal penalty, or injunction may be issued under section 274A of the Immigration and Nationality Act for the hiring, or recruiting or referring for a fee, for employment of individuals occurring before the first day of the seventh month beginning after the date of the enactment of this Act.

(B) During the one-year period beginning on the date of the enactment of this Act, the Attorney General, in cooperation with the Secretaries of Agriculture, Commerce, Health and Human Services, Labor, and the Treasury and the Administrator of the Small Business Administration, shall disseminate forms and information to employers, employment agencies, and organizations representing employees and provide for public education respecting the requirements of section 274A of the Immigration and Nationality Act. For the purpose of carrying out this subparagraph, there are authorized to be appropriated $10,000,000 for fiscal year 1983.

(C) The Attorney General shall, not later than the first day of the seventh month beginning after the date of the enactment of this Act, first issue, on an interim or other basis, such regulations as may be necessary in order to implement section 274A of the Immigration and Nationality Act.

(3) The table of contents is amended by inserting after the item relating to section 274 the following new item:

"Sec. 274A. Unlawful employment of aliens.".

(b)(1) The Farm Labor Contractor Registration Act of 1963 is amended—

(A) by amending paragraph (6) of section 5(b) (7 U.S.C. 2044(b)) to read as follows:

"(6) has been found to have violated paragraph (1) or (2) of section 274A(a) of the Immigration and Nationality Act;";

(B) by striking out paragraph (f) of section 6 (7 U.S.C. 2045); and

(C) by striking out subsection (c) of section 9 (7 U.S.C. 2048).

(2) The amendments made by paragraph (1) shall apply to the employment, recruitment, referral, or utilization of the services of an individual occurring on or after the first day of the seventh month beginning after the date of the enactment of this Act.

FRAUD AND MISUSE OF CERTAIN DOCUMENTS

SEC. 102. (a) Section 1546 of title 18, United States Code, is amended—

(1) by amending the heading to read as follows:

"§ 1546. Fraud and misuse of visas, permits, and other documents";

(2) by striking out "or other document required for entry into the United States" in the first paragraph and inserting in lieu thereof "border crossing card, alien registration receipt card, or other document prescribed by statute or regulation for entry into or as evidence of authorized stay or employment in the United States",

(3) by striking out "or document" in the first paragraph and inserting in lieu thereof "border crossing card, alien registration receipt card, or other document prescribed by statute or regulation for entry into or as evidence of authorized stay or employment in the United States",

(4) by striking out "$2,000" and inserting in lieu thereof "$5,000",

(5) by inserting "(a)" before "Whoever" the first place it appears, and

(6) by adding at the end the following new subsections:

"(b) Whoever knowingly uses an identification document (other than one issued lawfully for the use of the possessor) or a false identification document for the purpose of satisfying a requirement of subsection (b) or (c) of section 274A of the Immigration and Nationality Act, shall be fined not more than $5,000 or imprisoned not more than two years, or both.

"(c) This section does not prohibit any lawfully authorized investigative, protective, or intelligence activity of a law enforcement agency of the United States, a State, or a subdivision of a State, or of an intelligence agency of the United States, or any activity authorized under title V of the Organized Crime Control Act of 1970 (18 U.S.C. note prec. 3481).".

(b) The item relating to section 1546 in the table of sections of chapter 75 of such title is amended to read as follows:

"1546. Fraud and misuse of visas, permits, and other documents.".

PART B—ENFORCEMENT AND FEES

IMMIGRATION ENFORCEMENT ACTIVITIES

SEC. 111. (a) It is the sense of Congress that an essential element of the program of immigration control and reform established by this Act is an increase in border patrol and other enforcement activities of the Immigration and Naturalization Service and of other appropriate Federal agencies in order to prevent and deter the illegal entry of aliens into the United States.

(b) In order to do this in the most effective and efficient manner, it is the intent of Congress to provide, through the annual authorization of appropriations process for the Department of Justice and for other appropriate Federal agencies, for a controlled and closely monitored increase in the level of the border patrol and of other appropriate enforcement activities of the Immigration and Naturalization Service and of such other Federal agencies to achieve an effective level of control of illegal immigration.

UNLAWFUL TRANSPORTATION OF ALIENS TO THE UNITED STATES

SEC. 112. Section 274 (8 U.S.C. 1324) is amended—

(1) by striking out ": *Provided, however*" and all that follows up to the period at the end of subsection (a),

(2) by redesignating subsection (c) as subsection (d), and

(3) by inserting after subsection (b) the following new subsection:

"(c) Any person who, knowing or in reckless disregard of the fact that an alien has not received prior official authorization to come to, enter, or reside in the United States, brings to or attempts to bring to the United States such alien by himself or through another in any manner whatsoever, regardless of whether or not fraudulent, evasive, or surreptitious means are used and regardless of any official action which may later be taken with respect to such alien, shall, for each transaction constituting a violation of this subsection (regardless of the number of aliens involved)—

"(1) be fined not more than $5,000 or imprisoned not more than one year, or both, or

"(2) in the case of—

"(A) a second or subsequent offense under this subsection,

"(B) an offense done for the purpose of commercial advantage or private gain, or

"(C) an offense in which the alien is not upon arrival immediately brought and presented to an appropriate immigration officer at a designated port of entry,

be fined not more than $10,000 or imprisoned not more than five years, or both.".

FEES

SEC. 113. (a) Section 281 (8 U.S.C. 1351) is amended—

(1) by amending the heading to read as follows:

"NONIMMIGRANT VISA FEES AND ALIEN USER FEES";

(2) by inserting "(a)" after "SEC. 281."; and

(3) by adding at the end the following new subsection:

"(b) The Attorney General, in consultation with the Secretary of State, may impose fees on aliens with respect to their use of border facilities or services of the Service in such amounts as may reasonably reflect the portion of costs of maintenance and operation of such facilities and provision of such services attributable to aliens' use of such facilities and services.".

(b) The item in the table of contents relating to section 281 is amended to read as follows:

"Sec. 281. Nonimmigrant visa fees and alien user fees.".

PART C—ADJUDICATION PROCEDURES AND ASYLUM

INSPECTION AND EXCLUSION

SEC. 121. Subsection (b) of section 235 (8 U.S.C. 1225) is amended to read as follows:

"(b)(1)(A) An immigration officer shall inspect each alien who is seeking entry to the United States.

"(B)(i) If the examining immigration officer determines that the alien seeking entry—

"(I) does not present the documentation required (if any) to obtain entry to the United States,

"(II) does not have any reasonable basis for legal entry into the United States, and

"(III) does not indicate an intention to apply for asylum under section 208,

subject to clause (ii), the alien shall be excluded from entry into the United States without a hearing.

"(ii) Before excluding an alien without a hearing under clause (i), the examining immigration officer shall inform the alien of his right to have an administrative law judge redetermine the conditions described in clause (i). If the alien requests such a redetermination by an administrative law judge, the alien shall not be so excluded without a hearing until and unless the administrative law judge (after a nonadversarial, summary proceeding in which the alien may appear personally) redetermines that the alien meets the conditions of subclauses (I) through (III) of clause (i).

"(C) If the examining immigration officer determines that an alien seeking entry, other than an alien crewman and except as otherwise provided in subparagraph (B), subsection (c), or section 273(d), is otherwise not clearly and beyond a doubt entitled to land, the alien shall be detained for a hearing before an administrative law judge on exclusion of the alien.

"(2) The decision of the examining immigration officer, if favorable to the admission of any alien, shall be subject to challenge by any other immigration officer and such challenge shall operate to take the alien, whose privilege to land is so challenged, before an administrative law judge for a hearing on exclusion of the alien.

"(3) The Attorney General shall establish, after consultation with the Judiciary Committees of the Congress, procedures which assure that aliens are not excluded under paragraph (1)(B) without an inquiry into their reasons for seeking entry into the United States.

"(4) In the case of an alien who would be excluded from entry under paragraph (1)(B) but indicating an intention to apply for asylum, the exclusion hearing with respect to such entry shall be limited to the issues raised in connection with the alien's application for asylum.".

UNITED STATES IMMIGRATION BOARD AND ESTABLISHMENT OF ADMINISTRATIVE LAW JUDGE SYSTEM

SEC. 122. (a) Title I is amended by adding at the end the following new section:

"UNITED STATES IMMIGRATION BOARD; USE OF ADMINISTRATIVE LAW JUDGES

"SEC. 107. (a)(1) There is established, as an independent agency in the Department of Justice, a United States Immigration Board (hereinafter in this section referred to as the 'Board') composed of a Chairman and five other members appointed by the President by and with the advice and consent of the Senate.

"(2) The term of office of the Chairman and all other members of the Board shall be six years except that—

"(A) of the members first appointed under this subsection, two shall be appointed for a term of two years, two shall be appointed for a term of four years, and two shall be appointed for a term of six years,

"(B) a member appointed to fill a vacancy occurring before the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term, and

"(C) a member may serve after the expiration of his term until reappointed or his successor has taken office.

"(3) A member of the Board may be removed by the President only for neglect of duty or malfeasance in office.

"(4) Members of the Board (other than the Chairman) are entitled, subject to the amounts provided in advance in appropriation Acts, to receive compensation at the rate now or hereafter provided for grade GS-17 of the General Schedule, under section 5332 of title 5, United States Code. The Chairman is entitled, subject to the amounts provided in advance in appropriation Acts to receive compensation at the rate now or hereafter provided for grade GS-18 of such General Schedule.

"(5) The Chairman shall be responsible on behalf of the Board for the administrative operations of the Board. The Board shall establish rules of practice and procedure for itself and for the administrative law judges.

"(b)(1) The Board shall hear and determine appeals from—

"(A) final decisions of administrative law judges under this Act, other than a redetermination excluding an alien under section 235(b)(1)(B) or a determination granting voluntary departure under section 244(e) within a period of at least 30 days if the sole ground of appeal is that a greater period of departure time should have been fixed;

"(B) decisions on applications for the exercise of the discretionary authority contained in section 212(c) or section 212(d)(3)(B);

"(C) decisions involving the imposition of administrative fines and penalties under title II of this Act, including mitigation thereof;

"(D)(i) decisions on petitions filed in accordance with section 204, other than petitions to accord preference status under paragraph (3) or (6) of section 203(a) or petitions on behalf of a child described in section 101(b)(1)(F), and

"(ii) decisions on requests for revalidation and decisions revoking approval of such petitions under section 205; and

"(E) determinations relating to bond, parole, or detention of an alien under sections 242(a) and 242(c).

"(2) Three members of the Board constitute a quorum of the Board, except that the Chairman (or any member of the Board designated by the Chairman) is empowered to decide nondispositive motions.

"(3) The Board shall act in panels of three or more members or en banc (as designated by the Chairman in accordance with the rules of the Board). A final decision of such a panel shall be considered to be a final decision of the Board.

"(4)(A) Appeals to the Board from final orders of deportation or exclusion (including an order respecting asylum contained in

such an order) shall be filed not later than 20 days after the date of the final order.

"(B) The Board shall review the decision of an administrative law judge based solely upon the administrative record upon which the decision is made and the findings of fact in the judge's order, if supported by reasonable, substantial, and probative evidence on the record considered as a whole, shall be conclusive.

"(5) A final decision of the Board shall be binding on all administrative law judges, immigration officers, and consular officers under this Act unless and until otherwise modified or reversed by a court of the United States.

"(6) In a case in which the Board is considering an appeal of a decision of an administrative law judge respecting an application for asylum, the Board shall render its decision on the appeal not later than 60 days after the date the appeal is filed.

"(c)(1) The Chairman, in accordance with sections 3105 and 5108 and other provisions of title 5, United States Code, relating to administrative law judges in the competitive service, shall—

"(A) appoint administrative law judges, except that no more than 70 such judges may be appointed and hold office under this section at any time, and

"(B) designate one such judge to serve as chief administrative law judge.

"(2) In accordance with rules established by the Board, the chief administrative law judge—

"(A) shall have responsibility for the administrative activities affecting administrative law judges, and

"(B) may designate any administrative law judge in active service to hear and decide any cases described in paragraph (3).

"(3) Administrative law judges shall hear and decide—

"(A) exclusion cases under sections 236 and 360(c),

"(B) deportation and suspension of deportation cases under sections 242, 243, and 244,

"(C) rescission of adjustment of status cases under sections 245A(b)(4) and 246,

"(D) with respect to judges designated to hear such cases, applications for asylum under section 208,

"(E) the assessment of civil penalties under section 274A, and

"(F) such other cases arising under this Act as the Attorney General may provide by regulation.

Administrative law judges may also, without a formal hearing, make redeterminations pursuant to section 235(b)(1)(B)(ii).

"(4) In considering and deciding cases coming before them, administrative law judges may administer oaths, shall record and receive evidence and render findings of fact and conclusions of law, shall determine all applications for discretionary relief which may properly be raised in the proceedings, and shall exercise such discretion conferred upon the Attorney General by law as the Attorney General may specify for the just and equitable disposition of cases coming before such judges.".

(b) The table of contents is amended by inserting immediately after the item relating to section 106 the following new item:

"Sec. 107. United States Immigration Board; use of administrative law judges.".

JUDICIAL REVIEW

SEC. 123. (a) Subsection (a) of section 106 (8 U.S.C. 1105a) is amended—

(1) by striking out "AND EXCLUSION" in the heading and inserting in lieu thereof ", EXCLUSION, AND ASYLUM";

(2) in the matter before paragraph (1), by striking out "The procedure" and all that follows through "any prior Act" and inserting in lieu thereof the following: "Notwithstanding section 279 of this Act, section 1331 of title 28, United States Code, or any other provision of law, the procedures prescribed by and all the provisions of chapter 158 of title 28, United States Code, shall apply to, and shall be the sole and exclusive procedure for, the judicial review of all final orders of exclusion or deportation (including determinations respecting asylum encompassed within such orders and regardless of whether or not the alien is in custody and not including exclusions effected without a hearing pursuant to section 235(b)(1)(B)) made against aliens within (or seeking entry into) the United States";

(3) in paragraph (1), by striking out "not later than six months" and all that follows through "whichever is the later" and inserting in lieu thereof "by the alien involved or the Service not later than 30 days from the date of the final order";

(4) by inserting ", in the case of review sought by an individual petitioner," in paragraph (2) after "in whole or in part, or";

(5) by inserting "in the case of review sought by an individual petitioner," in paragraph (3) after "(3)";

(6) by inserting "exclusion or" before "deportation" in paragraphs (3) and (4);

(7) by striking out "Attorney General's findings of fact" in paragraphs (4) and (6) and inserting in lieu thereof "findings of fact in the order";

(8) by striking out "(4) except as provided in" in paragraph (4) and inserting in lieu thereof "(4)(A) except as provided in subparagraph (B) and in";

(9) by adding at the end of paragraph (4) the following new subparagraph:

"(B) to the extent that an order relates to a determination on an application for asylum, the court shall only have jurisdiction to review (i) whether the jurisdiction of the administrative law judge or the United States Immigration Board was properly exercised, (ii) whether the asylum determination was made in accordance with applicable laws and regulations, (iii) the constitutionality of the laws and regulations pursuant to which the determination was made, and (iv) whether the decision was arbitrary or capricious;";

(10) in paragraph (7)—

(A) by inserting "or exclusion" after "deportation" each place it appears,

(B) by striking out "subsection (c) of section 242 of this Act" and inserting in lieu thereof "section 235(b) or 242(c)",

(C) by striking out "a deportation order;" and inserting in lieu thereof "an exclusion or deportation order;", and

(D) by inserting "and" at the end thereof;

(11) by striking out "; and" at the end of paragraph (8) and inserting in lieu thereof a period; and

(12) by striking out paragraph (9).

(b) Subsection (b) of such section is amended to read as follows:

"(b)(1) Nothing in the provisions of this section shall be construed as limiting the right of habeas corpus under chapter 153 of title 28, United States Code. Petitions for habeas corpus based upon custody effected pursuant to this Act may be brought individually or on a multiple party basis as the interests of judicial efficiency and justice may require.

"(2) No court shall have jurisdiction to entertain a petition relating to a determination concerning asylum under section 208 except in a petition for review under subsection (a).

"(3) Notwithstanding any other provision of law, no court of the United States shall have jurisdiction to review determinations of administrative law judges or of the United States Immigration Board respecting the reopening or reconsideration of exclusion or deportation proceedings or asylum determinations outside of such proceedings, the reopening of an application for asylum because of changed circumstances, the Attorney General's denial of a stay of execution of an exclusion or deportation order, or a redetermination to exclude an alien from entering the United States under section 235(b)(1)(B).".

(c) Subsection (c) of such section is amended by striking out "deportation or of exclusion" and inserting in lieu thereof "an administrative law judge".

(d) Section 279 (8 U.S.C. 1329) is amended by striking out "The district courts" in the first sentence and inserting in lieu thereof "Except as otherwise provided under section 106, the district courts".

(e) The item in the table of contents relating to section 106 is amended to read as follows:

"Sec. 106. Judicial review of orders of deportation, exclusion, and asylum.".

(f) In the case of a final order of deportation or exclusion entered before the date of the enactment of this Act, a petition for review with respect to that order may in no case be filed under section 106(a)(1) of the Immigration and Nationality Act later than the earlier of (1) 30 days after the date of the enactment of this Act, or (2) the date (if any) such petition was required to be filed under the law in existence before the date of the enactment of this Act.

ASYLUM

SEC. 124. (a)(1) Subsection (a) of section 208 (8 U.S.C. 1158) is amended to read as follows:

"(a)(1)(A) Except as provided in subparagraph (B), any alien physically present in the United States or at a land border or port of entry may apply for asylum in accordance with this section.

"(B)(i) In the case of an alien against whom exclusion or deportation proceedings have been instituted, the alien's application for asylum may not be considered unless—

"(I) not later than 14 days after the date of the service of the notice instituting such proceedings, the alien has filed notice of intention to file an application for asylum and, not later than 30 days after the date of filing such notice of intention, the alien has actually filed the application for asylum,

"(II) the alien can make a clear showing, to the satisfaction of the administrative law judge conducting the proceeding, that changed circumstances after the date of the notice instituting the proceeding have resulted in a change in the basis for the alien's claim for asylum, or

"(III) the administrative law judge determines, solely in his discretion, that the interests of justice require the consideration of the application.

"(ii) An alien who has previously applied for asylum and had such application denied may not again apply for asylum unless the alien can make a clear showing that changed circumstances after the date of the denial of the previous application have resulted in a change in the basis for the alien's claim for asylum.

"(2) Applications for asylum shall be considered before administrative law judges

who are specially designated by the United States Immigration Board as having special training in international relations and international law. An individual who has served as a special inquiry officer under this title before the date of the enactment of the Immigration Reform and Control Act of 1982 may not be designated to hear applications under this section, unless the individual has received such special training after the date of the enactment of this Act.

"(3)(A)(i) Upon the filing of an application for asylum, an administrative law judge, at the earliest practicable time and after consultation with the attorney for the Government and the applicant, shall set the application for hearing on a day certain or list it for trial on a weekly or other short-term hearing calendar, so as to assure a speedy hearing.

"(ii) Unless the applicant consents in writing to the contrary, the hearing on the asylum application shall commence not later than 45 days after the date the application has been filed. The holding of an asylum hearing shall not delay the holding of any exclusion or deportation proceeding.

"(iii) In the case of an alien who has filed an application for asylum and who has been continuously detained pursuant to section 235 or 242 since the date the application was filed, if a hearing on the application is not held on a timely basis under clause (ii) or a decision on the application rendered on a timely basis under subparagraph (D), and if actions or inaction by the applicant have not resulted in unreasonable delay in the proceedings, the Attorney General shall provide for the release of the alien on parole subject to such reasonable conditions as the Attorney General may establish to assure the presence of the alien at any appropriate proceedings.

"(B)(i) A hearing on the asylum application shall be open to the public, unless the applicant requests that it be closed to the public.

"(ii) At the time of filing of notice of intention to apply for asylum, the alien shall be advised of the privilege of being represented by counsel (in accordance with section 292) and of the availability of legal services.

"(iii) The applicant is entitled to have the asylum hearing closed to the public, to present evidence and witnesses in his own behalf, to examine and object to evidence against him, and to cross-examine witnesses presented by the Government.

"(C) A complete record of the proceedings and of all testimony and evidence produced at the hearing shall be kept. The hearing shall be recorded verbatim. The Attorney General, and the United States Immigration Board, shall provide that a transcript of a hearing held under this section is made available not later than 10 days after the date of completion of the hearing.

"(D) The administrative law judge shall render a determination on the application not later than 30 days after the date of completion of the hearing. The determination of the administrative law judge shall be based only on the evidence produced at the hearing.

"(E) The Attorney General shall allocate sufficient resources so as to assure that applications for asylum are heard and determined on a timely basis under this paragraph.

"(4) An alien may be granted asylum only if the administrative law judge determines that the alien (A) is a refugee within the meaning of section 101(a)(42)(A), and (B) does not meet a condition described in one of the subparagraphs of section 243(h)(2).

"(5) The burden of proof shall be upon the alien applying for asylum to establish the alien's eligibility for asylum.

"(6) After making a determination on an application for asylum under this section, an administrative law judge may not reopen the proceeding at the request of the applicant except upon a clear showing that, since the date of such determination, changed circumstances have resulted in a change in the basis for the alien's claim for asylum.".

(2) Subsection (b) of such section is amended by inserting "(1)" after "determines that the alien" and by inserting before the period at the end the following: ", or (2) meets a condition described in one of the subparagraphs of section 243(h)(2)".

(3) Such section is further amended by adding at the end the following new subsection:

"(d) The procedures set forth in this section shall be the sole and exclusive procedure for determining asylum.".

(b) Section 243(h) (8 U.S.C. 1253(h)) is amended by adding at the end the following new paragraph:

"(3) An application for relief under this subsection shall be considered to be an application for asylum under section 208 and shall be considered in accordance with the procedures set forth in that section.".

(c) Section 222(f) (8 U.S.C. 1202(f)) is amended by inserting "(1)" after "(f)" and by adding at the end the following new paragraph:

"(2) The records or any document of the Department of Justice, the Department of State, or any other Government agency, or foreign government, pertaining to the issuance or denial of any application for asylum, refugee status, withholding of deportation under sections 207, 208, and 243(h) of this Act, or any other application arising under a claim of persecution on account of race, religion, political opinion, nationality, or membership in a particular social group, shall be confidential and exempt from disclosure and shall be used only for the formulation, amendment, administration, or enforcement of the immigration, nationality, and other laws of the United States. In the discretion of the Attorney General or the Secretary of State, as the case may be, certified copies of such records or document may be made available to a court which certifies that the information contained in such records or document is needed by the court in the interests of the ends of justice in a case pending before the court.".

EFFECTIVE DATES AND TRANSITION

SEC. 125. (a)(1) Except as otherwise provided in this section, the amendments made by this part take effect on the date of the enactment of this Act.

(2)(A) Except as provided in subparagraph (B), the amendments made by this part (other than those made by sections 121, 123(a)(2), 123(a)(3), 123(a)(6), 123(a)(10), 123(a)(12), 123(b), 123(d), and 124(b)) shall not apply to—

(i) any exclusion or deportation proceeding (or administrative or judicial review thereof) which was initiated before the hearing transition date (designated under subsection (c)(1)(A)), or

(ii) to any application for asylum filed before the asylum transition date (designated under subsection (c)(1)(B)).

In the case of such proceedings and such applications initiated before such dates which continue after such dates, the United States Immigration Board shall provide that administrative law judges may assume and perform such functions of special inquiry officers as may be appropriate and consistent with their duties as administrative law judges.

(B) Paragraphs (1)(B), (3)(B)(ii), (3)(B)(iii), (4), and (6) of section 208(a) and section 208(b) of the Immigration and Nationality Act (as amended by section 124(a) of this part) shall apply to applications for asylum made after the date of the enactment of this Act, except that—

(i) in the case of an alien against whom exclusion or deportation proceedings have been instituted as of the date of the enactment of this Act, the restriction of paragraph (1)(B)(i) of section 208(a) of the Immigration and Nationality Act (as so amended) shall apply to asylum applications made more than 14 days after the date of the enactment of this Act (rather than the date of the service of the notice of such exclusion or deportation proceeding), and

(ii) references in any such paragraph to an administrative law judge shall be deemed (before the asylum transition date) to be a reference to the immigration officer conducting the asylum hearing.

(b)(1) The President shall nominate the Chairman and other members of the United States Immigration Board (hereinafter in this section referred to as the "Board") not later than 45 days after the date of the enactment of this Act.

(2) The Chairman, in consultation with the Attorney General, shall designate a date, not later than 45 days after the Chairman and a majority of the members of the Board are appointed, on which the Board shall assume the present functions of the Board of Immigration Appeals (under existing rules and regulations).

(3)(A) The Board shall provide promptly for establishment of interim final rules of practice and procedure which will apply to the Board (when not acting as the Board of Immigration Appeals under paragraph (2)) and administrative law judges under the Immigration and Nationality Act, after the hearing transition date or asylum transition date, designated under subsection (c)(1), as the case may be.

(B) Not later than 60 days after the date such interim final rules are established, the Chairman shall appoint at least 10 administrative law judges who are qualified to be designated to hear asylum cases under section 208 of the Immigration and Nationality Act. The Board shall provide for such special training of these administrative law judges as it deems appropriate.

(c)(1) In order to provide for the orderly transfer of proceedings from the existing special inquiry system to the administrative law judge system, the Board, in consultation with the Attorney General, shall designate—

(A) a "hearing transition date", to be not later than 45 days after the date interim final rules of practice and procedure are established under subsection (b)(3)(A), and

(B) an "asylum transition date", after the establishment of interim final rules of practice and procedure respecting applications for asylum and after the appointment and designation of administrative law judges, in accordance with section 3105 of title 5, United States Code, under subsection (b)(3)(B).

(2) During the period before the hearing transition date or the asylum transition date (in the case of asylum hearings), any proceeding or hearing under the Immigra-

tion and Nationality Act which may be conducted by a special inquiry officer may be conducted by an individual appointed and qualified as an administrative law judge in accordance with all the rules and procedures otherwise applicable to a special inquiry officer's conduct of such proceeding or hearing.

(d) Individuals acting as special inquiry officers on the date of the enactment of this Act and on the hearing transition date may (without regard to other provisions of law) continue to conduct proceedings or hearings under the Immigration and Nationality Act after such transition date during the period ending two years after the date of the enactment of this Act.

(e)(1) The enactment of this part shall not result in any loss of rights or powers, interruption of jurisdiction, or prejudice to matters pending in the Board of Immigration Appeals or before special inquiry officers on the day before this Act takes effect.

(2) Under rules established by the United States Immigration Board, with respect to exclusion and deportation cases pending as of the hearing transition date and applications for asylum pending as of the asylum transition date, the United States Immigration Board shall be deemed to be a continuation of the Board of Immigration Appeals and administrative law judges shall be deemed to be a continuation of special inquiry officers for the purposes of effectuating the continuation of all existing powers, rights, and jurisdiction.

(f) In order to implement this section and the amendments made by this part, there are authorized to be appropriated $20,000,000 for fiscal year 1983.

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 126. (a)(1) Section 101(a) (8 U.S.C. 1101(a)) is amended by adding at the end the following new paragraph:

"(43) The term 'administrative law judge' means such a judge appointed under section 107.".

(2) Section 101(b) (8 U.S.C. 1101(b)) is amended by striking out paragraph (4) and redesignating paragraph (5) as paragraph (4).

(b) The first sentence of section 234 (8 U.S.C. 1124) is amended by striking out "special inquiry officers" and inserting in lieu thereof "administrative law judges".

(c)(1) Subsection (a) of section 235 (8 U.S.C. 1225) is amended—

(A) by striking out "special inquiry officers" in the first sentence and inserting in lieu thereof "administrative law judges",

(B) by striking out ", including special inquiry officers," in the fourth sentence and inserting in lieu thereof "and any administrative law judge",

(C) by striking out ", including special inquiry officers," in the sixth sentence,

(D) by striking out "and special inquiry officers" in the sixth sentence and inserting in lieu thereof "and administrative law judges", and

(E) by striking out "special inquiry officer" each place it appears in the seventh sentence and inserting in lieu thereof "administrative law judge".

(2) Subsection (c) of such section is amended—

(A) by striking out "the special inquiry officer during the examination before either of such officers" in the first sentence and inserting in lieu thereof "during the examination or an administrative law judge during an exclusion hearing",

(B) by striking out "no further inquiry by a special inquiry officer" in the first sentence and inserting in lieu thereof "no further examination or exclusion hearing",

(C) by striking out "inquiry or further inquiry" in the first sentence and inserting in lieu thereof "examination or hearing",

(D) by striking out "any inquiry or further inquiry by a special inquiry officer" in the second sentence and inserting in lieu thereof "any examination or hearing", and

(E) by striking out "an inquiry before a special inquiry officer" in the third sentence and inserting in lieu thereof "an exclusion hearing before an administrative law judge".

(d) Sections 106(a)(2), 236, and 242(b) (8 U.S.C. 1105a(a)(2), 1126, 1252(b)) are each amended by striking out "A" and "a" each place either appears before "special inquiry officer" and inserting in lieu thereof "An" and "an", respectively.

(e)(1) Sections 106(a)(2) and 236 (8 U.S.C. 1105a(a)(2), 1226) are each amended by striking out "special inquiry officer" and inserting in lieu thereof "administrative law judge" each place it appears.

(2) Subsection (a) of section 236 (8 U.S.C. 1226) is amended—

(A) by amending the first sentence to read as follows: "An administrative law judge shall conduct proceedings under this section.",

(B) by striking out "for further inquiry" in the second sentence and inserting in lieu thereof "for an exclusion hearing",

(C) by striking out "at the inquiry" in the third sentence and inserting in lieu thereof "at the hearing",

(D) by striking out the fourth sentence,

(E) by striking out "regulations as the Attorney General shall prescribe" in the fifth sentence and inserting in lieu thereof "rules as the United States Immigration Board shall establish", and

(F) by striking out "inquiry" in the seventh sentence and inserting in lieu thereof "hearing".

(3) Subsection (b) of such section is amended—

(A) by striking out "From a decision" and all that follows through "Attorney General" in the first sentence and inserting in lieu thereof the following: "From a decision of an administrative law judge excluding or admitting an alien, the alien or the immigration officer in charge at the port where the hearing is held, respectively, may file a timely appeal of the decision with the United States Immigration Board in accordance with rules established by the Board",

(B) by striking out "Attorney General" in the fourth sentence and inserting in lieu thereof "United States Immigration Board", and

(C) by striking out the third sentence.

(4) Subsection (c) of such section is amended by striking out "to the Attorney General".

(f) Section 242(b) (8 U.S.C. 1252(b)) is amended—

(1) by striking out "special inquiry officer" each place it appears in the first, second, third, and seventh sentences and inserting in lieu thereof "administrative law judge",

(2) by striking out "shall administer oaths" and all that follows through "Attorney General," in the first sentence,

(3) by striking out "Attorney General shall prescribe" in the second sentence and inserting in lieu thereof "United States Immigration Board shall establish",

(4) by striking out "In any case" and all that follows through "an additional immigration officer" in the fourth sentence and inserting in lieu thereof "An immigration officer" and by striking out "in such case such additional immigration officer" in that sentence,

(5) by striking out the fifth and sixth sentences,

(6) by striking out "such regulations" and all that follows through "shall prescribe" in the seventh sentence and inserting in lieu thereof "rules as are established by the United States Immigration Board",

(7) by striking out "Such regulations" in the eighth sentence and inserting in lieu thereof "Such rules", and

(8) by striking out "Attorney General shall be final" in the tenth sentence and inserting in lieu thereof "administrative law judge shall be final unless reversed on appeal".

(g) The last sentence of section 273(d) (8 U.S.C. 1323(d)) is amended by striking out "special inquiry officers" and inserting in lieu thereof "administrative law judges".

(h) Section 292 (8 U.S.C. 1362) is amended—

(1) by striking out "In" and all that follows through "proceedings," and inserting in lieu thereof "In any proceeding or hearing before an administrative law judge and in any appeal before the United States Immigration Board from any such proceeding", and

(2) by inserting "and at no unreasonable delay" after "Government".

(i) Section 360(c) (8 U.S.C. 1503(c)) is amended—

(1) by inserting "(and appeals thereof)" in the first sentence after "proceedings", and

(2) by striking out the second sentence.

(j) Any reference in section 203(h) of the Immigration and Nationality Act, as in effect before March 17, 1980, to a special inquiry officer shall be deemed to be a reference also to an administrative law judge under section 101(a)(43) of such Act.

PART D—ADJUSTMENT OF STATUS

LIMITATIONS ON ADJUSTMENT OF NONIMMIGRANTS TO IMMIGRANT STATUS BY OUT-OF-STATUS ALIENS

SEC. 131. (a) Section 245(c)(2) (8 U.S.C. 1255(c)(2)) is amended by inserting after "hereafter continues in or accepts unauthorized employment prior to filing an application for adjustment of status" the following: "or who is not in legal immigration status on the date of filing the application for adjustment of status".

(b) The amendment made by subsection (a) shall apply to applications for adjustment of status pending on the date of the enactment of this Act.

(c) For amendment prohibiting certain nonimmigrant students and visitors entering under visa waivers from adjusting their status to immigrants, see section 212(b) of this Act.

EDUCATION AND LABOR COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the first Education and Labor Committee amendment.

The Clerk read as follows:

Education and Labor Committee amendment: Page 6, strike out line 4 and insert in lieu thereof the following new paragraph:

"(3) the person or entity, in the case of the hiring of an individual, must attest, under penalty of perjury and on or appended to such form, to the name and address of each other individual who (A) applied in writing (within 90 days before the hiring of the individual) for the position in which the

individual was hired, and (B) was not hired for the position; and".

Page 6, line 5, strike out "(3)" and insert in lieu thereof "(4)".

Page 6, line 6, strike out "(1) and (2)" and insert in lieu thereof "(1), (2), and (3)".

Mr. HAWKINS. Mr. Chairman, I rise in support of the amendment.

The CHAIRMAN. The gentleman from California (Mr. HAWKINS) is recognized for 5 minutes.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield for a parliamentary inquiry?

Mr. HAWKINS. I yield to the gentleman from Kentucky.

PARLIAMENTARY INQUIRIES

Mr. MAZZOLI. Mr. Chairman, without taking too much of the gentleman's time, I would inquire of the Chair if the gentleman's amendments are being offered en bloc to this section, or are they offered individually?

The CHAIRMAN. The Chair would like to advise the gentleman from Kentucky that the rule does not provide for consideration en bloc. It does not make that provision.

Mr. MAZZOLI. I thank the Chair.

The CHAIRMAN. The amendment is an Education and Labor Committee amendment.

Mr. KAZEN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. Does the gentleman from California (Mr. HAWKINS) yield for a parliamentary inquiry?

Mr. HAWKINS. I yield to the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, did I understand the Chair to say that no amendments could be offered en bloc.

The CHAIRMAN. The rule does not so provide. The gentleman would be advised to this effect: That by a unanimous-consent request that could take place.

Mr. KAZEN. I thank the Chair.

The CHAIRMAN. The gentleman from California (Mr. HAWKINS) is recognized for 5 minutes.

Mr. HAWKINS. Mr. Chairman, during the consideration of this bill in the Committee on Education and Labor I offered several amendments. This is the first in a series which I am prohibited from offering en bloc, but they are interwoven. This first amendment is, I think, a very simple one.

Under the bill as proposed, the individual seeking employment may offer documentation concerning that individual's legal status as a citizen. The current practice would be that that individual would offer to the employer social security documentation, a driver's license, et cetera. In other words, a form would be prepared, which must be done anyway for anyone who seeks employment, and the employing entity would then decide whether or not that documentation is valid or is sufficient.

This amendment simply says that not only in the case of the individual who is hired but in the case of every applicant, the employing entity would simply state the name and address of each applicant. That is the only requirement that is made mandatory under this amendment.

In other words, not only is the individual who is actually employed on the form, but every individual seeking that employment, who may be rejected obviously in these instances, should also have his or her name and address on that form. That is all that is added. It is not a costly process. The process must be carried forward anyway. The form must be used anyway, the amendment being offered simply requires that the name and address of every applicant would be added to that document so that later, if there is some dispute arising, we would have known that there were other applicants and we would know who those applicants were.

The amendment was unanimously approved in the Committee on Education and Labor, and I think it is a very simple addition to the act.

Mr. KAZEN. Mr. Chairman, will the distinguished gentleman yield?

Mr. HAWKINS. Yes; I am pleased to yield to the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, these forms are to be kept regardless of whether or not the applicant for a job is given the job or not?

Mr. HAWKINS. That is true. In regard to the form which is now required in the act before this amendment, that form would be required to be kept anyway for 3 years.

Mr. KAZEN. Whether or not the applicant was employed?

Mr. HAWKINS. Whether he was employed or not. That would be the requirement in any event.

Mr. KAZEN. If that is true, then, and if that is in the bill regardless of the gentleman's amendment, that is a tremendous burden on any employer; is it not?

Mr. HAWKINS. I am not imposing that burden on the employer. The burden already is being imposed on the employer to keep that document. I am simply saying that the employer should, in addition to keeping the name and address and the information on the person who is hired, also list the names and addresses of those who applied as well.

Mr. KAZEN. What is the object of that?

Mr. HAWKINS. The object of this is to know who was not employed so if an individual later alleges that his documentation was not accepted, that he had documentation and it was not accepted and he wishes to establish some kind of action, at least he would have the basis on which to proceed. It really is a due-process protection to an indvidual who applies but who may not actually be hired for that particular job.

The CHAIRMAN. The time of the gentleman from California (Mr. HAWKINS) has expired.

(On request of Mr. KAZEN, and by unanimous consent, Mr. HAWKINS was allowed to proceed for 2 additional minutes.)

Mr. KAZEN. Mr. Chairman, is it then contemplated that these forms of applicants who are not hired be kept for the statutory time and are to be used or perused by a review board agency?

Mr. HAWKINS. A second amendment of mine will require that there would be three agencies, that the form could be made available to three separate agencies. That is not contained in this amendment.

At the present time that information is virtually kept without being revealed by anyone, except I believe—and the gentleman (Mr. MAZZOLI) can correct me if I am wrong—by the Attorney General in the usual process. This amendment does not affect that process whatsoever. It simply requires the adding of perhaps only one or two lines containing the names and addresses of all applicants. That is all the amendment does.

Mr. KAZEN. Mr. Chairman, I thank the gentleman.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. Mr. Chairman, I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I want to clarify this. I am very concerned that we may be starting something here that could turn out to be a monster.

Is it the intent of the gentleman's amendment that a list be kept of every person who applies for work, even if he just comes in and says, "do you have a job for me?" Does this mean that the employer should have the name and address of that individual?

Mr. HAWKINS. Mr. Chairman, may I say that I cannot see that there is tremendous burden being imposed on an employing entity. I would assume that this is a managerial problem anyway, and this merely requires them to list the names of the persons who applied for the position.

We can assume that that individual has advertised for so many employees.

The CHAIRMAN. The time of the gentleman from California (Mr. HAWKINS) has again expired.

(On request of Mr. DE LA GARZA, and by unanimous consent, Mr. HAWKINS was allowed to continue for 2 additional minutes.)

Mr. DE LA GARZA. Would the gentleman be kind enough to yield to me again?

Mr. HAWKINS. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, my concern is this: That we have to legislate for the Nation, but regretfully as individual Members we have to revert to how it applies in my district or my entity or my neighborhood.

This is what concerns me: That we have a gentleman who owns a packing shed and he hires people for his packing shed through a foreman or he talks to somebody or somebody runs into him downtown and says, "Hey, have you got a job for me?"

Are we imposing on him the burden of saying, "What is your name? What is your address? I don't know if I have a job for you, but I have to fill out a blank form when I get back to my shed."

And then who gets that information? My inner self tells me that this is asking for trouble, that we are going to make a list that will have a potential impact on individuals who later may be checked.

And that was my concern in the beginning. They may be asked, "Are you legal, or are you not legal? Do you have identification?"

I do not know the background of the gentleman's thinking as far as this amendment is concerned. With the respect and admiration I have for the gentleman, I am not going to per se oppose the gentleman, but I am going to wave that red flag and say that this has great potential for mischief.

Mr. HAWKINS. Mr. Chairman, may I answer the gentleman in this way: I am not imposing this responsibility on the employer. The bill itself proposes to do that. It requires that an individual seeking employment will go through this certification process in which the employer, in order to protect himself or herself, will use certain forms as a means of doing it.

The CHAIRMAN. The time of the gentleman from California (Mr. HAWKINS) has expired.

(By unanimous consent, Mr. HAWKINS was allowed to proceed for 1 additional minute.)

Mr. HAWKINS. So, Mr. Chairman, I am not the one who is trying to impose this burden on anyone.

o 1215

There is a complex situation set up by the proposal. I am trying to protect the proposal to the extent I say that the proposal should not end up with abusing the due process of an individual who makes an application, who goes through the process of seeking that employment but who is rejected. So the employer, on the form that is required by the act itself, which I am not requiring, but that is required by the proposal, on that form which is already being required we are simply saying not only are you going to have the documentation or list the reason why a certain individual was employed, but you only list the names and addresses of those who were rejected for the position.

This is the only way that we would have any knowledge of those who have been rejected.

That is all this amendment seeks to do.

The CHAIRMAN. The time of the gentleman from California (Mr. HAWKINS) has expired.

(At the request of Mr. GARCIA and by unanimous consent, Mr. HAWKINS was allowed to proceed for 2 additional minutes.)

Mr. GARCIA. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from New York.

Mr. GARCIA. I believe what we are talking about now with the gentleman's amendment is actually to the heart of the entire immigration bill as it pertains to the potential for discrimination in terms of hiring of persons. I would say to my colleague from Texas that this amendment, if it is not passed, will just leave the doors wide open for persons to keep no records as it pertains to those persons who have applied for a position in a factory or whatever the case may be.

It seems to me, my colleague from Texas and my colleague from California, that if in fact this does not become a reality that people will then be able to come in and say the following: that we never had anybody here and we never tried, in fact, to make an effort to hire those persons.

It seems to me that what our colleague is saying here is that this would insure the Justice Department and all of those persons who are responsible for law enforcement as it relates to discrimination would be very much involved and that is what we have to protect.

It seems to me that that is what we are trying to accomplish and the gentleman from California can correct me if I am wrong.

Mr. HAWKINS. I think the gentleman from Texas (Mr. DE LA GARZA) is trying to impose on me the burden of trying to defend this complex situation that is being proposed. I did not propose that.

I am trying to clarify it to the extent, as the gentleman from New York says, that in the recordkeeping this be added to that recordkeeping which the proposal requires and that an individual at least have the protection of knowing that there is a record kept and that that individual did in fact apply for that job.

The CHAIRMAN. The time of the gentleman from California (Mr. HAWKINS) has again expired.

(At the request of Mr. DE LA GARZA and by unanimous consent, Mr. HAWKINS was allowed to proceed for 2 additional minutes.)

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Texas.

Mr. DE LA GARZA. I would say to the gentleman that is my main concern because the gentleman in the well certainly has been the champion, and we admire and respect him for his activities in civil rights and in keeping Government out of people's business, except when the Government is required to intercede to protect those rights.

I say what the gentleman is doing is adding to an already burdensome procedure a list which is not the Government's business as to whether I apply for a job some place or not. You are making another list that the Government will have. That is none of their business whether I applied or I do not apply. But yet my name and address is going to be in every shed, every packing shed and every factory, and every housewife has to keep a list under the already burdensome procedure of the bill, not what the gentleman is doing, but he is adding further burden which I am concerned about, and you are going to have another list.

I know the intention that someone have the right to say, "I was discriminated against." But I think that can be protected without a list.

Lists in the hands of government belong in other systems of government, not in ours, and that is my main concern.

Mr. HAWKINS. This is not a case of discrimination as such. It is only a case of whether or not you file valid documentation proving yourself to be of a certain status. That is all this does.

It does not really get into the discrimination charge.

This is merely whether or not you went there, you applied for the job, you offered some documentation and you wish to prove it. That is all this does.

Mr. MAZZOLI. Mr. Chairman, I rise in reluctant opposition to the gentleman's amendment. I will be brief.

I think the gentleman from Texas (Mr. KAZEN) and the distinguished gentleman from Texas (Mr. DE LA GARZA) have put their finger on the problem. The problem is basically too much paperwork.

In the committee version which is before the House, in the section on employer sanctions, the committee has reported a bill to this House which I think successfully walks that middle line between too little paperwork, which then makes employer sanctions without teeth, and too much paperwork, which, as the two gentlemen have said, makes it burdensome and potentially has impact on the civil rights of individuals.

What your committee has reported is a methodology, an appropriate amount of paperwork which every employer, small and large, could easily handle. It applies to those who are hired. What we did was limit it to the contract of hire completions.

As to other people who apply, other people who are involved in this winnowing process which yields the successful applicant, those people are not

required to either present their identification nor are they required to list some piece of paper. Only for the successful completion of hire.

I might say further, in today's law we still have title VII of the Civil Rights Act which protects against any discrimination in the workplace on the basis of race, or religion, or nationality. We still have EEOC.

We have in our bill, because of the package of amendments offered in the full committee, further protections in the form of an appointment of a task force which will constantly monitor any civil rights implications of employer sanctions, a task force composed of the Attorney General, the Secretary of Labor, the Director of EEOC.

We further have the Civil Rights Commission itself monitoring any activity with respect to civil rights or discrimination.

We further have the President having to make periodic reports to the Congress on any discriminatory effect, if any, resulting from this bill.

We think, and again with respect to the gentleman from California, one of the leaders of this House, our bill gives the employer in every case needed protection, and at the same time with the least reasonable paperwork burden.

So I would suggest that the Committee reject the gentleman's amendment.

Mr. MILLER of California. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the Hawkins amendment.

There is a great concern about whether or not if the bill is successful and you have employer sanctions, whether or not employers will choose to discriminate against individuals by not hiring them, but not making employment available rather than going through the process of this legisation.

I think the amendment by my colleague, Mr. HAWKINS, simply requires that those documents that are already required be kept for I believe 90 days. This does not require that if somebody walks up to you on the street and says, "Hey, do you have a job for me," because it says that the information be retained only for an individual who applied in writing. So it simply requires that you hold onto those application forms for 90 days.

The vast majority of these jobs under this legislation are likely to be seasonal employment. They will be kept during the employment season and thereafter, and then they can be disposed of.

But the most important part is that this leaves a trail because you can have the Attorney General's task force, but if you do not have a record of who applied and who was turned down, and what their surnames were. I do not see how you are going to be able to determine whether or not employer sanctions have or have not led to discrimination. A good many people in this country are terribly concerned about and many people already believe discrimination exists because of accent, because of color, because of nationality.

I think that this amendment errs on the conservative side.

If it proves to become a burden, if it proves to become a burden after the act is in there for a year or two, it can be changed.

But what we ought to do with this sweeping change as this law makes, and makes in good faith, I think in some instances we ought to err on the conservative side so that we have a way to monitor. But if you do not have this kind of presentation of evidence available for really what is a relatively short period of time when talking about the task force that is going to monitor or not monitor, if you do not at least have this information available it is going to be very difficult to determine.

What you then will have are simply allegations that may or may not be supported by evidence as to what the effect of the employer sanctions has been.

I think it is a very reasonable amendment, especially when coupled with the second one, because the second amendment gives the Justice Department the ability to use this information to make an intelligent decision, to determine whether or not the discrimination has taken place. Perhaps, most of all, to dispel the fear, if in fact the fear is not warranted.

But absent this, you will continue to have allegations about this legislation promoting the discrimination through the use of employer sanctions.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

I would ask the gentleman, as I read the proposed amendment of the gentleman from California (Mr. HAWKINS) I see nothing that limits the retention of the paper to 90 days. It says that the application upon which the material would be kept would be made within 90 days.

Mr. MILLER of California. The gentleman is correct.

Mr. MAZZOLI. So we do have the potential for keeping paperwork for a lengthy period of time.

I would say one last thing to be sure the record is straight. In the bill before the House today in the Committee of the Whole is the section which deals with employer sanctions which says only for successful hires is the paperwork retained. Therefore this material which the gentleman from California asks in his amendment is new material. It is not that you simply put a name and an address on existing material already required under the bill because the bill only requires material on successful hires.

Mr. MILLER of California. If I can recover my time, it is for exactly that point raised by the gentleman from New York (Mr. GARCIA).

If you only have the successes you do not know from what pool of individuals those successes were drawn.

This allows you to have the universe of people who apply so you can determine whether or not actual discrimination, intentionally or unintentionally, took place within the pool of people that applied.

Also the question I think that is very important is whether or not American citizens applied and were turned down for the job so that, in fact, a foreign individual could come and have those jobs.

We know there is a problem with people being trained for jobs and whether or not they are acceptable to employers and so you really do not know the universe from which successful applicants for these jobs were in fact taken.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentleman from California.

Mr. HAWKINS. The sponsor of the bill has just said that this requires a new form or new documentation or new material. Clearly he has not read the amendment. It simply says the required information should be on or appended to such form as is already required.

The CHAIRMAN. The time of the gentleman from California (Mr. MILLER) has expired.

(By unanimous consent, Mr. MILLER of California was allowed to proceed for 2 additional minutes.)

Mr. HAWKINS. If the gentleman will continue to yield, we certainly do not intend to require any information on any new form. It says the required data should be on or appended to such form. That is all it does.

To suggest that this will be additional paperwork I think is very misleading. I know it was not intended to be misleading but I think that is the result proposed by the author of the amendment.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentleman.

Mr. MAZZOLI. I would say to my friend from California what the gentleman from Kentucky said earlier was under the committee bill the only persons for whom an affidavit is retained are those persons who have been hired, not the ones who are not hired.

The gentleman's amendment would require the name and address of all applicants, successful or not, to be kept, which means that the gentleman's amendment does require the

employer more paper in the form of the name and address.

Mr. HAWKINS. Not more paper. He uses the same sheet.

Mr. MAZZOLI. But an affidavit is not kept for every applicant under this bill.

□ 1230

Mr. HAWKINS. It is only the name and address on the form that is used. That is all the amendment does. It is not the keeping of affidavits or documentation. It is on the document that you would require as a sponsor of the bill. On that document the name and address of the other applicants who applied within 90 days of the hiring of an individual would be kept. That is not an additional form. It is only an additional entry.

Mr. RODINO. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentleman from New Jersey.

Mr. RODINO. I thank the gentleman for yielding.

Mr. Chairman, I must respectfully disagree with my subcommittee chairman. I think we are really making much of a situation that requires that we exercise whatever diligence that there not be discrimination, but since there is, I believe there is great concern that the keeping of these documents could certainly then insure that there would not be this kind of discrimination, and I would suggest that we accept the amendment.

Mr. FISH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have listened carefully to this debate, and I think that the proponents of this amendment have brought out something quite clearly. That is, this bill does not require that an employer keep records on all applicants in a situation where only 2 people are hired out of 100 people who respond to a newspaper ad.

Now, how do you go about meeting the very desirable end that has been advocated? I think that many of the speakers have brought to our attention the almost impossible paperwork burden that this amendment would impose on small employers for very little return. What is going to happen to these hundreds of thousands of documents? Conceivably the same individual's name and address could appear on several lists on a single day

I think that the applicant flow data that we are discussing here imposes an excessive burden on employers. They would have to compile and retain information on a very large number of individuals.

Now, how do we get to the real heart of the issue of protecting the person who indeed feels he was discriminated against? Well, I suggest that in the Education and Labor Committee package of amendments, amendment No. 4 is far more appropriate to reach the goal that we are all interested in. Amendment No. 3, as you recall, increases the penalties. Instead of being a static $500, it goes up. I like that. Amendment No. 4 provides an administrative and possible judicial remedy for an individual job applicant who claims that an employer, recruiter, or referrer has not acted in good faith. I think that would be a far better approach to address potential discrimination than the sweeping approach that has been presented to us in amendment No. 1.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, first, last night or early this morning I already voiced my complaints and concern about what is in the bill, if you just read what the bill does, it has verified that an individual is eligible to be employed in the United States by certain procedures, which will be national policy and under penalty of perjury a prospective employer has to attest that the prospective employee is eligible to be employed. And, as the bill says, examine on individual's U.S. passport, social security account number, alien documentation, identification, and telecommunication, whatever that is—I guess a credit card from the telephone company—driver's license or similar documents.

Now, the gentleman from California has expressed concern that there could be potential discrimination. My concern—and I speak only for myself—is not the potential discrimination. My concern is that throughout the Southwest anyone who looks like me has to have identification, driver's license, social security card, that I would have to verify who I am and where I came from, more so than the individual that does not look like me, that looks more the norm in the area.

Now, that is concern enough. I am concerned with potential discrimination, but I am more concerned with what it imposes on someone who looks like me in the Southwest, what you have to do to ask for a job.

Then the gentleman from California, my distinguished colleague and dear friend (Mr. HAWKINS), wants to add further insult to this, that there be a list, if you had just applied for a job, whether you were accepted or not, so that then you can come back for complaints on discrimination. But here in the bill it says that the list shall be the document of the Attorney General, it shall be made available to the Service—that means the Immigration Service—or the Department of Labor.

So here comes the border control: "Hey, Mr. Employer, I want to see your list." Sixty people applied for ten positions, forty were not hired. What business is it of the Government or the Immigration Service or the Labor Department of the 40 that were not hired? Why should they have their name and address? And that is my concern. I think that it is an infringement on the human and civil liberties of an individual in this country that so professes to protect the rights of individuals.

It is ironic that in an attempt in legislation to protect the rights of individuals that we have the potential for more harm than the protection that we are affording them.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to my colleague, the gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, I am intrigued that the gentleman says: someone who looks like him.

Is the distinguished chairman of the committee here suggesting that if this provision were not corrected, he could be stopped and asked to produce a green card, or whatever identification is required?

Mr. DE LA GARZA. Anywhere in the Southwest if a potential employer is looking for a protection from perjury, boy, if you look like me in the Southwest, you have got to have papers of every kind and color.

Mr. CONYERS. Well, what about somebody who looks like me?

Mr. DE LA GARZA. In the Southwest it would not affect somebody who looks like you that much, but through the South and other areas of the Northeast, where we have migration from some of the Caribbean countries and some of our friends who are darker than me, they would have the same problem. You would have the identical problem.

Mr. CONYERS. I am grateful that the gentleman brought this to my attention.

Mr. DE LA GARZA. The gentleman and I are in for potential trouble if we should ever go out looking for a job in the fields or in the shops or in the factories of the Northeast, the Midwest, through the South and the Southwest.

Mr. CONYERS. Which, at the rate this Congress is going, might not be an inevitable prospect.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to my distinguished colleague, the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

Mr. Chairman, the gentleman and I, who come from the Southwest and the border with Mexico, have had a lifetime of experience with this particular problem.

The CHAIRMAN. The time of the gentleman from Texas (Mr. DE LA GARZA) has expired.

(On request of Mr. KAZEN and by unanimous consent, Mr. DE LA GARZA

was allowed to proceed for 4 additional minutes.)

Mr. KAZEN. If the gentleman will yield further, what our colleague, the gentleman from California, is trying to do, I can see where he says it will not be any more burden than the form itself, because he is only adding two lines to that same form. I can understand this.

But what the gentleman in the well has just stated is true. Now, there is another potential field for mischief and for harassment. Unless you get an amendment in this bill that these forms are not going to be used by any Federal agency for any purpose unless the applicant himself has requested the papers for a court case in order to show that he was discriminated against or not, but if that kind of an amendment is not in this bill, then the potential for mischief is there, because the Department of Labor, the INS, the Treasury Department, anybody, can come in to an employer who keeps a stack of these applicants who were not hired, they will come in and say periodically, "I want a list of the people who have applied." And off they go, following each and every one of them, going into their homes. "I understand that you applied at La Casita Farms, and you say that you have this and this document. I want to see it." And they will be harassed from now until tomorrow, around the clock. This is the only way that they are going to have of checking to find out if there are any illegal aliens with counterfeit documents. And you are making it possible, under some of the provisions of this bill and later on in another amendment that says that the potential employer has to keep them. Then that is just a bird's nest on the ground. Knowing how the Government works—and this is going to be part of their enforcement—they are depending on the sanctions provisions of this bill to enforce immigration laws, something that the Government ought to be doing instead of putting it on the backs of American citizens to enforce the law.

Certainly I think the American citizens should respect the law, but they should not be made a law enforcement officer, as this bill would have them do under the sanctions. And this is just one more plank, along with the good intentions of the distinguished Congressman from California; the other side of the coin is that the potential for harassment is there at the Government's bidding all up and down the line. The things that we are trying to avoid is to protect the minorities, to protect the brown skin, the person who has a speech impediment or an accent. And this will just be one more way that the Federal Government can go in and harass that poor fellow who does not even know how to speak English, and we have got a lot of them in my part of the country, and to go into his home and say, "Hey, saca la tarjeta, show me your card. I want to see if it is the right kind of card or not." The guy says, "Hey, all I did was apply for a job. I didn't even get any. Why are you after me?

I think it is a bad deal.

Mr. GARCIA. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from New York.

Mr. GARCIA. I thank the gentleman for yielding.

Mr. Chairman, I think we have to work under the assumption that the Mazzoli-Simpson bill today may become a law and that we want to protect the rights of minorities seeking employment.

Mr. DE LA GARZA. Let me reclaim my time here for just a second.

The CHAIRMAN. The time of the gentleman from Texas (Mr. DE LA GARZA) has again expired

(ON request of Mr. GARCIA and by unanimous consent, Mr. DE LA GARZA WAS ALLOWED TO PROCEED FOR 2 ADDITIONAL MINUTES.)

MR. DE LA GARZA. Mr. Chairman, my concern is for citizens already here, whose families have been here for hundreds of years. And if there is potential for prejudice or potential for harassment to citizens, pray, I tell the gentleman, what can they do to the aliens, even if he has been granted amnesty?

You see, amnesty is not going to clear the potential for harassment, so far as employment, of having to identify himself. Amnesty is not going to do anything but to say, "Hey, for a little while you are going to be legal here," but it will not in any way deter potential discrimination or harassment or need of identification, which is what I am concerned about and what I am complaining about. And amnesty or not, he still will be on another list available to the Immigration Service or the Department of Labor solely because he applied for a job. Again I repeat very sincerely, this is for other types of governments to have lists about what individuals do in their daily lives, not for our system of government. We already have too many lists for potential for harassment.

□ 1245

Mr. GARCIA. Mr. Chairman, I want to get back to the point that I was trying to make before.

It seems to me that, and I find it interesting that both the gentleman and I are opposed to the bill for almost the same reasons, one of the positive aspects of the bill is the question of amnesty.

The point I am trying to make to both my colleagues from Texas is that I want to insure that under the Hawkins amendment that records be kept for a period of 90 days. We are not asking for something that is going to be there forever. We are asking for a 90-day period so if any of those persons who have been granted amnesty can then say, "we tried to get this job and we were not hired for the following reasons."

Mr. LUNGREN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the length of this debate on the first of almost 300 amendments I think suggests 2 things. One is that this is an issue that is extremely important, that it does have many facets to it, that it does need the direct and full attention of the House of Representatives.

And for that reason I am sorry we are here at this late date, because I do not think we should short circuit anybody from speaking on this important subject.

Second, at the same time, I recognize that the length of the debate suggests that perhaps the bill will not be passed.

But let me at least talk about this concept of employer sanctions because it is not a concept that this subcommittee came to easily.

When I first came to Congress 4 years ago and when I started looking at this particular bill in this Congress, I was against employer sanctions for virtually all of the reasons suggested by those who have risen to speak either against this section of the bill or in support of the additional amendment.

But it became clear to me that if we do want to get a handle on illegal immigration to this country caused on the one hand by the push factor from foreign countries whose economic circumstances are very stark in comparison to ours, and yet whose geography is so close to ours that their people can get here rather easily, we would have to do something about the pull factor, which is the possibility of employment.

And we felt that there is no way to get that handle on the problem, no matter how many Border Patrol officers you have in the interior of the United States unless we directly attack the question with respect to employers who will be hiring people illegally. In some cases, unfortunately, employers will be hiring them illegally so they can take advantage of these individuals.

So we came to the realization we had to have some sort of employer sanction. But the question then arises: How do you effectuate an employer sanction in a way that is nondiscriminatory?

The first decision we had to make was whether we should apply it to some people or all people. To get over the very serious and real hurdle of dis-

crimination, we felt that you had to have this across-the-board. That is, applying to all employees. This would be so that you do not look at someone to see what color they are, to see what the language is that they have, or the accent they have. It applies to everyone, whether they have brown eyes or blue eyes, whether they are light skinned or dark skinned. That does cause a problem on the other side. Then employers say, this is an undue burden on us. And so you reach the question, are you going to have any employer sanctions at all. We do believe you need them if you ever are going to get a handle on this situation. So then we must ask, How do you reach an accommodation between being overly burdensome on the employer and yet making sure that there are not additional opportunities for discrimination? On the subcommittee we tried to reach a compromise, where we would require it of all people who apply for a job.

But then we get to the paperwork requirements. We thought that on small employers such as mom and pop stores it might be unduly burdensome, because by and large they would not have a regular personnel filing system.

So we said for those who have three or less employees, they do not have the paperwork burden. We then tried to make the paperwork burden an attraction, by saying that by merely producing these documents, an affirmative defense is established against any action taken against an individual or entity for violating the law with respect to employer sanctions.

So it is in the interests of the employer to carry out these paperwork burdens, because they will give him an affirmative defense if an action is ever brought against him.

But then the question comes as to we should accept the amendment of the gentleman from California to create an additional burden as a means of ferreting discrimination.

But the question remains, Is the burden disproportionate to the benefit that will be gained? And I would suggest it is.

For one reason, you are changing the whole circumstance of the burden. You do not only require the burden to be maintained with respect to people who are successfully employed, but for all people who sought that job in the 90 days before. There is no threshold here other than it was 90 days before a successful hiring of another individual.

So does that mean if, for instance, an employer who goes to a college or university seeking one or two positions, merely gives that information to the office of employment at that university, he falls within the provisions of this amendment?

The CHAIRMAN. The time of the gentleman from California (Mr. LUNGREN) has expired.

(By unanimous consent, Mr. LUNGREN was allowed to proceed for 3 additional minutes.)

Mr. LUNGREN. Does that company then have the burden of maintaining the name and address of every single student who responded in writing by sending his or her résumé in?

What about those people who send out a request for employees through the newspaper, have 90 people respond, and then discover that the third person they interview is the person they want. Do they then have to verify the name and address of all 87 people thereafter that they had no interest in, not from a discriminatory standpoint, but merely because they found the person they wanted?

Last, I would say the real problem with this amendment is a problem that was specifically alluded to by the gentleman from New York (Mr. GARCIA).

Under this amendment, you will then have a list of all those people who were not hired for whatever reason. The INS could get that list, thinking in some circumstances that there may be a good chance a number of those people were not legal residents and did not meet the verification. They could then go down the list and go after those people. It would lead potentially to a harassment of individuals that I do not think we want.

I understand the intent behind it. I think it is similar to the intent of those of us on the subcommittee to reduce the possibilities of discrimination. That is why we have at least four parts of the bill dedicated to the elimination of discrimination. We require the President to monitor and consult semiannually with the Congress concerning the implementation of employer sanctions and their impact on employment. Some have suggested they want to have a sunset clause connected with this. I think that would be a good addition to this provision. We have a provision that requires the U.S. Civil Rights Commission to look into this on a regular basis and give us reports. We have a requirement for the Attorney General to work jointly with the Secretary of Labor and the chairman of the EEOC to establish a task force to monitor our nondiscriminatory efforts. We have three major efforts going on in three different parts of the Government to root out discrimination that may be engendered by this or may merely be revealed by this act. And I think that is the way to attack it.

It is not that we are not worried about discrimination. It is the question of whether the burden is so onerous in contrast to the benefit that would be gained by this additional burden.

Mr. HANSEN of Idaho. Mr. Chairman, will the gentleman yield?

Mr. LUNGREN. I yield to the gentleman from Idaho.

Mr. HANSEN of Idaho. I thank the gentleman for yielding.

Mr. Chairman, I would like to ask the gentleman, and I respect the study he has put in, and his position on the committee, and I know that he has considered this long and well.

It seems sanctions are nothing but a way to force the employer into even more of an adversary position with the rights of individuals. I am wondering what happened to the incentive system in this country, and why we have to employ punitives, particularly in this area.

I do not see where, for instance, you are going to give jail sentences or fines to Immigration Service employees.

The CHAIRMAN. The time of the gentleman from California (Mr. LUNGREN) has again expired.

(At the request of Mr. HANSEN of Idaho and by unanimous consent, Mr. LUNGREN was allowed to proceed for 2 additional minutes.)

Mr. HANSEN of Idaho. If the gentleman will yield further, it seems that the gentleman is putting a much larger burden on the employer than you do on even the enforcement officer who carries the badge of the U.S. Government.

Is there any real reason why there is no fine, no jail sentences for enforcement officers when you are going to put them on employers?

Mr. LUNGREN. If the gentleman would like a response.

In the first place, there are sanctions against INS officers who act inappropriately under a number of different legal sections.

Second, on this subcommittee just 2 years ago, we worked very hard with the INS to set up a watchguard organization on their own officers. They brought people in with law enforcement experience from the city of New York in the investigation of dereliction of duty by police officers. That has gone forward in the last 2 years.

But the gentleman raises a question about what happened to the incentive system. It is because of the incentive of the economic system in the United States that we are attracting so many people from foreign lands illegally. I happen to think that is a great success story, that people want to come to this country for economic well being and opportunity.

But the question still comes in this Congress as to whether we are going to have an immigration policy or no immigration policy. Are we going to allow anyone who wants to come here and successfully gets across the border to stay here? And are we going to continue to allow that to happen in the future?

If we are not, we are going to have to take rational, reasonable steps to prevent this. In our view, an employer sanction which only requires the employer to merely elicit from the employee at the time he applies for the job whether the person is here legally, is appropriate. He does not have to go back with all employees he already has. That ought to be made very clear. It is not retrospective. All employees that now exist do not have to be rechecked.

The CHAIRMAN. The time of the gentleman from California (Mr. LUNGREN) has again expired.

(At the request of Mr. HANSEN of Idaho and by unanimous consent, Mr. LUNGREN was allowed to proceed for 1 additional minute.)

Mr. HANSEN of Idaho. Mr. Chairman, if the gentleman will yield further, I think he misses my point about incentives. I am talking about the fact that there is no employer that really needs to be threatened with jail sentences or fines if you just keep in mind the fact that if you have people, particularly in the perishable crops area or whatever that cannot afford to have their workers taken away from them at the inappropriate time. What I am talking about is the fact that you provide a proper H-2 program, one easily managed, one that does not kill somebody with paperwork, so they can get the assistance, you bring them in on a dignified basis, give them the proper dignity of a human being and they will not be taking illegals because they cannot afford to have them taken away at the wrong times.

The incentive system will work better than the punitive system.

Mr. LUNGREN. I appreciate it. I welcome the gentleman's support for my H-2 provisions.

Mr. HANSEN of Idaho. I do not support it.

Mrs. SCHROEDER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I find the debate on this amendment something that really is perplexing to a lot of us, because I, too, like many others, worry about the whole employer sanctions area, and what it is going to do.

We all know there are a few bad employers, so in the great American tradition, we run out and slap all employers with a lot of paperwork and reporting burdens rather than just target after the bad employers. Everybody is talking about their districts and how this bill will affect certain people that look different ways. Who will get picked up? Who has to carry identification and who does not? I have a district that really makes this whole employer sanction thing very frightening from a civil rights perspective.

I have a district that not only has a very significant Hispanic population, it has a very significant Canadian population. Canadians look more like me. Hispanics do not. We had a very, very active Operation Jobs carried out in my district by INS, and I thought it was shameful. Operation Jobs was the opening shot to show the need for this bill. It was to show everybody how wonderful the bill was, and they were going to get jobs back for Americans, if it passed.

I hate to be so realistic about this, but realistically everybody in this room would much prefer the jobs that the Canadians have in my district than the Hispanics, because the pay is better and so forth and so on.

During Operation Jobs in my district, one person was killed. It was a horrendous example of a violation of all sorts of rights. It was a very ugly scene, and guess what? They did not find any Canadians at all. They found all sorts of Hispanics at very low paying jobs. They went after many Hispanic-Americans and in Colorado some of the Hispanics have a longer American heritage than many of the Anglos.

So what we are talking about in employer sanctions is employers being told there are now sanctions and they must keep records to prove they are not in violation. We are already seeing in Colorado employers telling certain employees, "We are going to have to let you go now. We are not allowed to hire Hispanics anymore."

I understand people who stand up and say that is not the law, that is not true. Fine. Try and tell some small employer that. He just does not want to cause himself trouble. Can you blame him? All he has is the Government coming after him every day and every day, and now they have this whole new recordkeeping burden. We are terribly naive if we do not recognize the impact of what we are doing today here with employer sanctions is going to affect Hispanics and blacks and people who look different.

□ 1300

If you look at Operation Jobs, 99.3 percent of the people they picked up were from Latin America or the Caribbean; that is black or Hispanic. They stood out. They went after them, and not a lot of Canadians or Europeans. In the energy field in Colorado, let me tell you, the best jobs are not held by Hispanics.

We must deal with that. The Civil Rights Commission in the "Tarnished Door" said that passage of the employer sanctions laws could lead to discriminatory practices involving especially members of the Asian and Spanish heritage communities. That is true.

This is our U.S. Commission. This is not the Mexican. It is our Civil Rights Commission and it is telling us we are doing something very serious by enacting employer sanction. The people discriminated against are people who have lived here for years and years and are American citizens. They will have to carry many more pieces of identification, as the gentleman from Texas pointed out. The Southwest sees this bill very differently.

I also want to point out that I have a wonderful study here from Notre Dame Law School. I underline that, Notre Dame Law School. It is on employer sanctions and its conclusion is that this is a very drastic, drastic thing to do and that it will do all sorts of negative things and we should be enforcing the labor laws first, and so forth and so on.

Now, let me get back to this amendment, because this is the quandary I have. Later on I will be offering a substitute to title I, which is what Notre Dame Law School thinks is the alternative, which is what the Civil Rights Commission would prefer, which the ACLU and the chamber of commerce would prefer.

Now, I think when you have got that kind of consensus, my substitute makes a lot of sense.

What my substitute will do is say, you do not do the employer sanctions, you target the bad guys. We know who the bad guys are. When we asked Immigration, "How did you pick the employers to go surveil during Operation Jobs?"

They say, "We know who is breaking the law." My substitute says if you know, do something. Go after the bad guys. Do not burden everyone.

The CHAIRMAN. The time of the gentlewoman from Colorado has expired.

(By unanimous consent, Mrs. SCHROEDER was allowed to proceed for 5 additional minutes.)

Mrs. SCHROEDER. So obviously, Mr. Chairman, I much prefer my alternative, and yet I really want to compliment the gentleman from California because what I think he is saying is that in case my substitute does not pass at least we will have some method of finding out whether the employer sanctions are discriminating, as the U.S. Civil Rights Commission said they probably would and Notre Dame Law School and others agreed.

We keep hearing employer sanctions are not discriminatory, but every civil rights group that I am aware of is not for this bill.

So I think the gentleman is making an attempt and it may be more burdensome but nevertheless, the additional protection of the amendment is there and needed because everyone is telling us that what we are doing in the bill as it is now written is discriminatory.

So I think we have no alternative if we care about discrimination, other than to support this and then hope we can change title I later on so that we

do not have to worry about it at all, because that is the better choice.

But now, Let me tell you one other problem that we have with keeping the names. I have the name Schroeder. I suppose if you have problems with German immigrants, I probably would be one that would have to carry around all the identification because of the name Schroeder. The only problem is that I am Irish. Schroeder happens to be my husband's name. That is one of the problems that we have when you are trying to monitor discrimination against Spanish heritage citizens by looking at names. You may have the name Smith and still be Hispanic; so it is still hard to tell from lists who is being affected and who is not, and I think we know that, too. So women get put in an even more difficult position when it comes to monitoring discrimination against them. You can be discriminated against and appear on the list and nobody would ever know you were discriminated against because your name was Smith; however, that happens to be your married name rather than your maiden name and employers are looking at faces and not at names.

This is a good perfecting amendment at this point to a title that I would like to perfect by substituting it entirely and doing away with employer sanctions.

On the other hand, I also think that with all the data that we have, with the experience I have seen in my district with two groups of immigrants working in my district and only seeing one group being asked for the green card. That was the group that did not look like me. This type of thing is absolutely essential in case the employer sanctions as are now written in title I should pass.

I compliment the chairman of the Judiciary Committee for saying that he supported this amendment and I hope everybody backs it. I think this is a very important addition in case we are not able to perfect the bill to a higher level.

Ms. OAKAR. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I am delighted to yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Chairman, I want to associate myself with the remarks of the gentlewoman from Colorado.

Mr. PICKLE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, separate and apart from this particular amendment, I wish to remind the House of the special interests of a group which has never supported any of us in an election; never given any of us money; and which will certainly never cast a single vote for me, nor most of the Members of this House.

I refer, Mr. Chairman, to that group of people we term "illegal aliens." In Texas these people are commonly called wetbacks, since to come to work in this country, many of them first had to swim the Rio Grande River, then walk mile after mile through our rugged brush country in search of field or factory, and a paycheck.

Today, they are bent over harvests, elbow deep in sinks, cooped up in vans, hiding under bridges, and sleeping a dozen to a shack all across the country—people who came in hope—and live in fear.

Some now have lived in the United States—and in my district in Texas—for a generation, long enough to see children and grandchildren born into citizenship. Many thousands have worked, paid taxes, and contributed to their new home for 5, 10, or 15 years. More often than not, they pay in and never draw out—since to claim benefits, to reveal themselves to the authorities, would destroy all they have sacrificed for.

I will not argue that they did the legal thing, or even the right thing, when they sought out our country years ago. What they did was the human thing; a migration we cannot undo any more than we can turn back the clock or stave off the tides.

They are here now, and so the question is not whether we approve of their coming, but what we will make of their presence.

We have heard many arguments and many voices against this bill. But few have spoken for the families who live in fear of discovery and deportation. For the men stooped in middle age by short hoes. For the women who work for $1.50 an hour at backbreaking labor no American would take, and thank God for the opportunity.

Few have spoken, Mr. Chairman, for the wetback, few have spoken for the illegal alien in permanent residence in this country, because they have no voice, they have no leverage, they have no money. And they have no vote.

With this bill we can at least give them one thing: We can lift them out of a disgraceful subclass. We can give them dignity, and the precious rights of a great Constitution.

The alternative is to do nothing, and the price of that is simply too high. Too high in human terms, too high in economic terms, too high in damage done to the integrity of our national borders.

Because the allure is strong. The opportunity for better jobs and a better life is almost irresistible. While we delay, the wetback will keep coming, keep crossing, as he has for years.

If sovereignty is to mean anything, then we must have an immigration policy. It is fantasy to think we can turn back the clock on those already here, and hardhearted fantasy at that. What we can do is cap the flow—which means cutting off the source which is jobs.

And we can establish a realistic policy to live by in the future. That is what this bill hopes to do—with compassion and commonsense, and with firmness.

Otherwise, nothing will keep them out—not barbed wire fences, nor marine divisions, nor landmines—not as long as opportunity, jobs, and money are on this side of the Rio Grande.

Twenty years of debate is too long. This year it is time to act.

I commend the distinguished chairman, Mr. RODINO, Mr. MAZZOLI, and their associates, for having the courage to bring this issue forward. It is not a perfect bill. But we can make it a good starting place. I know there are many amendments pending and I can certainly support some of them. But I hope we can resolve our differences and conclude with a bill which is fair and equitable. I feel the intent of this bill is good—and could be made workable.

Mr. ROYBAL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think that one can say at this point that we can agree with all the previous speakers because each one of them have made excellent points; but I would like to get back to the amendment now before the House.

I would like to try to get some understanding of the opposition that has arisen on the part of the gentleman from Texas (Mr. DE LA GARZA) and the gentleman from Texas (Mr. KAZEN).

Before I do that, I would like to set the stage for the questions that will follow. On page 4, line 19 of the bill, it states as follows:

The person or entity—

This means the employer—

must attest, under penalty of perjury and on a form designated or established by the Attorney General by regulation, that it has verified that the individual is eligible to be employed (or recruited or referred for employment) in the United States by examining the individual's—

United States passport, or Social Security account number card or certificate of birth in the United States or establishing United States nationality at birth—

And then it goes on to say—

alien documentation, identification, and telecommunication card, or similar fraud resistant card issued by the Attorney General to aliens and designated for use for this purpose.

Then there is another section which appears on page 5, line 22, and it says:

The individual must attest, under penalty of perjury and on the form designated or established for purposes of paragraph (1), that the individual is a citizen of the United States.

Taking those sections together, I think that it actually means that even

U.S. citizens will somewhere down the line have to go to some designated place and prove that they were born, and if they were born in the United States they would be deemed to be American citizens.

Now, the argument that we have had so far seems to indicate that only aliens will be affected by these sanctions. That is not true. American citizens are also included and it is quite possible that the telecommunication card or any other fraud-resistant card issued by the Attorney General could be made an article that must be carried by every American citizen or every person, every resident in the United States.

Now, let us go back to the point where an individual is seeking employment. What does the amendment actually do? What are the objections?

Instead of answering those questions myself, I would like to ask the author of the amendment and then ask anyone in opposition to it to try to explain to this House just exactly what the situation is.

Mr. FISH. Mr. Chairman, may I speak for the opposition, may I ask the gentleman from California, and I would be glad to ask for my own own time.

Mr. ROYBAL. I would like to yield first to the gentleman from Texas (Mr. DE LA GARZA) and then I will yield to the gentleman from California (Mr. HAWKINS) if the time permits.

□ 1315

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield to me?

Mr. ROYBAL. I yield at this time to the gentleman from Texas.

Mr. DE LA GARZA. I thank the gentleman for yielding.

The gentleman's interest is in my concern and why I oppose the amendment?

Mr. ROYBAL. That is correct.

Mr. DE LA GARZA. For a multiplicity of reasons.

One, it provides another list in the hands of the Federal Government, the Immigration Service, and the Labor Department. My concern for the potential for mischief with lists that are not required. As I stated again, in order to apply for a job, I would have to give my name, address, serial number, et cetera.

The CHAIRMAN. The time of the gentleman from California (Mr. ROYBAL) has expired.

(On request of Mr. MAZZOLI and by unanimous consent, Mr. ROYBAL was allowed to proceed for 5 additional minutes.)

Mr. ROYBAL. Mr. Speaker, I yield further to the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. I thank the gentleman for yielding.

Mr. Speaker, my concern is that I already object to the procedure in the bill, that is onerous enough, and I repeat again, and I hate to keep using it but I know of no better way to illustrate it, that anyone who looks like me has to have an identification, telecommunication card, driver's license, social security, passport, birth certificate, whatever.

The enforcement officer is going to be an employer who, under the penalty of perjury, has to certify that I am legally in this country and eligible to work. That is an imposition on the employer above and beyond what I think it should be. So for that reason I object also.

But my main reason is, and I feel this very deeply, that the potential for mischief or another list in the hands of a Federal agency, I think, is not necessary. I know there is concern, and I agree with the concern of the distinguished gentleman from California (Mr. HAWKINS) my dear friend from New York (Mr. GARCIA) that this list would be used to verify possible discrimination.

I am not as concerned with the discrimination as I am with the burden that it places on individuals to have to identify as the criteria in a criminal case, that you have to identify beyond a reasonable doubt or else the fellow goes for perjury. So if you have to identify yourself beyond a reasonable doubt that you are eligible to seek employment in this country, you are imposing a burden above and beyond the laws and the Constitution, and possibly of nature itself, that an individual, solely to apply for a job, has to kneel in front of a potential employer and show beyond a reasonable doubt that you are here legally and are entitled to ask for a job.

That is not the American way, and it will never be the American way, and this bill may become law but I will never agree to it.

Mr. ROYBAL. Mr. Chairman, I agree with the statement of the gentleman from Texas, but the amendment in question does not address itself to the fact that in the bill there is the establishment of a telecommunication card or a fraud-resistant card which is beyond the limits described by the gentleman from Texas. It is beyond the realm of reason.

So regardless of what happens with this amendment, we will still have to carry identification cards.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield to me?

Mr. ROYBAL. I yield to the gentleman from Texas.

Mr. DE LA GARZA. I thank the gentleman for yielding.

Mr. Chairman, that is why I object to the bill. He is just making it worse.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I really would like to have some clarification with regard to the problem at this particular moment. I will yield first to the gentleman from California (Mr. HAWKINS) and I will then be happy to yield to this side.

Mr. HAWKINS. I thank the gentleman for yielding.

Mr. Chairman, let me say I agree with the remarks of the gentleman from Texas about the possibility of an individual having to kneel and to demean oneself. However, that should not be placed on the author of this amendment for having caused that situation.

All that I am trying to do is to protect the rights of those individuals who are so unfortunate that they do not get one of these jobs.

Now, let us consider the case of an individual who is lawfully here but who has an accent, who may be brown in color or black, who presents himself or herself for one of these jobs and is simply turned down, whether they have the documentation or not, but they are turned down and they go away and afterwards they discover that someone else has been given the job.

That individual says, by jiminy, that they think or they may be able to get together some facts of their own that they think they have a case with.

The CHAIRMAN. The time of the gentleman from California (Mr. ROYBAL) has expired.

(On request of Mr. HAWKINS and by unanimous consent, Mr. ROYBAL was allowed to proceed for 3 additional minutes.)

Mr. ROYBAL. Mr. Chairman, I yield to the gentleman from California.

Mr. HAWKINS. I thank the gentleman for yielding.

Mr. Chairman, if there is no record that that individual even applied for that job, how do you think that individual is going to prove he was discriminated against if he did not have the documentation that he even applied for the job, there is no record?

It seems to me that is what we are overlooking. This simply says it is not burdensome, not a lot of recordkeeping; all of that is required under the act anyway.

Maybe there is too much recordkeeping. Maybe the Government should not be getting into this, but the author of this amendment did not advocate that. I did not set up the procedure whereby a certification is going to take place and you are going to have this form on which the employer is going to have to enter this recordkeeping.

I am simply saying, the amendment is simply saying, that in this recordkeeping you can at least have an address and the name of those who did apply so that you have a record of it, those who were rejected, and afterward if there is some dispute if the individual wishes to assert a right, a

statutory or constitutional right, that individual at least will have a point to start from without which, if this amendment is not adopted, there is no record.

It just raises in my mind the purpose and intent of the act. If something as simple as this to protect the individual's right is not to be kept a part of the act, then it seems to me we are introducing some rather dangerous practices in American life.

Mr. ROYBAL. May I ask the gentleman a question at that point?

How long will those records be kept under the provisions of the bill?

Mr. HAWKINS. The amendment does not address that, but under the bill those records are to be kept for a period of 3 years after the date of such recruiting or referral.

Mr. ROYBAL. It was my understanding that it was 90 days.

Mr. HAWKINS. That is required by the proposed bill and, of course, this information which is appended to that form would automatically be kept the same period of time, 3 years. We do not touch that in the amendment.

Mr. ROYBAL. My understanding is that there is some disagreement with regard to the time that these records must be kept. I was under the impression that it was a 90-day period as cited in the bill but maybe that is not the case.

I would like to know how long an employer must keep these records after the individual has been turned down for employment.

Mr. HAWKINS. Three years, the same as all other records are kept under the proposal.

The 90-day confusion arises out of the fact that this requirement of just adding the name and address will be restricted to only those who apply in writing within 90 days before the hiring of the individual. That is where the 90 days comes in.

The CHAIRMAN. The time of the gentleman from California (Mr. ROYBAL) has again expired.

Mr. MAZZOLI. Mr. Chairman, I ask unanimous consent that the gentleman from California (Mr. ROYBAL) be allowed to proceed for an additional 2 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

Mrs. FENWICK. Yes, I object. We have to get on with this bill.

The CHAIRMAN. Objection is heard.

Mrs. FENWICK. I withdraw my objection.

The CHAIRMAN. Without objection, the gentleman is recognized for 2 additional minutes.

There was no objection.

Mr. MAZZOLI. Mr. Chairman, I think the gentlewoman who made the objection originally was not with us in the evening hours of the last two nights to hear what the gentleman from California (Mr. ROYBAL) has gone through trying to make some points to the public and to this body about what is in this bill. I think he is entitled to ample pportunity for that.

Mr. Chairman, will the gentleman yield to me?

Mr. ROYBAL. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

Let me suggest to the gentleman that not only is there some confusion about the 90 days, which has now been solved, but there is a little further confusion, at least in my mind, as to the gentleman's amendment because he keeps saying you are simply adding a name and address to the form that is already going to be kept, so there is no paperwork.

The way the bill is drafted, that form which would be designated by the Attorney General is only kept for a successful contract of hire. So to keep the paperwork which would include a name and address is new work to the extent that it applies to one who did not successfully get the job. So that material would then be kept, as the gentleman from California has said, for 3 years.

Mr. ROYBAL. I thank the gentleman for that explanation.

Mr. Chairman, I yield to the gentleman from New York (Mr. FISH).

Mr. FISH. I thank the gentleman for yielding.

Mr. Chairman, that is what I was trying to say, because there is so much misinformation in the record. I was trying to explain exactly what the chairman of the subcommittee has explained. The gentleman asked a question about the relevance of the record-keeping that would be required by this amendment to the verification provision. Compliance with that provision, which begins in the middle of page 4, triggers the affirmative defense.

The verification provision, as the chairman of the subcommittee has pointed out, only requires an employer to verify the eligibility of the person hired. If you have one job and you put a notice in the paper and 100 people respond, the section that the gentleman from California read, at the bottom of page 4, is only applicable to the person that you hire.

The difference between that and this amendment is that this amendment requires that you keep a record on the 99 that you did not hire, for reasons totally unrelated to the purposes of this bill, which has made it risk free for an employer to hire without discrimination.

The CHAIRMAN. The time of the gentleman from California (Mr. ROYBAL) has again expired.

Mr. GONZALEZ. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to tell the gentleman from California (Mr. ROYBAL) that I am only going to use about 1 minute and that I would yield to him to continue his interrogation on the amendment if he wishes. If he does not, OK, then I will use the 5 minutes.

Mr. Chairman, I know from great and personal friendship through the years with the distinguished author of this amendment that he has nothing but the best of intentions. I first knew "GUS" HAWKINS when he was an assemblyman over in California fighting a great battle, and it was he who inherited the Watts rioting and all, and has been at the forefront on this level in fighting for human rights, for civil rights, for economic and basic rights. So I do not think we ought to question any improper motivation here.

However, this amendment, even with the best of intentions, reminds me of what is happening back home in Texas with the new mode of administering the death to those who have been senenced to death. The debate now has been the question of relative humaneness of injecting a poison rather than hanging a guy, or shooting him or frying him or gassing him, whatever you want to call it.

To me it is so ridiculous becasue the big point is the brutality of the death penalty system and how unworkable it has been through the years. The death penalty has turned out to be mostly for insane, incapacitated minorities. Look at the record of the history in our own State of Texas and you will see if the condemned happened to be Mexicans or black or what have you he was hanged or burned by electrocution.

The issue should be the matter of capital punishment. Likewise here, I think, this amendment merely offers an alternative of death in the process of vitiating the basic rights of a free-born American who happens to have a color texture or accent or in a particular regional area gives rise to a presumptive illegality and, therefore, introducing a form of death to that basic right that every American enjoys, at least up to now, with a few exceptions.

You know, we have had some abridgements of rights also in the name of protecting the country from radicals and revolutionaries, or nasty Communists.

□ 1330

We have had the "Red Scare" of the 1920's—the care of Sacco-Vanzetti was a side product of the antialien sentiment existing then. We have had the "Red Scare" of McCarty, and we had wholesale violations in which even Presidents advocated the registration of Americans if they wanted the great privilege of working for the Federal

Government. All we have to do is look at the track record of that, and it is a sorry, sorry page in American history. So, that the amendment, even with the best of intentions intended to soften the adverse impact of the employer sanctions provision in the bill, I think it would be a lot more wholesome if we had an amendment striking this whole section in the bill, as I think somebody has pending, and I am going to wait for that.

But, I think this is also symptomatic of the whole thing that is affecting us in the lawmaking process and as in everything, whether it is the budgetary process, whether it is the defense appropriation issue, where we are totally losing sight of the reality and the imminence of the tremendous burgeoning problems that are hitting us now from south of the border. What we face now in this regard is not reflected in this bill. The burgeoning, snowballing problems now surging on our borders, tragically, are not being addressed in this proposed legislation.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. SHAW. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just returned from the other body down the hall, and I could see the tremendous amount of frustration that was going through that particular body, but I can tell you, it is not anywhere near the frustration that many of us who want an immigration bill now are feeling listening to this charade that this committee is going through in this great House of Representatives. We have now been 1½ hours into the debate, and we only have 2 hours left by the limitations that have been placed upon us. I doubt if there is anyone in this body that is foolish enough to think that this House of Representatives is going to turn out a bill in the meager amount of time that has been left to us.

We first of all saw that the debate on this bill was going on into the wee hours of the morning. That assures minimum participation. We now find that the amendment process, with almost 300 amendments, is confined to just a few hours, and there is nobody who thinks that this body is going to stay in session through the Christmas holidays and into the last days of this year in order to finish up a bill such as this.

The Members have certainly proven one thing, that if they can take up 1½ hours on one amendment without getting a vote they will have little trouble—little trouble in filling 2 short hours with nothing but delaying tactics that will make it impossible for us to get a bill out this year.

I have really nothing to add to the debate on this particular amendment except that I wanted to express my frustration and the frustration of my part of the country that has been victimized for so many years with do-nothing Congresses while the immigration laws of this great country were eroding.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. SHAW. I will be glad to yield to the chairman, who has done a great job, and I believe I did support him, in bringing this important piece of legislation to the floor.

Mr. MAZZOLI. Mr. Chairman, I thank the gentleman for those kind remarks. I mention to the gentleman, of course, having sat here myself last night and the night before and today, I do not think what has been suggested so far is dilatory. I think these are very genuine concerns raised about a very difficult and comprehensive bill. So, it demonstrates one thing about which the gentleman speaks. It suggests the perplexing questions presented to all those who serve on the Committee on the Judiciary, and suggests the fact that we had presented an array of opinion, an array of recommendations, and that all of us reached consensus on what is in the bill today. I think it suggests the great difficulty in making any changes essentially from what is in the bill today.

It is imperfect, as I have said many times, but it is the least imperfect work product that I believe any committee could actually report to the House. So, what the gentleman says is right. I share his frustration and I have spoken on this myself. Members of the committee have worked; people before us have worked long and hard. I wish we could expedite the debate, but I think to do so would be to curtail a free and fair discussion of some very difficult concepts.

I think that the Nation is entitled and the gentlemen who propose these amendments are entitled to have a full expression of their positions being known, but I think in that full expression it is evident to all who have listened that there is a great difficulty in this subject, and I think this committee has done a good job in reporting the bill to the House.

Mr. SHAW. I thank my chairman for those statements.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. SHAW. I will be glad to yield.

Mr. KAZEN. Mr. Chairman, I can appreciate the gentleman's attitude, but I would hope that he would also take into account the way some of us feel and our frustration at this bill having come up at this 11th hour in this lameduck session, and at the same time coming out with a 5-hour rule, which demonstrates the importance of this bill, because there are few bills that come to this floor with 5 hours of debate.

However, this gentleman stayed up until 1 o'clock this morning trying to debate this bill and found myself with only 2 minutes—2 minutes at 12:30 this morning in debate. So, the gentleman can see my frustration when, because the gentleman happens to sit on the committee that brought this bill to the floor, and I am one of those that praised the chairman and the members of the committee for having put so much work into this, but it gives those of us who were not privileged to sit in on the workings of this committee and the formulating of this bill, gives the opportunity to express ourselves. Our only opportunity is on the floor.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(By unanimous consent, Mr. SHAW was allowed to proceed for 2 additional minutes.)

Mr. SHAW. Mr. Chairman, I would like to respond to the remarks that were just made, because I think they are very well taken, and I think it shows and exemplifies the shabby way in which the leadership has treated this particular bill. We have a most important bill that should have been debated for hours on end. The committee has been through with its work for a long time. I quite agree that 1:30 in the morning is not time to talk about something like this. The Members should be here and should be listening to the arguments and thoroughly debating it and considering the many important facets of this bill. The Members have not been given an opportunity to do so.

I am not of the correct party nor the correct seniority to make schedules around here. However, I would suggest to those that are, that they see that this does not happen again with such an important piece of legislation. This affects not only Americans who are already citizens of this country, but those that want to immigrate into our country.

Mr. CONYERS. Mr. Chairman, I move to strike the requisite number of words.

Ladies and gentlemen of the House, I would like to identify myself, given the last remarks of the last speaker, as one of the Members that would like to see immigration reform. I happen to support reform of a racist program of immigration that has been in law and fact operational for a century or more in this country. So, let us not sound so righteous about wanting some immigration reform, sir. We need it more than you do.

Now, the question does not happen to be whether you want immigration reform. It is not whether you want immigration reform or not. It is, what kind of reform do you choose? I would like to suggest to you that the Notre Dame organization which has been pushing employer sanctions for three decades are now at it again.

The gentlewoman from Colorado found something good that Notre Dame had done. The question here, sir, is whether you are now going to run through employer sanctions after they have been turned down in the House of Representatives. That is the heart of this bill, and so I would like to make a plea to the Congressional Black Caucus and the Hispanic Caucus, let us stick together, fellows.

The senior member of the Congressional Black Caucus has introduced a perfecting amendment to employer sanctions, presenting a little bit of a quandary for us. Why do we not keep the thing as bad and brutal and vicious and big-brotherish as it is and vote it down, or should we improve it to make it a little bit more acceptable? Well, this Member had to pause for a moment or two on this, but then remembering that the senior member of the Congressional Black Caucus offered this amendment, my loyalties restored my good judgment, and I am happy to announce that I will support the amendment.

It would not hurt if he would criticize the basic proposal to which he is attaching those perfections. It would make me feel a little bit better if he acted like he was not bringing in a police state on the Hispanics and the blacks in this country. He could act like he is going to vote against the bill if his amendment is not adopted.

The subcommittee chairman could act like he is willing to accept this amendment, but no, we do not get anything. But, let us just argue the fine point of whether you want to sign up everybody, to go into a 3-year protection. Now, everybody keeps a straight face on this, and the Government will destroy the records after 3 years. OK? Do not worry about a thing. You are safe, fellows.

And so it is with great pride and privilege that I join my colleague from California in supporting his amendment.

Mr. SHAW. Mr Chairman, will the gentleman yield?

Mr. CONYERS. Absolutely.

Mr. SHAW. Mr. Chairman, I would like to remind the gentleman in the well who just said that employer sanctions had been turned down by this body, that in the time that he has served in this body it passed this body twice. It was the other body that turned it down. This House of Representatives has passed this particular provision now on two occasions while the gentleman has been here.

Mr. CONYERS. Well, I guess that just goes to show you that I do not have as much influence as some people think.

Mr. WEISS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think that this is an extremely serious policy question, and the debate that we have had over the course of the last couple of evenings and today has been serious. It is regrettable that the time is short, and tempers are getting frayed, and people suggest that those who are directing this matter in a serious manner on both sides are in some way taking up someone else's time unfairly.

This is the only occasion we have to discuss it, and we are doing it. I must say that I do not quite understand the objection that has been raised by the gentleman from Texas on this issue. What the gentleman from California has done has been to take a look at a provision in the bill which I personally find impossible to accept, that is, the employer sanction portion, and he looks at it and in essence through his amendment echoes the concern that minority groups, civil rights groups, people generally throughout this country have expressed concerns about; that is, that employers faced with that sanction provision may, in fact, decide on a wholesale, without exception basis, not to take any chances. The way that they will not take any chances is that they will not hire the minorities in the particular community, which may, in fact, subject them to further governmental action. And so, the gentleman from California has said, "Listen, if that happens, if both aliens who are here legally and American citizens may in fact be denied job opportunities and jobs by the way they look, by the way they sound, then we ought to be doing something to correct that legislation on the premise that if the basic sanctions pass, we ought to be providing some base protection."

His protection, a very modest one, is to require the employer to keep records as to who applied for those jobs so that if it turns out that over a period of time there may have been 1,000 Hispanics who applied for 100 jobs, but that only 100 non-Hispanics were hired, that there is some way of establishing that. Otherwise, there would be no record whatsoever.

□ 1345

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I am delighted to yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I have the utmost respect and admiration for the distinguished gentleman from California and for my dear friend, the gentleman from New York (Mr. WEISS). But my concern is this: I wonder what the gentleman would have thought about it if 40 years ago in a country in Europe the Government said it was going to have another list that had names, addresses, religion, and color on it? What would the gentleman have said 40 years ago in the country of Germany when the Government was asking for another list with names, religion, and color? Would he have agreed to it at that time?

Mr. WEISS. Mr. Chairman, it is a serious question and I want to give the gentleman a serious answer. To some extent I have an advantage over many of the Members in this body. I can prove my citizenship because I am a naturalized citizen. I have the proof, like the person perhaps who can demonstrate that he is sane because he has got a certificate of release.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. WEISS. Mr. Chairman, I want to complete my answer first.

What I am opposed to is the basic employer sanction. What I am opposed to, to use the gentleman's analogy, is whether, in this country or in Germany of 40 years ago, there might be a policy which would encourage employers to say, "we are not going to hire Jews because if we hire Jews, we are going to get into trouble."

What we are doing here in this legislation is encouraging people not to hire Hispanics or blacks, because if they do so, they may possibly get into trouble.

I am for striking that whole provision, but in the event that provision remains in the legislation, we ought to be able to prove that in fact deliberate discrimination has taken place. I do not see why there is anything wrong in an effort to prevent discrimination or to punish discrimination.

The CHAIRMAN. The time of the gentleman from New York (Mr. WEISS) has expired.

(On request of Mr. DE LA GARZA, and by unanimous consent, Mr. WEISS was allowed to proceed for 2 additional minutes.)

Mr. WEISS. Mr. Chairman, I do not see anything wrong with an effort which says that in the event that basic sanction provision remains in the legislation, then we want to be sure that we can establish that discrimination has or has not taken place. That is what the amendment is about, and I would think that the gentleman would want to support that rather than oppose that.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I agree with the gentleman on the intent, but that is not the fact. I would like to tell the gentleman that once he received the blessing of becoming a naturalized citizen, I think it is not then incumbent upon the gentleman to have to prove that he is legally here. The burden should be otherwise. That is what the sanction does.

Mr. WEISS. Mr. Chairman, if I could recapture my time; that is right, that is what the sanction does, and the

gentleman can defeat the amendment that is on the floor before us and that is still what the sanction will do. What the gentleman from California offers is an opportunity to prove that discrimination has taken place.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I am pleased to yield to the gentleman from California.

Mr. DE LA GARZA. There were other avenues and other areas. I agree with the gentleman that the sanctions are bad enough, but the gentleman from California is adding to those problems. My main concern again is that we are going to put a list in the hands of a Federal agency, a list that is needlessly used.

Mr. WEISS. Mr. Chairman, I have heard the gentleman say that. If I may recapture my time just briefly, I want to tell the gentleman that the experience that was recounted by the gentlewoman from Colorado (Mrs. SCHROEDER) is a very real one. It has happened not just in Colorado; it has happened in my district in New York, where people who were obviously Hispanic by appearance and by accent were stopped in subway cars, in restaurants, and driving taxicabs. These are only Hispanic-appearing people, and they were questioned by the Immigration and Naturalization people.

The CHAIRMAN. The time of the gentleman from New York (Mr. WEISS) has again expired.

(By unanimous consent, Mr. WEISS was allowed to proceed for 1 additional minute.)

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield at that point?

Mr. WEISS. First let me complete my thought.

There is a very serious danger inherent in the sanctions provision. The hope and expectation is that that provision can be stricken from the bill. But in the event we are not successful—and it is important to point out to the body that it has carried twice already—it seems to me that the amendment offered by the gentleman from California (Mr. HAWKINS) is absolutely essential to demonstrate to those who would discriminate that in fact they are going to get caught or at least there is a likelihood that they are going to get caught.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I am delighted to yield to the gentleman from California.

Mr. DE LA GARZA. Mr. Chairman, I would say to my dear colleague that I have no disagreement in that aspect, but I am again saying that the gentleman's concern about the possibility of discrimination is minimal compared to the potential for mischief when we make another list available of all those people whom the gentleman and I wish to protect. Then they get stopped on the subway, they get stopped on the metro, because they are Hispanics. We are putting them on another list just because they go out and apply for a job.

The CHAIRMAN. The time of the gentleman from New York (Mr. WEISS) has again expired.

(By unanimous consent, Mr. WEISS was allowed to proceed an additional 30 seconds.)

Mr. WEISS. Mr. Chairman, the gentleman and I, I guess, can continue to chase one another's tails around on this particular issue for some time. The gentleman believes that more mischief will be created by requiring employers to keep a record which can demonstrate whether in fact they have discriminated or not, and I think that more mischief is created if that is not done and the sanctions provision is kept in this legislation.

Mr. HANSEN of Idaho. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I appreciate what the gentleman from Florida (Mr. SHAW) stated about a charade, and I appreciate a lot of the other comments that have been made about the time. I was here also last night into the wee hours. I appreciate what was said about the time constraints and all these things. But I think we see something else here, some concerns that have never really struck the committee, like what is being imposed here now upon those who would have to live with the impact of such a law.

There are those who go to the border and they see things, and they become instant experts, but they do not have to live with the impact of such legislation as this. I have heard the chairman of the full committee state that they can go to the courts and they can get redress.

Mr. Chairman, I have seen evidence that when there has been abuse of people's rights, they go to the courts and it costs them money. I have seen cases where people can be deprived of justice because the Immigration Service could hustle off the witnesses where there has been abuse of an illegal alien, and they can send him back to Mexico, and they could not do anything about it. I have seen cases of even murder. I have seen cases where young farmers on this sanction type thing have been put to the test because of the entrapment operations of the INS and the Federal court threw out what the INS was doing. And I have seen where it would cost as much as $40,000 to prove they were not doing wrong.

Mr. Chairman, I have seen certain circumstances where these things happened. For instance, I would like to recite from the grand jury testimony by a man by the name of Willie Garcia, who was a witness just a year ago and who stated: "my position now is as a criminal investigator assigned as an antismuggling agent." Six pages later this antismuggling agent is talking about being in Mexico smuggling Mexicans into the United States.

I have not seen the committee address this. I have made this available to the committee, to the Department of Justice, and so forth. I have not seen anyone who wants to address the fact that the Department of Justice and the Immigration Service are not acting according to the laws passed by this body.

If we give more sanctions and more authority, what is going to happen?

My colleague, the gentleman from California (Mr. LUNGREN), has said, "well, what the border patrol needs is more men." Well, do they need more men being in Mexico to send more people up here to trade like cattle? Is the Government doing it? That is what we are talking about.

I checked with the Mexican authorities and the Ambassador, and I checked at the Capitol in Mexico City. There was no authority for American immigration agents to be operating inside Mexico. How would the U.S. Government like it if Mexican agents were operating inside the United States smuggling Americans like cattle 1,000 miles into Mexico to trade them? There would have been a terrible uproar in this country.

And all of this is at a time when our own President Reagan was trying to establish decent relationships with President Portillo Lopez. It could have been highly explosive and highly embarrassing. It just seems to me it is time for us to stop and think what we are doing. We hear the fact that we are opening the gates for selective justice, selective justice by an Immigration Service that wants to single out someone and say, "we are going to make an example of you." There is nothing to get people's attention more than to be standing in line and having someone come along and hitting one of them over the head with a baseball bat. They make their point that way. Everybody else understands that if they got his attention, they can get yours. That is what happens.

This list business that the gentleman from Texas (Mr. DE LA GARZA) has been talking about is, I think, absolutely important to address. I have had the Internal Revenue Service in my own district take lists of people with driver's licenses, check them against their own, and go door to door, plan door-to-door operations at gun point to check it out to see if people filed their income taxes. And that is documentable.

My point is that the existence of lists in the hands of Government is a very dangerous thing sometimes, and I think the gentleman from New York (Mr. WEISS), who was in the well a moment ago, certainly understands

that. The point was brought out very well about what Government can do and what governments have done. That can lead to a great degree of mischief.

I think that is very important, and I have an amendment to address that. I say that we should strike this business of sanctions or lists, or otherwise we are going to dedicate this country to something that I do not think any of us can stand or any of us want, and that is an absolute set of second-class citizens and second-class human beings if the Government would enforce this kind of condition.

Mr. PEYSER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I am pleased to yield to my friend, the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I rise in support of H.R. 7357, the Immigration Reform and Control Act of 1982. I would like to commend the Subcommittee on Immigration, Refugees, and International Law and its chairman, ROMANO MAZZOLI, for their tireless efforts to bring this bill to the floor. I would also like to praise the chairman of the House Judiciary Committee, PETER RODINO, for his work on this issue. He has been spearheading proposals for effective immigration reform for many years.

Immigration has become a vexing national problem, reaching crisis proportions. The Census Bureau estimates that between 3.5 and 6 million illegal aliens currently live in the United States, and other estimates place the illegal alien population at up to 10 million. Many of these people have made tangible contributions to our society, yet, as the New York Times recently noted, they are forced to live under a "cloud of exploitation and fear." The Times also noted that some of these people take jobs that might otherwise go to poor Americans "and extract a price in public tolerance."

H.R. 7357 addresses the serious problems inherent in illegal immigration and at the same time acknowledges the importance of legal immigration and family reunification. It is a carefully constructed compromise that will stem the tide of future illegal immigration while recognizing the humane and practical need to grant amnesty to those aliens who have been here for years.

As one who strongly believes in the concept of family reunification as part of our immigration policy, I was involved in the early stages of this legislation. As introduced, the Simpson-Mazzoli bill eliminated the fifth preference of immigration categories for brothers and sisters of U.S. citizens. Fifteen of my colleagues joined me in a letter to the bill's sponsors, urging them to reinstate the fifth preference. In this letter we reiterated the testimony of the American Committee on Italian Migration:

> For Italians and for many other ethnic groups, brothers and sisters are an integral part of the family reunification concept. Elimination of that preference category would violate a sacrosanct right of an American citizen to live with his family according to his own tradition and lifestyle.

We also noted the inequity in forcing those who wish to legally emigrate to the United States to bear the brunt of our sanctions against illegal immigration.

I am delighted that the full Judiciary Committee reinstated the fifth preference. The crucial concept of family reunification will continue to be a cornerstone of U.S. immigration policy.

I am also pleased that H.R. 7357 contains a provision to permit aliens who entered the United States illegally prior to 1977 to become permanent resident aliens, and allows those who entered the U.S. illegally prior to 1980 to become temporary resident aliens.

This legalization program is supported by former Presidents Ford and Carter, and by President Reagan as well, as the only practical and humanitarian way of dealing with the millions of undocumented aliens now in the United States. In this regard I would commend to the attention of my colleagues an excellent "Dear Colleague" letter circulated by my good friend and distinguished colleague from New York, Representative SHIRLEY CHISHOLM. In her letter she notes:

> To seek to deport (illegal aliens) would uproot large numbers of people who have built up equities in this country, sever close family ties, and present the danger of serious civil rights violations. Surely, the last thing our country needs, at the present time, is a cruel campaign against a significant minority population.

Just as I could not support this bill if the family reunification concept was eliminated, I could also not support it if the amnesty provision was deleted leading to such a cruel campaign against minorities.

H.R. 7357 also makes it illegal to hire, recruit, or refer for a fee, illegal aliens for employment in the United States. I support employer sanctions as a practical way of stemming the flow of undocumented immigrants who compete with U.S. citizens for jobs. This provision is a vital complement to the legalization proposal, especially at a time of grave economic distress throughout our country.

I understand the concern that employer sanctions may result in discrimination because employers may refuse to hire foreign-looking workers for fear of incurring penalties. In order to prevent such abuses, I will support amendments by the Education and Labor Committee which provide redress for job applicants who can prove discrimination. I also believe that merely asking job applicants for proof of citizenship is not an onerous task, and records employers will have to keep to show they have not discriminated can be easily maintained.

This bill is an equitable, carefully constructed, necessary package of immigration reforms. It is vital if we are to maintain control over our borders while recognizing the profound and lasting contributions the immigrant community has made to our society. I urge my colleagues to support this reform with both the legalization program and employer sanctions.

I am including in today's RECORD a copy of the letter which I sent to Chairman RODINO concerning family reunification as well as a letter which my colleague from California Representative DAN LUNGREN, and I circulated to all of our colleagues:

HOUSE OF REPRESENTATIVES,
Washington, D.C., June 15, 1982.

Hon. PETER RODINO,
Chairman, House Committee on the Judiciary, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: We are writing to express our deep concern for a provision in the Immigration Reform and Control Act of 1982 that would severely weaken the fifth preference of immigration categories. We urge you to fully reinstate the fifth preference when your full Committee conducts a markup on the bill.

As you know, the fifth preference is directed at brothers and sisters of U.S. citizens who wish to emigrate to the United States. As introduced, the immigration Reform and Control Act of 1982 would have completely eliminated that preference, thus curbing and restricting the rights of Americans to become reunited with their families in the United States.

Sixteen House Members wrote to the Chairmen of the House and Senate judiciary Subcommittees with jurisdiction for the bill urging that the legislation be amended to restore the fifth preference. We were pleased to learn that, indeed, the House Subcommittee on Immigration, Refugees and International Law did provide for a partial reinstatement of the fifth preference. As reported by the subcommittee, the preference will be maintained only for unmarried brothers and sisters of U.S. citizens who wish to come to the United States and married siblings who have already applied. The amended bill would continue to eliminate the fifth preference for married brothers and sisters of U.S. citizens who have not already applied.

We commend the subcommittee for this partial reinstatement and greatly appreciate the responsiveness of its Chairman. We continue to believe, however, that a full restoration—for married as well as unmarried individuals—is necessary.

As was pointed out in a previous letter to Senator Simpson and Congressman Mazzoli:

> There is little economic justification to abandon the fifth preference. Brothers and sisters of U.S. citizens have the support of their families here, and generally do not require public assistance.

The fifth preference is a reflection of the family reunification concept—an important component of our immigration policies. As the American Committee on Italian Migration recently testified:

"For Italians, and for many other ethnic groups, brothers and sisters are an integral part of the family reunification concept. Elimination of that preference category would violate a sacrosanct right of an American citizen to live with his family according to his own tradition and lifestyle."

Proponents of eliminating the fifth preference have argued that retention of that preference will cause serious backlogs. For the vast majority of those who rely on the fifth preference, however, living with a backlog is certainly preferable to living with no prospect of immigration whatsoever.

We recognized the need for reform in our immigration policies, and understand that the Immigration Reform and Control Act goes a long way toward that end. We also believe, however, that family reunification should have a priority in our immigration policies. We therefore urge you to complete the restoration of the fifth preference in the full judiciary Commission markup of the Immigration Reform and Control Act.

We appreciate your attention to this urgent matter.

Mike Lowry, Jonathan Bingham, Bob Edgar, Richard L. Ottinger, Silvio Conte, Thomas Foglietta, Harold Ford, Ted Weiss, Leo Zeferetti, Norman Mineta, Phillip Burton, Guy Molinari, Matthew McHugh, Frank Annunzio, Sam Gejdenson,
Members of Congress.

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 17, 1982.

DEAR COLLEAGUE: Today the House will consider H.R. 7357, the Immigration Reform and Control Act of 1982. In this regard, we commend to your attention the lead editorial in the New York Times of December 16.

H.R. 7357 as reported is an equitable and necessary package of immigration reforms. The bill recognizes the importance of legal immigration and family reunification; contains methods to decrease future illegal immigration; creates potential employment opportunities for American workers. It also recognizes that aliens who have been here illegally for years have already made contributions and have been productive members of our society. As the editorial notes, they should now be freed from a "cloud of exploitation and fear."

We urge you to support this carefully constructed measure.

Sincerely,

DAN LUNGREN,
RICHARD OTTINGER,
Members of Congress.

IMMIGRATION AND PURITY

What do good conservatives think about immigration? The same thing, chances are, that good liberals do. Probably no issue lends itself less to partisan ideology—or attracts more centrist agreement. Yet paradoxically, that very quality explains the peril hovering over the immigration bill to come up in the House today.

The Senate overwhelmingly approved the bill last fall, and by every sign the House would do the same if only there is a vote today. But that may not happen; this painfully achieved proposal is not pure enough for extremists on both ends. If they succeed in drowning the bill with dozens of perfectionist amendments, the opportunity of a generation will sink with it.

Unlimited immigration was a need, and a glory, of the undeveloped American past. Yet no one believes America can still support it. We must choose how many people to admit, and which ones. That can be done only if we can control the borders. Otherwise, a population troubled by hard times will slam the Golden Door. As the Senate debate demonstrated, there's a rising, ugly nativist sentiment to keep out not only the illegal gate-crashers but also legitimate entrants like the sister from Italy, the refugee from the Soviet Union, the physician from Nigeria, the grocer from South Korea.

To do that would defile America's historic image; worse, it would do practical harm. All Americans prize the vitamin shots of energy, ambition and skills that legal immigrants keep injecting into our society. But illegal aliens take jobs and social welfare funds that might otherwise go to poor Americans—and extract a price in public tolerance.

The surest way to avert the rising exclusionist sentiment is to pass the carefully balanced Simpson-Mazzoli bill. On the one side, it meets a humane need; amnesty for illegal aliens who have been here for years. That is essential, if only to free them from a cloud of exploitation and fear. But without tougher enforcement amnesty would only encourage more illegal immigration.

That's why the bill would also create a practical form of enforcement: through employment. At present, if an employer hires illegals only they are subject to prosecution. The Simpson-Mazzoli bill would make the employer culpable too. In time, that would turn off a powerful magnet.

Could the bill be improved, by liberal or conservative lights? Obviously, and that's exactly the point. To have gotten this far, any immigration bill would have to be a compromise—and this is an honorable one. Yet at five minutes till midnight, purists still insist on making the best the enemy of the good. Simpson-Mazzoli deserves to be called a reform bill. The next immigration bill, if there is one at all, could warrant a much uglier adjective.●

Mr. PEYSER. Mr. Chairman, in one sense I am sorry that I am taking the floor at this time because we have reached the point obviously where there are very few Members to speak on this particular amendment.

I want to speak briefly on this amendment because I believe it deals with protection of the people who are most affected by this legislation. I have listened with interest, of course, to my friends from Texas who have discussed this from another point of view, and their problem is obviously a serious one.

However, on balance I would have to come down on the side that says the best effort to protect the people is to support the amendment offered by the gentleman from California (Mr. HAWKINS).

Now, due to the procedure that we are in today and due to the time constraints of this committee rising at about 3:30—which is what my understanding is at this time—one of the things that I wanted to be sure was acted on in this bill, that dealing with the protection of an individual in a certain group is not going to be coming up. In a very practical sense, we are not going to have time to reach this amendment, and yet it is an amendment that, just by its passage, regardless of what happens to the bill, would have a profound impact on someone in this country whom many of us have followed for the last year and a half and who is facing a very distinct problem. The person I am talking about is a young Ukrainian boy whom many of us met just a few months ago here named Walter Polovchak.

Walter Polovchak's case is now in the Supreme Court of Illinois. The amendment that was to be offered is an amendment that would simply say that where the Federal Government of the United States of America granted asylum, he could not or she could not be forced involuntarily to leave this country. And yet that is surely conceivable in the case of Walter Polovchak at this time.

I believe it is a very essential interest of this Congress and an interest of the Federal Government to say that when, in the wisdom of the Federal Government, asylum is granted for political or religious reasons, a locality should not be able to override that decision of the U.S. Government.

□ 1400

It had been my hope to be able to offer this amendment, and just the passage of it—and I am convinced it would be passed—would be a clear signal to the courts in this case in Illinois as to what the Congress felt on this issue.

I have asked my good friend from Illinois (Mr. ANNUNZIO) to carry the ball on this case next year because it is obvious that we are not going to reach a conclusion here, as he is very interested in this case and he is going to do that.

However, the best I can do at this point is to say for the Record that it is very clear in my mind that if the Congress today could act on this amendment that they would pass it.

I do want to take just a minute and a half, which is about what it is going to take me, to read part of a letter from the wife of Alexandr Solzhenitsyn, Natalia, on the subject of Walter Polovchak on what this whole thing means.

In speaking of Walter she says:

If I had not already known many situations before this when the deepest naivete of some responsible Americans—together with the kindest and even highest intentions on their part—lead to brutal consequences, I never would have believed that adults living on our planet in the 20th century might seriously consider the possibility of returning the boy to the U.S.S.R. against his will. After all, this is not a puppy, not a kitten, this is a being possessing a soul—and it is precisely on his soul, on his free will, and not on his hands and feet that the enslaving Government of the U.S.S.R. is laying claim.

The CHAIRMAN. The time of the gentleman from New York (Mr. PEYSER) has expired.

(By unanimous consent, Mr. PEYSER was allowed to proceed for 3 additional minutes.)

Mr. PEYSER. Mr. Chairman—

Of course in this instance it is easy to object that, in principle, a rational society should not support the rebellion of children against their parents. I myself consider that the family might well be the most important structure of society, and by weakening it and destroying it as an institution humanity is threatened with immense calamities. In our own family my husband and I try to bring up our children with complete respect toward their elders and with a consciousness of the extreme importance of continuity and tradition in the life of human kind.

But all these considerations make sense only for those societies where the family is at least partially independent from the state. In the U.S.S.R. for many decades already the family is deprived of its rights just as much (if not more) as any individual citizen. Consider the countless instances when the state has taken children away from their parents (formally!, "legally"!), for example, because of religious education. In case of divorce, that spouse who wanted to and was able to prove that the other spouse is not 100 percent loyal to Soviet ideology would immediately receive rights to the child without any consideration.

The letter goes on, Mr. Chairman, to state that it would be their hope that this Congress in its action would never take a step that would end up in the returning of this young man against his will to the Soviet Union.

I have interviewed, and many of my colleagues have heard the testimony of a high KGB official who has defected to the United States, who met with me and indicated that what would happen to this young man if he was returned is that he would go under the control of the KGB and, in effect, his life would end.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I am happy to yield.

Mr. AuCOIN. Mr. Chairman, I appreciate the gentleman yielding and I appreciate his remarks.

I rise in support of the amendment. I want the record to show that I oppose employer sanctions and oppose the bill.

Mr. Chairman. When I arrived in the House, nearly 8 years ago, this body was engaged in one of its most honorable eras—an era devoted to human and civil rights that produced some of the greatest humanitarian legislation in history.

It has been among my greatest pleasures, and rewards, to have helped shape and preserve some of those bills. And having come through that experience, I am extremely distressed that the House is now considering a bill, H.R. 7357, that beyond any doubt will result in renewed discrimination against minorities, on the basis of skin color and accent—despite the sincerest good wishes of the prime sponsors.

Look at the question of employer sanctions. under this bill, any employer who hires an illegal alien faces a heavy fine. Well, how is one to know that a potential employee is, or is not, illegal? How is the employer to determine the validity of a green card? And where is the burden of proof? H.R. 7357 leaves it very unclear.

Employer sanctions are a serious affront and threat to the civil rights of minorities. Employers are going to be extremely hesitant about hiring anyone who might look like an illegal alien. And who is it that might look like an illegal alien? These are not the white faces in this country. It is the Hispanics, the Chinese, and the Southeast Asians who will face very serious job discrimination under these sanctions.

Further, I am also disturbed by the contentions that this bill is somehow a jobs bill. I would like to call your attention to the INS project known as Operation Jobs, because I believe the failures of this operation show us what we can expect if this bill passes.

During Operation Jobs, INS ousted undocumented workers from their jobs and offered the jobs to out-of-work Americans. But when the jobs came open, American workers refused to take them. They regarded the work as dirty and the pay as meager.

As a provider of jobs, Operation Jobs was a disaster. And that is exactly what we can expect from this bill. Sanctions will not create jobs; but they will cause discrimination.

There is another point that makes this bill repugnant—the proposal for development of a national employment verification system. I regard this as nothing less than the first step in the creation of an internal passport.

All of my concerns have been highlighted in the Wall Street Journal and the New York Times and I would like these articles included in the CONGRESSIONAL RECORD.

[From the Wall Street Journal, Dec. 5, 1982]

"DIRTY WORK": AMERICANS TURN DOWN MANY JOBS VACATED BY OUSTER OF ALIENS

(By Merle Linda Wolin)

When the U.S. Immigration and Naturalization Service launched "Project Jobs" last spring, its aim was to oust undocumented foreign workers from "better" jobs and thereby open employment opportunities for out-of-work Americans.

In the well-publicized crackdown during the last week in April, agents in nine major cities arrested 5,440 aliens at 560 different work sites. Operating on the assumption that unemployed U.S. workers wouldn't take jobs at the lowest level, agents largely ignored aliens working as busboys and field hands. The aliens seized in the raids had been earning an average wage of $4.81 an hour.

Joseph Salgado, associate commissioner for enforcement at the immigration service and mastermind of the project, hailed the raids as an "unqualified success." But then, over the summer, the aura of success faded as academic and newspaper surveys in cities such as Los Angeles, New York, Houston and Detroit indicated that most of the vacated positions were once again filled by the arrested aliens or their counterparts.

What went wrong with Project Jobs?

The answer to that question is particularly relevant as suporters of the controversial Simpson/Mazzoli bill push for its final passage during the current lame-duck session of Congress. The proposed law, which cleared the Senate in August and possibly will go before the House this month, makes it unlawful for employers to knowingly hire illegal foreign workers and grants amnesty only to those undocumented aliens who were in the U.S. before 1980.

SHAKY HYPOTHESIS?

According to its supporters, the proposed law could create an estimated one million to two million job opportunities for unemployed Americans. But for the legislation to work, Americans must be willing to take the jobs now held by illegals and stick with them—a hypothesis that is contrary to much available evidence. Most local and regional studies, for example, show that the estimated 3.5 million to six million undocumented workers in the U.S., constitute a largely unskilled work force holding jobs that most Americans don't want. And in 1980, the Select Commission on Immigration and Refugee Policy, a blue-ribbon task force appointed by President Carter, concluded there is no strong evidence to support either the idea that illegals take away jobs or, more importantly, that Americans want the work.

And then there are the results of Project Jobs.

Interviews with 26 randomly chosen employers hit by the immigration-service raids in five major cities indicate that nearly all the U.S. workers who took the vacated jobs in their operations left within days. But numbers don't tell the entire story. More revealing are conversations with some of the Americans who actually tried the work and left—conversations that suggest why at least some U.S. workers don't want the so-called better jobs held by illegals, even in times of double-digit unemployment.

DEAD-END JOBS

The 19 workers who were interviewed were culled from employer lists of former workers. Most of those interviewed say they spurned the jobs mainly because they considered them dead-end, demeaning and underpaying. But they also left because they had a backup source of support such as welfare or family. All say they believe Americans simply don't want such jobs (although some say they would reconsider if the pay were better).

Some of those who have studied the U.S work place suggest that unemployed Americans don't want certain jobs because of certain broad, sociological factors. "We simply don't bring up our children to be manual-service workers." says Wayne Cornelius, head of the center for U.S.-Mexican studies at the University of California at San Diego. He speculates that Americans who took positions opened by Project Jobs and then abandoned them might have been influenced in part by the weakening of the belief that hard work is the vehicle for upward mobility, by rising levels of education in the U.S. and by rising occupational expectations.

The kinds of positions opened up by Project Jobs were viewed as "Mexican jobs or Haitian jobs," Mr. Cornelius says, adding

that he thinks a certain stigma is attached to work held by foreign laborers. He says further: "The attitude is this is the dirty work of society and that people born, brought up and educated in the U.S. shouldn't have to do them."

TALES OF FIVE WORKERS

The stories of five U.S. workers who gained employment as a result of Project Jobs and then left their positions are illustrative. One of those workers is Fred Luttjohann, a 35-year-old Californian who took a job created by the raids on a furniture-assembly line only to quit after two and a half weeks. "I wouldn't have stayed even if the money was better," he says, noting that he earned $3.50 an hour. "I knew what I was getting from the beginning. It was the work."

Mr. Luttjohann, a former carpenter, agreed to work at B.P. John Furniture Co. in Santa Ana because he had been unemployed since December 1981 after a five-and-a-half year job. "I got tired of doing nothing all day, just watching TV," he explains, sitting on the patio of his parents' small, comfortable Orange County home.

A soft-spoken, divorced father of one daughter, Mr. Luttjohann says he has been living with his parents since he was laid off last year. At the time he took the assembly-line job, he says, he was drawing $520 in monthly unemployment-insurance benefits—$80 more than his B.P. John take-home pay.

At B.P. John, a budget- to medium-priced furniture maker, Mr. Luttjohann and about 400 other workers—most of whom, he says, couldn't speak English—worked 10-hour days, four days a week. His task was to stand alongside a conveyor belt and put drawers in cabinets. By the third week, he was spent. He says the cabinets rolled too quickly down the line to put in the drawers and there was no help. After lunch on the 13th day, he quit.

"I told the foreman, 'I can't do this anymore,'" he says. "My arms are tired, my back is tired. For what you're paying me, and for what I'm doing, I just can't do it."

Four months after he left B.P. John, Mr. Luttjohann landed a $7.18 an hour, part-time job as a bus driver for an elementary school in Huntington Beach. He holds that job today; he likes the work, he says, because he gets along with children and because he likes to drive. "It all turned out for the best," he says.

The Cooper brothers of Houston say the main problem with the jobs they took in the wake of the raids was more with the pay than with the work itself. "It was too much hard work for cheap pay," says Billy Wayne Cooper, 23, of his $4 an hour job repairing railroad tracks for Earl Campbell construction Co. "I could've slung hamburgers and made more money than that, out there in the hot sun driving picks."

Terry Cooper, Billy's 20-year-old brother, took the same job A former truck driver who had earned $5.50 an hour, he says: "I was desperate for a job. But the day they work you eight hours a day, that work is worth $12 an hour. . . . We were like dogs out there. I ain't never been in prison, but it felt that way."

After two days working at what they both described as "hard labor," the Cooper brothers quit. "I would've stayed if they paid more," Terry Cooper says. Billy Cooper, also a former $5.50-an-hour truck driver, says: "You can't live on $3.50 an hour. Maybe Mexicans can, liying four to five families in one house. But on that, no way we could live by ourselves."

Both men say they took the work only because they had been unemployed for several weeks before the raids and couldn't find jobs. After they quit, they say, they each depended on savings and part time jobs. Then in June, Terry landed a $6.50-an-hour job on a Harris County park-maintenance crew. "You couldn't chase me off the work," he says. A month later, Billy found another truck driving job, also for $6.50 an hour."I earn more money now, and it's not near as hard work," he says.

Another Houston worker, Timothy E. Cochran, spurned work created by the raids more because he didn't like working with Mexicans than because of the job or the pay. The 19-year-old accepted a $4.20-an-hour an hour tree-trimming job at Trees Inc., a large concern that keeps branches away from electrical lines for the utility and telephone companies. After two weeks of climbing trees and hauling brush, he had had enough.

"Just too dangerous." Mr. Cochran says of the work, noting that he simply walked off the job. But in further conversation, he repeatedly makes remarks indicating he quit mainly because he was disturbed about working with Mexicans.

Sitting shirtless in a rickety wooden chair in the small, cluttered living room of his mother's house on Houston's North Side, Mr. Cochran frequently disdains his former co-workers as "wetbacks" and claims they weren't as scared of climbing trees as he was "because they were too stupid." He also seems to have been offended by the fact that co-workers spoke Spanish. (Although he makes contemptuous remarks about blacks, he says he would rather work with them than Mexicans because "at least they speak English.") And he says the only way he would ever go back to Trees Inc. is if the Immigration Service "hauled off all the wetbacks" and the company "started having some white foremen."

"A few Spanish ain't bad," he says. "But overdoing it is overdoing it." (Mr. Cochran says his foreman was white.)

Since his work at Trees Inc., Mr. Cochran says he has held a few odd jobs and earned other money repairing a few cars. "Finding jobs is no problem for me," he says. "The problem is finding one that suits me." He currently lives with his parents who support him. In the future, he says, he plans to get married and look for another job. But he asserts he won't accept minimum wage. "That's woman's pay," he explains.

A MATTER OF PRIDE

The current whereabouts of Jerry Goodman is unknown. When interviewed earlier this fall, he was in Chicago. At that time, he admitted that pride got between him and his $4.35-an-hour shipping-clerk's job at Newly Weds Foods Inc., a private food processing plant on the city's North Side. On his third day of work, when there was nothing else to do, he said, the foreman asked him to sweep the parking lot.

"That's when I quit," he said. "I just couldn't live with the thought of others seeing me (sweep the parking lot). It belittled my pride. I considered it slave labor."

Mr. Goodman, a 25-year-old bachelor, said he only reluctantly took the Newly Weds job the day after the immigration raids because he previously had earned $8.20 an hour driving a truck and considered $4.35 an hour too low. But his unemployment insurance of $592 a month had run out, and he had no other income. "I had to settle for it," he said.

The first two days were spent loading and unloading trucks with sacks of flour and other baking materials, he said, and were "tolerable." His co-workers, he said, were mostly Mexicans and were friendly and helpful. He called everyone "amigo."

On the third day, he said, before he quit, he thought about the rigors of unemployment because he knew it would be difficult to find another job; still, he couldn't bear to sweep the parking lot. "That the others could see me—that's what I didn't like," he said.

HARD TIMES

After Newly Weds, however, Mr. Goodman fell on hard times. Without an income, he was forced to give up his apartment, sell his car and furniture and move back home with his parents and five younger siblings. For money, he relied on $144 a month in welfare payments. That amount, he said, supplemented the $197 a month that his parents receive from Social Security and food stamps. "It's been very hard for the whole family," he said.

In early September, Mr. Goodman accepted a 30-day trial for a $3.95-an-hour security guard position with a local company. "Worse than Newly Weds," he said at the time but added that he would try to stay on the job. Since that time, however, he has been unreachable. His parents' phone has been disconnected, and the personnel director of the security company said "Jerry who?"

At the time of his interview with this newspaper, Mr. Goodman said that employers know that if Americans don't take low-status, low paying jobs, "the Mexicans and Puerto Ricans will," And he said he believes the government ought to oust undocumented aliens; the resulting labor shortage, he said, would force employers "to pay more to citizens—to people born here who are entitled to these jobs."

Billy Cooper, the Houstonian, agrees. Creating a labor shortage, he says, is the only way to force employers to pay "a white man's wage." And if employers can't—or won't pay higher wages? Terry Cooper answers that question: "They need to go out of business."

But Fred Luttjohann, the Californian, says that most Americans simply don't want the kinds of jobs that were opened up by the raids. "I wouldn't think Americans would want to do the work," he says about his furniture assembly job at B.P. John. "I wouldn't recommend it for anybody, that's for sure. It's too much work for one person."

[From the New York Times, Sept. 9, 1982]

EDITORIAL

(By William Safire)

WASHINGTON, September 8.—In a well-meaning effort to curb the employment of illegal aliens, and with the hearty good wishes of editorialists who ordinarily pride themselves on guarding against the intrusion of government into the private lives of individual Americans, Congress is about to take this generation's longest step toward totalitarianism.

"There is no 'slippery slope' toward loss of liberties," insists Senator Alan Simpson of Wyoming, author of the latest immigration bill, "only a long staircase where each step downward must be first tolerated by the American people and their leaders."

The first step downward on the Simpson staircase to Big-Brotherdom is the requirement that within three years the Federal Government come up with a "secure system to determine employment eligibility in the United States."

Despite denials, that means a national identity card. Nobody who is pushing this bill admits that—on the contrary, all sorts of "safeguards" and rhetorical warnings about not having to carry an identity card on one's person at all times are festooned on the bill. Much is made of the use of passports. Social Security cards and driver's licenses as "preferred" forms of identification, but anyone who takes the trouble to read this legislation can see that the disclaimers are intended to help the medicine go down.

Most American citizens are being led to believe that only aliens will be required to show "papers." But how can a prospective employer tell who is an alien? If the applicant could say "I'm an American, I don't have any card," the new control system would immediately break down. The very basis of the proposed law is the notion that individuals must carry verifiable papers—more likely, a card keyed to "a new Government data bank"—to prove eligibility for work.

No big deal, say those who consider illegal immigration more fearsome than the coming of an internal passport; if you're legitimate, you shouldn't object. And shucks, law enforcement officials won't use it for anything else, nosirree—at least not until the nation is ready for another legislated step down the staircase.

Most Americans see no danger at all in a national identity card. Most people even like the idea of a piece of plastic that tells the world, and themselves, who they are. "I'm me," says the little card. "I'am entitled to all the benefits that go with being provably and demonstrably me." Good citizens—the ones who vote regularly, and who don't get into auto accidents—might get a gold card.

Once the down staircase is set in place, the temptation to take each next step will be irresistible. Certainly every business would want to ask customers to insert their identity cards into the whizbang credit checker. Banks, phone companies, schools, hotels would all take advantage of the obvious utility of the document that could not be counterfeited. Law enforcement and tax collection would surely be easier, because the Federal Government would know at all times exactly where everybody was and what they were spending.

And then you might as well live in the Soviet Union. One of the great differences between free and enslaved societies is the right of the individual to live and work without the government knowing his every move. There can sometimes be privacy without freedom, as those in solitary confinement know, but there can be no freedom without privacy.

When Patty Hearst managed to remain a fugitive for 591 days, that did not mean the F.B.I. was bad at catching fugitives. It meant that America was a free society. In China or the Soviet Union she would have been captured in days, because it is impossible for ordinary citizens to move about without permission. If our values mean anything at all, they mean that it is better to tolerate the illegal movement of aliens and even criminals than to tolerate the constant surveillance of the free.

The Attorney General, who evidently has no grasp of libertarian conservative principles, will not fight this legislation. When an outside adviser, Martin Anderson—who with his wife, Annelise, at O.M.B. represent what is left of the conservative conscience of the Reagan Administration—objected in a Cabinet meeting to this danger of federal intrusion. William French Smith was forced to tell Congress of "a small but serious objection" to the identity card clause. He later made his objection meaningless by pretending it was "Inappropriate to presume" he would have to do what the bill mandates him to do—come up with a foolproof identity system."

We are entering the computer age. Combined with a national identity card—an abuse of power that Peter Rodino professes to oppose in the House, as he makes it inevitable—government computer and data banks pose a threat to personal liberty. Though aimed against "undocumented workers," the computer tattoo will be pressed on you and me.

[From the Wall Street Journal, Aug. 12, 1982]

EMPLOYERS AS COPS

Small-business men, watch out. A bill coming before the Senate floor would provide you with another regulatory nuisance, without solving the problem it is intended to solve.

The bill is Sen. Alan K. Simpson's Immigration Reform and Control Act of 1982 (a companion bill has been introduced by Rep. Romano L. Mazzoli). It is a complicated bill, with hundreds of provisions including amnesty for illegal aliens who arrived in the U.S. before 1982, as well as a long-overdue streamlining of asylum procedures. But the most important provision, in the view of the sponsors, would impose civil and criminal penalties on employers who knowingly hire illegal immigrants.

The idea is to shift onto businesses the burden of enforcing our immigration laws. The Immigration and Naturalization Service hasn't been very effective in policing U.S. borders or in making sure foreigners don't stay here after their visas expire. So, it is argued, the only way to stop illegal immigrants is to make employers responsible for denying them jobs. But, at best, employer sanctions won't work. At worst, they could be a regulatory nightmare like OSHA.

At first, under the Simpson bill, the obligations on business would only be a slight bother. Every time someone is hired, the employer would have to fill out a form saying he'd seen at least two pieces of identification—Social Security card, driver's license, etc.—indicating legal residence. However, ID cards are easily forged: You can even buy U.S. identification in Tijuana or Santo Domingo. So this rule, while boosting paper and filing cabinet sales, would be completely useless in stopping the hiring of illegal aliens.

The real trouble would begin after three years, when the president would be authorized to introduce some kind of national identification system. The most common proposal is for something like the telephone checking system retailers use for credit cards: Before anyone could be hired, the employer would have to call up a government data bank to make sure the applicant's ID is genuine. A University of Michigan study in the mid-1970s estimated that there are about 70 million new hires a year—which translates into 7,500 calls every hour. If you've had any experience with the filing systems of the Social Security Administration or other government agencies, you can imagine how much fun it will be waiting for an answer.

Big companies would be able to adapt to sanctions. They already have personnel departments that make detailed investigations into job applicants' backgrounds. They have copying machines and hordes of bookkeepers. They have expensive lawyers to make sure the company keeps out of trouble. Perhaps for these reasons, the Labor Management Committee of the Business Roundtable has endorsed the principle of employer sanctions.

But for small companies, without personnel or legal departments, and where the boss is scurrying around so much that he has to make snap hiring and firing decisions, the measure would be a real headache. Unless there is an OSHA-style inspection force ready to barge in on everybody's files, the incentive for most small businessmen will be to ignore the rules.

Even with the penalties, moreover, many businesses—particularly in construction, retailing, hotels and restaurants and light manufacturing—will still have an economic incentive to hire illegal aliens. Often this will be because the work is menial and American won't take it. Sometimes it is because the illegal alien will work for lower wages. Perhaps the major reason is that these are businesses with high worker turnover where bosses must hire people instantly: A building subcontractor doesn't care where you're from when he needs concrete-pourers right away. It is no accident that the greatest number of illegal immigrants have been in the boom economies of Texas and California. Indeed, it is widely believed that both states' economies would have suffered if they hadn't been able to draw on illegal labor.

None of this is to suggest that illegal immigration isn't worrisome. A nation that prides itself on the rule of law can hardly be comfortable when millions of people are breaking the rules. But employer sanctions will not remove the incentives for illegal immigration. Even if they reduce the flow somewhat, the disruption they will cause in small businesses may make the cure worse than the disease.

Mr. PEYSER. I thank the gentleman and I thank all of you for bearing with me on this issue and yield back the balance of my time.

Mr. BADHAM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have been one who has always had the highest respect for the author of this amendment, the gentleman from California (Mr. HAWKINS), whom I have known for many, many years, whose motives have certainly never been impugned, who has, I believe personally, as I believe all of us do, the highest motives in the presentation of this amendment.

Today I have been waiting and waiting, and waiting to hear somebody on the floor of the House of Representatives say just a word for the employer, the small businessman in this country.

I have been waiting for somebody to say just a word about what we are asking employers to do by this legislation.

I think it is ironic that a lot of the nonsense, and I really hate to use that

word in this august Chamber, that has been going on around here has been devoted to jobs and the providing of jobs for people who are out of work, for making things so we can provide a better economy.

Yet here we are meeting today ironically on another bill and we are putting the screws again to the employer.

Our distinguished colleague and my friend from California in offering this amendment I think unfortunately points out what it is that we are doing to the very person in this country who we are asking to provide jobs so people can work, jobs so people can have money to buy Christmas presents, feed their children, send their children to school, and we are putting the screws to them.

First of all, on employer sanctions, we are telling the small business man in this country that, "Oh, yes, you can have an affirmative defense if you can have two or three documents that anybody can get at any dime store or any border town to show that a prospective employee is here and it is really not your fault that you hired an illegal alien, a guest worker, an undocumented worker, or whatever we call them from time to time."

So we put a burden on the employer by saying, "OK, Mr. Employer, you pay taxes, you provide jobs, and now we want you to be a free cop for the INS because we cannot afford a good, solid, complete border patrol to close our borders," which is another situation entirely.

So we take the employer and say, "OK, you can do business, but you are going to be a cop and you are going to keep a bunch of records."

Fortunately, and in one sense I thank the gentleman for his amendment because he has now pointed out what the other side of the coin is and that is we are going to put another burden on the employer.

"OK, you have to be responsible, Mr. Employer, to make sure and to verify that your prospective employee is here legally in the United States of America. If you are in question, you do not hire him."

Now, if this amendment goes through we can have the civil rights folks come in and say, "Well, he might not have been legal," or "He might not have been illegal, but you had no reason not to hire him and, therefore, we are going to slap a discrimination suit on you."

I think it is about time somebody spoke up for the employer in this country and said that enough is enough.

I come from a business background. My family is still in business. They are willing, probably because I am a Member of Congress, to accept these employer sanctions and to do everything they can to insure that right and proper things are done in this area. But please, my colleagues, do you not think enough is enough?

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. BADHAM. I am happy to yield.

Mr. EDWARDS of California. I thank the gentleman from California for yielding. I think his words should be listened to very carefully because there have been several points of view made clear today about the problems, both from the employer and from the employee, the applicant and the alien, or someone who looks a little bit different from the rest of us.

□ 1410

The heart of this bill or, to quote the words of the gentleman from Florida (Mr. MCCOLLUM), the guts and heart of this bill is employer sanctions. And the whole bill rests on employer sanctions, and it is a flawed concept. It has never worked under any circumstances. The committee has no indication that it will work, and yet year after year—and I have been here a long time—it comes up as a solution to our immigration problems.

The CHAIRMAN. The time of the gentleman from California (Mr. BADHAM) has expired.

(By unanimous consent, Mr. BADHAM was allowed to proceed for 3 additional minutes.)

Mr. EDWARDS of California. Would the gentleman not agree that an immigration bill that does not have employer sanctions as the heart of it, that that will be the happy day that we can take progressive steps to resolving this very difficult and important problem of guarding our borders?

Mr. BADHAM. I thank the gentleman for his contribution, and I believe that my statements and the gentleman's statements point out the confusion in this bill and what the proper course is. The unfortunate aspect of this extremely well meant amendment is to make the problems worse and make them bigger.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. BADHAM. I yield to the gentleman from California.

Mr. JOHN L. BURTON. I would just like to say that Hoffman hardware Co. in Orange County for years has been one of the most distinguished small businesses in that area, and I would like to commend the gentleman for his association with it and commend him for his remarks.

Mr. BADHAM. I thank the gentleman for his contribution. It was neither small nor in Orange County, nor is it in business anymore, but I thank the gentleman for his remarks.

Mr. JOHN L. BURTON. Is the gentleman still associated with it?

Mr. LUNGREN. Mr. Chairman, will the gentleman yield?

Mr. BADHAM. I yield to the gentleman from California.

Mr. LUNGREN. I appreciate the gentleman's remarks about the potential problems with this. I would just ask one question. The gentleman from California mentioned that every bill that has come forward has had employer sanctions, it is therefore flawed, and until we come up with another idea, we are not going to have anything fly. That is one of the major problems that we have with that. Everyone is looking for the better, perfect idea. No one has come up with anything other than this, and that is a severe problem. If we want to say that there is no solution that is practical, we ought to say that. We ought to say the borders cannot be patrolled, we cannot do anything about the magnet of attracting people here to the United States for purposes of work, and stop all of the debate and stop us from telling the American public we are gong to do something about it. Unfortunately, they are asking us to do something about it. The problem requires that we do something about it. I appreciate the gentleman's remarks. I wish if there were a better idea that we would have it presented on the floor during this debate.

Mr. BADHAM. I thank the gentleman for his contribution. I think what the gentleman says is entirely correct. I think most people in business who are faced with this, who want an immigration bill that will help to clean up the immigration mess that we have now, would accept, grudgingly, swallow hard, and accept some sort of employer sanctions. It is unfortunate but I think almost necessary.

Mr. PATTERSON. Mr. Chairman, will the gentleman yield?

Mr. BADHAM. I yield to the gentleman from California.

Mr. PATTERSON. I thank the gentleman for yielding.

Mr. Chairman, I want to associate myself with the remarks of the gentleman, in that the employer sanctions segments of this bill hurt not only the employee but the employer. As a matter of fact, by trying to make the employer the enforcing agency, we are in effect going to see that the local government will have a greater burden as well.

As to controlling the immigration problem, it has not been controlled. I suspect all of us, including myself, have been emigrees to this country, and only by bringing about economic development both at home and abroad can we really solve the border problem.

Mr. BADHAM. I thank the gentleman for his contribution.

Mr. FRANK. I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment of the gentleman from California. I think he makes a useful effort to improve on the sanc-

tions, and in so doing I think he helps bring into focus the central issue, and I think it is the one the gentleman from California (Mr. LUNGREN) just mentioned.

This bill looks terrible when you compare it with perfection. If you think about an ideal situation, this bill is about as bad an idea as our being here this afternoon debating it. If you compare it with present reality, it looks a lot better. But most of all, this bill looks good if you compare it with the alternative, because then it wins the heavyweight championship by an absolute knockout in the first second of the first round, because there are no alternatives.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Michigan.

Mr. CONYERS. I thank the gentleman for yielding.

Mr. Chairman, this is the most incredible debate I have ever witnessed on this subject. "There are no solutions to immigration." May I suggest one to the gentleman from California and to the gentleman in the well: How about putting some more guards at the United States-Mexican border?

Mr. FRANK. I will be glad to respond to the gentleman. I am a little bit surprised, but always prepared to be enlightened, to have my friend from Michigan tell me that many, many more police officers are the answer. But I do not think they are. I do not think it worked when Robert McNamara tried it in Vietnam and I do not think it is going to work now. I think that the United States-Mexican border is sufficiently large so that if every potential law enforcement official we could find were put there, it still would not stop it. And in the second place, it is not simply Mexico where this problem arises. We have immigrants from elsewhere as well, who come by boat along a lot of coastline.

We ought to be clear what we are talking about. We are talking about a problem that is a mark of success. We happen to have, with all of our current problems, a very successful economy. There are in this world people of unusual initiative and determination. They are the immigrants. And we ought to be clear that when we talk about employer sanctions, we are, in fact, paying tribute to the immigrants involved. What we are saying—and it ought to be said explicitly—is that these are not people who come here for welfare, these are not people who come here for any kind of a free ride. They are people who came here, many of them knowing very few people in the country, not knowing the language, having no particular prospects, but out of a sense that they want to make themselves better off. It is a very attractive human drive. It is one that we ought to encourage. I am prepared to vote for probably more legal immigration in this Chamber than is feasible politically. I will continue to support immigration.

On the other hand, I think it is clear that it is in no one's interest to have an unlimited stream of people coming here when they come illegally, because they are themselves exploited. The U.S Chamber of Commerce's opposition to this bill is, I think, the most sensible opposition. They, of all people, know what they are about.

They are about trying, I think, to insure a continued source of pretty cheap labor. As long as we have that cheap labor, it will be very difficult for unions to organize as they should, for OSHA to be enforced, for minimum wages to be enforced.

Now, we say: What are the alternatives?

Let us take it first as to the people who are already here. Sealing the borders will not be retroactive. We have a lot of complaints about amnesty, but we have millions of people here who are at issue. Has anyone told us what the alternative for an amnesty or sanctions is? If the proposal is that the alternative is to somehow get them out of here, then I think we have left the realm of reality.

Let us talk first about that part of it. We have got here x million people who are going to be here, they are working, they are here. No one doubts for a minute they will remain. Are we better off as a nation if they remain here in a legal status or in an illegal status?

The chamber of commerce may think it makes more sense to have them here illegally, and probably on the balance sheets it does. But only in that very limited perspective. It is not good for anyone else. Then the question is: What do we do about keeping more people from coming? We could, I suppose, send thousands of law enforcement people back down to line the American-Mexican border. What that would do in terms of civil liberties and in terms of other people who have a legitimate reason to cross, what that would do in terms of expenses to have the Armed Forces substantially down there, I do not know. On the other hand, that only takes care of Mexico. There are plenty of other places in the world where people want to come and share in the prosperity we have had and hope we will have again. It is not simply a problem with regard of Mexico, of people wanting to come here and work. We have people in many countries who are attracted here by the idea that they can do better economically than elsewhere. I want to accommodate as many of them as possible in a legal way. But I do not think we can simply throw open the gates and let everyone come who wants to.

Other than sanctions, which say to people, "You should not hire them if they are here illegally," I do not know what you do.

Now, we are told, "Well, gee, that is terrible to the employer." It is no more terrible than the burden on anyone in this country who sells alcohol. We are doing to the employers here exactly what we do to everybody in this country who has got a saloon or a package store. You have to prove to him or her who owns the store that you are legally eligible to buy. I do not think that produces a lot of discrimination against 18- or 19- or 21-year-olds, depending on the State's drinking age. They have to have the ID.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. FRANK) has expired.

(On request of Mr. FISH, and by unanimous consent, Mr. FRANK was allowed to proceed for 3 additional minutes.)

Mr. FRANK. I think it is important to have a good faith requirement in there so that an employer does not have to become an investigator or a detective. We are not asking the employer to hold the ID up to the light and see if it is counterfeit. We are not asking him or her to doublecheck and say, "Well, are you really here, and did you pay off?" We are asking that the piece of paper be shown, not I think a great burden.

In the average employment application you probably would not be able, without knowing where it was, to find that piece of paper through all of the other pieces of paper that are there. Now, again, it is an unpleasant situation. I wish we did not have all of these people here in an illegal status. That is not good for anyone, most of all them. I wish we did not have the economic imbalances in the world that lead people to keep coming. But what we have got is, I think, a fairly closely reasoned bill, capable of improvement, as in the amendment of the gentleman from California, which I support, and other amendments. But without legalizing the people who are here and trying to remove or at least severely diminish the economic incentive for others to come, I do not think we will do much about the problem. So this will be our last effort, of else it is a valedictory and we can simply learn to live with the status quo

□ 1420

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Michigan.

Mr. CONYERS. I thank the gentleman for yielding.

Mr. Chairman, I want to thank the gentleman for a very cogent argument in behalf of his beliefs about the in-

comprehensible complexity of immigration.

Now, let me just say one thing.

We have got 12 million people here. I support an amnesty provision, like the gentleman from Massachusetts.

Now, the first point of logic on this subject would be trying to stop so many millions from coming in. That is not the end of the solution. It is the beginning of wisdom.

So we have the fact that we ought to have some sort of protective device, so that Members of Congress cannot go down to the Rio Grande and watch people coming over is the beginning of wisdom. But what did we do? We reduced the INS budget and barely got it up to snuff.

In this bill is not one provision for one guard, one piece of material or procedure to improve that.

The second problem, which the gentleman quite eloquently comments, is what do we do with those who are here? I submit to the gentleman that that is a difficult problem. But to mask this on the basis of jobs being lost, has the gentleman got some constituents who want to pick or do that kind of crop stoop labor? I have not got any.

So, let us stop knocking the fact that so many jobs are going to be lost. Because I think, I really——

Mr. FRANK. I never mentioned job loss. If the gentleman wants to debate someone who debated that, I will be glad to help him find that individual. I would appreciate on my time that I be asked to defend what I said. I did not talk about job loss. I did say that when you have people who are here illegally, it is harder to get enforcement of the laws. I did not refer to the job loss, because I think the answer is not to have people fighting over available jobs but to increase them.

Second, I agree with the gentleman. I would like to have amnesty. In the Judiciary Committee I moved with the support of the gentleman for a broader amnesty. I do not like the restriction on one in here. But we would have a hard enough time if we were voting to keep the amnesty we have.

The notion that we could get amnesty without employer sanctions or that we could have employer sanctions without amnesty just is not true. It may no longer be the case that love and marriage go together, but amnesty and sanctions sure do.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. FRANK) has expired.

(By unanimous consent. Mr. FRANK was allowed to proceed for 30 additional seconds.)

Mr. FRANK. Mr. Chairman, just to summarize, love and marriage may have been made separable—to some people's dissatisfaction and unhappiness—but employer sanctions and amnesty are indisolubly linked, if not logically then politically. If we do not have the enactment of both in this bill, we have neither.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from New York.

Mr. FISH. I thank the gentleman for yielding.

First of all, I want to compliment the gentleman. I realize in large part this consideration of the first amendment has served as the forum for the debate that we have missed in the past few months. But I want to associate myself with the remarks of the gentleman. You start off asking what is the alternative to employer sanctions. It was suggested in the debate last night and the night before that enforcement of our labor standards was such an alternative.

I want to ask the gentleman whether he agrees with me that enforcement of our labor standards laws does not rely on massive Federal presence but rather the willingness of workers to file grievances—and in the case of illegal aliens this is totally inadequate because we are generally talking about a group that is unwilling to come forward and file the complaints necessary to trigger the enforcement.

Mr. FRANK. The gentleman is absolutely correct.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. FRANK) has again expired.

(At the request of Mr. FISH and by unanimous consent, Mr. FRANK was allowed to proceed for 3 additional minutes.)

Mr. FRANK. The gentleman is absolutely correct. One of the problems we have got with so-called victimless crimes is that there is no one to report them. You put an impossible burden on any police force, any enforcement agency, if you take away from them reports of crimes.

So that if you have got a subject population in the literal sense afraid to speak up for their rights, then the task of enforcing the laws for them is absolutely impossible. No police department in the world could make a dent in any crime if the subjects who were the victims of mugging, if the subjects who were the victims of robbery or auto theft, if the victims could not report crime you could not do anything about it.

And you have got that particular problem very much here. Without a population that is legally able to fight back, then there is no chance of enforcing any of our labor laws.

Mr. FISH. I realize I have a Member in the well with absolutely impeccable credentials as a civil libertarian. I would like to return to the amendment under discussion, which requires that an employer make a notation of the name and address of anybody and everybody who applies for a job within a 90-day period.

It concerns me that we require this despite the fact that no allegation of discrimination has been made by the prospective employee and no allegation of illegality has been made by the prospective employer. And I wonder just what the relevancy to this bill is of adding this requirement.

Second, would the gentleman consider the question of the possible invasion of privacy when Government entities know how many jobs—and exactly what jobs—you applied for unsuccessfully. What earthly purpose does that serve?

Mr. FRANK. I think the amendment needs some refinement. I say that not critically of the gentleman from California, because I have a version of the same thing later on.

The purpose it serves is the fear on the part of many Hispanics in particular that if you only have to document once you are hired, that that will be a reason not to hire them. Whereas if you in fact require the documentation at the application stage, then you are canceling out a potential differentiating factor and are less likely to have that kind of problem.

Second, it provides a data base to see if there has been discrimination.

If I understand, eliminating the differential paperwork requirement at the outset they think would diminish the likelihood of discrimination.

Mr. FISH. The gentleman realizes discrimination is not an issue in this amendment. This is not a verification amendment. It requires names and addresses. None of the questions are asked under this amendment that go to the issue of your eligibility for employment.

Mr. FRANK. I would apologize. I misunderstood as I read the amendment. My understanding was this was also to require that there be a showing of legal residence—if that is the case, I would have to withdraw what I said.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

Mr. Chairman, I ask for a moment to commend the gentleman on a really brilliant statement. I thank the gentleman as usual—though some of us have little difficult fathoming that staccato rapid fire Jersey Bay State accent—for those of us with trained ears who have been able to understand what the gentleman said, and most of us can, it was a brilliant statement putting it all into perspective.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. FRANK) has expired.

(At the request of Mr. MAZZOLI and by unanimous consent, Mr. FRANK was

allowed to proceed for 1 additional minute.)

Mr. MAZZOLI. Mr. Chairman, what I think the gentleman has said, is, there is a great difficulty in dealing with the subject. He has said in any case the centerpiece of any action has got to be a broad and a generous legalization coupled with indissolubly a very good and tight and fully teethed form of employer sanctions.

The gentleman has stated it. I think really the House has heard in this debate today so far the reason why this bill that has been reported is a good bill.

Mr. GARCIA. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from New York.

Mr. GARCIA. I thank the gentleman for yielding.

Mr. Chairman, I would like to say to my colleague from Massachusetts, with whom I probably have as much in common as anyone here, that the heart of what we are doing here is discussing the possible discriminatory aspects of this bill. It is interesting that even amongst those who are of Hispanic background, and who are part of the Black Congressional Caucus, that we are united in our opposition to this bill.

I think the reason for this is the question of discrimination. But I do not have to tell the gentleman in the well.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. FRANK) has expired.

(At the request of Mr. GARCIA and by unanimous consent, Mr. FRANK was allowed to proceed for 2 additional minutes.)

Mr. GARCIA. Mr. Chairman, I think the crux of what we are talking about is discrimination. And for those of us who have understood it and have lived with it, we do not see a particular aspect of this bill where we are certain that it will not take place. What we are trying to do is to perfect it, to make certain that those of us who represent the new migration—I am certain coming to New York at the turn of the century there were Italians who had their share of problems, Jews who had their share of problems, and it was the La Guardias, in those days, who took the floor of this Chamber, and spoke on behalf of the Italians, and other minorities. Do the same as the La Guardias.

We are charged with the responsibility of being just to the new migrants, whether they be black from Haiti or Hispanic from the Caribbean or from Central America, or Mexico. Yet, I keep hearing from many here, that this is the best we can get.

Well, if the best we can get is going to discriminate against Hispanics and against blacks, then I think that it is not good enough.

□ 1430

Yes; there are parts of this legislation, especially the amnesty program, which are good, but there are persons on that side of the aisle who are going to move to strike the amnesty; it seems to me that unless we can get a solid coalition of individuals who will protect the rights of minorities, then we will not be able to live comfortably with this legislation. If this were to pass, I would not want to come back 1 year or 2 years from now, and neither does anybody in this Chamber, and say, "We made a mistake," because hardship has been caused to people who are black or brown.

So I say to my colleague, the gentleman from Massachusetts, for whom I have tremendous respect, and I am as happy as anybody in the world that the gentleman won this year, because I know he is going to continue to make a good contribution to this body. I disagree with him, but every now and then even the best of us can disagree. I remain firm, however, in my belief that this bill is not good enough.

Mr. FRANK. Mr. Chairman, I thank the gentleman for putting it that way.

The CHAIRMAN. The time of the gentleman from Massachusetts has again expired.

(At the request of Mr. MAZZOLI, and by unanimous consent, Mr. FRANK was allowed to proceed for 3 additional minutes.)

Mr. FRANK. Mr. Chairman, I appreciate very much both the substance and the spirit in which the gentleman from New York made his remarks. I think he has very helpfully defined the issue.

I guess my difference with the gentleman is just on a couple of points. One is predictive ability. Maybe the gentleman thinks that from our perspective, we can do better in the future. I do not.

As far as amendments and further refining this, I would hope we could do that. I supported some which lost in the committee.

I think we ought to be clear that we have a better bill here in the House than they had in the Senate. And I agree that it can be done better by amendments now before us. But I see no chance in the future for a bill with amnesty alone.

When the gentleman said at one point that it has the possibility of discrimination, I guess I am saying that the positive antidiscriminatory effects of amnesty, and I really mean that very sincerely, I think the greatest blow we can strike against actual ongoing degrading and dehumanizing discrimination that is currently in this country today would be in amnesty.

I just do not think we will ever get anything remotely approaching amnesty unless we also have the best possible set of sanctions.

I may be wrong, and as I said, I appreciate the way in which the gentleman phrased it; but that seems to me the choice we have to make here today and I fear that if we do not get one, we will not get both.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, if amnesty is struck out, which is the clear intention of many on the other side of the aisle, where will the gentleman be then?

Mr. FRANK. Against the bill, as I have said on many other occasions.

Mr. CONYERS. I thank the gentleman.

Mr. FRANK. I think we have a very honorable deal here and I think that people would understand that. People on the one side do not like sanctions and on the other side some do not like amnesty; without one we will not have another. What we will have is 8, 10 or 12 million illegal people here and hundreds of thousands, perhaps millions more coming, and I think that is an unfortunate situation.

Mr. McCOLLUM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think that the gentleman from Massachusetts, with the exception which I beg to differ on the amnesty question, has made a very important contribution to this debate by framing the significant policy questions that we face. I think the really big policy question that we have to face is how important is it that we close off the illegal immigration flow across our borders.

How important is it that we gain control of our borders? That is the public policy question.

The additional subquestion is, What price are we willing to pay to do that? Because there is always a price to do something like that.

When we look at the overall picture, I think it is extremely important that we gain control of our borders. I think that with the total numbers that are in here, that is one thing, of illegal aliens I am talking about; but when you consider the fact that we are gaining at least half a million new people across our borders illegally every year and adding to the numbers that are coming by a multiplier effect of births and so on and so forth, the very quality of life of the American people is threatened over the long haul for the reasons that the gentleman from Massachusetts outlined, and many more.

The question then becomes one of how do we go about controlling that? The way we could go about controlling it a lot of people think is by adding numbers of border patrolmen along the borders or doing traditional things such as adding Coast Guard vessels

around my good State of Florida; but I know and I think most of the Members of this body know that it is impossible to add enough border patrolmen or enough Coast Guard vessels to do the job.

As has been said just a few minutes ago on several occasions, there is really no other reasonable or responsible solution than some form of employer sanctions to deter those people from coming over here who want a better economic life and want the jobs that only America can provide.

Then the question is what price are we willing to pay? What form can that take? That is the whole debate here today.

It happens to be my opinion that what the Committee on the Judiciary, the Subcommittee on Immigration, of which I have been so proud to be a member, has drafted and has perfected in the amending process by and large with a little exception here and there is the only way to go. It is a fair and balanced approach.

Yes, it provides a burden on employers. There is no question that it does. It does add to the difficulties of being an employer in this day and age. It does provide some threat to the opportunity upon occasion to be able to have maybe the precise employees available when you want to have them; but it does provide a reasonable method of proceeding for an employer. It does not place too many restrictions on the employer. It places a minimum burden of paperwork on the employer to achieve the desired results and it places a minimum penalty to achieve the desired results.

The question is: What price is being paid by those who fear because of color, black, brown, yellow, that they are going to be discriminated against? I think that is a bogus fear, but I understand the fear. We debated that last night.

I think that the risks are as minimal as could possibly be under the present form of the employers sanction provision of this bill. That is the question here today. What risks, what price, what cost, what burdens are we as American citizens willing to pay in order to gain control over our borders? If we are not willing to gain control over our borders, and there are those who do not think we should. I know there are Members of this body who have not today come forth to say so who believe that we ought to have a totally open border and let millions come in with no restrictions whatsoever. If we are willing to agree to that, which I am not, then we should certainly end the debate and end the question of employer sanctions; but if we want to achieve the control over our borders that I think is absolutely essential to the future quality of American life, we must have the employer sanctions provisions essentially as they exist in this bill.

Now, the question of legalization I am not going to get into great debate about, but I dispute the assertions of the gentleman from Massachusetts and some others of my colleagues that in some way it is an essential ingredient of this whole process to have amnesty in the bill. It is not. If you have employer sanctions administered as they should be under the laws set forth under this bill, you will have an orderly attrition of those who do not find jobs in this country, without the INS going out and rounding up anybody.

You will have a slow attrition back to the countries from which they came because they do not have jobs. To get jobs is why they came here in the first place and once the opportunity for jobs is gone most illegals will voluntarily go home. It makes no sense to me to have the legalization.

But regardless, win, lose, or draw eventually on that question in the great debate over this issue, I am for the basic premises of this bill that are embodied in all the provisions that are in it at the present time, and most essentially in the employers sanctions provisions because I am ultimately and absolutely convinced, having studied this issue so long and so hard, that we cannot regain the control of our borders without the employer sanctions provisions and without paying a price for those provisions.

The CHAIRMAN. The question is on the Education and Labor Committee amendment offered by the gentleman from California (Mr. HAWKINS).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 16, noes 24.

Mr. HAWKINS. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Forty-six Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

Mr. MAZZOLI. Mr. Chairman, is it too late to withdraw the point of order that a quorum is not present and if the gentleman wishes a vote that we give a vote?

The CHAIRMAN. The Chair will state that the gentleman's request is too late.

The call was taken by electronic device.

□ 1450

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from California (Mr. HAWKINS) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 110, noes 213, answered "present" 1, not voting 109, as follows:

[Roll No. 483]

□ 1510

So the Education and Labor Committee amendment was rejected.

The result of the vote was announced as above recorded.

EDUCATION AND LABOR COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the second amendment offered by the Committee on Education and Labor.

The Clerk read as folows:

Education and Labor Committee amendment: Page 7, at the end of line 3, add the following new sentence: "The person or entity shall also make the completed forms described in this subsection available to officials of the Department of Justice, the Civil Rights Commission, and the Equal Employment Opportunity Commission.".

Page 7, line 21, before the comma insert the following: "and determining whether discrimination because of race or national origin has occurred.".

Mr. HAWKINS. Mr. Chairman, the amendment which has just been read by the Clerk is interwoven with the first amendment that I offered. Inasmuch as the first amendment was rejected, I ask unanimous consent that this amendment be withdrawn.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

EDUCATION AND LABOR COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the third amendment offered by the Committee on Education and Labor.

The Clerk read as follows:

Education and Labor Committee Amendment: Page 9 line 21, insert "either" after "Attorney General."

Page 9, line 24, insert before the comma the following: "or has reason to believe that a person or entity is engaged in a pattern or practice of employment, recruitment, or referral in violation of subsection (a)(1)(B).".

Page 10, strike out line 16 and all that follows through line 20, and insert in lieu thereof the following:

(B) In the case of a person or entity which has previously been cited under subparagraph (A), which is determined to have violated subsection (a)(1)(B), and which—

(i) has not previously been subject to a civil penalty under this subparagraph, the person or entity shall be subject to a civil penalty of $500 for each individual with respect to whom such violation occurred;

(ii) has previously been subject to a civil penalty under this subparagraph, the person or entity shall be subject to a civil penalty of $1,000 for each individual with respect to whom such violation occurred; and

(iii) has previously been subject to a civil penalty under this subparagraph in more than one instance, the person or entity shall be subject to a civil penalty of $1,500 for each individual with respect to whom such violation occurred.

Mr. CORRADA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Puerto Rico?

Mr. KAZEN. Mr. Chairman, I object. I want to hear the amendment.

The CHAIRMAN. Objection is heard.

The Clerk will continue reading the amendment.

The Clerk completed reading the amendment.

Mr. CORRADA. Mr. Chairman, I rise in support of the amendment.

Mr. CHAIRMAN, this amendment which I offered when the bill was considered by the Education and Labor Committee and was adopted by the Education and Labor Committee would amend H.R. 7357 as reported by the Judiciary Committee.

The bill, as reported by the Judiciary Committee, establishes civil and criminal penalties for any employer or entity who knowingly hires, recruits, or refers for employment an alien not otherwise authorized to work in the United States.

It requires employers of four or more employees to have all perspective employees show them, as a condition of hiring, any of the following documents:

A U.S. passport or a social security card, U.S. birth certificate, or some other proof of U.S. nationality at birth, and a federally issued alien identification card, a State-issued driver's license, a similar State-issued identification or any other identification that the Attorney General deems reliable.

However, Mr. Chairman, failure to comply with the identification, verification requirements would subject an employer to a citation for a first offense and a maximum penalty of only $500 for each violation thereafter.

These penalities for nonverification of an employee's work eligibility documentation are not only weak but also inconsistent with the penalties established for hiring undocumented aliens which are under the bill for a first offense a citation and warning of possible penalties; second offense, $1,000 civil fine for each unauthorized alien; third offense, $2,000 civil fine for each unauthorized alien; and, fourth and subsequent offenses, $3,000 fine and/or imprisonment for not more than 1 year for each unauthorized alien.

□ 1520

The Attorney General may bring civil action, including seeking an injunction against pattern and practice violators.

My amendment, which, as I said, was accepted by the Education and Labor Committee, would increase penalties for employers who failed to verify that prospective employees are eligible to be employed to, first, a citation for a first offense, $500 fine for a second offense, $1,000 for a third offense, and a $1,500 for for subsequent offenses. And also it would provide authority for the Justice Department to take court action to deal with pattern and practice violations.

I would like to point out that my amendment is consistent with the enforcement aspects of this section as reported by the Judiciary Committee. In counting the violations, the first offense as well as subsequent offenses could still include various violations of verification practices, as long as they

arise under a single proceeding or adjudication.

In addition, the employer could only be penalized for violations committed after the enactment of this act.

Mr. Chairman, the amendment simply provides comparable sanctions for hiring illegal aliens so that sanctions for not verifying identification before hiring would be more or less comparable with the other sanctions. Our major concern, Mr. Chairman, is that unless this amendment is adopted, the verification proceedings would be applied to those who look like aliens, who would be subject to the inconveniences of the verification proceedings, but that the verification proceedings might be overlooked in the case of people who may be aliens but who do not look like aliens. And I believe that, rather than allow an employer to go on to the second stage and find himself in the position of being in violation of hiring an illegal alien, he should be strongly required to make sure that he requires an identification from any who apply for a job.

Mr. MAZZOLI. Mr. Chairman, I move to strike the requisite number of words.

Mr. DICKINSON. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Alabama.

Mr. DICKINSON. I thank the gentleman for yielding.

Mr. Chairman, I would just like to share with the gentleman who offered the amendment—and I will be brief—I am going to support the gentleman's amendment, I think it is a step in the right direction. But a year ago I had come into my office in Montgomery, Ala., a Mexican family, with their employer who grew tomatoes, and he was asking me to get an extension because this family had been caught as illegal and they were about to be deported. The father, who spoke no English, was very grateful for having had his children educated in this country, and he was not bitter at all. He was asking about an extension. But he had a social security card, he had a driver's license, and he had even bought a pickup truck on credit and had a mortgage on it from the State of Florida.

So I do not think that the requirements that the gentleman is setting out in his amendment are really going to meet the problem. I think it is a step in the right direction. But you can get a social security card, you can get a driver's license, you can get mortgage financing, even if you are an illegal alien, and certainly this is something that should be addressed.

Mr. MAZZOLI. I appreciate the gentleman's statement. I need to reclaim my time to address the gentleman's amendment. But I would like to say to the gentleman from Alabama that he would be happy to know that in the bill there are increased sanctions against fraudulent documentation.

Yesterday, by unanimous consent, this House passed a bill dealing with fraudulent identification, sponsored by the gentleman from Texas (Mr. SAM B. HALL, JR.) and the gentleman from Illinois (Mr. HYDE), which would also stiffen and make very much more painful the penalties on people who would use false and fraudulent identification to derive benefits under Federal act or under this law. So we are moving to the point of trying to curtail that. And I would certainly say to the gentleman that there is a cottage industry that has grown up in basements all over the country in printing presses, and we know it, but we are moving in a proper way to deal with those in criminal sanctions. But in our bill, we now address it in a different fashion.

Mr. DICKINSON. If the gentleman will yield for a short reply, only one of these instruments, either the social security card or the driver's license, need be invalid, and the rest of them just follow on. I do not know which one was invalid, if any.

Mr. MAZZOLI. Mr. Chairman, the delegate from Puerto Rico has introduced a very interesting amendment and one which, in the end analysis, I would not be strongly moved to oppose. I would like to speak in behalf of the bill which is before this House and to reflect with the Members of the House what the bill does do and what it has in it. The gentleman has introduced an amendment which would slightly change the penalty structure, but it is well to reflect that in our bill we have a two-level set of penalties.

There is a penalty in our bill, a very severe civil as well as eventually criminal penalty, for knowingly hiring people without documentation. And then there is a second level, and that is for people who will not and do not maintain records of having examined the documents of all people, whether alien or not alien, who have successfully been hired. So there are two levels of penalty. And I might say to the Members in this Chamber that over two or three times this body has adopted employer sanctions and successfully passed it, only to see it die in the other body. But in all of those instances, this body adopted legislation which did not have the second level of penalty. It only had penalties for knowingly hiring undocumented workers. We added this method, which the gentleman seeks to stiffen and strengthen, because of the concerns largely announced by the Hispanic community of the country, to say that without this level, without this new kind of penalty, the employer had the great opportunity of discriminating, because the employer could decide which person would be taken in and which persons would not be, accept or reject, perhaps based on the way the individual looked or sounded. Our bill says that if you are going to hire someone, you have to examine of that individual the same documentation, regardless of what the person looks like, what the person sounds like. If they are to be hired, their documentation, proof of identification, and of qualification to work have to be examined, and a simple piece of paper, a testimony to that examination, signed by both the employer and the employee is retained.

Mr. Chairman, the delegate from Puerto Rico seeks to make the penalty structure of this second level, that is, the failure to maintain proof of having examined documentation, to stiffen the penalties assignable to that transgression. And I feel that our bill is a good and well drafted bill and has stern penalties for these various activities, but the gentleman's amendment appears to be reasonably constructive, and I would not strongly oppose it.

□ 1530

Mr. CORRADA. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Puerto Rico.

Mr. CORRADA. I thank the gentleman for yielding.

I would like to state that although I have certain misgivings about the sanctions system established in the bill, I believe that the bill would be more consistent and also the understanding of possible sanctions under the bill would be more clear as far as people are concerned if my amendment is passed.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, we are going to rise in about a minute I guess. I would like to say that nobody in America could have done as good a job as the gentleman from Kentucky (Mr. MAZZOLI), nor the gentleman from New York (Mr. FISH), on the most single difficult problem, including social security, facing America.

The sensitivities involved, the emotions involved, the legal questions involved are prodigious. And the time has not been wasted, even though this bill is not going to pass, because the issues have been ventilated, they are out on the table now, they will be thought about over the next few weeks, and we start the next session well ahead of the game.

I think this whole country owes a tremendous vote of gratitude and thanks to the gentleman from Kentucky (Mr. MAZZOLI) and the gentleman from New York (Mr. FISH).

Mr. MAZZOLI. Let me sincerely thank my friend from Illinois for that wonderful statement. The hard work the gentleman from Kentucky has done has been fully acquitted in the elegant and high level nature of the debate we have had the last 3 days. It has been more than fully acquitted.

The chance to make friendships with many people in the House that I have only peripherally worked with over the years, a chance to take a role with my friend from New York (Mr. FISH), who has been a wonderful ranking Member; my friend from California (Mr. LUNGREN); the gentleman from Florida (Mr. MCCOLLUM); our friends from this side and the other side of the aisle, the gentleman from Texas (Mr. SAM B. HALL, JR.); the gentleman from Massachusetts (Mr. FRANK); the gentleman from Michigan (Mr. CROCKETT). It has been a remarkable opportunity for me to work with these gentlemen and gentlewomen. I value this opportunity. It is one of the high points of my life.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I would like to state to the gentleman, the chairman of the committee and the chairman of the subcommittee, that the debate on this bill has been one of the most enlightening debates. I think it did this House proud, the way that it has been handled, both by the majority and the minority.

There are disagreements of course. That is the nature of our business. But I want to state to the gentleman that the high level of discussion and the high level of debate do the gentleman and his committee proud.

On the product which they brought to us, there is disagreement. But the manner in which it was handled by the gentleman from Kentucky and the gentleman from New York and the gentleman from New Jersey, has been exemplary. And I think we have done our country good, that we have done good to the institution, and that we should dedicate ourselves to a final good product somewhere along the line, wherever it be, this year or the next year.

But my sincere commendations to the gentleman for what he has done, for the institution, and respecting the rights of individuals that disagree, which after all is the system that all of us are dedicated to protect.

Mr. MAZZOLI. I thank the gentleman.

Mr. DAUB. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Nebraska.

Mr. DAUB. I thank the gentleman for yielding.

Mr. Chairman, I have had the privilege of working with the gentleman. I appreciate all the gentleman has done.

I would say to my colleagues in the House that if this RECORD, from the work that has been done, both in committee and on the floor, gets studied by the Members, I think we will move a lot quicker to compromises that will move this bill in the next session of the Congress. And I look forward to working with the gentleman.

Mr. Chairman, had the amendment removing amnesty from this bill been offered by my colleague, Mr. MCCOLLUM, which was printed in the RECORD, these remarks would be in support thereof.

Many arguments have been made in favor of providing a liberal amnesty—or legalization—program for undocumented aliens. I will not attempt to reiterate these arguments and refute them.

The plain fact is that the U.S. Government—and the American people—simply cannot afford such an amnesty—especially at this time.

We have always been known as a humanitarian nation. We have had, and continue to have, one of the most liberal immigration policies known in the world.

But the costs of amnesty are so tremendous that it is difficult to estimate. The Department of Health and Human Services recently provided, in my view, some conservative estimates—based on an estimated 3 to 6 million undocumented aliens residing in this country (many believe this figure to be as high as 12 million). Taking a middle figure of 4½ million, HHS figured that 45 percent of these would be eligible for amnesty under this legislation; this is approximately 2¼ million people. Of this figure, 15 percent would be eligible for temporary resident status, and eligible for permanent status in 3 years.

Additionally HHS estimated that only 60 percent of the 2 million plus eligible undocumented aliens would participate in the program. Assuming that the public assistance rate for these individuals would initially be lower than that of the American population as a whole, but that this rate will eventually rise to meet that rate of the present American population—that rate is around 9 percent—HHS further estimated that the Federal public assistance costs alone could be as high as $6.67 billion over the next 5 years.

But we have an alternative, as described by the gentleman's amendment.

Approximately 10 percent of the undocumented aliens believed to be in the country have been here for 10 years or longer. These individuals are—for the most part—well integrated into their communities, have children who are U.S. citizens, and are entitled to be recognized as productive and desirable additions to our population.

These individuals can be provided for under the gentleman's amendment. There is already in law a provision—a registry date procedure—which allows a limited form of amnesty for all aliens who can show good moral character and continuous residence in the United States since 1948. During full committee consideration, this provision was updated to January 1, 1973.

By striking section 301, the legalization provision of H.R. 7357, the registry date will remain intact—updated to 1973—and we can avoid the unmanageable burden that would otherwise be created by this bill.

Rather than eliminating laws we cannot enforce, we should seek to better enforce them.

I urge your support of this amendment.

Mr. Chairman, I rise today in support of my amendment offered to restore the ceiling on legal immigration. Since debate did not proceed to the appropriate title. I offer this explanation for the record and thereby, for future consideration.

The 1970's became a turning point for U.S. immigration. It became clear that changes must be made in our policies for dealing with the influx of immigrants seeking a better life.

Many months have gone into the preparation of the legislation before us today, and I commend my colleagues for their diligent and well-intended efforts. However, this bill contains a lethal combination. In addition to providing no cap on legal immigration, we will be opening the doors to millions of illegal aliens under the amnesty provisions in this bill.

This amendment will allow us to achieve—at the very least—some control over legal immigration by setting an annual ceiling of 425,000—approximately our present level of legal immigration.

The American people do not support massive immigration. In repeated public opinion polls, 80 percent of those polled wanted legal admissions reduced below 400,000 per year. No reasonable person involved in immigration reform wants to stop immigration entirely, but we are concerned about the growing resentment of immigrants and immigration. With over 10 million Americans out of work—and I know this concerns my colleagues because just the other day the House passed legislation to restrict foreign competition in an attempt to preserve American jobs—and with growing Government deficits, we cannot afford to simply open our doors to all who wish to come here.

The demographics and costs of immigration are staggering. According to the 1979 Justice Statistical Yearbook,

270,000 immigrants were admitted that year under our system of preferences for relatives of American citizens, alone. Fully one-third of this number came under the fifth preference—brothers and sisters of U.S. citizens and their spouses and children. This is, in my view, "chain migration" at its best. Above and beyond the 270,000 legal "relative" immigrants, we admitted 218,000 refugees.

Once these immigrants achieve permanent residence, he, she, and their dependents become eligible for all the benefits of U.S. citizens—public assistance such as food stamps, AFDC, and SSI.

Additionally, in 1979 nearly 1.1 million undocumented aliens were apprehended in this country. Conservative estimates show that over 80,000 undocumented—or illegal—aliens have entered this country each year since 1976.

For the sake of argument, I offer findings of several studies: One study found that 29 percent of illegal Dominicans in New York City received welfare. Another study found 18.5 percent of a group of undocumented women in Los Angeles to be receiving welfare. A study of unemployment insurance applications from aliens in Illinois found 46 to 51 percent of them to be illegal.

I point to these studies only to emphasize that the costs of immigration have not been sufficiently documented for us to make the sweeping reforms that this legislation proposes.

We cannot possibly control the costs of illegal immigration if we cannot put a hold on the costs of legal immigration.

At a time when Government programs are being pared, this legislation is a further threat to our social service system.

We have three options: First, to increase spending for our social services; second, to reduce services to our most needy citizens; or third, to control immigration.

I suggest to my colleagues that this final option is not only the most practical, but in light of growing deficits and unemployment, it is our only option.

We must restore the cap—or ceiling—on legal immigration, and I therefore urge your support for this amendment.

Mr. GARCIA. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from New York.

Mr. GARCIA. I thank the gentleman for yielding.

Mr. Chairman, I would like to associate myself with the remarks made by my colleague from the State of Texas (Mr. DE LA GARZA). I think his remarks were right on target. I think for many of us who have debated this bill over the last several days, our feelings are very strong.

The subcommittee chairman, the gentleman from Kentucky (Mr. MAZZOLI); the chairman of the full committee and my colleague, the gentleman from New Jersey (Mr. RODINO); the ranking minority Member, that all of my colleagues have conducted themselves in a manner that I think truly reflects what this body is all about.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from California.

Mr. PASHAYAN. Mr. Chairman, I of course am one who found it impossible to support this bill for various reasons. But I do appreciate the enormous work that the chairman has put in and the ranking member on this side, my colleague, the gentleman from California (Mr. LUNGREN).

It is a subject of enormous difficulty. I hope in some future time we can sit down and work out a measure that will touch on all the elements and be as comprehensive as possible.

Mr. Chairman, I appreciate this opportunity to express some of my views on H.R. 7357, the Immigration Reform and Control Act of 1982.

My interests and concerns are specific to agriculture and the availability to that sector of the American economy to obtain a work force that is sufficient to harvest and tend the multitude of crops that do not lend themselves to mechanization.

Make no mistake, domestic workers in sufficient quantity, will not do the work. Farmers in Fresno County, Calif., worked for years on a pilot program with the State to develop a domestic work force. It failed miserably.

Less than 9 months ago the strawberry growers in southern California actively recruited unemployed domestic workers to harvest a rapidly ripening strawberry crop. The turnout was marginal and the results worse. Some of the unemployed lasted 2 days on the job, others not even a day.

Growers of fruits and vegetables throughout this country have tried to meet their needs with domestic workers. They have been unsuccessful, even when wages reach $20,000 annually. As the domestic shortfall increased, the dependency on undocumented workers increased to a point where between 65 and 85 percent of the harvesting is done by undocumented workers. I daresay that in some instances that number could be as high as 100 percent.

Farmers both small and large have insisted that if Congress is to reform the Immigration and Nationality Act, that we not lose sight of agriculture's unique needs. In their view, and mine, the work of the Subcommittee on Immigration came close, but the final product is inadequate in both structure and content.

The full Judiciary Committee markup of the bill, however, produced a number of substantial changes to section 211, the so-called H-2 provisions. These political compromises, secured in order to expedite the bill's progress, have destroyed the legislation's balance and have insured that the proposed modifications to the H-2 program will make it unworkable for nearly all of American agriculture. That includes regions of this country where H-2 workers have been utilized for many years, as well as regions in the West where use has been most limited.

Therefore, agricultural groups supported referral of H.R. 6514 to the House Agriculture Committee because it is felt that a number of these issues need to be revisited in some depth. Time did not permit that visit, so we are left with many questions and legislation that is insensitive to agriculture.

Specifically, agricultural groups would support the following changes to section 211 of H.R. 7357 which would restore the legislation's balance:

First. Substantial U.S. Department of Agriculture involvement in regulations, with the Attorney General having final authority after consultation with both the Department of Labor and USDA.

Second. Retain the existing standard, an 11 month maximum length of stay, in statute.

Third. The Judiciary Committee report language appears to "freeze" present regulations regarding "concerted activity involving two or more employees."

These permit the frivolous disruption of the H-2 certification process, the timeliness of which is critical to the success of the program.

Additionally, it is my understanding that there is support for the Education and Labor Committee's recommendation for codification of existing DOL regulations governing the H-2 program. With the potentially substantial, yet unknown effects which this legislation will have upon agriculture, codification of these regulations would render the H-2 program inflexible, unresponsive, and useless to the agricultural community.

In my view H.R. 7357 will cause chaos in American agriculture without resolving the difficult problems associated with its substantial illegal work force.

I was pleased that S. 2222 and H.R. 7357 included the concept of establishing a separate H-2 program for agriculture, thus giving congressional recognition of the particular needs of agriculture. However, further consideration must be given to:

First. Avoiding the necessity for employers to conduct a nationwide re-

cruitment of domestic workers to show that needed workers were not available.

Second. A realistic advance filing time for certification.

Third. Language regarding availability of qualified and willing domestic workers worded so that employers would not be denied certification through referrals of unqualified and unwilling workers from some distant part of the United States who have no intention of showing up when needed and of doing the work.

Fourth. Expedited review of certification denials with a de novo administrative hearing on request of an employer.

Fifth. Statutory definition of "agriculture," "agricultural employment," and "wages."

Agricultural groups and I favor an amendment to be offered by Representative DON EDWARDS to require search warranta when INS agents enter agricultural lands; and a provision making it clear that the Federal law preempts any State law regarding immigration policy.

Absent the time thoroughly to review the question of immigration policies on agriculture, I should ask that this body carefully review the issues I have outlined on an adequate work force for agriculture.

Those who will charge that a workable H-2 or guest worker program for agriculture costs American citizens and permanent resident aliens job opportunities are not being honest with the facts. A domestic labor pool will not follow the harvest in sufficient numbers to get food from the fields to the marketplace.

Without a foreign work force to harvest the raw products, consumers pay more for what produce can be delivered, and the very infrastructure of the agriculture community would be placed in a state of chaos. By denying agriculture access to foreign workers to harvest and tend the fields, this body could be adding to the high-unemployment problem by denying job opportunities to workers who handle and process the raw bounty of the land.

Mr. FISH. Mr. Chairman, I just want to let the chairman know, I am the optimist. I will be here Sunday, Monday, Tuesday, Wednesday, to pick up again.

The CHAIRMAN. The question is on the Education and Labor Committee amendment.

The Education and Labor Committee amendment was agreed to.

● Mr. MINETA. Mr. Chairman, this week we are considering the Immigration Reform and Control Act of 1982. This is an important, complex, and far-reaching piece of legislation, and I think it important that Members consider this bill with great care and caution.

Before discussing the detailed provisions of the bill, I would like to state my philosophy on the underlying issues before us. To me, immigration to this country is not a problem, indeed, it is a source of our strength, our vitality, and our tradition of freedom and diversity.

The question then, is not how to cut off or limit immigration. Our task is to resolve problems in the administration of our existing laws, and eliminate any inequalities or unfairness in the current system.

In attempting a comprehensive reform of the immigration laws, the sponsors of this legislation have taken on a large and difficult task. While I admire their energy and determination, the product now before us has several important—and I believe fatal—flaws. In addition, the version of this legislation already passed by the other body has additional problems, which we can not be certain would be resolved as we would wish in a conference committee working against the strict time limits of the approaching end of this Congress.

I would like to set out some of these important problems facing us in the proposed legislation.

Employer sanctions are proposed in the bill. I share the concern of many that such a provision will lead to discriminatory hiring practices by employers unwilling or unable to assume what they might see as the legal risks in hiring minority individuals.

Our legislation contains a requirement for a 3-year study of national identity cards. There is even stronger language in the other body's bill. I strongly oppose such an unnecessary and unwarranted step. The potential for discriminatory ruse of such a system of identity cards is far greater than any possible benefit to be gained.

In the interest of simplifying and reforming the administrative processes, I am deeply concerned that this legislation would in effect reduce the civil liberties and rights of individuals who are charged with immigration related offenses.

The Judiciary Committee has eliminated the changes in the system of preferences originally proposed in this bill. However, significant changes do exist in the other body's version, and I see no reason to open ourselves to the risk of facing such changes as the result of a conference agreement.

The so-called colonial quotas are an out of late vestige of the racism once inherent in our immigration laws. Let us at least reduce the impact of this unnecessary provision by raising the quota on such immigration from 600 to 3,000 visas a year.

We are also presented with a proposal for a limited two-tier amnesty for undocumented aliens present in this country for several years. I support such an amnesty, and hope we shall not be shortsighted enough to reject this provision. If anything, we need to expand the amnesty provision. In doing so, we must be careful to insure that local governments are provided with the resources to serve those affected by the amnesty. It makes no sense to grant a group of individuals the rights and privileges of residency without insuring that those rights can be protected by local government.

Foreign students faced a requirement to return to their home countries for 2 years prior to obtaining work status under the legislation as originally introduced in this House. We need to insure that the Judiciary Committee's action in providing relief from this overly stringent provision is protected throughout the process.

Significant changes in the H-2 agricultural worker program are in the bill before us, and I share the reservations of the Committee on Education and Labor about the impact of such changes upon agricultural labor markets, as well as the rights and work conditions of farm workers. Among other things, we need to insure that agricultural employers and their fields meet the same standards of due process—and have the same search warrant protection—as all other segments of our economy.

These are my major concerns with this legislation. We may well need administrative reform, but this is not the time and this is not the legislation to completely rewrite our complex immigration laws. A rush to judgment at this time would be a mistake, and I urge my colleagues to resist the pressure to act hastily.●

● Mr. SHUMWAY. Mr. Chairman, for the past several years our immigration law has been examined by the Select Commission on Immigration and Refugee Policy, both Houses of Congress, and the Ford, Carter, and Reagan administrations. The bill before us is the first major overhaul of immigration law since 1952, and I commend my colleagues RON MAZZOLI and ALAN SIMPSON as well as the members of the Judiciary Committee for their efforts. Despite my respect for their difficult task of reconciling the needs of labor, agriculture, business, and ethnic groups, however, I believe H.R. 7357 requires improvement.

My major objection is to the mass legalization program. Under the House Judiciary Committee bill, all those who can prove continuous residence in the United States prior to 1977 will be eligible for permanent resident status and Federal benefits after 3 years. Individuals who can prove continuous residence between 1977 and January 1, 1980, can be granted temporary resident alien status which may be upgraded to permanent resident status after 3 years. After an additional 3

years, they too will be eligible for Federal benefits.

I can appreciate the fears of exploitation and discovery that the estimated 3 to 6 million undocumented aliens may live under, but at the same time, feel that there are too many unknown variables surrounding this proposal. We do not know how many of the aliens will choose to take advantage of our offer, whether the Immigration and Naturalization Service (INS) has the staff and resources to evaluate the claims for legalization, how many eventually will be eligible for Federal assistance, and how this legalization program will affect our already staggering unemployment rate. The 3-year waiting period for eligibility for Federal benefits will stall the costs to the Federal Government, but we have no idea how much it eventually will cost.

Our experience with the refugee program points up the interminable costs associated with 100 percent Federal reimbursement to States. I have supported this policy because the Refugee Act of 1980 was a Federal initiative, and for consistency's sake I would have to support having the Federal Government pay all costs associated with the legalization program. However we all know that authorizations and appropriations are two different things, and congressional intent is not always translated into action, particularly at a time when Federal spending is being reduced. In California, and perhaps in other States, there is a discrepency between State refugee expenses and Federal reimbursement. Federal auditors are in the process of reconciling this difference, and the Secretary of Health and Human Services has indicated that the Federal Government will reimburse California 100 percent for the shortfall. In the meantime, however, this shortfall has put a severe strain on State and county budgets, and the resentment that this benefit program has engendered among American citizens is growing. Unfortunately, it is difficult to be charitable during these times of economic distress, and I can see the same sorts of problems occurring with the impact of legalization on States and counties.

I, therefore, favor the more moderate and gradual approach of moving the registry date from 1948 to 1973. This will allow the Attorney General to lawfully admit, at his discretion, undocumented aliens in the United States who entered prior to 1973, who have resided in the United States continuously since then, are of good moral character and eligible for citizenship, and who are not inadmissible because of certain past actions. This would allow the program to be tested on a more modest scale, and would allow time to refine any problems connected with employer sanctions, an identification system, and costs of the program. It would also lessen the unfairness to those who have waited for years to enter this country legally.

I also have reservations about the lack of responsiveness of H.R. 7357 to the needs of agriculture, particularly as it relates to the harvest of highly perishable crops such as citrus, grapes, strawberries, lettuce, and other vegetables. Growers in my district have repeatedly told me that the H-2 program does not work for them, and I am concerned that the numbers of workers, speed, and availability measures are insufficienlty addressed by the Judiciary Committee's bill. I am pleased that the committee has amended present law regarding worker availability in a manner similar to legislation that I introduced in the 96th and 97th Congresses. Worker availability would be based on "sufficient workers who are able, willing, and qualified, and who will be available at the time and place needed to perform the labor or services required." I believe that limiting the geographical search to the area in which the work is to be done is reasonable and realistic. Despite this modification and some other minor changes, I am not satisfied with the H-2 program as amended in H.R. 7357. The Education and Labor Committee substitute is even more restrictive. Among other things, it removes the Agriculture Secretary from any role in the H-2 determination, restricts the stay of H-2 workers to 8 months, and does not allow more than the number of H-2 workers admitted in fiscal year 1982 to enter until the Labor Secretary can certify that he can adequately enforce the program.

Another provision of the bill as it relates to agriculture deserves mention. Employer sanctions remove the magnet for illegal immigration—jobs—by penalizing employers who hire illegal aliens. A secure form of verification is intended to protect both the employer and the workers by proving that they are able to work here legally. However, given that the H-2 program is already inadequate for agriculture, employer sanctions and verification will further hamper growers' ability to hire workers to harvest crops. Growers in my district hire illegal aliens because they are available and because, for the most part, Americans will not do the back-breaking and tedious work required. Further, agriculture is not conducive to the kinds of bookkeeping required by the bill, and I have difficulty visualizing the process of predawn ID checks and paperwork as a busload of H-2 workers or farmworkers in general shows up for work. The solution is an expanded H-2 program or guestworker program for agriculture.

In conclusion, Mr. Chairman, I hope the Members of this body recognize the shortcomings contained in this extraordinary piece of legislation, particularly the provisions relating to amnesty and the H-2 program. In its present form I cannot support this bill. It is neither workable, nor will it achieve the benefits expressed by its authors. I hope that through the amendment process we will develop a coherent and fair immigration policy that upholds American traditions, and recognizes economic and social realities.●

● Mr. RAILSBACK. Mr. Chairman, I rise in support of H.R. 7357, the Immigration Reform Act of 1982. I would like to commend the chairman of our committee (Mr. RODINO) the gentleman from Kentucky (Mr. MAZZOLI), and the gentleman from New York (Mr. FISH), for the extraordinary amount of effort which has gone into the crafting of this bill. The chairman of our committee has been working for many years on immigration reform and is an acknowledged expert in the area. Mr. MAZZOLI has recently taken on the responsibility for the Subcommittee on Immigration, Refugees, and International Law and has distinguished himself by his dedication and the bipartisan support he has been able to garner for this legislation. Mr. FISH has served on the Select Commission on Immigration and Refugee Policy and his expertise and guidance are recognized by all who have contributed to this legislative effort. In addition, a great deal of credit must be given to the administration, the Attorney General, and those in the Justice Department who have made immigration reform their top legislative priority and have worked diligently with the committee members and staff through every step of consideration.

Mr. Chairman, while there are some aspects of H.R. 7357 which I would like to see improved, I feel that we must regain control of our immigration policy, and I believe this compromise legislation is essential to the achievement of that goal. I urge my colleagues to join with me in support of H.R. 7357.●

● Mrs. SCHROEDER. Mr. Chairman, last night we began general debate on H.R. 7357, the Immigration Reform and Control Act of 1982. I would like to pick up on some things said last night.

First, it was repeated over and over how we are entering uncharted waters with employers sanctions. In the same breath, Members said that we have enough provisions in the bill to guard against discrimination in the bill; six instances of provisions to guard against discrimination. I would like to point out that these are in the form of after-the-fact reporting requirements. The bill, as long as it gives the employers the power and, indeed, the burden of deciding whether employee X is an American citizen or an illegal alien, or whether documentation presented is

genuine or bogus, is very much open to discrimination.

As some of my colleagues pointed out last night, if this bill is not discriminatory why does it not have support from Hispanic, black, civil libertarian, and church groups? Editorial boards across the Nation have inferred that H.R. 7357 is a legislative compromise that enjoys universal support. That is not true. The bill barely survived the House Judiciary Committee. Groups across the Nation have called for revisions to the bill, such as Denver Catholic Community Services, the National Council of the Churches of Christ, LULAC, MALDEF, ACLU, and many others.

Coming from an area that was a target area for Operation Jobs; in 1954 a similar effort was made by the Justice Department which was disgracefully called Operation Wetback, because it targeted Hispanics. As disgraceful and derogatory as the operation was called, at least it was honest. Operation Jobs on the other hand, said it was targeted at those illegal individuals who were taking American jobs. Around 90 percent of those rounded up, however, were Hispanic. In my district, I did not hear of one Canadian or fair complexion illegal who was picked up. In fact, in Denver, there were Hispanic Americans who were seized. I think the Operation Jobs experience in Denver exemplifies how vulnerable the practice of good theories like employer sanctions are to discrimination and discriminatory practices that this Congress has passed many laws to avoid.

The tragedy of it all was that Operation Jobs was not even successful in its goal: Saving jobs for Americans. Followup surveys from newspapers and academic reports found that most of the 5,440 jobs secured by Operation Jobs were once again filled by aliens. The Americans who took over these vacated jobs had quit within weeks, and in many instances, days. Some companies raided said that few, if any, unemployed American citizens even had applied for the jobs that were freed. In Texas, for example, a week after the raids occurred, the Texas Employment Commission said they had made only 42 job referrals for 1,105 positions vacated by alien workers.

American workers did not want the jobs because the wages were low, the work was difficult, and the working conditions were poor.

Undocumented workers come to this country to work, at any wages, and in any conditions. In light of the drastic devaluation of the peso, the U.S. dollar is even more of a magnet to Mexican workers who are 40-percent underemployed or unemployed. With the devaluation of the peso, the minimum wage in Mexico of 2,400 pesos a week, translates into $34 American, an average daily wage in the United States for a construction worker or a field hand. The worst economic crisis in Mexico with more than 1 million layoffs expected, fuels the fire.

Who benefits from all this? The bad guys, unscrupulous employers who take advantage of the swelling reservoir of willing workers and flout U.S. labor laws. A 1980 Labor Department survey found that 5 percent of U.S. businesses paid less than the minimum wage and 21 percent failed to give time and a half for overtime hours. The exploitation of employers has led to the mistreatment of American workers. A Labor Department official who oversees investigations of wage law violations says:

We cannot identify any particular job where there is only abuse of illegal aliens. We see them working side by side, illegal immigrants and U.S. citizens.●

● Mr. WAMPLER. Mr. Chairman, we have under discussion the immigration Reform and Control Act of 1982 (H.R. 7357).

This bill has many individuals on both sides of the issue and the final outcome of this legislation in the lameduck session is very much up in the air. No matter what happens here today I want to present a few thoughts as expressed by my friends in agriculture.

Today there are special problems facing agriculture because of the economic recession, and it seems to me that we shouldn't heap any more problems on the agriculture industry if we can help it. I have been advised that the present "H-2" program as admistered by the Secretary of Labor leaves a lot to be desired.

Acting on this premise the agricultural industry convinced the Senate and the Judiciary Subcomittee on Immigration. Refugees, and International Law to sympathetically establish a more workable temporary foreign worker program for agricultural interests. However, when the parent Judiciary Committee took up the legislation they made major changes. The House Education and Labor Committee then considered the legislation under sequential referral additional damage was done. The agricultural industry opposes the amendment of the House Education and Labor Committee and if these amendments are adopted they recommend a vote against this legislation.

Let us look at what these amendments would provide. Grower interests have attempted throughout the legislative process to play down the role of the Department of Labor and call upon more input from the Department of Agriculture understands better the problems facing agriculture. Labor interests understandably want to protect the American laboring man, but I do not believe that the American laboring class wishes to perform the hand labor required to harvest the fruits and vegetables. It is no pleasure to follow the harvest from south to north and as I indicated, few Americans participate, so we have grown accustomed to relying on the foreign labor to get the job done.

Maybe as some have indicated we should put this legislation over until the next session of Congress and try to perfect it in a more leisurely fashion, particularly since we have so many amendments being offered.

The amemdments being offered by the House Education and Labor Committee should be rejected and the various amendments being offered by Members representing agricultural interests should be adopted. If we in agriculture cannot prevail then it would be may recommendation that this legislation be defeated.

I particularly want to see the Department of Agriculture regularly consulted as the H-2 program is implemented. Further, I see no reason to lock into the statute the current regulations that the Department of Labor operates under when implementing the current H-2 program. It is very difficult to get consideration for amending current law and I can foresee problems developing if we are so rigid as to enact current regulations into the statute. One last problem I would call to your attention is the matter of time that a foreign worker would be allowed to remain in this country. For most purposes the agricultural industry feels that 11 months is a more realistic figure. However, the Education and Labor Committee selected 8 months to be more appropriate. To operate an H-2 program under this limitation will only cause the farmer to incur more costs and more costs we do not need in the current claimate.

Mr. Chairman, I felt I had a responsibility to call Members' attention to these items. Again I call upon my colleagues to reject the amendments to be offered by members of the House Education and Labor Committee. If we are no successful, then I intend to reconsider my support for this legislation.●

Mr. MAZZOLI. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. FOLEY) having assumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7357), to revise and reform the Immigration and Nationality Act, and for other purposes, had come to no resolution thereon.

MODIFYING WEST VIRGINIA FEDERAL JUDICIAL DISTRICTS

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 3081) to modify the judicial districts of West Virginia, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. WALKER. Mr. Speaker, reserving the right to object, could we get some idea as to what is going on here.

Mr. RAILSBACK. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Illinois.

Mr. RAILSBACK. I thank the gentleman for yielding.

Mr. Speaker, it is my understanding this is the so-called West Virginia amendment. Perhaps the chairman would like to explain. I think it is one that came up last night.

Mr. KASTENMEIER. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. Mr. Speaker, this is the same bill that was up on unanimous consent yesterday and ultimately was objected to on grounds other than the merits by the gentleman from Michigan, the gentleman from Pennsylvania will recall.

This is a bill which costs nothing, which has agreement of all Members of the West Virginia delegation. There is no objection we have been able to ascertain in any quarter.

The purpose of the bill is to adjust county lines in the two judicial districts of West Virginia, assigning three new counties to the south and two new counties to the north, and also to assign the so-called swing judge in West Virginia.

□ 1540

Mr. WALKER. Mr. Speaker, reserving the right to object, this is the same bill that was brought up last night that changes north to south and south to north?

Mr. KASTENMEIER. Mr. Speaker, if the gentleman will yield, it is precisely the same bill.

Mr. WALKER. Mr. Speaker, it seems like an entirely appropriate bill for the end of Congress.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin (Mr. KASTENMEIER)?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3081

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 129 of title 28, United States Code, is amended—

(1) in subsection (a) by—

(A) striking out ", Wirt, and Wood";

(B) inserting "Braxton," after "Berkeley,";

(C) inserting "Pocahontas" after "Pleasants,"; and

(D) inserting "Webster, and" after "Upshur"; and

(2) in subsection (b) by—

(A) striking out "Braxton,", "Pocahontas," and "Webster,"; and

(B) inserting "Wirt, Wood," after "Wayne,".

SEC. 2. (a) The existing district judgeship for the Southern District of West Virginia, authorized by section 2 of the Act entitled "An Act to provide for the appointment of additional district and circuit judges and for other purposes", approved October 20, 1978 (92 Stat. 1632; 28 U.S.C. 133 note) shall, as of the date of enactment of this Act, be authorized under section 133 of title 28 of the United States Code as a district judgeship for the Northern District of West Virginia, and the incumbent of that office shall henceforth hold office under section 133, as amended by this Act.

(b) The existing district judgeship for the Northern and Southern Districts of West Virginia shall be authorized as the district judgeship for the Southern District.

SEC. 3. The table in section 133 of title 28, United States Code, is amended by striking out the following:

"West Virginia:

"Northern	1
"Southern	3
"Northern and Southern	1",

and inserting in lieu thereof the following:

"West Virginia:

"Northern	2
"Southern	4".

Passed the Senate December 10 (legislative day, November 30), 1982.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

APPOINTMENT OF CONFEREES ON H.R. 5470, PERIODIC PAYMENT SETTLEMENT TAXES ACT OF 1982

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill, H.R. 5470, to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness, with Senate amendments thereto, insist on the House amendments and agree to the conference requested by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois? The Chair hears none and, without objection, appoints the following conferees: Messrs. ROSTENKOWSKI, GIBBONS, PICKLE, DUNCAN, and FRENZEL.

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 7093, REDUCING RATE OF CERTAIN TAXES PAID TO VIRGIN ISLANDS

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill, H.R. 7093, to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income, with Senate amendments thereto, insist on the House amendments and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois? The Chair hears none and, without objection, appoints the following conferees: Messrs. ROSTENKOWSKI, PICKLE, JACOBS, GEPHARDT, SHANNON, ARCHER, GRADISON, and MARTIN of North Carolina.

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 6056, TECHNICAL CORRECTIONS ACT OF 1982

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the managers have until midnight tonight to file a conference report on the bill, H.R. 6056, to make technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PROVIDING TELEPHONE SERVICE TO PERSONS WITH IMPAIRED HEARING

Mr. WIRTH. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2355) to amend the Communications Act of 1934 to provide that persons with impaired hearing are insured reasonable access to telephone service, with the Senate amendment to the House amendments thereto, and concur in the Senate amendment to the House amendments.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendment to the House amendments, as follows: Page 4, after line 17, of the House engrossed amendment, insert:

SEC. 3. Subparagraph (B) of paragraph (2) of section 1225(a) of the Public Broadcasting Amendments Act of 1981 is amended to read as follows:

"(B) Notwithstanding the provisions of subsection (c) of section 396 of the communications Act of 1934, in the case of the offices of director the terms of which expired March 1982, persons appointed to fill two of such vacancies existing as of December 13, 1982, shall be appointed for terms which

shall expire on March 1, 1984 and shall not be representative of the political party having a majority of the directors of the Board on December 13, 1982. Persons appointed for a term beginning March 1, 1984, to fill the vacancies occurring in such offices the terms of which, by reason of the preceding sentence, expire on March 1, 1984, shall not be filled by persons representing the political party having a majority of the directors of the Board on March 1, 1984. Persons appointed on or after March 1, 1984, to fill vacancies in the two such offices shall be appointed for terms of five years. On March 1, 1984, there are abolished those five offices of director the terms of which, without application of the preceding provisions of this paragraph, expire on such date. In administering the provisions of this paragraph a director is a minority member of the Board if he is not a member of the political party to which the majority of the directors of the Board are members.".

SEC. 4. The Communications Satellite Act of 1962, as amended (47 U.S.C. 701 et seq.), is amended by deleting the second sentence of section 304(b)(2) of such Act.

Mr. WIRTH [during the reading]. Mr. Speaker I ask unanimous consent that the Senate amendment to the House amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

Mr. WALKER. Mr. Speaker, reserving the right to object, is there any cost at all in this bill? Is there any money involved in the bill?

I yield to the gentleman.

Mr. WIRTH. The answer to that is "No." As part of the Public Broadcasting Amendments Act of 1981 Congress reduced, by attrition as of October 1, 1983, the size of the Board of the Corporation for Public Broadcasting, from 15 to 11, while providing that the new Board have no more than six members from the same political party. Because of a number of appointments now pending to the 15-person Board, in 1984 an impermissible imbalance could occur in terms of the political party representation on the Board. By having two of the terms that are slated to be filled in the near future—which expired in March of this year—end on March 1, 1984, this problem of political imbalance can be avoided, thus allowing attrition of the Board to proceed smoothly. This is a noncontroversial amendment which has complete bipartisan support in both Houses.

One Senate amendment repeals an outdated provision of the Communications Satellite Act of 1962. This provision required Comsat to offer 50 percent of any stock offering it was going to bring to the market for sale to the various communications carriers. However, since the enactment of this provision, all of the authorized carriers have divested themselves of their holdings in Comsat.

Comsat is currently planning to bring a new equity offering to the market. This provision of the act imposes a burden on the issuance of new securities, yet does not give the authorized carriers any corresponding benefit. In 1972, as part of the Comsat proceeding, the FCC required AT&T to divest itself of its holdings in Comsat as a precondition of operating its own domestic satellite system. And the International Record Carriers, which purchased the permitted number of shares in Comsat when the company was formed, have long since disposed of their holdings, since Comsat has not, until recently, been a good investment.

When Comsat brings its new equity offering to the market, any member of the public—including the International Record Carriers—will have the opportunity to purchase stock. The removal of this particular section will not have any effect over the carriers' ability to own shares in Comsat. The change merely removes Comsat's obligation to set aside 50 percent of its new offering for a group of carriers who have shown no inclination in—or have been constrained from—owning shares of Comsat.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado (Mr. WIRTH)?

Mr. BLILEY. Mr. Speaker, reserving the right to object, I would like to engage the chairman of the Telecommunications Subcommittee in a brief colloquy.

I apologize to my colleagues for having been necessarily absent when this legislation was considered under suspension earlier this week. I did have several concerns about the legislation, and the chairman of the subcommittee has been most helpful in addressing several of them.

Could the gentleman from Colorado clarify for me: Would it be possible for an industry to avoid regulation by the Federal Communications Commission by engaging in a program of voluntary compliance with the goals of this act?

Mr. WIRTH. I thank the gentleman for his inquiry. The language of the statute specifically directs the Commission to consider the costs and benefits of any proposed regulation. As I suggested in my earlier remarks, the Commission should encourage programs of voluntary compliance, which avoid many of the costs associated with direct enforcement by the Commission. Accordingly, the Commission should rely upon voluntary programs developed by an industry segment to achieve compliance with the provisions of the statute provided that those programs are effective on a continuing basis.

Mr. BLILEY. The report of the committee provides examples relating to the possible requirements that could be imposed on the hotel industry. Were those examples intended to specify that the Commission should adopt any particular requirements with regard to this industry?

Mr. WIRTH. No. The hearing impaired have expressed particular concern about their ability to reach their family and to conduct business while traveling. In previous legislation, they have urged that all hotel phones be made compatible. I believe that the committee was concerned that the Commission not impose undue costs on the hotel industry. It also observed the broad authority of the Commission with respect to hotels and motels. The committee, therefore, provided several examples of the maximum extent of regulation that the Commission should promulgate. These examples do not require or suggest that the Commission adopt any of these requirements.

Mr. BLILEY. I thank the chairman for his cooperation in clarifying this point. I share his concern for the safety and convenience of the hearing impaired when they are traveling. It is my hope that a strong voluntary effort by the hotel industry will provide the hearing impaired with the information and equipment they need so that we can avoid unnecessary new regulations in this area.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado (Mr. WIRTH)?

Mr. BROYHILL. Further reserving the right to object, Mr. Speaker, and I shall not object, I just wanted to thank the gentleman from Colorado for accommodating the concerns just expressed by the gentleman for Virginia (Mr. BLILEY).

I think this has added a great deal to the passage of this legislation which surely is needed. I know the hearing impaired in my area have been expressing their interest in this legislation for some time. I think it is in the public interest and would urge that it pass unanimously here today.

Mr. WIRTH. Mr. Speaker, would the gentleman yield?

Mr. BROYHILL. I am glad to yield.

Mr. WIRTH. Mr. Speaker, I want to thank the gentleman and thank the gentleman from Virginia for their help in sorting through a question which has plagued this legislation for the last 5 or 6 years and also to take the opportunity on behalf of our colleagues to wish a speedy recovery to the gentleman from Virginia (Mr. BLILEY).

Mr. BROYHILL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado (Mr. WIRTH)

that the amendment be considered as read and printed in the RECORD?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Colorado (Mr. WIRTH)?

There was no objection.

A motion to reconsider was laid on the table.

JOB TRAINING PARTNERSHIP ACT AMENDMENTS

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill, S. 3113, making certain minor and technical amendments to the Job Training Partnership Act and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California (Mr. HAWKINS)?

Mr. JEFFORDS. Mr. Speaker, reserving the right to object, I do so for the purpose of allowing the chairman to explain the nature of this bill.

I would like to say first that I have examined the bill. It is made up with one exception, which not of great major note, of merely technical amendments, misspellings or punctuation problems which are technical in nature.

The one area, I believe, which is more of a substantive matter involves advertising in a newspaper by a State. It is not of any great moment and I assure the gentleman from Pennsylvania that this does not in any way affect any expenditure of sums, other than the possibility of saving money through confusion.

I would ask the chairman of the committee if he concurs with that and wishes to make any other additional comments with respect to this bill?

Mr. HAWKINS. Mr. Speaker, I thank the gentleman for his remarks. It is true that this bill merely makes certain corrections in references, in material that was inadvertently deleted and minor corrections. As was indicated, the only substantive part of the bill which could be construed as different from what the conferees agreed to in conference was a deleted section which refers to the States advertising in newspapers for high-paying jobs.

□ 1550

This was not the intent, certainly, of the conferees, but inadvertently this was stricken and this will reinsert it. With that one exception, all of the other changes are corrections in sections and in deleted materials.

Mr. JEFFORDS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3113

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 103(c)(3) of the Job Training Partnership Act (hereafter in this Act referred to as the "Act") is amended by striking out "104" and inserting in lieu thereof "101".

(b) Section 106(d)(3) of the Act is amended by striking out "ex-offenders" and inserting in lieu thereof "offenders".

(c) Section 108(b)(2)(A)(iv) of the Act is amended by striking out "projects" and inserting in lieu thereof "payments".

(d) Section 122(a)(3)(C) of the Act is amended by striking out "executive officers" and inserting in lieu thereof "elected officials".

(e) Section 125(c) of the Act is amended by striking out "subsection" and inserting in lieu thereof "section".

(f)(1) Section 141(c) of the Act is amended by inserting after "unless" the following: "the Secretary determines that".

(2) Section 141(G) of the Act is amended—

(A) by striking out the word "which"; and

(B) by striking out the word "title"; and inserting in lieu thereof the word "Act".

(g) Section 142(b) of the Act is amended by inserting after "aid" the following: "furnished under any Federal or federally assisted program based on need".

(h) Section 143(d) of the Act is amended by striking out "1921" and inserting in lieu thereof "1931".

(i) Section 181(f)(5) of the Act is amended by striking out "this section" and inserting in lieu thereof "this subsection".

SEC. 2. (a) Section 203(a)(1) of the Act is amended by striking out "participate" and inserting in lieu thereof "participate".

(b) Section 203(b)(2) of the Act is amended by striking out "expend" and inserting in lieu thereof "be expended".

SEC. 3. Section 308 of the Act is amended by—

(1) striking out ", as described in section 121," and inserting in lieu thereof "with"; and

(2) inserting before the period at the end thereof the following: ", in accordance with the provisions of section 121".

SEC. 4. (a) Section 401(h)(2) of the Act is amended by striking out "103" and inserting in lieu thereof "106".

(b) (1) Section 402(a)(2) of the Act is amended by inserting "the special nature of" after "because of".

(2) Section 402(c)(4) of the Act is amended by striking out "103" and inserting in lieu thereof "106".

(c) Section 454(b) of the Act is amended by striking out "title II" and inserting in lieu thereof "title IV".

(d)(1) Section 463(a)(1) of the Act is amended by inserting after "processing systems" the following: "related to labor market information".

(2) Section 463(a)(2) of the Act is amended by inserting after "coding measures" the following: "related to labor market information".

(e)(1) Section 464(a)(1) of the Act is amended by inserting "for each fiscal year" after "part".

(2) Section 464(b)(7) of the Act is amended by striking out "providing" and inserting in lieu thereof "provide".

SEC. 5. Section 13 of the Wagner-Peyser Act, as added by section 501 (h) of the Act is amended by inserting "(1)" after "(b)" and by adding at the end thereof the following new paragraph:

"(2) No funds paid under this Act may be used by any State for advertising in newspapers for high paying jobs unless such State submits an annual report to the Secretary beginning in December 1984 concerning such advertising and the justifications therefor, and the justification may include that such jobs are part of a State industrial development effort.".

SEC. 6. The amendments made by this Act shall not be construed as affecting the term "originally enacted" as applied to the Job Training Partnership Act in section 402(a)(8)(A)(v) of the Social Security Act as amended by section 503 (a) of the Act.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CENTRAL PLATTE VALLEY WATER STUDY

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5536) to authorize the Secretary of the Interior to engage in a feasibility study of water resource development and for other purposes in the Central Platte Valley, Nebraska, with a Senate amendment thereto, and concur in the Senate amendment with an amendment:

The Clerk read the title of the bill.

The Clerk read the House amendment to the Senate amendment, as follows:

In lieu of the Senate amendment insert:

Strike out all after the enacting clause and insert:

That the Secretary of the Interior is hereby authorized to engage in feasibility studies of the following proposals:

(1) Colville Indian Reservation, Chief Joseph Dam project, located in northeastern Washington.

(2) Gibson Dam powerplant, located on the Sun River in Lewis and Clark Counties, Montana.

(3) Imperial Irrigation District canal lining, located in Imperial Irrigation District, Imperial County in southern California.

(4) New Melones conveyance system study, Central Valley project, Stanislaus River division, located in Tuolume, Calaveras, Stanislaus, San Joaquin, and Merced Counties, California.

(5) Pilot Butte powerplant, Riverton unit, located in Fremont County Wyoming.

(6) Prairie Bend unit, located in the Platte River basin, located in Buffalo and Hall Counties, Nebraska. Such feasibility study shall include a detailed report on any effects the proposed project may have on wildlife habitat, including habitat of the sandhill crane and the endangered whooping crane.

(7) Siletz River Basin project, located in Lincoln and Polk Counties, Oregon.

(8) Spring Canyon pumped-storage project, located in Mohave County, Arizona.

(9) Tongue River Dam, located in Big Horn and Rosebud Counties, Montana.

(10) Water conservation and efficient use program, All-American canal relocation

project, located in Imperial County, California.

(11) Upper Klamath offstream storage study, Klamath project, located in Klamath County, Oregon.

(12) South Dakota water deliveries study, Pick-Sloan Missouri Basin program, located in Brown and Spink Counties, South Dakota.

(13) Central South Dakota water studies, Pick-Sloan Missouri Basin program, located in Sully, Hughes, Hyde, Hand, Beadle, and Faulk Counties, South Dakota.

(14) Blue Holes Reservoir, located in Fremont County and the Wind River Indian Reservation, Wyoming.

(15) Muddy Creek Basin hydrologic, surge relief, and erosion control study, near Great Falls, Montana.

SEC. 2. Before funds are expended for any of the feasibility studies authorized herein, the State in which the proposed project which is the subject of such feasibility study, or some other non-Federal entity, shall agree to participate in the study and to share in the cost of the study. The non-Federal share of the cost shall be a reasonable share, but not less than twenty-five percent, as determined by the Secretary of the Interior and may be partly or wholly in the form of services directly related to the conduct of the study.

SEC. 3. The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to complete protection of the Fisherman's Wharf area of San Francisco, California, substantially in accordance with the report of the Chief of Engineers dated February 3, 1978, as supplemented on June 7, 1979. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the amendment may be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. FITHIAN. Mr. Speaker, reserving the right to object, I reserve the right to object to inquire of the distinguished chairman as to what disposition, if any, has been made of the fundamental question I have raised, which is that of cost sharing by local authorities?

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. FITHIAN. I would be happy to yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Speaker, last night we had some difficulty with this bill because of a misunderstanding about what was in and what was not in. Let me assure the gentleman that I have personally gone over the amendment which was submitted and it will require a minimum of 25-percent local cost sharing.

Mr. FITHIAN. Further reserving the right to object, Mr. Speaker, let me say to Members of the House that the chairman and the distinguished members on the Committee on Interior and Insular Affairs have carried this to what I think is the ultimate conclusion: We must have cost sharing in these projects. I congratulate the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. BEREUTER. Mr. Speaker, reserving the right to object, I will not object, but I do congratulate the chairman on reaching agreement on this one sticking point.

Mr. Speaker, I rise in support of H.R. 5536, a bill of which I am an original cosponsor, providing for feasibility studies by the Bureau of Reclamation on the proposed Prairie Bend project in Nebraska as well as studies for 14 other proposals. The Water and Power Subcommittee held a hearing on the Prairie Bend study during which it heard from a host of witnesses including Bureau of Reclamation Commissioner Broadbent. The administration urged the inclusion of 13 other project feasibility studies in addition to the Prairie Bend study. After H.R. 5536 was reported favorably out of the subcommittee and the full Interior Committee, it passed the floor of the House and went to the other body. The other body passed an amended version which included the 13 other projects requested by the administration. That version also included studies for the Muddy Creek special irrigation project which is supported by a bipartisan delegation from Montana. The Muddy Creek studies were thoroughly discussed by the other body which also had the opportunity to debate the studies.

Mr. Speaker, the way to determine whether or not a proposed project is appropriate is to accomplish the feasibility study.

Mr. Speaker, the administration supports H.R. 5536. I urge my colleagues to support this measure.

Mr. BEREUTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. COELHO. Mr. Speaker, reserving the right to object, I just want to make sure that all of the projects that were in the proposal last night are still in it.

Mr. UDALL. If the gentleman will yield under his reservation, yes, Mr. Speaker, the one that the gentleman is concerned about is in there.

Mr. Speaker, the Senate amendments adds authority for some 14 feasibility studies. The Commissioner of Reclamation furnished the Subcommittee on Water and Power Resources information on these studies at the time of our hearing on H.R. 5536. The amendment also adds back in to the bill language concerning the feasibility study for the Prairie Bend Unit in Nebraska. This added language, approved by our committee, would require that report include a detailed statement upon the effect which the proposed project might have on wildlife and, in particular, the sandhill crane and endangered whooping crane.

Finally, the amendment would require that the States, or other local entities share in the cost of the studies. This would be to an extent to be determined by the Secretary of the Interior, but not less than 25 percent. I might mention that this is a new policy. Under existing law, the costs of such studies are nonreimbursable.

● Mr. PHILLIP BURTON. Mr. Speaker, I urge my colleagues to support this legislation, which includes authorization for construction of a breakwater at Fisherman's Wharf in San Francisco. This project has been sought for many years by the Fisherman's Wharf Merchants Association, led by its most able and effective president, Patrick Flannagan—and his predecessors. This breakwater is needed to protect not only San Francisco's fishing fleet, but also the historic ships in the National Maritime Museum's portion of the Golden Gate National Recreation Area. This has been desperately needed for years but the urgency of this project was forcefully brought to our attention during a recent storm which damaged both fishing vessels and historic ships. I again urge passage of this bill.●

Mr. COELHO. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 5002, FISHERY CONSERVATION AND MANAGEMENT IMPROVEMENT

Mr. JONES or North Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5002) to improve fishery conservation and management, disagree to the Senate amendment, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. WALKER. Mr. Speaker, reserving the right to object, do I under-

stand this bill has no budgetary impact?

I yield to the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I can assure the gentleman that it has no budgetary impact.

In a few words, if the gentleman cares to hear it, I will explain the difference between the Senate and the House versions.

Mr. WALKER. Further reserving the right to object, I would be very happy if the gentleman would do that just briefly.

Mr. JONES of North Carolina. I thank the gentleman for yielding.

Briefly, the State of California's representation in this noble body insisted on having two additional members on these various fishing councils, particularly the one involving California. The Senate saw fit not to allow the two extra members, so therefore, on behalf of the California Members of this body, I am requesting a conference in order that we can work it out and see whether California gets two, one, or no additional members.

This has no budgetary impact whatsoever, and that is the only difference between what we passed a few weeks ago and what the Senate passed.

Mr. WALKER. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. DINGELL. Mr. Speaker, reserving the right to object, and with all due respect for my dear friend, the distinguished chairman of the Committee on Merchant Marine and Fisheries, is there anything added to this with respect to the Alaska Railroad, or anything of that sort?

Mr. JONES of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I, of course, yield to the chairman.

Mr. JONES of North Carolina. No, Mr. Speaker, this is H.R. 5002. What we discussed a few minutes ago has been completely discounted and disregarded.

Mr. SNYDER. Mr. Speaker, will the gentleman yield under his reservation of objection?

Mr. DINGELL. I, of course, yield to the gentleman from Kentucky.

Mr. SNYDER. I can assure the gentleman that if they try to add the Alaska Railroad I will call him.

Mr. DINGELL. I thank the gentleman. I do not know whether I am for or against the addition of the Alaska Railroad provisions, but the Senate does things sometimes in great haste this time of year without consultation with the proper committees over here, and a little watchfulness is sometimes in order.

Mr. SNYDER. If the gentleman will yield further, the Committee on Merchant Marine and Fisheries has no reason and no jurisdiction to be messing with the Alaska Railroad. It ought not to be bothering with it. That is the gentleman's jurisdiction, and I am not going to agree, as the ranking minority member on the committee, because it is something we ought not to be dealing with. That is the gentleman's.

Mr. DINGELL. I thank the gentleman. But that is not in this bill, however?

Mr. JONES of Carolina. If the gentleman will yield, no, no connection whatsoever; no language.

Mr. DINGELL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina? The Chair hears none and, without objection, appoints the following conferees: Messrs. ANDERSON, BREAUX, STUDDS, SYNDER, and FORSYTHE.

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 5002, FISHERY CONSERVATION AND MANAGEMENT IMPROVEMENT

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that the managers may have until midnight, December 18, 1982, to file a conference report on the bill (H.R. 5002) to improve fishery conservation and management.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 5002.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

HOUR OF MEETING TOMORROW

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 4 p.m. tomorrow.

The SPEAKER pro tempore (Mr. BREAUX). Is there objection to the request of the gentleman from Washington?

There was no objection.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 7439, passed earlier today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate has passed without amendment bills and a concurrent resolution of the House of the following titles:

H.R. 5204. An act to authorize and direct the Secretary of the Interior to accept certain lands for the benefit of the Sycuan Band of Mission Indians;

H.R. 6588. An act to provide for Federal recognition of the Cow Creek Band of Umpqua Tribe of Indians, to institute for such tribe those Federal services provided to Indians who are recognized by the Federal Government and who receive such services because of the Federal trust responsibility, and for other purposes;

H.R. 6904. An act to provide subsistence allowances for members of the Coast Guard officer candidate program, and for other purposes;

H.R. 7155. An act to settle certain Indian land claims within the State of Florida, and for other purposes; and

H. Con. Res. 435. Concurrent resolution correcting the enrollment of H.R. 5447.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7144) entitled "An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 3, 7, 17, 23, 33, 34, 35, 39, 40, and 41 to the above-entitled bill.

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate numbered 1 to the amendment of the House to the bill (S. 625) entitled "An act to revise the boundary of Voyageurs National Park in the State of Minnesota, and for other purposes."

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate numbered 2 to the amendments of the House to the bill (S. 2273) entitled "An act to amend section 7 of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706) to extend authorizations for appropriations, and for other purposes."

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate to the bill (H.R. 5238) entitled

"An act to amend the Federal Food, Drug, and Cosmetic Act to facilitate the development of drugs for rare diseases and conditions, and for other purposes."

□ 1600

A WORKABLE SOLUTION TO OUR TRADE PROBLEMS WITH JAPAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska (Mr. BEREUTER) is recognized for 60 minutes.

Mr. BEREUTER. Mr. Speaker, several weeks ago, the long-awaited GATT (General Agreement on Tariffs and Trade) Ministerial Conference concluded. Eighty-eight countries met in Geneva, Switzerland, to discuss critical issues relating to the conduct of international trade.

Given the troubled economies of virtually all nations, even our own, proponents of free trade faced a difficult task at this trade conference. With economic difficulties come almost insurmountable calls for protection of domestic producers and manufacturers and an increasing cold shoulder to foreign goods.

As a member of the congressional delegation to this conference, I considered these negotiations to be of utmost importance. Of particular interest to me, because I represent one of the Nation's premier agricultural districts, were the bilateral United States-Japan negotiations. Promised to the anxious farm community in early spring, these discussions were designed to identify and to implement ways to bring down formidable Japanese barriers to the importation of American agricultural products.

In the last few days, we have heard much said in this Chamber about the status of United States-Japan trade relations, and particularly, the imbalances in that relationship. The agricultural trade barriers set up by the Japanese came in for special scorn. Yet, no one in this body offered any workable solution to these problems. The much debated domestic content bill, the proponents admit, is a flawed vehicle, one with a potential for creating chaos in the international trading system. It does not offer a reasonable or acceptable answer to the problems we encounter in trade with the Japanese.

Today, I would like to reemphasize to my colleagues the important role agricultural trade plays in the American economy and to describe some of the problems American traders face abroad. Moreover, I hope to encourage a search for meaningful solutions to the intolerable United States-Japan trade imbalance by suggesting what I believe to be a promising answer to the agriculture trade barrier conflict.

AMERICA'S EXPORT SUCCESS STORY

Let me begin by first giving a brief description of America's greatest trade success story: The agricultural export market.

America began exporting agricultural products more than 350 years ago with the sale of tobacco to the English. According to statistics gathered by the U.S. Department of Agriculture's Foreign Agricultural Service, our Nation now exports more agricultural products than any other country in the world. More than 150 nations receive U.S. agricultural products. We account for four-fifths of the soybeans moving in world markets, two-thirds of the feed grains traded, two-fifths of the wheat and cotton shipped abroad and one-fifth of the tobacco and rice sold between nations. Earnings from foreign sales of agricultural products have added more than $10 billion to our trade surplus account each year since 1974. In contrast, our nonagricultural trade balance reversed from a $958 million surplus in 1970 to a $50 billion deficit just 10 years later. Over the same period, the farmers and ranchers of this Nation have preformed in exemplary fashion, boosting the agricultural trade surplus from $1.3 billion in 1970 to an amazing $23.2 billion at decade's end.

The value of these foreign markets to the individual farmer—as well as to the Nation as a whole—cannot be underestimated. Presently two-fifths of our cropland—or approximately 138 million acres—produces commodities for foreign sales. Moreover, one-fourth of the cash receipts earned by our farmers and ranchers comes from that vital trade. Expanded markets encourage production efficiencies which engender benefits to the farmer, as well as to the American consumer.

It seems almost unbelievable that in the 1930's, average yearly exports were only $765 million. That figure rose steadily to $2,416 billion in the 1940's, $3,603 billion in the 1950's, and $5,735 billion in the 1960's. Average yearly sales then skyrocketed to $18,370 billion in the decade of the 1970's.

Everyone—consumers, farmers, workers ranchers,—benefits from a health agricultural export program. Multiple values of the export effort can be readily cited.

Although we exported more than $40 billion of agricultural commodities during fiscal year 1980, the U.S. Department of Agriculture estimated that such trade generated twice that amount of activity in the domestic economy and accounted for roughly 1 million jobs. In 1979, almost half a million people were employed on the farm and approximately 680,000 in jobs related to the assembling, processing and distribution of agricultural goods destined for foreign markets. USDA statistics for 1979 tied to our agricultural export effort 60,000 food processing, 300,000 trade and transportation, 120,000 manufacturing and 50,000 other jobs in the economy.

Such statistics take on even more significance when one learns that the value of overall U.S. agricultural exports for fiscal year 1982 dropped $4.7 billion, an 11 percent slide from the previous year, to $39.1 billion. Furthermore, the volume of agricultural exports for the period lagged 2 percent behind the previous year's figures, slipping to 158 million tons. Despite an 11 percent decline in imports, our agricultural trade surplus fell from a record $26.6 billion in fiscal year 1981 to $23.7 billion.

During October of this year, we suffered another distressing decline, as volume dropped 23 percent—to 12.1 million tons—and value fell 26 percent—to $2.9 billion—from the same month a year ago. For fiscal year 1983, the USDA predicts a continued slide, down to $37.5 billion, in the value of agricultural trade.

In certain areas, we did have some good news. For the first 6 months of the year, trade with South Asia, India, and Pakistan was up over 100 percent. Exchanges with Latin American and the Caribbean, however, showed a 33 percent drop over the same period.

Some of the drop in export performance occurs due to circumstances beyond our control. Economic conditions, for example, the Polish debt crisis, explain the 56-percent slump in imports by East European countries. In other cases, the dollar's appreciation has hampered U.S. export performance.

In some cases, however, the USDA reports that movements in the value of the U.S. dollar did not appreciably affect foreign prices. For example: between March 1981 and March, 1982, when the yen depreciated 16 percent, Japanese import prices for U.S. wheat, corn, and soybeans fell 3 percent, 17 percent, and 16 percent compared to drops in U.S. export prices of 4 percent, 20 percent, and 16 percent.

Regardless of the cause, the deterioration in export performance is unnecessary. American farmers, poultry men, stockgrowers, and fruit and vegetable growers produce high quality goods in heavy demand worldwide. If economic conditions downgrade market opportunities in one sector, we must pursue any other options all the more aggressively. We must constantly work to penetrate any possible market abroad. Certainly the demand for our goods exists.

Despite the desirability of our agricultural products, we are enduring trade declines because trade barriers in some countries hamper our sales efforts and undermine our ability to overcome temporary economic disincentives to trade.

UNITED STATES TRADE WITH JAPAN

Japan offers the classic example of the deleterious impact of trade barriers, one that is constantly and appropriately cited in this body. It must be recognized that Japan has been our No. 1 market since 1964. Japan purchased $6.7 billion of agricultural goods from us in 1981, up 17 percent from 1980. The second ranking customer, West Germany, received less than half that amount. One out of every 20 U.S. farm acres goes to produce commodities which feed Japan, a figure which represents more cropland than Japan itself devotes to feeding its citizens. Some 90 percent of Japan's high quality beef imports, for example, come from the United States. With food imports by Japan expected to double by the end of the century, our Asian ally offers a fertile market for additional American sales.

Despite the already extensive purchases by the Japanese from the United States, their significant trade barriers still greatly hamper our increased sales to this important market. According to Alan Middaugh, president of the Meat Export Federation, "While the average ad valorem duty on Japanese manufactured goods entering the United States is 2.5 percent of the import duty on U.S. beef is 25 percent."

Japan maintains import quotas on 22 agricultural products and ad valorem tariffs on a number of commodities. Tariff quotas apply to 11 items including corn used for industrial purposes and barley used for feed.

Beef quotas are particularly notorious. For April 1981, to March 1982, beef import quotas were as follows:

	Metric tons
General quota	111,000
International hotel and restaurant quota	3,000
School lunch	2,250
Boiled beef	4,700
Okinawa	5,850
Total	126,800

Quotas change roughly every 6 months, the above quota being 8,000 metric tons less than the previous level. This restricted level allows the annual entry of only 2.5 pounds of foreign beef per Japanese citizen.

Equally stringent quotas apply to fresh oranges and fruit juices. Quota limits cover two periods: June to August and the remainder of the year. A 20-percent tariff applies during the latter period even though virtually no domestic oranges are available during that time. A 1978 requirement that imported juices must use at least 40 percent of their juice from Japanese oranges caused a dramatic drop in the U.S. share of the Japanese market, from 77 percent to 20 percent.

Formal quotas are not the only mechanism used to depress imports, governmental advocacy of voluntary imports, quarantine regulations, health regulations, standards and credit arrangements can all be used to hamper U.S. sales efforts. Purchases of commodities for resale by the MAFF's (Ministry of Agriculture, Forestry and Fisheries) food agency, at a noncompetitive price support of the domestic produce, further discourages purchases from abroad.

If these trade barriers could be eliminated, U.S. sales to Japan potentially could increase in a major degree.

One important unexploited sales opportunity is for pineapple juice, which is not produced in Japan. Another opportunity lies in beef sales.

The following figures demonstrate the potential for enhanced beef sales. Total meat consumption in Japan grew from 3.5 kilograms per person in 1960 to 22 kilograms in 1980, with high quality beef and veal consumption increasing from 1.1 kilogram to 3.5 kilograms per person. Despite this rise, however, that level equals only one-tenth of U.S. beef consumption and one-fourth of that of Western Europe. In 1981, per capita carcass weight beef consumption averaged 11 pounds in Japan, a stark contrast with the United States 106-pound average. With the Japanese diet in transition since World War II and fish stocks off Japan's coast decreasing, its citizenry is becoming increasingly reliant on beef imports for protein.

INTERNAL JAPANESE RESISTANCE TO IMPORT INCREASES

The need for increased imports and the desirability of freer trade policies, however, seem to be ignored by the Japanese, especially the farming sector. Japanese farmers are dead set against any change in the current import policies. On April 23, an estimated 8,000 farmers took to the streets in Tokyo chanting "No more beef, no more oranges," a direct protest against the U.S. request that import quotas on 22 agricultural and fishery products, including beef and oranges, be dropped. According to a report in the May 1982, issue of the London Economist:

Japanese have been fed with horror stories in the newspapers and on the air waves about what could happen to local agriculture if the Americans were allowed to export more of their cheap beef and delicious oranges. Nightmares of a farming system reduced to the near starvation level of 1945 are conjured up. The Japanese are told that they are already dependent on foreign supplies for nearly half of their daily diet of 2,500 calories. What if the Americans should once again slap embargoes on certain food exports?

Why the campaign to create mass hysteria? Moreover, why do the Japanese perpetuate an agricultural commodity where the average farm size is less than 3 acres, compared to 450 acres in the United States? Why the campaign in an economy which suffered in 1980 its worst rice crop in 26 years? Why the hysteria when 1981 wheat production was virtually equal to that of 1980, despite a 17-percent increase in harvested area? Why the hysteria when only 13 percent of Japanese farmers are full-time operators and only 14 percent of the land is suitable for agricultural use?

Part of the answer lies in basic Japanese law. The 1961 Agricultural Basic Act, for example, perpetuates small-scale operations. It allows imports to be controlled if they threaten domestic farm prices, thereby keeping domestic prices and income high. The Japanese Ministry of Agriculture, Forestry and Fisheries estimates that such a program cost the Japanese $14.7 billion in 1979, an amount equivalent to 28 percent of gross agricultural income.

Similar subsidy programs benefit Japanese beef producers, enabling the nation to provide 75 percent of its own beef requirements. Although the average Japanese herd size is 5–6 head, a complicated system of prices, supports, import quotas, feeder-calf stabilization schemes, direct grants, and low-interest loans for capital and operating expenses, and direct breeding assistance sustain the Japanese beef producers. Costs are high. By comparison, the average cost of production per hundredweight of slaughtered cattle in the United States in 1979 was $65.74; it was $140.91 for a Japanese dairy steer and $218.27 for a Japanese breed Wagyu steer. As a result, the average retail price of beef in Japan was $6.77 per pound in 1981 compared to $2.40 in the United States. Retail prices for boneless sirloin averaged $14.40 during 1979–81 compared to $3.50 in the United States High demands and artificial limitations on supply, coupled with small scale production, inefficient feeding practices and high livestock mortality keep Japanese beef expensive.

JAPANESE FARMERS HOLD POLITICAL CONTROL

A recent article by Aurelia George in the journal Pacific Affairs provides an explanation for Japanese obstinacy on these points.

It is widely recognized that, in matters of agricultural trade and farm policy, the Japanese government is influenced more strongly by political factors than by considerations of economic efficiency or comparative advantage. The ruling Liberal Democratic Party (LDP) is commonly portrayed as captive of domestic farming interests and bound to the dictates of an electoral strategy aimed at preserving a voting base in rural areas.

Labeled by George as a "well-mobilized and vocal political force," Japanese farmers must be reckoned with in any debate on Japanese trade policy. With membership concentrated in a single association of agricultural cooperatives, Nokyo, 5 million voices and a half million personnel speak together on any political debate, making it the

largest single organization in the country.

Indicative of Nokyo's control over the agricultural sector is the fact that virtually all of the rice, over 90 percent of the milk, almost 90 percent of the vegetables and fruits, over 80 percent of the eggs and pork and 80 percent of the beef sold in Japan is marketed through Nokyo's 10,000 member cooperatives

Unchallenged economic power, matched by its political control—especially of agricultural policy—makes Noyko a potent force indeed. It has automatic consultation rights and even acts as administrative agent for numerous programs, including payments to producers. Despite a 43.6 percent decline in the agricultural workforce during 1965-78—from 10.09 million to 4.69 million workers—Noyko remains a potent voting block because total agricultural population declined only 7.8 million during that same period, from 30.0 million to 22.2 million. That figure represents 20.45 percent of the national electorate of 16.2 million eligible voters. Failure to reapportion the Diet since its creation further enhances the electoral power of the rural vote, providing these rural and semirural constituencies 30 percent of the total delegates in the Japanese diet. Given the slow declines in farm acreage and household population expected, Nokyo's ability to expand its services into nonfarm areas and its activism on the part of favored candidates, the agricultural imbalance in the Japanese political system promises to remain in the foreseeable future.

As a result of this political potency, George says:

. . . the LDP allows no major items affecting is rural clients to go unquestioned. In pursuing its stated political objectives of providing market and price stability for farm products, income equity across various sectors of the economy, maintenance of agriculture as a viable industry and security of food supply, the Government has created a comprehensive system of state control and support for agriculture. This system has led to considerable intervention in price determination and in matters relating to agricultural production, development and trade.

Such is the control of the agricultural sectors that:

Although bureaucracy in Japan has traditionally played an active and decisive role in the policy process, Government decisions affecting agriculture carry such political import that they are not left to the bureaucracy to make.

George said.

DESPITE HIGH PRICES, CONSUMERS SUPPORT THESE POLICIES

Despite the fact that Japanese consumers endure some of the world's highest food prices, they seem allied with the farmers on this protectionist policy. A recent survey in Japan reportedly revealed that 70 percent of Japanese consumers were willing to forgo less expensive imported food stuffs in favor of increased domestic prices. They endure higher domestic prices as well, allocating 32 percent of their consumer expenditures to food compared to 17 percent in the United States. Staples such as rice, bread, and beef sell at two to three times the average world prices.

No constituency for lower prices exists, especially one that disregards the interests of farmers. Noyko's efforts to forge a "community of interest" between urban residents and rural producers further undermines any chance for change in the absence of political support within the Diet for consumer interests. Rather, competing political parties attempt to outgun each other on the issue of support for farmers.

As a result of this intense concentration of decisionmaking authority, a general agreement on agricultural policy has emerged, George states. The most important facet of that agreement is a "national recognition of the need for a stable and guaranteed food supply, even at the risk of alienating consumers by high food prices, taxpayers by large budget deficits and overseas trading partners by import controls and tariff barriers." This policy process culminated in an April 1980 diet resolution which called upon the Government to "take every possible measure to enhance the country's food self-sufficiency and develop the agriculture and fishing industry with a view to ensuring the security of the people."

This food security commitment places tough obstacles in the way of foreign traders, and rightly or wrongly, justifies protectionism. As Mr. George suggests, it provides a "convenient guise of 'national interest' for special concessions to sectoral interests."

QUOTA INCREASES INSUFFICIENT

No wonder American negotiators face such obstacles in negotiating with the Japanese on the elimination of these trade barriers. At best we seem capable of eliciting from the Japanese only meager increases in quotas. That approach, however, accomplishes little.

Dr. Fred Sanderson, noted expert on Japanese food security issues and a Brookings guest scholar, challenges the Japanese approach to the goal of food security. He states:

Obviously there are better solutions than to try to grow enough food in Japan to guard against any disruptions of world trade. In any case, it's not a practical proposition. It cannot be done. The next best solution is to provide more security of supply through international agreements.

If such agreements would be consummated, what would this do to the Japanese farmer? Dr. Sanderson suggests a solution to the food security which would benefit all parties involved, the farmer as well as the American exporter and the Japanese consumer.

According to Dr. Sanderson, the distributors' profits and the Livestock Industry Promotion Corp. (LIPC) take a large share of the price markup on imported beef—causing the difference between the average $2 per pound U.S. price and the $15 per pound Japanese retail price. The LIPC is designed to channel resources to the Japanese farmer to improve meat production efficiency, but "apparently very little is actually used for this purpose." Moreover, "the system provides little incentive or pressure to improve efficiency. Rather, it creates a vested interest in inefficiency," Sanderson said.

A resolution of the import restriction-farm protection conflict, Dr. Sanderson says, would be for elimination of all quantitative restrictions on beef imports, leaving intact only the 25 percent duty. Under such a system, he projects that domestic market price would fall 50 percent, consumption increase 70 percent, and imports rise 250 percent, of which half could be expected to be supplied by U.S. farmers and ranchers who now have roughly 27 percent of the import market.

Of course, such a drastic price drop would have a devastating impact on Japanese beef producers. Deficiency payments, however, could easily remedy that problem. Sanderson notes that proceeds from the remaining 25 percent duty would cover 30 percent of the cost of the deficiency program. The remainder of the program expenditures could be financed directly by the Government or through a temporary 50 percent surcharge. Under the latter approach, Sanderson still expects prices would drop 30 percent, consumption rise 42 percent and imports climb 150 percent. Increased foreign competition would also push Japanese producers to improve the efficiency of their own operations, where much improvement is possible. Under such a system all parties, the Japanese consumer, the Japanese farmer and the American farmer, would benefit and United States-Japanese trade relations would improve markedly.

Sanderson predicts that a similar drop in orange quotas would enable both foreign and domestic producers to tap an as yet underdeveloped market for orange juice, allowing the United States to reap about half of the expected $300-$400 million sales increase. Although Japanese consumption of fresh oranges is twice that per capita as the United States, total fresh orange and orange juice consumption per capita in the United States doubles that of Japan. Japanese oranges do not produce high quality juice, thus accounting for the current limited market. Increased customs receipts

could then be channeled into diversification of the industry.

A RESPONSIBLE SEARCH FOR SOLUTIONS NEEDED

The debate on the terrible domestic content bill should demonstrate to Japan the frustations faced by the American public and its elected representatives regarding our bilateral trade regulations. Unless some progress occurs soon, the Japanese will be faced with stern, protectionist measures such as H.R. 5133. The international damage which that measure would cause must be avoided at all costs. But, the Japanese must step forward and make an effort to develop meaningful solutions to these conflicts.

We need to break through the wall of protectionism, not just reduce it brick by brick. Regardless of political conditions, the Japanese must assume the responsibilities of a leading world trader. They cannot continue piecemeal, grudging changes. No longer can they be allowed to drag their feet and to reject each American proposal with a "But that's not possible" response. As Dr. Fred Sanderson suggests:

. . . I believe it is not sufficient for Japan to simply continue with the process of small increases in the import quotas. What is called for in this situation for in this situation is a change in the system.

The alternative that I just suggested is but one of the many possible options which our two nations can and must explore. In the strongest possible terms I urge the development of a continuing dialogue on the matter between the Congress, the administration and the Japanese Government—one that continues unabated until these perceived inequities are removed.

The United States and Japan form one of the world's most important bilateral alliances. Intransigence on trade issues must not be allowed to destroy this key relationship. Both countries, however, must act responsibly to explore all avenues of compromise to resolve these conflicts.

It would be well to note the comments of the highly respected U.S. Ambassador to Japan, Mike Mansfield. Earlier this year he addressed the Foreign Correspondents' Club of Japan. In that speech, Mansfield warned our nations:

. . . Both of us bear a responsibility for ensuring that the current trade problem does not reach proportions whereby it causes even more severe strains in our overall relationship. If this were to happen, it would be much more difficult for the industrial democracies to deal together with the important problems we face—problems that are crucial to world peace—problems such as Russian troops in Afghanistan, the Polish situation, the concerns for the developing countries, the global negotiations. . . .

TRIBUTE TO THE HONORABLE TOM HAGEDORN AND THE HONORABLE ARLEN ERDAHL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL) is recognized for 60 minutes.

● Mr. FRENZEL. Mr. Speaker, today I want to thank two retiring colleagues, TOM HAGEDORN and ARLEN ERDAHL, for a job well done, and wish them well in their future activities.

Both ARLEN and TOM have served their districts well in the best traditions of Minnesota public service. Both received excellent training for the Congress in the Minnesota Legislature, where they served with current congressional colleagues, ARLAN STANGELAND, BRUCE VENTO, MARTIN SABO, and myself. There, as they have here in the Congress, distinguished themselves with able service.

TOM serves on the Public Works Committees and is the ranking minority member on the Investigations and Oversight Subcommittee. He also serves on the Agriculture Committee and is ranking minority member on its Livestock, Dairy, and Poultry Subcommittee. He has been a strong voice for conservative economic policy, and has earned a reputation as a staunch defender of farm producers and small business people.

ARLEN serves the Foreign Affairs Committee and the Education and Labor Committee and was the ranking minority member on the Subcommittee of Select Education. He made his reputation here as a thoughtful, sensitive, foreign policy analyst, and as an independent voice on matters of education and economics.

Both were farmers who still own farms in southern Minnesota. While neither has immediate plans to return to active agricultural production, those farms will be more than anchors to windward. ARLEN and TOM are going to carry the vocational description of "farmers" for the rest of their lives, and they will carry it proudly.

It is not terribly difficult to say goodbye to able colleagues. Members of Congress come and go with too great a frequency. The really hard part is to say goodbye to good friends like TOM and ARLEN. Their service here has been effective, successful, and selfless. I will miss them both.

I thank them for that service and wish TOM HAGEDORN and ARLEN and Ellen ERDAHL great success in whatever new careers on which they may embark.●

● Mr. MONTGOMERY. Mr. Speaker, I want to add my name to the list of colleagues paying tribute to two Congressman from the State of Minnesota who will not be back when the 98th Congress convenes, Representatives TOM HAGEDORN and ARLEN ERDAHL.

TOM HAGEDORN has served with distinction in this Chamber since being elected from the First District in 1974. I know he has been particularly interested in matters affecting agriculture and he has made a great contribution as a member of the Agriculture Committee. He has also been active on the Public Works and Transportation Committee.

TOM is an outstanding and well-respected Member and he can truly be proud of the service he has given to the First District and to the State of Minnesota in the House of Representatives. I am sure he will put his experience and leadership abilities to good use in the future, both in community activities and on the political scene.

I have come to know ARLEN ERDAHL well through our association with the Congressional Prayer Breakfasts. He has been a hard worker in this Chamber and we will miss him.

He has served diligently on the Education and Labor Committee and I know he has made a valuable contribution to the Foreign Affairs Committee.

ARLEN has served in a wide range of public service positions including Missesota secretary of state, State representative and public service commissioner. He can indeed be proud of these accomplishments.

ARLEN ERDAHL is a man of high integrity and character. It is unfortunate that we in this Chamber are losing a man of this caliber. He will be missed.

I want to wish the best for both of these fine gentlemen.●

● Mr. YATRON. Mr. Speaker, I would like to take this opportunity to say a few words about a friend and fine colleague, ARLEN ERDAHL.

As a member of the House since the 96th Congress, ARLEN ERDAHL quickly distinguished himself as an extremely capable, and devoted legislator. I have had the privilege of serving with ARLEN ERDAHL on the House Foreign Affairs Committee and I have seen first hand his many unique skills and abilities. ARLEN ERDAHL has been deeply involved in the development of foreign policy initiatives which promote and protect American interests and which maintain world peace. He has done an outstanding job on the committee.

ARLEN ERDAHL was also an active and effective member of the House Committee on Education and Labor. His strong belief in the importance of education to our society was manifest during his tenure on the committee. His efforts to guarantee quality education for our citizens was widely known and highly respected by his colleagues.

Indeed, ARLEN ERDAHL was a hard-working and diligent public servant. His work of his constituents, the State of Minnesota, and this Nation will long be remembered after he leaves the Congress. ARLEN ERDAHL will be truly missed by all of us who served

with him. I know that he will be successful in all his future endeavors and I wish him the very best.●

THE REPUBLICAN ALTERNATIVE HOUSE RULES PROPOSALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. LOTT) is recognized for 30 minutes.

● Mr. LOTT. Mr. Speaker, when the 98th Congress convenes on Monday, January 3, 1983, it will make one of the most important decisions of that Congress in adopting a body of rules to guide it for the ensuing 2 years. This will come in the form of a resolution reported from the Democratic Caucus adopting the House rules of the 97th Congress together with several far-reaching changes.

Mr. Speaker, on Thursday, December 16, 1982, I took a special order in which I offered a critique of those Democratic Caucus proposals for changing our House rules. That critique can be found on page H10102 of the December 16 RECORD, part II. In essence I criticized five of those proposals for undermining the concepts of both majority rule and minority rights in the House. The caucus proposals would make it more difficult to consider limitation amendments to appropriations bills and to discharge constitutional amendments. They would further erode the constitutional requirement for a majority quorum to do business by permitting a postponement of the vote on the Journal, a means of establishing a quorum, and by eliminating a vote on going into the Committee of the Whole to consider legislation. And finally, they would strip the House of the right to remove Members from committees and replace it with removal by communication between the caucus chairman and the Speaker.

Today, Mr. Speaker, I would like to focus my remarks on the alternative rules package being recommended by the Republican leadership which will be considered by our Republican Conference on the opening day of the new Congress. Unlike the Democratic Caucus rules package, our proposed rules changes are aimed at making the House and its committees more open, accountable, and conscientious. Many of these proposals are based on my own "Committee Improvement Amendments," House Resolution 100, introduced in this Congress with over 100 cosponsors. Not all of these are original with me. The Republican Party in the House has been pressing for many of these changes for years.

Mr. Speaker, I think it is especially regrettable that this most important decision on opening day is confined to just 1 hour of debate with no opportunity for amendment or separate votes. Not only is the minority precluded from offering its alternative proposals unless it defeats the previous question, but members of the majority caucus are denied separate votes in the House on their own caucus package, even though two of those proposals, relating to appropriations riders and constitutional amendments, were the subject of considerable dissent and opposition within the caucus. Members of the Democratic Caucus are under informal, binding instructions to support their entire package and resist any minority attempt to even offer its alternative package.

What would our alternative rules package do? First, we would eliminate the joint referral of bills to two or more committees and replace it with a designated principal committee of jurisdiction for referral purposes. Sequential and split referral would still be allowed subject to appropriate time limits. The present practice of joint referrals has greatly diminished legislative accountability in this House while greatly increasing confusion and delays. Our House Select Committee on Committees in the 96th Congress found that joint referrals lead to a substantial duplication of effort, a slowdown in the legislative process, an increase in staff power, jurisdictional bickering, and a lack of accountability. The Select Committee went on to find that such multiply referred bills consume four times as much meeting and hearing time, and have less chance of passage then singly referred bills. Finally, joint referrals lead to more amendments and confusion when and if such bills ever reach the House floor. This practice must be eliminated if we are to return this House to some semblance of order and efficiency.

In connection with this jurisdictional confusion at the committee level, our proposals would improve the committee system in several other important respects. First, they would require that the party ratios on all committees, except the Rules Committee, must reflect the party ratio of the House. Even though Democrats will comprise 61.8 percent of the House in the 98th Congress, the Democratic Caucus has mandated that Democrates comprise 63 percent of the Appropriations Committee, 64.5 percent of the Budget Committee, and 65.7 percent of the Ways and Means Committee. This not only does violence to the one-man, one-vote concept, but insures that the decisions made by these committees will not truly represent the interests or will of the House or the American people.

Second, our proposals would limit all commmittees, except Appropriations, to no more than six subcommittees, and all Members to no more than four subcommittee assignments. One of the greatest sources of legislative chaos in this body has been the proliferation of subcommittees with all the attendant duplication and jurisdictional bickering. Moreover, this proliferation has made it virtually impossible for any Member to be a conscientious legislator with so many conflicting demands on his time. In this Congress the Democratic Caucus limited subcommittees to no more that eight subcommittees. But this is still far too many. There are now 148 subcommittees and task forces in the House. Four committees now have eight subcommittees and five have seven. Our proposed rules change would reduce this number by 16, bringing the total down to 132.

Because our committee system is now spread all over the lot, the Democrats have had to resort to rules under which less than a majority of a committee can conduct business. This is done on two ways: First one-third of a committee can constitute a quorum for conducting all business except reporting a measure. Second, committees may authorize proxy voting. Taken together, these present rules only further insure that the legislative products of committees are neither representative of the committee nor the House. We have sacrificed majority rule and deliberation for expediency. Ironically, the Democratic Caucus has adopted a Caucus rule for the next Congress prohibiting proxy voting in the full caucus as well as in committee caucuses. Our proposed rules changes would restore the majority quorum requirement in committees for the transaction of any business, and would abolish all proxy voting.

Another source of problems in the House, in connection with the proliferation of subcommittees, has been the growth of staff. There can be no question that committees and subcommittees must have adequate staff backup and expertise. But, in recent years this has reached a point of diminishing returns. We have more staff doing more work than our own limited legislative time and responsibilities can possibly absorb. Just as our daily schedules tend to govern us rather than vice versa, excessive staff tend to dictate our workload, rather than the other way around. The more we become overreliant on staff to do the work we should be paying more attention to, the further removed we become from being the Representatives the people elected to make the decisions of government. Under one of our proposals, the House would vote each year on an overall committee staff ceiling, and this ceiling would then be used to allocate staff to each committee based on past and anticipated legislative and oversight activity.

With respect to committee oversight, we are proposing that each committee vote on its oversight agenda at the beginning of each Congress. At present,

these are put together by staff without consultation or approval by the membership of committees and subcommittees. As such, the present oversight plans submitted to the Government Operations Committee have little relation to reality. Our proposal would also make it possible for the bipartisan leadership to excercise more of an oversight coordination role in developing these plans in order to avoid duplication and insure that important oversight issues are given proper attention. Finally, the final oversight reports of committees would be required to relate actual oversight accomplishments to these original plans.

We are also proposing a House rule aimed at insuring that a new Congress get organized early so that the important work of committees can go forward immediately. At present we spend the first two months of a Congress just getting organized, even though the early organization rule voted by the 94th Congress was intended to permit the making of committee assignments in December before a new Congress convenes. Under our rule, the House would be required to elect its committees not later than 5 days after it convenes, and committees would be required to hold their organizational meetings not later than 8-legislative days after the new Congress convenes. Given the press of our budget deadlines for authorizations, early organization is esstential if we are to do a conscientious job of legislating in this body.

Finally, Mr. Speaker, we are proposing a rule to require that broadcast coverage of House proceedings include a view of the House while it is voting. At present this is blocked out despite the House broadcast rule requiring "complete and unedited" broadcast coverage of our proceedings. Our proposed rule would permit a visual display of the ongoing vote to be superimposed on the view of the Chamber while we are voting. The American people have a right to view this most important aspect of our proceedings as was originally intended by the House broadcast rule.

At this point in the RECORD, Mr. Speaker, I include a summary of our proposals and commend them to the reading and support of my colleagues. The summary follows:

BRIEF SUMMARY OF SUGGESTED REPUBLICAN AMENDMENTS TO HOUSE RULES, 98TH CONGRESS

(1) *Multiple Referral of Legislation.*—The joint referral of bills would be abolished in favor of designating a principal committee of jurisdiction for each bill introduced, but the Speaker would retain discretionary authority for sequential and split referral of bills.

(2) *Subcommittee Limits.*—Rule X, clause 6(c) would be amended to limit each committee (except Appropriations) to no more than six subcommittees, and to limit Members to no more than four subcommittee assignments in the House.

(3) *Staff Ceiling.*—Rule X, clause 5 would be amended by inserting a new paragraph (a) to prohibit the consideration of any primary expense resolution for a committee until the House had adopted a resolution to be reported from the House Administration Committee establishing an overall committee staff ceiling for that year. Primary expense resolutions would include an allocation for staff consistent with the overall ceiling established, and the total number of statutory and investigative staff shall not exceed the overall ceiling. The House Administration Committee would take into account a committee's past and anticipated legislative and oversight activities in allocating investigative staff positions to each committee. Any supplemental expense resolutions must indicate whether additional staff positions are being authorized, and, if such positions exceed the overall ceiling established, a two-thirds vote of the House would be required to consider any such resolution.

(4) *House Broadcasting.*—Rule I, clause 9(b)(1) would be amended to clarify the intent of the present broadcast rule that the "complete and unedited" broadcast coverage of House proceedings be provided to the media by requiring that the audio and visual coverage of the House Chamber be presented while Members are voting, including a visual presentation of the running vote tally.

(5) *Party Ratios on Committees.*—Rule X, clause 6(a) would be amended to require that the party ratios on committees reflect that of the House except for the Committee on Standards of Official Conduct (bipartisan) and Rules (two-thirds majority).

(6) *Committee Elections and Organizations.*—Rule X, clause 6(a)(1) would be amended to require that the House elect its committees not later than five legislative days after the convening of a Congress. And Rule XI, clause 1(a) would be amended to require committees to hold their organizational meetings not later than eight legislative days after the convening of the Congress.

(7) *Proxy Voting Ban.*—Rule XI, clause 2(f) would be amended to abolish all proxy voting on committees and subcommittees.

(8) *Majority Quorum.*—Rule XI, clause 2(h)(2) would be amended to require a majority quorum on committees and subcommittees for the transaction of any business (presently a one-third quorum may transact any business except for the reporting of a measure which requires a majority present).

(9) *Oversight.*—Rule X, clause 2(c) would be amended to require committees to formally adopt and submit to the Government Operations Committee by March 1 of the first session their oversight plans for that session, giving priority consideration to reviewing those laws, programs or agencies operating under permanent budget or statutory authority, and with a view to reviewing all significant laws, programs or agencies within their jurisdiction at least once every ten years. The Government Operations Committee, after consultation with the Speaker and majority and minority leaders, would report these plans to the House not later than March 15 together with any recommendations for coordination. The Speaker would be authorized to appoint ad hoc oversight committees to review matters within the jurisdiction of two or more committees. And, Rule XI, clause 1(d) would be amended to insure that each committee's final activity report at the end of a Congress include a separate section on its oversight accomplishments with reference to its original oversight plans.●

FOREIGN POLICY CONTRIBUTIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. PHILIP M. CRANE) is recognized for 15 minutes.

● Mr. PHILIP M. CRANE. Mr. Speaker, our Illinois colleague, the Honorable EDWARD J. DERWINSKI, in 24 years of outstanding congressional service, has proven himself a stalwart proponent of the United States of America. Unlike most of us, he has accomplished that feat principally in the realm of foreign policy. It is an understatement that his service on the House Committee on Foreign Affairs has been with extraordinary distinction. That accolade has come from Members of both House and Senate and from both sides of the political aisle. It has come from administration after administration, from the White House, the Department of State, and the Department of Defense. And it has come from foreign governments and diplomats. I have here but a sample of the numerous letters our colleagues have received. Letters from people who daily decide on questions of import for their countries. That recognition does not accrue from frivolous activities. That recognition evolves from a developed expertise based on firsthand experience. ED DERWINSKI built that expertise on a solid understanding of global and regional history. He built it on a sound appreciation of the essence of U.S. foreign policy. Foreign policy based on the principles set forth by our Founding Fathers.

ED DERWINSKI's specific contributions are too numerous to list but a brief sample here. These are some of his more recent and continuing efforts while serving his constituents, State of Illinois, and the United States. With the name DERWINSKI, it is fair to assume that he has an interest in Eastern European affairs. He appreciates the ideological struggle which exists between the United States and the Soviet Union. Since I have known him, he has championed the cause of people in captive nations of the Soviet Empire. Latvians, Lithuanians, Estonians, Poles, Germans, Hungarians, Czechoslovakians, Romanians, and Bulgarians—the peoples of once free states who periodically rise up against their Communist masters in their efforts to be free—have gained the consistent support of Congressman DERWINSKI. He has steadfastly pointed to the deliberate and continued Soviet violations of both the spirit and the letter of the Helsinki accords, which they signed.

When the Soviet Union snuffed out the free country of Afghanistan, ED DERWINSKI spoke out. He was in the vanguard of those working assiduously to remind free peoples everywhere

that, once again, the Soviets were up to their old tricks. When Greece and Turkey went to war over Cyprus, ED DERWINSKI provided well-reasoned, statesman-like advice and counsel on a truly emotional and explosive issue. When the SALT II strategic arms treaty negotiations stirred widespread national concern ED DERWINSKI responded. Congress expressed concerns about the verifiability of various proposals in the negotiations. He crafted a section to the Arms Control and Disarmament Agency bill. That addition requires the executive branch to provide regular reports on the verifiability of strategic arms provisions.

Few of us have been as close to the crucial substance of U.S. relationships with our friends and allies as has our colleague. He has resolutely rallied behind such redoubtable friends of America as the Republic of Korea, the Republic of Taiwan, Israel, and Lebanon. South Korea plays a vital role in U.S. strategy in Asia. Taiwan is one of America's oldest and most faithful anti-Communist allies. Israel is a rock of democratic tradition in a region of turmoil. Lebanon is a refugee seeking a viable central Government capable of restoring and maintaining the peace and stability that once made it the banking center of the Middle East. ED DERWINSKI has visited and talked with the people and the governments of these nations and more.

ED DERWINSKI has spent incalculable hours working to gain the bipartisan support of broadbased foreign policy measures. Measures designed to realize the national security objectives of the United States. He has developed foreign policy position papers for Presidential aspirants. He has campaigned diligently for the expanded use of this country's considerable influence. And he has done all this in a milieu that requires political prowess, diplomacy and inherent wit. ED DERWINSKI has what it takes.

From his vantage point on the Foreign Affairs Committee, he has consistently worked to forge a sound foreign policy. Foreign policy designed not only to respond to crises, but to avert dangerous occurrences before they can threaten peace. That can only be accomplished by maintaining real military strength, firm resolve, and a well defined national strategy.

It is indeed fitting that a man who has dedicated his elected service to the betterment of U.S. foreign policy, should now serve the Reagan administration. His appointment as Counselor of the Department of State will provide Secretary Schultz with a special adviser and troubleshooter of proven quality and character. At this point I include the following letters:

THE DANISH GROUP OF THE INTER-PARLIAMENTARY UNION,
Copenhagen, October 19, 1982.

Hon. EDWARD J. DERWINSKI,
Member of Congress, House of Representatives, Washington, D.C.

DEAR ED.: Rachel and I were very pleased to learn through an article in "Newsweek" that you now are taking over an important function in the State Department. I am sure that your considerable international experience and extensive personal contacts in countries all over the world will be of invaluable importance to you and your country in your new job.

Please receive our warm congratulations on this occasion.

I definitely hope that we shall be able to continue our good contact in future and send you and your wife our best greetings.

Yours sincerely,

ROBERT PEDERSEN,
President of the Danish IPU-Group.

REPUBLIC OF ALGERIA,
Alger, Algiers, October 25, 1982.

Monsieur EDWARD DERWINSKI,
Conseiller au Département d'Etat, Washington, D.C.

HONORABLE COLLEAGUE: I was agreeably surprised to learn from the press of your nomination to be Counselor at the Department of State, and I congratulate you sincerely.

During the many sessions of the Interparliamentary Union, I had the occasion to appreciate your competence and judicial choices. The members of the Algerian delegation who have known you have excellent memories of you.

I wish you much success in your new mission and hope through your post you will contribute to the development of relations between our two countries in the mutual interest of our two peoples.

I assure you of my highest regard.

MOHAMED LEMKAMI,
Vice President.

LUXEMBOURG, *November 26, 1982.*

Monsieur EDWARD J. DERWINSKI,
Member of Congress, 1401 Longworth Building, Washington, D.C.

Cher Monsieur DERWINSKI: I have received your letter of Nov. 16. It is with regret that I learn of your leaving Congress at the end of the year.

However, I send you my sincere congratulations on your nomination to the post of Counselor of the State Department and I wish you much success in your new and important functions.

Like you, I hope we will stay in touch, and I assure you that it is with much pleasure that I would welcome you to Luxembourg, should your mission bring you there.

Best regards,

LÉON BOLLENDORFF,
Président de la Chambre des Députés.

OFFICE OF THE SPEAKER, NATIONAL ASSEMBLY, REPUBLIC OF KOREA,
SEOUL, KOREA, *September 15, 1982.*

Hon. EDWARD DERWINSKI,
U.S. House of Representatives, Washington, D.C.

DEAR HON. DERWINSKI: It is a real pleasure to send you this short note on the occasion of your birthday. I hope this very special day brings you all the joy and happiness the world has to offer.

Moreover, the boundless contributions which you are making for the promotion of world peace through your Congressional works is deeply appreciated by many of your friends.

Happy birthday to you!

Sincerely yours,

JUNG NAE-HIUK.

October 20, 1981.

Hon. EDWARD J. DERWINSKI,
House of Representatives, Washington, D.C.

DEAR MR. DERWINSKI: I would like to take this opportunity to thank you for your letter of 2 October and to express my deep appreciation for your kind words of advice.

As a result of the recent events, following the tragic assassination of President Sadat, there is an even greater urgency to find a just, comprehensive and durable solution to the Palestinian problem. Stability and progress can only be built on the basis of understanding the needs and aspirations of the people, and any neglect of these aspects will certainly jeopardize the chance of a lasting peace.

I look forward to fruitful meetings with the President in our search for this common objective.

Your sincere friend,

HUSSEIN.

BONN, GERMAN, *December 7, 1982.*

Mr. EDWARD J. DERWINSKI,
Member of Congress, State Department, 1401 Longworth Building, Washington, D.C.

DEAR COLLEAGUE: Thank you very much for your letter of November 16, 1982. I was extremely pleased to hear from you and have fond memories of our successful cooperation in the past. During numerous conferences of the Inter-Parliamentary Union you have successfully and skillfully represented the cause of the western countries. Therefore I am happy to hear that you will be fulfilling a similar role in the future as advisor to the State Department. As special assistant to Mr. Shultz, Minister for External Affairs, your influence upon international relations could well be considerable. It is with great pleasure that I look forward to meeting you again soon—either in Bonn or in Washington. Anyway, I will let you know in advance should I happen to travel to Washington.

Kind regards and best wishes.

Yours sincerely,

DR. OTTFRIED HENNIG,
Member of Congress.

NEW DELHI, *November 30, 1982.*

Mr. EDWARD J. DERWINSKI,
Member of Congress, Congress of the United States, House of Representatives, Washington, D.C.

DEAR MR. DERWINSKI: I am glad to know from your letter of 16th November, 1982 that you have taken over as Special Assistant to the Secretary of State, George Shultz. I pray for your success in the new assignment. Whenever you feel like coming, you are most welcome to visit this country and I am sure friends like you holding key positions will further the mutual interests of our two great countries.

With best wishes,

Yours sincerely,

BAL RAM JAKHAR.

NATIONAL ASSEMBLY, INTER-PARLIAMENTARY UNION, JORDANIAN GROUP, THE HASHEMITE KINGDOM OF JORDAN

AMMAN, *December 1, 1982.*

Hon. EDWARD DERWINSKI,
House of Representatives,
Washington, D.C.

DEAR MR. DERWINSKI: Thank you for your letter dated November 16, 1982. I would like to take this opportunity to congratulate Your Excellency on your nomination to the position of Counselor of the Department of State. There is no doubt that such important position carries in itself a broad range of responsibility that can only be undertaken through your past experience and present expertise in political life.

I recall our first meeting which took place at the Inter-Parliamentary Council held in Sri Lanka in 1975 together with our meeting at IPU Conference held in London in 1975 both of which helped us to proceed forward in our mutual cooperation and coordination in matters of world interest.

I sincerely hope that such long-time friendship vis-a-vis past Inter-Parliamentary meetings will further be strengthened and cooperation amongst us further be developed by means of future contacts and work opportunities beneficial for the mutual interests of our two countries.

With my regards and best wishes for success in your assignment, I remain.

Sincerely yours,

BAHJAT TALHOUNI,
President of the Senate.

MONACO, *November 30, 1982.*

Monsieur EDWARD J. DERWINSKI,
Member de la Chambre des Représentants,
Washington, D.C.

CHER COLLÈGUE: I have received with much pleasure and interest your letter announcing your upcoming position at the State Dept.

I thank you for having thought on this occasion of our good relations. I want to congratulate you, on behalf of myself, the President and the members of our Assembly, our good wishes for your success in your new mission.

I will be happy if the occasion arises to meet again.

Best wishes.

MAX PRINCIPALE,
Président du Groupe monégasque
de l'Union Interparlementaire.●

TRIBUTE TO HON. ALBERT LEE SMITH, HON. J. WILLIAM STANTON, HON. CLARENCE J. BROWN, HON. ED WEBER, AND HON. JEAN ASHBROOK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. LATTA) is recognized for 60 minutes.

Mr. LATTA. Mr. Speaker, I have taken this time to pay tribute to four Ohio Members who will not be returning the next session, but before I do that I want to pay tribute to a member of our Budget Committee who will not be returning.

Representative ALBERT LEE SMITH, my very able colleague from Birmingham, has been a very vital member of the House Budget Committee during the 97th Congress. The Budget Committee, as everyone in this body knows, is a very important committee that has the responsibility for setting overall spending targets for the entire Federal budget. ALBERT LEE SMITH is one of only four freshman Members to be appointed to a major committee of this 97th Congress on the Republican side, and his initiation to the Budget Committee came at a very crucial time as we worked to regain control of deficit spending.

ALBERT LEE tackled his responsibilities with energy, and proved more than equal to the assignment, which was not easy given the volume and importance of the task. As minority leader of the Budget Committee, I want to commend ALBERT LEE SMITH for the significant and important contribution he made to the Federal budget process, and thank his constituents for sending him to this body.

ALBERT LEE was an asset to the Budget Committee and to his constituents of the Sixth District of Alabama, and to the citizenry of this great land, as he served with distinction. ALBERT LEE's dedication to the free market and his desire to provide for the truly needy while protecting the taxpayers is apparent in his record.

Mr. Speaker, the four Members from Ohio who will not be returning are JEAN ASHBROOK, BILL STANTON, ED WEBER, and BUD BROWN.

Let me say that the Ohio delegation and the Congress will sorely miss our good friend from the 11th District of Ohio, BILL STANTON.

BILL has served in this Congress with distinction since 1964 and has left his mark in the field of banking for generations to come. In addition to serving on the Banking, Finance and Urban Affairs Committee, he has served equally as well on Small Business Committee.

Born in Painesville, part of the district he served in the Congress, he attended the School of Foreign Service at Georgetown University and, in 1949, graduated from Georgetown University, after having his studies interrupted by the war. BILL served his country in the Army from 1942 to 1946 in the Pacific Theater.

We will all miss BILL, but I know that his future outside the Congress will be bright and filled with many distinguished and outstanding accomplishments.

We wish both he and his wife, Peggy, a full and complete life filled with God's blessings.

Mr. Speaker, it will not be until January, when we arrive for the 98th Congress that many of us will begin to recognize the true magnitude of losing a good friend and colleague, BUD BROWN. BUD BROWN has been an exceptional Representative, a man truly dedicated to the pursuit of liberty and justice for all.

Like most good legislators, BUD has not limited his activities to any one area. He has shepherded through Congress a wide range of legislation, all designed to promote the best interests of the Nation.

BUD has represented Ohio's Seventh Congressional District since 1965, and in the last several Congresses BUD has been the chief Republican spokesman for energy matters in the House. His work in the field of energy has earned him national recognition and he could easily be referred to as "Mr. Energy." However, BUD was also an early advocate of "supply-side" economics and served on the Joint Economic Committee. For his valuable service in this area, he could well be referred to as "Mr. Economics."

BUD's loyalty to his job and his constituents, his respect for government, and his never ending will to satisfy the needs of his country are but a few of the many qualities for which he will long be remembered.

I would like to take this opportunity to express my very best wishes to BUD and his wife, Joyce, and for many years of good health and happiness.

Mr. Speaker, on November 4, 1980, the citizens of this Nation issued a mandate for fiscal responsibility on the part of their elected legislators in Congress. Like so many of their fellow countrymen, the good people of the Ninth Congressional District of Ohio sent as their Representative to Washington a man who would, indeed, measure up to this mandate. As a Member of the Banking, Finance and Urban Affairs committee and the Committee on Small Business, EDWARD FORD WEBER set about to make his voice heard on matters necessary to the revitalization of our Nation. He did so with the vigor and experience of a veteran legislator. He did not flinch on the so-called tough votes as he knew our Nation's economic future well-being depended on them.

ED represented the Ninth District during this Congress with unparalleled enthusiasm and dedication. His short service will be sorely missed by his constituents.

To ED and his wife Alice, I offer my best wishes for the future.

Our colleague, JEAN ASHBROOK, came to this Congress in a special election held on June 29, 1982, following the passing of her husband and our longtime friend and colleague, the late John M. Ashbrook. She was sworn in on July 12, 1982, and has served with distinction in this House since that time.

□ 1610

She has carried on the conservative voting record established by her late husband, John Ashbrook, and I am certain that he would be proud of her record. As JEAN's service in this body comes to a close, let me say that it is regrettable, that redistricting in Ohio

prevented her from continuing to serve her district and the Nation.

Mr. KINDNESS. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I am pleased to yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Speaker, I thank the gentleman for yielding.

Saying farewell to retiring Ohio Republican colleagues is not something to which I have looked forward, but I share the sense of pride at this moment as we pay tribute to our four distinguished Ohioans.

BILL STANTON, as has been noted, came to the House of Representatives in 1964 and CLARENCE BROWN, a year later, in 1965; ED WEBER in 1980, and JEAN ASHBROOK just this year. They each have made an important mark in the legislative work of this body, and they each have been forceful and effective spokespeople for their constituents.

BILL STANTON'S quiet, thoughtful, and consistent leadership has done much to move legislation which otherwise might have become stalemated due to partisan or philosophical differences. His has been the type of leadership and congressional service which does not often make the headlines but which is so badly needed and so essential to the Democratic legislative processes.

BUD BROWN has represented another type of leadership that is also needed. He has been a forceful and articulate spokesman on critical national energy and economic issues. His intelligence, wit, and hard work have aided immeasurably to the quality of our work here in the House of Representatives.

ED WEBER has not been here as long as these others we have mentioned, but ED, too, has been hard working and forceful in representing his district. His legislative work has been characterized by a familiarity with the issues and an uncommon creativity in addressing problems. I am sure we have not seen the last of ED WEBER, and I welcome the time when he would return to public office.

Mr. Speaker, I express to these fine men my appreciation for their cooperation, and efforts that we have undertaken together. I have great pride in calling them my friends.

Now, Mr. Speaker, I would express my particular pleasure in being a colleague and friend of JEAN ASHBROOK'S, whose tribute is the last to be expressed, because the greatness of her company in this House has shone for the shortest period, but most brilliantly, Mr. Speaker, and most pleasantly. JEAN ASHBROOK has graced this House of Representatives all too short a time, and we shall miss her, but will continue in firm friendship in the years ahead.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I am pleased to yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to thank the gentleman for taking this time to pay tribute to these members of the Ohio delegation who are leaving the House at the end of this Congress.

I had the pleasure of serving with BUD BROWN since he has been in the House. I served with his father before him. Our families were friends before I ever met BUD. My father and Clarence Brown, Sr., were both on the Republican National Committee together for a number of years, so I had known him when I came to the House of Representatives in the 88th Congress. Then, of course, I got to know BUD when he came after his father's untimely passing. BUD has served with me on the House Commerce committee, formerly called the Interstate and Foreign Commerce Committee and now the Energy and Commerce Committee.

BUD, of course, has been a real leader, and he was a right arm to me and a real help to me as ranking minority member. He has made his mark in the field of energy, and, of course, he has made a real mark and a real contribution in the economic debates that we have had going on here in Washington during the last Congress or so. We will miss him.

BILL STANTON, another good friend, has been a real leader and made his mark here in Congress. He has made his mark on legislation. He has been involved in the formulation of much needed legislation in this House. The type of legislation he has been involved with in his committee has, of course, been controversial. It is in that type of legislation that a Member can show really what he is made of and what kind of leadership qualities he has. BILL STANTON has shown those leadership abilities as he has helped to forge compromises. He is the type of person who knows the art of compromise and how to put together a bill in such a way that it will gain support in a majority of the House. We will miss that kind of leadership here.

ED WEBER is a first termer. He has not served as long as these other two, but he has become a real friend of mine. He has made an excellent record here. I regret that he is not going to be with us for more terms. I think there is a place in the legislative or the executive branch somewhere in public service for ED WEBER. I want to wish him well and pledge him my support and my help in whatever endeavor he may want to enter.

Of course, JEAN ASHBROOK came after a special election, to replace her late husband. JEAN has been an attentive Member. She has made a contribution here that the people she has represented can be proud of. She, of course, was not able to run for reelection because of the redistricting problems, but she, too, I am sure can make a real contribution in public service somewhere in the future as well.

Mr. Speaker, again I thank the gentleman for permitting me to say a word or two about these four friends who are leaving us. We want to wish them well.

Mr. LATTA. Mr. Speaker, I thank the gentleman from North Carolina (Mr. BROYHILL) for his comments.

Mr. MILLER of Ohio. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Ohio.

Mr. MILLER of Ohio. Mr. Speaker, one of the sadder aspects of congressional service is to have to bid farewell to colleagues soon to be departed from these Halls.

Today, I rise to pay tribute and to say thank you for a job well done to four of my colleagues from Ohio who will not be returning to this Chamber for the 98th Congress.

JEAN ASHBROOK, BUD BROWN, BILL STANTON, and ED WEBER are as fine a collection of individuals to serve in this body as you will ever find. Collectively, there contributions to good government will serve the people they have so ably represented long after they are gone.

For BUD and BILL, these Halls have been home for most of the last two decades. Their long service in the Congress has been marked by one achievement after another. Knowledgeable, hard working, they have won the respect and admiration of all who have worked with them.

For JEAN and ED, though their service has been brief it too was marked by hard work and a deep sense of purpose and dedication. I am confident had they the opportunity to continue their service in the Congress they, too, would have become formidable figures on the national scene.

For all four of my departing colleagues their future is still before them. They still have much to give to their communities, to their country, and to their fellow men and I wish them every success in whatever pursuits they elect to undertake. Knowing all of them well as I do, I am confident that we have not heard the last of these very able public servants.

On behalf of the people of Ohio and on behalf of all of the people of this Nation they so ably served I say thank you and Godspeed.

Mr. WEBER of Ohio. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I am happy to yield to the gentleman from Ohio.

Mr. WEBER of Ohio. Mr. Speaker, I thank the gentleman for yielding, and I thank him for taking this special order today to pay tribute not only to

me but also to the other departing members of the Ohio delegation.

I appreciate very much the thoughtfulness that the gentleman has shown in taking this special order. I appreciate so much the thoughtfulness in the words that have been expressed to me, both spoken and unspoken, and in letters to me from people here as Members of Congress and members of staffs of different committees on the Hill.

I am disappointed that I will not be back here to help with the legislative workload in the 1st session of the 98th Congress. Nevertheless, I feel I have had a real privilege to have been here during the past 2 years, working with so many people for whom I have come to have the highest respect and admiration for their character, for their hard work, for their knowledge, and for their thoughtfulness in the legislative matters that come before us.

I appreciate so much the help that people have given to me personally, especially from the Ohio delegation. DEL, you have been a great help to me, and it has been an extra privilege to be able to fly so many times back and forth on the same airplane together so that I could have the benefit of that extra time with you.

And CLARENCE MILLER, JIM BROYHILL, and BUD BROWN, along with other Members of the Ohio delegation—I could go on and on. And from people outside the delegation, the members of the leadership and members on the other side of the aisle as well as on this side of the aisle.

I wish all of you well as you approach your duties in the 98th Congress. Again, let me say that I wish I could be back here to help you carry that workload, I think you are carrying a burden that has to be carried, and you are bringing very important messages that have to be carried over on that side of the aisle.

Mr. Speaker, I will be returning to my private practice of law, but the Members can expect me to come here frequently for visits in the future.

□ 1620

Mr. LATTA. I thank the gentleman very much.

Let me say in conclusion, we are all going to miss you. As I said earlier, I want to again compliment you for the positions you have taken. You took them unflinchingly. You did what you thought was right for your country and for your district, and we all commend you for it.

We wish you well in all of your endeavors in the future, and certainly as you return to your law practice in Toledo we wish you well.

● Ms. OAKAR. Mr. Speaker, the Congress is losing one of its most ablest and outstanding members—BILL STANTON. I believe everyone knows of his abilities in this body. He is truly a fine leader and respected legislator. As ranking member of the House Committee on Banking, Finance and Urban Affairs, BILL STANTON has been, first and foremost, effective. He has shown willingness to compromise, negotiate, and persuade, when necessary. As a member, myself, on the committee, I have admired JIM's wit, commitment and "stick-to-it" ability.

There is no doubt BILL STANTON did not shy away from tough issues. His leadership helped shape a critical new role for the Federal Reserve in establishing universal reserve requirements. He chartered new ground in the deregulation of financial institutions. He saw to it that adequate housing was provided to those in our society who most needed shelter. He was extremely effective in tackling the biggest and hardest issue of the decade—the economy. Charting an effective monetary policy was a major challenge to our ranking minority leader. There is no doubt that at every step, BILL STANTON's leadership on the Banking Committee made a difference. I will greatly miss my Ohio colleague but have no doubt that BILL STANTON will continue to tackle the difficult issues that our country faces. We will not hesitate to call on BILL STANTON for advice and counsel in the future.

I wish BILL and his intelligent, lovely wife Peggy and his family the every best of luck and Godspeed.●

● Mr. WYLIE. Mr. Speaker, when ED WEBER was elected to Congress he was assigned to the Banking Committee because he wanted the assignment but also because he was recognized as a very bright young man who could make a real contribution in a very important area.

When BILL STANTON had to miss some of the Banking Committee work because he needed a heart bypass, ED WEBER came forward to me as an industrious, studious, and willing committee member. He was most helpful in a solid and reliable way. I was looking forward to his assistance in the 98th Congress. But ED did not win reelection. For whatever reason he did not win, I was surprised.

ED is able. He is honest. He is decent. He has all the attributes of an excellent Congressman. His presence on the Banking Committee will be sorely missed by me. Things happen in life which are hard to explain. But I have developed a philosophy that changes of this significance happen for the best. So I join with our colleagues in wishing for ED WEBER the very best, knowing that he and his wife will be active and worthy citizens of their community who will make a significant contribution in another way.

ED is young and bright, and I hope he continues his active interest in politics. We need his intellect and ability in solving political problems.

My wife Marjorie joins me in wishing for ED, his wife Alice, and his family a bright future and an enjoyable life ahead.●

● Mr. CARMAN. Mr. Speaker, I am most pleased today to pay tribute to a fellow Member of my freshman class, ED WEBER, who has served during his 2 years in Congress with dedication and distinction. I worked with ED as a fellow member of the Banking Committee and was impressed not only with his work there, but with his dedication to his constituents. He has tried to help secure the soundness of the social security system and he has introduced legislation designed to help inland ports on which his area is dependent. I enjoyed serving in the Congress with ED and I wish him all the best in what I am sure will be a bright future.●

● Mr. ZABLOCKI. Mr. Speaker, I certainly want to join my colleagues in honoring the long and honorable career of the gentleman from Ohio (Mr. STANTON) on the eve of his retirement from this body.

BILL STANTON has not only been an effective legislator over the past 17 years, but as ranking minority member of the Banking Committee, he has developed an expertise in monetary affairs which few other Members have attained. His contribution, therefore, to foreign policy debates has been a strong, positive, and constructive one—based invariably on solid information and "sophistication"—in the best sense of that term.

During the past decade, the gentleman has participated actively and effectively in biannual interparliamentary meetings with European Parliament, both in Washington and abroad, where his input into the discussions on trade and monetary affairs has been an important factor in their success. As one who has regularly encouraged the participation in these meetings of members of other committees, that is in addition to Foreign Affairs, BILL STANTON is precisely the type of person I have had in mind.

Although the gentleman's decision to retire was, I understand, based largely on reasons of health, I would just like to note that he has obviously been taking good care of himself, as I have never seen him look better or more fit.

And so—even though we cannot afford to lose a BILL STANTON from our midst, I want to take this opportunity to commend him for his past accomplishments and to express the hope that he will continue to have an important impact on public policy in the years ahead. To BILL, his wife Peggy, and their daughter Kelly, I extend my warmest appreciation and best wishes.

● Mr. REGULA. Mr. Speaker, I appreciate this opportunity to pay tribute to our friend and colleague, CLARENCE

BROWN. I thank the gentleman from Ohio Mr. LATTA) for taking this special order.

BUD BROWN was a distinguished Members of the Congress when I came to the House of Representatives in 1973. Through the years, I have drawn considerable insight from his experience. He has always been available for counsel and his advice was always reasoned and competent. His knowledge of energy policy is unsurpassed in this body, and his legislative skills are second to none. As a result, the policies of this great country—not just energy policies—bear his imprint.

CLARENCE BROWN brought to this body hard work, a keen intellect, and a sharp wit. He contributed stature and dignity. As a result, he leaves this institution a better place for his having been here.●

● Mr. OXLEY. Mr. Speaker, When the 97th Congress adjourns sine die, it will mark the departure of three esteemed members of the Ohio Republican congressional delegation: CLARENCE (BUD) BROWN of Urbana, BILL STANTON of Painesville, and ED WEBER of Toledo. I rise to express my gratitude, on behalf of all the members of the Ohio congressional delegation and the entire Congress, for their dedicated service to their districts, our home State of Ohio, and the United States.

As a newcomer to the Ohio GOP congressional delegation 17 months ago, I naturally turned for advice and assistance to fellow Ohio Members. BUD, BILL, and ED were all more than willing to lend a helping hand, despite the many demands on their time. For their friendship, I am especially grateful.

Each of these Members can be very proud of their accomplishments while serving in Congress. During his 17 years representing the Seventh District, BUD become recognized as a leading national spokesman on energy and economic issues. One of the most personable and well-liked Members of the house, BILL distinguished himself as a financial whiz while serving on the Banking Committee. ED, too, as a junior member of the Banking Committee, contributed significantly to public policy regarding financial institutions. And all three knew the people of their districts inside and out, and relished their roles as spokesmen for the people back home.

I wish to thank DEL LATTA for setting aside this time to pay tribute to three outstanding members of our delegation. Combined, they represent 37 years of selfless public service. They will be missed by us all.

And to BUD, BILL, and ED, I extend my very best wishes for continued success and good health in every future endeavor.●

● Mr. ECKART. Mr. Speaker, I rise to pay tribute to BILL STANTON, a man who is entitled to wear the title "honorable" even had he never served in the House.

BILL STANTON was elected from the 11th District of Ohio in 1964. He was able to overcome the landslide of Lyndon Johnson. And he was invincible every election after that in a district with more registered Democrats than Republicans. That record of winning elections speaks for itself.

BILL served the Nation admirably and courageously in World War II. He is a holder of the Bronze Star and the Purple Heart for his service in the U.S. Army.

Unfortunately, BILL decided to retire in 1982 following the discovery of a health problem. Fortunately, BILL has undergone surgery and today is fit and healthy.

As you probably are aware I will be representering most of BILL STANTON's 11th District effective January 3. I consider it a privilege and an honor to follow in BILL STANTON's footsteps in representing the 11th District.

BILL STANTON represented his constituents well. He is a good and decent man, a good husband, a good father. We will miss him.

Mr. Speaker, ED WEBER had the opportunity to serve his district of Ohio for only one term. But during that term he championed the right causes—protecting the solvency of the social security system, helping the Nation's small businesses, and introducing legislation to help ailing Lake Erie ports.

I believe he established a good record of service in a short time. From my own experience I know ED WEBER is a fine man. We are going to miss him.

Mr. Speaker, BUD BROWN served his constituents with distinction. I believe he will be remembered for his role in enacting the inspector general legislation—a bill that established inspectors general at Federal agencies to ferret out waste, fraud, and abuse. I have no doubt that legislation is paying for itself by discouraging and preventing a lot of waste and fraud.

BUD also was instrumental in getting Congress Joint Economic Committee to function in a bipartisan manner and agree in their annual reports on what has been ailing the economy.

BUD has served with dedication. I wish him the best as he leaves the House.●

● Mr. SHUMWAY. Mr. Speaker, I am grateful to DEL LATTA for requesting this special order to enable us to pay tribute to three departing colleagues from Ohio, CLARENCE "BUD" BROWN, BILL STANTON, and ED WEBER.

BUD BROWN has served the residents of Ohio not only as a Member of the House of Representatives since the 90th Congress, but also at the local level as mayor of Lancaster and as a member of that city's city council. He fully understands the need for a local voice from his own experience, and he has brought valuable experience to Congress.

BILL STANTON is a particular friend of mine, as well as an admired colleague. As ranking minority member of the House Banking Committee, on which I serve, he has provided me with invaluable guidance and leadership. I shall certainly miss his presence on that panel during the upcoming Congress.

ED WEBER has always struck me as the type of qualified and dedicated individual who realy has what it takes to be an effective Member of Congress. I am indeed sorry that he will be leaving us after so short a tenure, and I sincerely hope he will return.

To BUD, BILL, and ED, I extend my appreciation for the opportunity to work with them, and my very best wish for continued success in whatever endeavors they may choose to undertake.●

● Mr. WYLIE. Mr. Speaker, almost the day after I was elected to Congress, CLARENCE sent me a letter of congratulations and Joyce sent Marjorie a note offering to get Marjorie acquainted with our new surroundings.

This is the kind of partnership that comes to mind when you think of CLARENCE and Joyce BROWN.

We encouraged them to run for Governor, and they ran as a team because we knew they would serve admirably as our State's chief executive and first lady. But that was not to be, and they have approached the end of their service in Congress with the same togetherness and appealing philosophy that characterized BUD's service in Congress.

I spoke for CLARENCE several times on the campaign trail. It apparently did not do any good. But I said then and I say now that CLARENCE is the kind of completely decent person we need in public service. He is articulate when he espouses a cause. he is knowledgeable when he presents his arguments during debate, and he has always worked hard to represent his district in a manner befiting what he perceived to be the best interest of the Nation.

CLARENCE followed an illustrious father with service in this body. He has been in or around Congress most of his life. I know he will miss being here on certain days as much as we will miss him.

But he leaves knowing he has been responsible for helping mold much positive legislation and with a sense that he has served honorably and well.

Marjorie joins me in wishing our dear friends Joyce and BUD Godspeed and much happiness in days ahead for their family.●

● Mr. LOEFFLER. Mr. Speaker, through every step of my career in Washington, BUD BROWN has been at

my side—counselling, guiding, helping. Words can never adequately express my thanks, BUD, so forgive me if I do not try to do so in this forum.

Since our friendship will long endure and our paths will cross often, suffice it to say for the moment, BUD, that Kathy and I wish you and Joyce and your family the very best of everything always—you deserve all of that—and more. Godspeed.

Mr. Speaker, when the 98th Congress convenes, one of our most able and talented Members will no longer be at our side to guide us.

Since so much of the good legislation which has passed over the years to help our Nation's housing industry and to reform and revitalize our Nation's financial institutions bears the imprint of BILL STANTON, he leaves a major void which will not be easily filled for quite some time.

The same can be said for the Republican whip organization, where BILL was one of our steadiest voices, our most responsible soldiers, and our wisest counsels.

We shall miss you, BILL, we truly shall. May your new endeavors be rich and rewarding for you and your family. Keep in touch.●

● Ms. OAKAR. Mr. Speaker, I wish ED WEBER, my colleague from Ohio and the Banking, Housing and Urban Affairs Committee, all the best as he departs the House of Representatives. ED WEBER has been an active member on the Banking Committee and its subcommittees on Domestic Monetary Policy, Financial Institutions Supervision, Regulation and Insurance and General Oversight and Renegotiation. He has also served on the Small Business Committee. I know ED WEBER to be a sincere person and to have a personal commitment to wanting our country to maintain its leadership in the world. I know ED WEBER will continue to show perserverance and commitment in his future endeavors.●

● Mr. STOKES. Mr. Speaker, I would like to thank the distinguished gentleman from Ohio (Mr. LATTA) for reserving this special order so that Members can honor Ohio Congressmen CLARENCE BROWN and BILL STANTON who will be retiring at the end of the 97th Congress.

Mr. Speaker, as my colleagues know, CLARENCE BROWN was elected to the House of Representatives in 1965 from the Seventh Congressional District of Ohio. In his 17 years in the House, CLARENCE has not only risen in seniority in the House but also has gained the respect of Members on both sides of the aisles.

Mr. Speaker, when you review the notable career of CLARENCE BROWN, it is obvious that he will be most remembered for his viligance in being the energy industry's primary defender on the House Commerce Committee. He has been, for many years, the key strategist for the position that oil and gas companies should be free from Government regulations.

In addition to this assignment, Mr. Speaker, CLARENCE has been a very vocal and important member of the House Government Operations Committee and the Joint Economic Committee. Finally, CLARENCE has been an active Member of the Ohio congressional delegation.

At this time, Mr. Speaker, I would like to direct my remarks to another one of my colleagues from Ohio, Congressman J. WILLIAM STANTON. BILL STANTON has represented the people of Ohio's 11th Congressional District for 18 years. During his tenure in the Congress, Mr. Speaker, BILL STANTON has gained a reputation as a mediator. He has managed on many occasions to bring the Members on opposite sides of the aisle to the table of compromise.

In addition to his outstanding service as the ranking minority member of the House Banking, Finance and Urban Affairs Committee, BILL STANTON will be remembered always for his affable style and commitment to meeting the needs of the American people.

On a personal note, Mr. Speaker, I shall miss BILL STANTON greatly. Although we have not always agreed on the issues before this body, I have found in BILL STANTON a good friend and a man dedicated to this Nation. He is a deeply committed and hard working legislator. His work in Congress will stand as a lasting tribute to him.

Again, I thank my colleague from Ohio, the dean of the Republican delegation, Mr. LATTA, for reserving this time to honor CLARENCE BROWN and BILL STANTON.●

● Mr. ROE. Mr. Speaker, I would like to take this opportunity to pay tribute to two outstanding Members of the Ohio congressional delegation, BILL STANTON and ED WEBER, who will not be with us in the new 98th Congress.

BILL and ED have provided fine services to the people of their congressional districts and their contributions to them and the Nation will be sorely missed.

As a member of the Banking, Finance and Urban Affairs Committee for the past decade, BILL STANTON has been responsible for securing passage of legislation that has helped millions of low-income families secure home mortgages.

BILL's devotion to bipartisan politics has made him one of the most effective Members of this body and he will be deeply missed.

While ED WEBER has only served in Congress for one term, he has established himself firmly as a hard-working Member deeply devoted to the needs of his constituents.

As a member of the Banking Committee, he has been one of the leaders in the fight to reduce taxes for all Americans.

I would like to wish BILL and ED the best of luck in their future endeavors.●

● Ms. OAKAR. Mr. Speaker, BUD BROWN will be missed in this body. He has served this body with dignity and distinction just as his father had served the House of Representatives. BUD is leaving the House after having served almost 20 years. He has been a fine leader and has worked in a bipartisan manner to help the State of Ohio and his country. He was an active member of the Energy and Commerce, Government Operations and Joint Economic Committees. I wish BUD BROWN well—I feel confident that he will continue to serve the public interest in the most able manner. My best wishes to BUD and his lovely family.●

● Mr. CARMAN. Mr. Speaker, it is an honor for me to rise today on the occasion of the retirement of BILL STANTON from Congress. BILL began his public service in the U.S. Army during World War II where he served with distinction. He was elected to the 89th Congress in 1964 and has been a Member ever since. He is presently the ranking Republican member of the Committee on Banking and Urban Affairs. Since I was a freshman member of that committee during the 97th Congress I had a chance to observe BILL's ability, leadership, and dedication firsthand. BILL has not only served his constituents and country with great dedication, but he also displayed his leadership through the teaching of others. The 11th District of Ohio has been fortunate indeed to have such representation over the last 18 years. It was a privilege for me to serve in the Congress with BILL and I know he will be sorely missed. I wish him all the best in the days ahead.●

● Mr. ANNUNZIO. Mr. Speaker, it is a genuine pleasure for me to join with my colleagues in paying tribute to the Honorable J. WILLIAM STANTON, who came to the Congress with me in 1965. He and I were Members of the same class—the 89th Congress, and we have both served for 18 years as members of the House Banking, Finance and Urban Affairs Committee, where I have come to know and respect BILL for his knowledge, for his fairness, and for his leadership abilities as the ranking minority member of the committee.

Before coming to the House of Representatives, BILL honorably served our country in the U.S. Army. He also served as a county commissioner from 1956 to 1964.

Congressman BILL STANTON has ably represented the people of the 11th District of Ohio in the Congress for the last 18 years, where he has served with diligence and distinction as the

ranking minority member of the Subcommittee on Housing and Community Development, as a member of the Subcommittee on International Development Institutions and Finance, and as a member of the Subcommittee on International Trade, Investment and Monetary Policy of the House Banking, Finance and Urban Affairs Committee. He has also compiled an exemplary record of achievement as the ranking minority member of the Subcommittee on General Oversight of the House Small Business Committee.

BILL is a fine legislator, and a dedicated and devoted American, who will be missed here in the House of Representatives, especially by those of us, like myself, who have had the pleasure of working with him.

I extend to BILL STANTON my best wishes for continued success in all of his future endeavors.●

● Mr. WYLIE. Mr. Speaker, I first met BILL STANTON in 1966 at a State Republican committee luncheon in Columbus. It was my privilege to be seated next to BILL. Earlier that week the announcement of his impending marriage to Peggy Smeeton had been announced. Naturally, BILL wanted to brag about his bride-to-be.

A few months later, Marjorie and I met BILL and now Peggy Stanton just after our swearing-in ceremony. We have traveled with BILL and Peggy, visited with them during vacation and have been with them socially. We do not know two finer people and are pleased to number them among our valued friends.

BILL STANTON has truly been a remarkable ranking minority member on the Banking Committee. He has been able to make friends easily because of his warmth, knowledge, intelligence, and the artful way he persuades. He has been honest and straightforward in his approach to problems coming before the Banking Committee and, in the process, has earned the admiration and respect of Members of both parties.

It was his ability to keep his Republican colleagues together that enabled us to have a say in legislation coming from the Banking Committee.

BILL STANTON will be missed. His is a tough act to follow, and I approach my new assignment with some trepidation, knowing it would be easier with BILL's wise counsel.

Yes, BILL will be missed. But he leaves Congress with a sense of distinguished service from which his district and our Nation have benefited.

Marjorie and I wish for BILL and his charming wife Peggy much happiness in the years ahead, knowing they will enhance their role of service to our Nation.●

● Mr. ZABLOCKI. Mr. Speaker, I certainly welcome this opportunity to pay tribute to the public career of the gentleman from Ohio (Mr. BROWN). "BUD" BROWN has had a major influence on legislation considered by this body over the past 17 years and his input, as well as his personality—and especially his sense of humor—will be sorely missed in the years ahead.

The gentleman, as most colleagues are aware, is a highly versatile individual. He has been at one time or another a Navy veteran, a journalist and radio station manager, a publisher, a farmowner, a trustee of numerous universities and foundations, an economist, and a legislator. And in this body he has served on two major standing committees in addition to the Joint Economic Committee and the Advisory Commission on Intergovernmental Relations.

In fact, it might be noted that running for Governor was only his most recent activity in a truly remarkable record of public service, which clearly deserves our special attention and commendation on the eve of his retirement from the House.

Much more could be said about the gentleman from Ohio and his outstanding career, but at this time I merely wish to extend to him my personal appreciation for his contribution to the legislative process and to wish him and his family the very best in the future.●

● Mr. MONTGOMERY. Mr. Speaker, I want to participate in this special order today on three of my colleagues from the State of Ohio who will not return to the 98th Congress, Representatives CLARENCE "BUD" BROWN, BILL STANTON, and ED WEBER.

BUD BROWN's strong leadership was a great asset to the Republican party and his hard work for the constituents of his Seventh District deserves recognition. His election in 1965 and reelection to each succeeding Congress is testimony to the great confidence and respect BUD's constituents had in his abilities.

In addition to working for his constituents, he was a hard worker on the committees to which he was assigned. BUD made a great contribution to the Energy and Commerce Committee, as well as the Government Operations Committee. He was also a member of the Joint Economic Committee.

I know BUD will continue to be a strong and forceful leader in private life. He is leaving a great many friends here on Capitol Hill.

BILL STANTON began serving the people of the 11th District in Ohio in 1965 and he has been a truly effective Congressman in taking care of the interests of his district.

I want to point out his contributions to the Committees on Small Business as well as Banking, Finance and Urban Affairs. He has come to be counted on by younger Members of this Chamber for direction on matters concerning these committees, and on other matters.

It has been a pleasure to serve with BILL and I want to wish him the best in the future. He has gained a great number of admirers during the 18 years he served in this Chamber. He will be missed.

Though ED WEBER's stay in the House has been a short one, he has made a fine contribution. He has made a number of friends and I know he has earned the respect of colleagues on both sides of the aisle.

He served diligently on the Banking, Finance and Urban Affairs Committee and on the Small Business Committees. I know he has been a valuable member on both these committees.

I want to wish the best for ED. He can be proud of his service to the State of Ohio and to this Nation during the 97th Congress.●

● Mr. DINGELL. Mr. Speaker, a close friend and valued colleague in the U.S. House of Representatives is the Honorable CLARENCE (BUD) BROWN.

I am going to miss BUD and our many occasions when we could agree and disagree on legislation.

BUD has been most helpful on a host of issues and it has been far preferable to have him as an ally on any number of issues. But when we were in opposition, it was a tenacious fuss with neither giving an inch until the final vote was cast. At the conclusion of any such discussion in disagreement, there were always handshakes and back slapping, all around, no matter the winner.

He and I share another common bond beyond a strong friendship. Both of our fathers served in Congress before us and instilled in us the highest principles of service in the public interest.

To BUD, his family and the future go my best of wishes.●

● Mr. CARMAN. Mr. Speaker, I rise today to pay tribute to CLARENCE (BUD) BROWN who will be leaving Congress after having been a member since first being elected in 1965. BUD will be remembered for his dedication and hard work especially in the field of energy. As a member of the Energy and Commerce Committee and as the ranking minority member of the Energy and Power Subcommittee, he has been a distinguished leader on energy issues. He will also be remembered for his work on the Joint Economic Committee where he was extremely influential. I enjoyed having the honor of working with him in the 97th Congress and I know that his departure from the Congress will leave a void. I wish him all the best in his future efforts.●

● Mr. ZABLOCKI. Mr. Speaker, I thank my colleagues and friend from Ohio (Mr. LATTA) the dean of the Ohio Republican delegation, for taking this special order to honor BILL STANTON.

BILL STANTON is truly one of the most distinguished Members of the Congress. He has represented the 11th Congressional District of Ohio with great distinction since 1964. His quiet but effective leadership has proved extremely valuable to this legislative body.

His bipartisan work in housing policy and his unparalleled knowledge in the areas of banking and foreign trade made him one of the most respected individuals in the Congress.

Those of us who have had the privilege of knowing BILL STANTON and working closely with him will miss him very much. I know he will continue to make important and significant contributions to the people of this great country.

On a personal note, I cherish his friendship. BILL will be sorely missed by all of us as we return to the 98th Congress.●

● Mr. REGULA. Mr. Speaker, I rise to honor my colleague from Ohio, the Honorable ED WEBER.

ED WEBER served the Toledo area with distinction, keeping the interests of northern Ohioans and all Americans carefully in mind as he was called upon to dispatch the duties of his office. He was able and decisive. He took his responsibilities very seriously.

ED WEBER will be missed. It is with disappointment that I participate in bidding him farewell from this body. I hope that he will continue his service to the people of Ohio and to our Nation.●

GENERAL LEAVE

Mr. LATTA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

GENERAL SUMMARY OF PREVIOUS SPECIAL ORDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, at this near terminal point of this session or this Congress I rise in order to sum up on the occasion of some of the special orders that I have indulged in during the course of this Congress.

First with respect to the critical matter as I considered it, and as it I think turns out to be considered, the great crime of the assassination of the U.S. district judge for the western district in Texas, John W. Wood, and the report this week of a jury finally turning in three convictions. I do so because I importuned to the House considerably. I spoke out on more than 40 occasions and I wanted to merely register my congratulations not only to the Justice Department whose director, Mr. Webster, called me earlier, several hours before the release of the announcement of the indictments to tell me in Texas that he was calling me because he considered me more than, as in his words, more than anybody else responsible for having reached the point where the case was kept alive and indictments could have been returned.

In my remarks I repeatedly stated that I was fearful that that case would recede into the dust of history, very much like the Jimmy Hoffa case still is.

But one thing that remains yet is something that I also spoke considerably about before the assassination of Judge Wood. As a matter of fact, in the course of those speeches I predicted, and such a possibility turned out sadly and tragically to be the case, after the assassination of Judge Wood what happened, and that was the attempted assassination of the assistant district attorney for the western district, James Kerr. That crime is still unresolved, and I consider it an equally important responsibility on the part of the law enforcement agents, particularly the United States, our national law enforcement agents to pursue and to pursue with a sense of urgency that they did the resolution of the Judge Wood case.

So much for that. I will have to defer to the next Congress, God willing, my continued discussion on the continuing threat of air safety to those particularly who will have occasion to be using in the meanwhile the National Airport here. But that is just one example of the dangerous situation still existing in our air travel in the United States. I have spoken on that on these special orders at least nine times, and I will have to continue that into the next year.

I have also developed a matter that if we are in session Monday I intend to pursue, and that is the unconscionable and criminal mulcting of the taxpayer through what I call war profiteering, what in polite language is known as excess profits, and which has been going on unrestrained in any manner whatsoever since the death or the demise of the board known as the Renegotiation Board which was the only agency that people have had since World War II to guard against profits. It was eliminated by the Congress in effect about 3 years ago, and since then it is my estimate that not less than $10 billion in excess profits have been mulcted from the taxpayers' pockets, this at a time when we asked to vote the highest appropriation for defense.

I am a strong defense proponent, but I have always been very careful to select the area of support. It has been with a great sense of frustration that I have seen the country and its Government and the Congress proceeding and taxing as never before, unprecedentedly for defense, while this get-away theory is running rampant, amok, and without any restraint.

I have introduced a bill that I tried to offer as an amendment to the defense appropriation bill that we had under consideration and I was not afforded an opportunity because of the rules. But I hope to pursue that fight.

Today, I want to sum up on the subject matter of the last discussion, and it is on a subject matter that I have spoken out on since 1964 and 1965 particularly, but more repeatedly in the last 3 years. It is with a great sense of dismay or sustained dismay that I rise again this time to refer to the bill of impeachment that I have introduced directly to the Chairman of the Federal Reserve Board and the two reform bills that I feel are so long overdue that in effect now it is too late to avert the castastrophe that is about us.

In fact, as in the case of the Renegotiation Board, I watch with utter dismay the Congress, this one, compound the problem of these extortionate interest rates that have literally, literally collapsed the economy, that have driven out businesses in America, the lifeblood of our economy just out in record numbers just in the last 12-month period, as reported just last week.

□ 1630

The number of bankruptcies, of individual business firms, exceeded that even of the record number during the depression period. Who says we are not in a depression? And there is no question about it. It was totally unnecessary. This depression has been induced. It was not necessary that the American people be sacrificed this way, that they be threatened and confronted with the diminution of the standard of living that we have long boasted.

Just yesterday we approved a so-called Caribbean Basin Initiative. This was created on such a tenous and illusory basis that I had to vote against it. But it demonstrates the naivety or maybe purposeful and heedless disregard of the economic facts facing the country by our leaders, from the President to the Congress.

But with respect to the Federal Reserve Board, let me say that some future historian, and I think it will be in the not too distant future, you will have a historian recording this great discrepancy or anomaly of us sitting here in the waning hours of a Congress, reflecting not one glimmer of reaction to the burgeoning, pressing intimate problems confronted by individ-

ual American families and businessmen. Absolutely none whatsoever.

What is the order of precedence here in these waning hours? A continuing resolution which has been the basis that this entire Congress has proceeded on by way of financing the Federal Government. Incredible.

When I came to the Congress 21 years ago, if I had dared tell any of the congressional leaders then that this would ever happen to the American Congress, they would have said, "You are absolutely irrational."

Here is a Congress that has proceeded these entire 2 years on the basis of a continuing appropriation bill that was approved by the dying Congress 2 years ago. And we will now pass a continuing resolution, which is what we are waiting on, and must do so certainly before January 3, in order to have the dead hand of this dead Congress by then weighing down the future Congress, the next one, the 98th.

But it is symptomatic, because do we have any passionate debate to keep this Congress open to address itself to the question of this debt ceiling, extortionate rate of interest? Not a word.

Oh, yes, after some of us have been talking for 15 years finally here within the last 3 months even those who have been advocating the very position that is killing us really economically, are now saying, "Well, it wasn't our remedy that gave this kind of an effect to the patient. It was that dastardly Federal Reserve Board and the hard-headed dogmatic Chairman who insists on this tight money policy, high interest rates," overlooking the fact that they went along with that all along, until now, when their policies have completely revealed themselves to be the bankrupt policies of sleezy economics, which some of us, few of us, very few, dared say, not 3 months ago, not a year ago, but at the very outset when they were proposed, which was February 1981, immediately upon the advent of this administration and President Reagan.

At this point, not only is the domestic economy collapsing all around our ears, but the international as well, in a day and time in which it is so interlocking that one cannot be separated from the other.

What does this Congress do? It further compounds the problem by the good old technique that we were debating at 10:30 at night on the conference report on October 2, just as we were anxiously trying to get away, to go face the elections of November 2.

And what did that do? It gave the most radical changes to our banking and financial institutional structures since the 1935 Banking Act. All in the name of saying that they were trying to save the floundering S&L's, the savings and loans.

But in effect, they have opened the sluice gates further. In other words, throwing gasoline on the fire in the name of trying to put it out. To no avail did the feeble voices of some of us raised in honest interrogation have a chance to even be heard, much less have an imput.

And so today we have newspapaer reports, such as this. And this is one on page D-1 of the Monday, December 13, New York Times. The headline is "Push By Banks To Sell Account—Introduction Tomorrow."

That is December 14 when this great legislation we passed delegating, mind you—delegating the power of structuralization in determining which banking institutions would have the leverage to compete with the others in a dog-eat-dog market.

It is absolutely unthinkable to me. Yet it is reality.

What do these papers say? They say now that these banks that have the power will be able to issue the a kind of paper. Well, this is kind of certificate that will impose a permanence to the high interest rates. In other words, they will be valuable only as long as those high-interest rates in excess of 10½, 11, and 11½ percent prevail.

It will be interesting to see which mastodon finally conquers the other, just as we have had these massive mergers, tying up billions and billions and billions of bank reserve and credit which under our law and the reason for having charters for banks is supposed to be destined as credit allocations for the engines of industry and commerce and factories and the production of goods and jobs.

But instead tied up by these mastodons in crucial takeover struggles—Exxon versus Mobile, First City National Bank of New York testing the waters in its control over some of these international flows of credit and money, where they have sold out the American interests time after time after time. They have speculated against our currency. They are speculating against it now. They have tied up billions of dollars, the Federal Reserve has allowed these banks to. The Federal Reserve has the power, both explicit and implied, to control.

But do you think that a lackey who happens to be Chairman of the Federal Reserve Board, but a lackey of those few gigantic financial institutions, is going to be able to tell them to stop? On the contrary. As I have alleged in my bill of particulars, in my bill of impeachment, you have the Chairman of the Federal Reserve going in secret to have a secret meeting with the head of the First City National Bank, Walter Wriston, and whom else—the billionaire, Bunker Nelson Hunt who was risking that capital allocation from the First City and Chase Manhattan and a couple of other New York banks in his ill-thought of and ill-faring venture into trying to control the silver market of the world.

□ 1640

Mr. Speaker, I yield to the distinguished gentleman from California (Mr. JOHN L. BURTON).

Mr. JOHN L. BURTON. Mr. Speaker, I thank the gentleman from Texas for yielding.

I would like to commend him for his remarks today. One of the things I have enjoyed throughout my stay in Congress and learned a great deal from was the gentleman's addresses that were usually on the state of the Nation or the state of the world as he saw it.

His target of the Federal Reserve Board is right on mark.

The work the gentleman did in getting finally the prosecution of the murders of the judge down in Texas will go down in history as one man's fight.

In leaving this institution, one of the sad parts will be that I will no longer be able to watch the "GONZALEZ Hour." I was sitting over in my office trying to decide whether I would watch this special order or watch the football game and I decided after watching this special order for 30 seconds to just come over here and tell the gentleman how much I am going to miss him and miss his reports to the people.

I think the gentleman does a great service to this institution and to this Nation and to the city of San Antonio.

Mr. GONZALEZ. Well, coming from this very distinguished Member of this House who also on the question of air safety has done such tremendous yeoman work, I deeply appreciate those words, more than I can tell the gentleman.

In fact, let me say that when the gentleman gives up a football game to hear this, "Greater love hath no man."

Mr. JOHN L. BURTON. Mr. Speaker, I thank the gentleman.

Mr. GONZALEZ. Mr. Speaker, to me, here is another sad article. This one was in the business section of the Dallas Morning News, Monday, December 13, and it has two headlines, one headline up above and then a subheadline of two different articles. In fact, they are so contradictory that if it were not so sad it would be laughable.

The top one says, "Exec Plays Down Effects of Changes. Money Funds Won't Hurt Brokerage Firms, Shearson-American Chief Says."

Then the immediate headline right to the side of his picture and under the big headline is, "Banking Officials Hope To Draw Millions of Dollars. Bank and Saving and Loan Officials Are Making Last Minute Preparations Offer New High Interest Money

Market Accounts Tuesday They Hope Will Bring Millions of Dollars of Deposits Into Their Institutions."

Well, I guess you do not have to be an economic or fiscal or monetary expert to know that that is contradictory and one of them is wrong; but in the meanwhile, what is happening is that anybody knows that if you get a flyweight to go into the ring with a heavyweight what the results are apt to be if the flyweight does not run out of the ring, and this is what is happening; but what is so tragic and so unpardonable in my book is to see this terrible statistic of where just plain average small businesses are continuing to go out in greater record numbers, even though the President and the Chairman of the Federal Reserve Board and the leaders in and out of the Congress, incidentally, on both sides of the parties, still indulge in fanciful myths that they think the people accept, that inflation has been reduced, that if there are 15 or 18 million Americans unemployed that that is just part of the price for having brought inflation down and then they say under control.

But now, you go out, if you do, and do your shopping in the grocery store. If you are paying rent, I will ask the question, has the deflationary impact of these policies affected your rent? Are you paying less rent today or more? Are you paying less for your groceries or are you paying even more now?

So on closer examination, what I read is what they are saying is like President Nixon was saying back in the early seventies, boasting about how his administration had controlled crime or reduced it. When we examine what he was saying, he was saying that the rate of growth in crime had been reduced.

What they are telling us is that the rate of inflation, the rate at which inflation had been registered for say a given 12-month period in the past had been reduced, but it does not mean that inflation has been controlled. It does not mean that the American people at this time have any defense against this massive pressure of a fixed salary—no inflation there—and the continued high cost of living just on the basics, and that includes interest rates. If the family needs an automobile, I want to know what average American family at this tim e can go in and afford to buy an average priced popular American make. I doubt that anybody can get a safe, decent, and comfortable car for much less than $10,000 and finance it. Even if it were at 9, 10, or 11 percent, it still is an unconscionable and an extortionate rate and impossible and beyond the means of the average American without facing some kind of credit crisis for his own family's economy.

What businessman anywhere in the country, whether it is my hometown of San Antonio or Washington, D.C., or Oshkosh, Wis., or Los Angeles, Calif., can go in and get a line of credit from his bank for a floor inventory in order to have an inventory to sell at less than 16 percent, if at all; that is, when you include points and everything.

You know, you get into this malarkey about how interest rates have gone down, meaning prime interest rates, in some cases to below 12 percent. Well, that is prime interest rate. That is not for you and for me. That is for the big ones. That is for the favored ones.

Remember this, that those big ones, even in their flailings around trying to gobble each other up, never had to pay the prime interest rate to get that money from the banks. They always had favored treatment.

When I raised my voice in allegations in furtherance of the impeachment of the Chairman, I have seen these reactions of people who look at it as if it is some bombastic flamboyant attempt to get publicity; but I say, like old Fidel Castro said, "I appeal to the future," tragically, because I think this whole process is irreversible and this whole house of cards must tumble, as it has begun already crumbling all around our ears and the historian will write further that here was a Congress that in the waning hours could not find time to schedule the Urban and Rural Housing and Development Act for 1982 and 1983, could not even get an authorization bill for the basic housing programs and policies that performed the miracle of America for 40 years.

America, the only country in the world that did what it did in the matter of providing housing, safe, decent, and affordable housing for 40 years, with a President and an administration and a country that seemed, as I said last year, not this year, I said it last year and I got terribly chastised by the local press and others because I compared it to a giant national Bouyana.

I said, here is a President going around saying, "Drink this potion known as ERP."

□ 1650

Some call it Reaganomics. He called it the economic recovery plan. I examined it. I asked questions, questions that would not or could not be answered.

I am the chairman of the Subcommittee on Housing and Urban Development of the Committee on Banking, Finance and Urban Affairs. I was able to persuade Mr. Stockman, and he reminded me what a big favor he was doing, when he said, "I appear here in an unprecedented manner and against all the advice of my assistants and counsel who say that a Director of the Office of Management and Budget never appears before a congressional nonbudgetary committee."

So I said, "Well, I appreciate th favor, but it seems to me that is the least you could do since you are asking that 75 percent or better of the thrust of your cutbacks are directed in the areas of activity that this subcommittee has jurisdiction of."

Historians will write incredulously that this great Nation of ours, under this cult, which is what I call it, which now, of course, in the light of brutal reality but too late to do anything about, has reversed. All last year, while you would have thought it was the Reverand Jones in Guyana saying, "Drink this potion of salvation," the thing I noticed, just like in the case of Guyana, is that when the people started dropping dead and some of those folks, true believers, said "Hey, wait a while; this is not saving, this is killing," they had enforcers on the side who said, "Drink or else." Those who did not drink got shot.

We are going into the same thing nationally. In fact, I faced it last year by being bitterly assailed as an obstructionist simply because I was asking questions. How in the world, in the absence of any administration criticism or attack on the policies that this runaway institution known as the Federal Reserve Board was imposing like a crown of thorns or worse on America's economic and financial way of living and its standard of living, how in the world could any such plan as one saying that the main thing was to balance the budget by reducing the Federal budget along certain lines in a certain amount, $42 billion, but increasing the defense budget over $58 billion?

When I said, "Wait, that is not going to balance because you have an $18 billion discrepancy," they said, "That is because you have to wait and see what our tax program is and it is in place. Our tax program is concomitant and indispensable in this ERP. Not only is it necessary to reduce the budget, but we have to have the tax bill because that is going to reduce taxes, and those taxes are going to be invested in order to produce goods and produce jobs."

When I said, "Where is your tax bill?" they said, "We, are not going to reveal it until you first vote for the budget."

When I would not do either, they called me an obstructionist. When the tax bill finally evolved, I asked the authors, "Since you are saying this is the same thing that Kennedy advanced in 1962," and I know a little bit about that because that was my first year here and I went into it thoroughly and was greatly troubled by the proposition then, but then we had finally a briefing by the great economist Walter Heller who explained it in ways some

of us had not quite perceived, the rationale.

But I remember distinctly the language of those bills and I remember the tie-in between the fast, accelerated writeoff and the inventory buildup or machinery and installation of modern techniques to produce more, better, more skillfully, more economically, in our American industrial effort. In other words, you did not get that tax cut if you did not do those things that were going to be invested in the expansion of industry, production of jobs, production of goods. But here comes this so-called recovery tax bill. If anybody can ever show me such an anachronism, I stand open to conviction. But that is what is was labeled.

Nowhere is there any language to tie in. In fact, there was contrary language. So what is happening now? Here is another story: "Factory Output Hits 5-Year Low." This is from the Dallas Morning News, December 16, just the day before yesterday:

> The recession lengthened into its 17th month during November, matching the longest downturn since the Great Depression, government figures indicated Wednesday. The latest sign, November factory output, dropped .4 percent to the lowest production level in 5 years.

Now, you remember a year ago the President was telling us that by now we would all be basking in prosperity, with factories producing. What happened? When it did not happen, he said the deadline, first, would be last spring, then he said it would be in the summer after the tax cut took effect, then October 1, when the rest of it takes effect, and when neither happened, and the election came on us this year, you will remember the President said, "Why, this is all because of President Carter. It is not our fault. President Carter."

Today I think now they accept the statute of limitations on blaming President Carter, but the reason is simple, as anyone could have foreseen 1½ years ago.

Do you think that the greedy, the insatiable interests which we have always had through history, this is why I keep repeating that we have always had controls on interest, since 7,000 years before Christ. All we have to remember is the scriptures. Who was Christ chasing out of the temple? The so-called money changers. But there were laws then limiting the rate of interest. They were semireligious laws. And all through history, because of predatory, insatiable interests, the more they have, the more they want, and they do not stop at wars, they do not stop at national destinies. These multinational, international institutions now have no nationality, and even our own so-called American companies are speculating against the dollar. They have not said one word. In fact, I am the only one in the Congress who has mentioned EMS, EMF, European Monetary Fund and European Monetary System. It was advanced in Bonn at the economic summit meeting that President Carter went to.

Where was the last summit economic meeting this last week? It was in Germany also, for the good reason that that is where this is emanating from.

So as I say, these historians will be incredulous. They will see we are acting the way I just mentioned. They will see that half our budget for defense, which is over $200 billion, over half of it is for what, the so-called defense of Europe, where those that we say we are defending are more scared of us than they are of the Russians.

The day before yesterday, one of the big stories, another American official bombed in Germany. A year ago I wrote a letter to the chairman of the Committee on Foreign Affairs. I tried to get attention on the fact that our policies would have to become realistic, long overdue in Germany and in Middle Europe and now way overdue with respect to what is happening south of the border.

□ 1700

I am saying now—I have written it, I have spoken it, I have addressed other letters, I have spoken here at this podium on this other subject matter that again I will have to defer to the future Congress, God willing, to pursue. In the meanwhile, it is the same thing. It is incredible to me, we will be lucky if Mexico turns out to be our Poland and not our Afghanistan—lucky. All of this involves these men that now have arrogated to themselves and this particular banking community in the United States, or let me say gained the absolute control of our fiscal and monetary destiny with no accountability to the Government, which means to the people. This is why I repeat what I have said all through these years. This is an issue as to whether or not the bankers are going to be the ones to determine the question of war and peace, depression or recession, maintenance of the American standard of living or its loss, or whether the people are going to regain their destiny.

We have lost it. The Congress has no control. I said this a while ago, and the leadership said, "Oh, yes, that Federal Reserve, we have got to do something about it."

Last week we had Senator SCOOP JACKSON saying, "Oh, yes."

But what are they saying? They are saying, "Let's pass a resolution, address it to Mr. Volcker saying, 'Please Mr. Volcker, please, please drop the interest rates a little bit. Please drop them a little bit.' "

It is as if to say, "Hit me again, Mr. President, Mr. Volcker. It feels so good when you stop."

That is all we have been getting. These resolutions are powderpuffs. We are going to hit Mr. Volcker with a little powderpuff when the issue is, is the Congress not abdicating its responsibility? After all, the Congress created the Federal Reserve Board. I have been aghast at how many of my colleagues seem to think that the Federal Reserve Board is an autonomous, free-wheeling, independent body, and how many Americans think it is a branch of the Federal Goverment, it is a Federal entity. It is not, and the way it is operating now, it is out of control. It does not account either to the President or to the Congress.

These are heart-rending times for that reason, and I have gone into the history of that issue enough, ad infinitum. Today I merely want to emphasize that it looks as if my primary, primordial intention, which was the same as the one I had when I first started talking on this attempted assassination of James Kerr, and later the murder of Judge Wood, and that was to keep at least the matter with a sense of urgency and priority before, first, the Chief Executive and then the law enforcement officials, but above all, the Congress.

I must say that fortunately we had men like Director Webster of the FBI, but other than that, they are limited. They are challenged even after this resolution of the Wood case, which has to go into the processes of appeal and all, is still to go behind all of that and resolve the Kerr case. Without the Kerr case there would not have been any bizarre murder of a Federal judge, and then go behind even the forces that created the environment that made that crime possible. Those forces are still loose in this country, but they are high and powerful. They are just as sophisticated and as powerful as any ability of the National Government to enforce the law against them. That is still a continuing challenge, and it is here now with the Federal Reserve Board.

The American people have been stripped naked of defense against the criminals, what I call King Crime, and their economic masters. What does it avail us to have political freedom, constitutional rights, if in this day and time in the kind of society we live in, we do not have economic freedom, but are either wage serfs or are dependent on the individual economic philisophical positions of chairmen who dare come—in fact, this is what triggered me off in my bill of impeachment—who finally dare come even to us in our committee and say, in answer to my question, "Yes, this will affect detrimentally the standard of living of certain Americans."

Now, since when—since when does any official, elected or not, have that power which only is placed by the

Constitution in the national policy-making body, which is the Congress of this country? Since when?

When I saw that nobody would challenge that, I decided that no matter what the odds, no matter how ridiculous it would seem that I was taking in my position, it was something that had to be done. I have had joinders of others, like the gentleman from California a while ago, but I am afraid at this end of the session I must confess that my primary objective has not been served. I could not even get a hearing with the Committee on the Judiciary, even with a subcommittee.

Now, I was acting and have acted in good faith. It is not a pleasant thing to draw bills of impeachment, utter specific charges against men whom personally one does not dislike. That is not easy, but it is a duty in my book.

What good does it do for me to serve on the Banking Committee of the House of Representatives if I choose to ignore that, but also, how depressing that serious consideration, at least in hearings, was not given, so I then said what I am going to say now and reaffirm, and that is, since it is a privileged motion, it is a privileged legislative act, and that if I do not get serious consideration by the proper committee at the proper time I will have developed a case as if I were developing it before the committee here on the House floor and call it up in such a way that the Members of the Congress will not be able to say that they have had no opportunity to pass or regain the control of the economic destinies and well-being of the American people we presume to represent, and had no chance to vote thereon.

Now, let us assume that we sought and obtained the impeachment, and even the trial and conviction in the Senate. That still does not remedy the question, and that is the need to reform this tremendous diversion of the intention of Congress through such things as a development of the Open Market Committee in 1923 and thereabouts. Some of their sleeper clause amendments that were slipped through, just like on October 2 in the so-called Equity Protection Act, or "Save the Savings and Loan Act," which was, as I said and repeat, much more than that, and belatedly finding that the control and responsibility and accountability has slipped.

What good does it do to be the playthings of a master who says, "Well, you know what, yes, conditions are so bad and businesses are going so broke and political pressures have arisen, especially before the election, that we are going to do something here to ease up a little."

□ 1710

So we had big headlines about short term. Incidentially, long-term interest rates are still unaffordable—in an economy such as ours, fatally so. And so when we put in such things as the Caribbean Initiative, in which we are trying to privatize or, as we say, Americanize the economy of the Caribbean Basin, we adopt tactics that Caribbeanize our economy.

We now have all the conditions and high interest rates that Third World countries have been afflicted with all through history. Anyone familiar with just our neighbor to the immediate south, Mexico, will tell us that at no time were interest rates affordable.

If you were fortunate enough to be in the position where you could ask for a loan, that meant you had to be in the upper middle class or lower rich class in Mexico. Never would you be able to get that loan at less than 16 percent. Today it is over 55, 60, and 65 percent if you can get it. But as to the economy, you cannot compare it.

When I did try to bring this to the attention to these big expert economists, they did not understand. And I have learned, after coming on this level, that nothing makes me more distrustful than when somebody comes in as an expert, and particularly from the Treasury Department; then I know that we are in for bad times.

But where, then, are the American people going to entrust their destiny, if not in their representatives or agents? That is the question. The overall fundamental issue is whether or not there is a fiscal agent. Like the American people did during the first 10 years' national existence, in the Continental Congresses you had the same issue. You had the same class trying to take control as the price for being the fiscal agent.

The thing that amazes me is that even the members of the committee do not realize or do not seem to understand. I am not trying to downgrade them. I have the highest respect and affection for them, but I must attest to what I have witnessed. But the legal definition of the Federal Reserve Board is that it is the fiscal agent of the U.S. Treasury. That is its legal function and title. Even Secretaries of the Treasury that I have talked to have seemingly not known that.

Mr. Speaker, the country, of course, had men like Jefferson, who was very outspoken. If what I have said about bankers seems harsh, others were harsh, too. And let me say that I believe in what William Lloyd Garrison, that great emancipator, said when he was chastised for making what appeared to be radical statements. He said, "Well, I intend to be as harsh as truth and as unrelinquishing and uncompromising as justice."

Jefferson was violently concerned, and fortunately they prevailed in both Congresses.

The first bank was created or chartered in Philadelphia, the National Bank of North America, mostly because every entitly or individual has to have some kind of a fiscal agent. But what happened? If they had gotten what they demanded, why they would have had unthinkable rates of interest, but they did not. Then, when the first Congress was formed in 1789, that of course, was the issue, and they had great men like Gallatin and Alexander Hamilton, who, incidentally, was a great and sympathetic friend, but he was also responsive and responsible and honest and would not succumb to these interests.

Then with the creation of the first Bank of the United States with a 20-year charter, what was the issue then? It was the same issue, the allocation of credit and its control.

Then came Andrew Jackson and his forcible canceling of that second U.S. Bank. Then came the Civil War, and we remember the last words of Abraham Lincoln before he was killed—I have quoted them in the RECORD before—concerning that issue: "He who controls the allocation of credit is going to control the freedom of the people of this country."

He was concerned. Why? Because the Congress here then—and they did not have a CONGRESSIONAL RECORD then, so if you want to dig all this out, you have to dig it out from other sources—was debating the so-called 1864 Currency Act and eventually the 1865 Currency Act. Historians say that is when our national banking system started, but it was nothing compared to how we interpret national banks today. And they had their scandals right after that. What were they?

Well, at that time they were scandals, but today people shrug their shoulders at something like that. It is like this headline in today's Post where the chairman of the Interstate Commerce Commission said, "What's wrong with a kickback? Why, there is nothing wrong with a kickback in this industry. Sure, it is a bribe in a way, but that is the way they do business and have done business in the trucking industry for years."

Now, this is the same atmosphere that has been pervading the banking interests here in our country.

I have alleged in my bill of particulars and my bill of impeachment the leaking of information, which they call erroneous information. That is the way the Federal Reserve said it. But the Open Market Committee member leaked informantion that meant millions and millions and millions to such entities as the Manufacturers Hanover Trust in New York, Chase Manhattan, and a few others. And we had more than one leak.

It is accountable to Congress? No; we cannot even get an audit of the Federal Reserve Board. Do they have an audit? Well, they have an audit like we used to have in my city on the city

water board when I was first a city councilman.

Incidentally, if Members think this is a fight, they should have seen that one. Again, it was a lonely fight, and I was charged and criticized the same way I am now. But I won it. That is one reason I am here as an elected Representative. We won it.

They had certain types of audits, but they had all kinds of shenanigans. The chairman of the water board was chairman of the bank that was a depository of the water board. Then they had "sweetheart" arrangements with some of the developers who would come in and say, "Look, we have a tremendous housing need, and we have got to develop this subdivision over here." It was right after the war. They said, "You can't pay for the extension of the water mains. We will pay. We will capitalize if you will reimburse us." So then they got a note from the board saying, "When and if we have the funds, we will reimburse you $250,000 for the cost of the extension of water mains over to Shearer Hills."

They did not have the money. The developers did not have the money. They got that note and went to the depository bank and got the loan on that note. Then they built the homes, they extended the mains, and they charged every home purchaser the per capita cost of that extension and got their money back then, plus the $250,000 from the bank. Now, all the kind of thing will happen any place if you have unrestrained power and unaccountability by anybody. It will happen here with a Congressman, as it has. It will happen with Cabinet members, it will happen with school board officials. If you have power and do not have to render accounting for that power, you are going to get corruption and thievery.

What I am saying now is that in the Federal Reserve Board is no different than it was in my local city water board 29 years ago. What I am saying is that nobody thought that fight was going to be won, but we did win it. I am saying further that this fight here will be won ultimately. In good time the issue will finally be addressed.

What I am saying is that it is a shame it will not be in a timely fashion to anticipate and prevent this great suffering, this great downgrading of the American standard, and this great exposure to our international competition in which we are foreordained to lose the standard of living that we proudly boast of. There is no anticipatory action here.

□ 1720

The housing bill I speak of, there was no time for us to bring it up in the lameduck session. We wanted to. I wanted to.

Oh, no, you could force a so-called immigration control act, but not that one.

TELEVISION COVERAGE OF CONGRESSIONAL PROCEEDINGS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DORNAN) is recognized for 60 minutes.

Mr. DORNAN of California. Mr. Speaker, the hour is late.

I had intended to take out a special order about the death of nine young Air Force crewmen in a B-52 crash in my State of California 2 days ago. But I would like to ask unanimous consent that I be allowed to address the House in a special order tomorrow night instead and change the subject tonight of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DORNAN of California. Mr. Speaker, I came to this distinguished body from the electronic world of television. I was this new, vague, modern job description they call a communicator, and I thought it was an exciting day when this House began to go on television through the services of C-SPAN over in Virginia across the Nation. They say that the audience now may be somewhere around 300,000 coast to coast.

I circulated a letter that year of 1979.

We were supposed to be televised on George Washington's birthday, a fitting day, February 22. Due to the largest snow storm in this area in about 50 years, it was put off until April 3, which happens to be my birthday. So I took a little special interest because of that coincidence and circulated a letter signed by about 65 Congressmen to the majority leader in the other body who was then Mr. BYRD of West Virginia, and then minority leader, Mr. HOWARD BAKER, who is now the majority leader, saying we on the House side would appreciate if they would also televise the action in the other body so that we could watch.

The B-1 dabate was coming up. Also the Panama Canal debate.

I had described in that letter that the opening up of this body to electronic media was like blowing the walls of the gallery out all the way to Alaska, Hawaii, Puerto Rico, and the Virgin Islands and letting any American tune in the proceedings in this august body and watch it from the comfort of their own living room, in an old, torn robe, with our first cup of coffee, just as though they had dressed up and spent hundreds of dollars just to fly to Washington, D.C., go to their Member's office and secure guest passes to sit in this gallery and watch us in action here.

I still stand by that. But I believe now that there are things happening in this Chamber that are affected by television that are wrong.

The other body was supposed to during this 3-week lameduck session, according to its distinguished majority leader, debate whether or not they would go on television. They are all wired for it on the Senate side.

I think if they watch what happens here during these special orders, in which I am participating right now, they will decide to keep their Chamber darkened, and available firsthand, sight and sound and motion only to those people lucky enough to have the money to come to Washington, D.C., and get guest passes to the gallery of the other body from their Senators or their Representative in this body.

I think we should do everything here in the decorum of how we conduct ourselves on television to encourage that other distinguished body, the other half of the Congress of the United States, to also go on television. But I have noticed, and I have thought about it deeply since I took out five special orders during the last 3 weeks of this lameduck session, I have noticed that it will probably be very healthy for this Congress, and encouragement to the other body to go on the electronic medium of television and probably good for the American taxpayers, that is certainly an irrefutable fact, if we turn off the coverage of the House after the conclusion of official business.

There is nothing that says in concrete that we have to televise this Chamber from gavel to gavel. We could go from the opening prayer to the conclusion of official business, and then allow the Members to come down here with special issues that they feel they have to deliver to our hard-working staff and pages, and the police officers who are in private clothes to guard us inside the Chamber, and the extra police staff outside, and all of the hundreds of thousands of dollars that it takes to run this Chamber from the electricity down to the last young page waiting to end his day, and the hardest working people in this Chamber from a physical labor standpoint, and that is these great reporters who take down our pearls of wisdom, that that money saved for the taxpayers would be significant if the temptation was not there for Members to go on and on with their special orders instead of saying succinctly at the beginning, taking 5 or 6 minutes of a special order, and then submitting the rest for the RECORD. That RECORD goes out across our 50 States and even to some interested countries in Europe if they are involved in other parts of the world, and goes into every public library in the United States, the written CONGRESSIONAL RECORD. There is no

need to stand up here and go on and on.

I am here a little bit on shaky grounds, having taken five special orders, some of them on late nights. Each one I tried to end in 5 or 10 minutes, and they were all on subjects like Soviet war crimes, the current use of red rain, yellow rain, blue rain, the seven poison gas agents used by the Soviet Union in Afghanistan and Ethiopia, and given to the Communist puppet forces to control Indochina for use against the humble people in Cambodia and Laos.

I think that is pretty important. But I did not take the full special order, the 60 minutes to speak on the 60 violations of the SALT I and SALT II treaties, the arms limitation agreements by the Soviets, the other major superpower in the world. I put that almost in its entirety into the RECORD and tried to shorten that RECORD because we were not working on a weekend, but we were going late at night after a long day.

On child pornography, I cut that short, and I cut short another special order on the whole state of our defense structure and what is happening to it and the

I cut short a special order on our prisoners of war and our men who are missing in Indochina, some of whom I believe are still alive, a slightly nightmarish story.

Then one night when I was speaking on the floor an act of rudeness did occur from a fellow Member. He deliberately walked right in front of me, well aware that he was going to cut me off from the cameras or something childish. Other Members on the majority side started deliberately making noise in the background because I was keeping them after hours, they thought, because they were all going to pat one another on the back, which is a fine tradition, in saying goodbye to Members in these special orders, which again is for the RECORD and does not have to be televised.

I went up to one of the Members and asked what her problem was, and I said, "Now, wait a minute." Before I even could get out a defense of the importance of my issue of narcotics, cocaine use, which even struck this Chamber and has one of our Members sitting in a Federal penetentiary at this moment, the wealthiest Member of this House of Repesentatives, Mr. RICHMOND from New York, who brought disgrace and ignominy on this body, before I could even defend my special order on cocaine, the lady Member in question said, "I know, I know, I know about Henry."

If they are aware of that problem on one side, without impugning anybody's eloquence, impugning their motives or casting any aspersions about the brilliance of the remarks stated here in the well, I think that as important as my special orders were, and cutting them short as I did, that they would have best been served going out to those public libraries through the written record so that this body could at least quickly expedite itself through the personal interest period of Members' special orders and not keep going for about 10 people in the gallery. We appreciate their interest, and I am violating a tradition in this House to even refer to television, the other body at length or to the gallery.

The Press Gallery, of course, is always empty. That is a slight violation of tradition to refer to the most powerful part of our system, what Edmund Burke called the fourth estate, but we simply should have initiated on the majority side, because that is where the greatest, I do not want to call it abuse, but the greatest ut utilization, at tremendous cost to the taxpayers takes place in this well, and that there should be in the 98th Congress, and since people have seen fit to come down here on special orders and advise all of their Members, their fellow Members on things to do next year in the Congress they will not be a part of, I will just leave one word of advice to you, Mr. Speaker, in the interest of saving money.

□ 1730

Why do you not, Mr. Speaker, get the Republican leadership and people of reason on both sides to counsel together to cut off the electronic coverage of this august body at the end of official business. Because if someone ever decides to take a computer and run a cost accounting on a couple of Members covering the hugs and kisses here in the well and all that stuff about greater love hath no man, because while Members may stay down here and think there is this vast audience out there hanging on every pearl of their wisdom, I just checked and one Member who goes on at length here does not have a single staff member in his office now watching their boss on the closed circuit television system of this proceedings.

As a matter of fact, I can assure the gentleman they are home watching a football game.

If there is anything I repeat in summation going to destroy the best hopes for the American people of getting inside the Chamber of the other body to watch their deliberations and debate, and encourage more people to come over on that floor over there, and engage in the give and take of debate, it is we conduct ourselves here in a frugal and swift manner.

We are not allowed by the rules to read things, and Member after Member gets in this well and violates the rules and reads ad nausem, and loses that American audience out there trying to learn something about our Government.

I would say 95 percent of our Members sell themselves short here. If they would not read the staff-prepared material, or even if they wrote it themselves, and tried to speak from their hearts more from their minds it will increase the level of debate in this Chamber, most Members will amaze themselves how eloquent they can get in trying to express their ideas.

We all have the right to extend and revise our remarks. And that word "revise" means to clean up the syntactical error and to maybe add a few succinct or trenchant points we forgot in the course of debate.

I would hope in the 98th Congress since it is becoming more and more expensive to run this Congress, it has become a billion dollar industry every year, that people would come into the well or stand at the leadership desk, prepare themselves for debate, engage in terse colloquy back and forth, and even if they want to talk about missing Americans, Soviet use of poison gas, child pornography, or Judge Wood in Texas, or the Federal Reserve and the bad guy Paul Volcker, whatever the importance of their subject, save it for the written record and shorten down these special orders to give the hard-working people on this Hill that keep us going here as Congressmen and Senators a fair break, particularly on weekends, and when we have been in session all weekend long past the hour of midnight and have to come back before the Government shuts down and do more of the same next week.

I meant my advice sincerely. Some of the longer special orders I found interesting. But I am supposed to be a professional legislator aware of everything that is going on around here. And I think we should show some respect and a little kindness to not only the staff here but the American people who would like to follow that proceedings on that magic box that has been such a great tool and such an evil tool for communication in our country or never will we ever see the other distinguished body sometime referred to by columnists as the House of Lords ever ballooning out the walls of their Chamber from Hawaii to Puerto Rico and by satellite to Europe where people all over what is left of the free world can watch what goes on in this Chamber.

Mr. Speaker, I yield back the balance of my 60 minutes and promise to only speak for 5 minutes tomorrow night on our brave young men who died in California on December 16.

AGRICULTURAL ISSUES IN AN ACTIVE CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from California (Mr. BROWN) is recognized for 5 minutes.

Mr. BROWN of California. Mr. Speaker, the 97th Congress has adopted a number of major changes in policies designed to restore vitality to the economy. Like all sectors of the economy, the agricultural sector has benefited from the declining rates of inflation and interest. Yet, the administration's economic and monetary policies have also exacerbated other agricultural problems. It would be difficult for anyone to argue persuasively at this point that the U.S. farm economy is more prosperous today than 2 or 4 years ago.

There is a growing consensus that several basic agricultural institutions and policies are in need of substantial reform. The changing economic and monetary realities of international trade in agricultural commodities is one of the basic reasons we need to reevaluate basic farm programs. Likewise, the direct and indirect costs of production for most types of agricultural enterprises are escalating rapidly. I think that public research, conservation, foreign trade, and domestic and international assistance programs have played a fundamental role in shaping the U.S. agricultural system. These are the areas of public policies which must also play a major role in overcoming the agricultural sector's current economic problems.

The House Agriculture Subcommittee on Department Operations, Research, and Foreign Agriculture (DORFA), which I chair, began investigating many of these issues during the 97th Congress. For the benefit of other Members interested in agricultural matters, I would like to summarize some of the subcommittee's activities, and highlight the policy issues I think require further work in the next Congress. I will arrange any remarks according to the subcommittee's areas of legislative jurisdiction and oversight activity.

HUMAN NUTRITION RESEARCH AND EDUCATION

Two subcommittee hearings were conducted jointly with the Subcommittee on Science, Research, and Technology of the Committee on Science and Technology which emphasized the need to stimulate human nutrition research, to develop methods and techniques to better understand the relationship between food, nutrition, and health, and to transfer the knowledge base and technology to the scientific community and the public. The hearings were designed to focus the attention of the new administration on the continuing need for Federal support of human nutrition research to insure and monitor the nutritional quality of the food supply and the nutritional and health status of the population.

In response to the June 1981 hearing, the Department of Agriculture and the Department of Health and Human Services submitted to Congress the long overdue joint implementation plan for a national nutrition monitoring system. This plan incorporates, for the first time, the National Health and Nutrition Examination Survey and the Nationwide Food Consumption Survey into an operational national nutrition monitoring system. The plan will broaden the ranges of comparable information which is necessary for identification of the nutritional habits, status, and needs of Americans.

The plan marked a major step forward and the departments indicated they were committed to implementing the plan in a timely fashion. However, after a series of letters requesting progress reports from the executive agencies, it was clear the departments had been unable to reach successfully a number of critical goals in accordance with the fiscal year 1982 timetable developed only last year. Therefore, a follow-up hearing was held in June 1982 to again obtain the Departments' commitment to the national nutrition monitoring system as well as the broad area of human nutrition research. The departments once again indicated closest attention would be given to the implementation of the plan at the Assistant Secretary level.

This series of hearings pointed out the need for a Federal human nutrition research plan and strategy. This need was documented in a May 1982 report which I requested from the General Accounting Office (GAO) in 1980. The GAO recommended that the Office of Science and Technology Policy (OSTP) direct the Joint Subcommittee on Human Nutrition Research to develop a Federal nutrition research plan. I am pleased to report that the Director of OSTP has accepted the responsibilities.

The need for a human nutrition research information and management system was documented in a DORFA hearing in March 1981. Budget decisions by the Congress and each agency conducting nutrition research were being made without up-to-date information of ongoing and planned projects in other agencies. I offered an amendment which became section 1427 of the 1981 farm bill calling for development of such an interactive research planning and management system.

In August 1981, the subcommittee and the Domestic Marketing, Consumer Relations, and Nutrition Subcommittees held a joint hearing on the reorganization of nutrition research responsibilities within USDA. This reorganization was viewed by some as a retreat from past commitments to human nutrition research and scientific excellence within the Department. I have noted a number of USDA efforts to accommodate requests from producer or food processing interests which have led to administrative or budgetary policy changes opposed by scientific organizations and consumer groups alike. Many of the controversial Department initiatives in this area, though, are not surprising in light of the administration's basic goals. I will continue monitoring the Department's actions in this area, and will encourage the Department to retain a strong and credible consumer orientation in its scientific, educational, food assistance, and regulatory functions.

INTERNATIONAL AGRICULTURE ISSUES

In preparing to draft its portion of the 1981 farm bill, the subcommittee held 2 days of hearings in March 1981, reviewing the Public Law 480 program. Testimony presented laid the foundation for title XII of the farm bill. The proper mix of expenditures between the different types of Public Law 480 programs was discussed at length, as were ways to verify the value of self-help measures instituted as a part of Public Law 480 contracts. We worked in concert with the House Foreign Affairs Committee to make needed changes to the food for peace program.

Agricultural trade issues were a frequent topic for discussion throughout the 97th Congress. During the debate on the basic provisions and price levels in the commodity price support programs adopted as part of the 1981 farm bill, the administration repeatedly argued against higher support prices and land retirement programs because of the administration's optimistic appraisal of export prospects. When restrictive monetary policy in the United States drove up the value of the dollar, hence dampening demand for U.S. farm products, and favorable weather patterns led to record crops in many countries, crop surpluses began to build in the United States during the second half of 1981. As grain prices fell, the administration's commitment to agricultural export trade promotion activities was carefully watched. Diverse agricultural groups tried to develop new ways to promote exports and open up new markets. Criticism toward restrictive trade practices in Europe, Japan, and other countries also grew in intensity.

The subcommittee held 3 days of hearings on export trade issues in June and July 1981. The hearings focused on opportunities to expand export trade, the domestic economic and environmental consequences of alternative levels of export trade, and strategies the Federal Government should consider in developing a balanced export policy.

Testimony representing a diversity of interests and conclusions was presented at these hearings. The witnesses generally agreed that the United States had sufficient untapped

agricultural productive capacity to substantially expand over many decades the volume of exports. Most witnesses also pointed out, however, that the desirability of doing so would require constant appraisal. Some analysts contended that U.S. agriculture's dependence on export markets had already forced down commodity prices and net farm income. Export dependence also has increased fluctuations from year to year in commodity prices, hence raising the need for and cost of income support programs. Other resource specialists voiced concern over the heightened erosivity of the land available for cultivation in order to satisfy expanding export demand. The rate of depletion of underground aquifers and soil salinity problems would also be exacerbated by further expansion in production levels, especially in the absence of greater commitment to resource conservation needs.

These hearings raised a number of important questions regarding the costs and benefits of export promotion programs. It became obvious that a wide range of opinions exist regarding whether and how export policy should be integrated with conservation programs and income stabilization policies. I believe that better understanding of these policy options and their impacts is essential in order to realistically address future farm program needs.

The subcommittee explored agricultural trade transport issues in a hearing and markup of the International Perishable Foodstuffs Act in May 1982. Passage of this act was needed in order to permit the United States to sign an international treaty facilitating the movement of perishable commodities in sealed containers when transported across the borders of nations signing the treaty.

FOREIGN AGRICULTURAL DEVELOPMENT

During a period of severe economic strain in the U.S. farm sector, the subcommittee's appraisal of agricultural development needs in developing nations required a substantial shift in perspective and focus. In part because of the President's Caribbean Basin Initiative, the subcommittee focused on the impact of U.S. programs on agricultural development in the Caribbean and Central America. Hearings held jointly with the Inter-American Affairs Subcommittee of the Foreign Affairs Committee documented the several ways in which agricultural development in that region has paradoxically led to expanded opportunities for agricultural trade.

Many witnesses described the considerable political importance of agricultural development based on stable land reform programs in this region of the world. If opportunities for constructive employment in agriculture are not lost or not available in rural areas, demographic shifts toward urban centers take place. When major population shifts occur in relatively short periods, a nation's political, cultural, and economic stability can be severely undermined. The results of such instability are now apparent throughout the region. Experts appearing at the hearing generally agreed that an expanded commitment to agricultural development would greatly enhance the chances for these countries to recover a measure of political stability and economic hope.

In the next Congress, I hope to further investigate how U.S. agricultural research, technology transfer, and food assistance programs can be more effectively administered and coordinated in politically unstable developing regions of the world. Important economic, strategic, and humanitarian benefits could be realized if social strife like that experienced in El Salvador can be prevented through timely commitments to agricultural development.

AGRICULTURAL RESEARCH AND DATA ISSUES

Undertaking a detailed review of agricultural research and extension programs was one of the most important activities of the subcommittee during the 97th Congress. Three days of hearings were held in March 1981, to investigate a wide range of research issues prior to final consideration of title XIV of the farm bill.

Discussion generated during consideration of the research title touched upon all the major themes encountered and explored in more detail in several other hearings on related topics. The contribution of past breakthroughs in the agricultural sciences to the productivity of U.S. agriculture was frequently pointed to in explaining the potential benefits that could accrue to future advances. However, nearly all witnesses also voiced concerns that historic rates of technological innovation in agriculture would be hard, if not impossible, to sustain in the future without a major increase in the level of public funding devoted to research and development expenditures. A special need for an expanded long-term commitment to basic research in the plant and animal sciences and cell biology was expressed by a number of witnesses.

The subcommittee appraised in a June 2, 1981, hearing the natural resource data bases available to research scientists and policy analysts inside and outside government. With the cooperation of the USDA, an up-to-date inventory of data sources was compiled by the subcommittee. During the hearing, three major observations were repeatedly expressed. Most analysts familiar with USDA data sources felt that a better job could be done within the Department in sharing among different agencies data collected by a single agency. To be useful, witnesses felt that the various natural resource data bases needed be well documented and accessible on-line to other users for analytic manipulations.

A second theme encountered a number of times is that USDA agencies need to spend more effort in strategic data base planning exercises across agencies. The goal of such planning would be to agree on common definitions, nomenclatures, and formats whenever possible. Furthermore, many witnesses felt that data collected by one agency for a relatively narrow purpose could be made much more useful to other agency analysts at little or no additional cost.

A last comment made a number of times is that the USDA should take steps to accommodate requests from outside researchers for access to raw data for analytic projects. The steps needed to accomplish this task include advising the public of the nature and availability of data series and preparing accurate and useful documentation of the data elements on the tapes.

In response to this hearing and subsequent questions from the subcommittee on the Department's progress in providing for public access to the 1977 and 1982 national resources inventory data tapes, the Soil Conservation Service has agreed to prepare needed documentation and, upon request, to provide the data tapes to independent researchers.

The unique research and data needs associated with developing effective Federal policies for salinity control in the Colorado River Basin was the subject of a June 10, 1981, hearing. The Department of Agriculture described ongoing program efforts to control further salinization of both cropland and the Colorado River. Substantial uncertainty was expressed about the cost-effectiveness of alternative control technologies. The Department described the research program it has underway to resolve outstanding issues, and expressed the view that the Department's technical and financial commitment to the program is essential because of the national and international goals served by reduced salinity loads in the Colorado River.

The status of the Department's efforts in developing a national plant germplasm system was explored in a hearing on June 24, 1981. Testimony presented by the General Accounting Office documented certain problematic features of the germplasm system. Department witnesses responded to the GAO findings and recommendations, and outlined the steps taken and planned to improve program coordination and planning. The hearing documented the considerable progress made by the Department in establishing the germplasm system and undertaking institutional adjustments in the administration of the program.

Another small but important research activity assessing the impacts of air pollution on agricultural productivity was the topic of a hearing held on July 7, 1981, jointly with the House Science and Technology Subcommittee on Natural Resources, Agriculture Research, and Environment. Witnesses described ongoing research sponsored by the USDA, the Environmental Protection Agency, and other Federal agencies. The importance of the research in developing better quantitative models demonstrating the nature and magnitude of air pollution impacts on agriculture was stressed throughout the hearing. In light of pending amendments to the Clean Air Act and the administration's inclination toward the use of cost-benefit analysis in appraising alternative regulatory actions, further research on the agricultural effects of air pollution seems clearly justified.

AGRICULTURAL EXTENSION AND TECHNOLOGY TRANSFER TECHNIQUES

Information tailored to specific local conditions on agricultural technologies and production practices must be accessible to farmers if the benefits of public and private agricultural research and investments are to be fully realized. The subcommittee began a detailed oversight investigation of the Cooperative Extension Service to appraise the operative linkage between public agricultural research scientists and farmers. Three days of hearings were conducted on February 17, and March 9, and 10, 1982.

The hearings focused on a number of basic issues about the Extension Service's mission, funding formula, and usefulness. The issues were articulated in a background discussion paper distributed to witnesses in order to help focus the hearings. The testimony presented by extension employees effectively characterized the range of views held within the service. Other witnesses representing State and local governments discussed their opinions regarding the Federal role in guiding the Extension Service's priorities in light of the relative magnitude of the percentage contribution of the financial support for extension from the Federal, State, and local levels of government.

Considerable attention was also given to what some witnesses perceived to be regional and/or commodity specific inequities in the funding formula used to distribute Federal extension funds to States. Suggestions were offered for modifying the formula to weigh more heavily agricultural variables such as farm income and/or population in the formula funding equation.

The process through which extension priorities are developed was also discussed extensively. The value of the Extension Service as a conduit for information back to the basic researchers in universities regarding the research needs of famers was also explained. A further refinement and focusing of this oversight effort needs to be accomplished in the next Congress.

A 2-day subcommittee workshop on computer-based informatin system for agriculture was held to explore in more detail the types of systems which have already been successfully established. The meetings were held in May 1982, and attracted over 100 participants including representatives from computer companies in the private sector, farm groups, agribusiness firms considering computers as a means of information transfer, extension officials, and interested members of the public. The workshops included several demonstrations of specific capabilities of individual systems, as well as smaller group discussions on individual topics.

THE SUSTAINABILITY OF U.S. AGRICULTURE

During the course of several previous hearings, witnesses raised serious concerns about the adequacy of the Nation's natural resource base to support on a longrun basis current and projected levels of crop production. Three factors were repeatedly cited in explaining this concern. During the 1970's, over 60 million acres of additional cropland was brought into intensive crop production uses in order to satisfy expert demand. Use patterns essentially exhausted the supply of readily available, idle cropland held in reserve for over a decade. Comparable statements were made in reference to irrigation water supplies.

Witnesses also stated that the average productivity of the Nation's land and water resources was declining as a result of inadequate attention to conservation needs. Last, several scientists challenged the notion that future average increases in crop yields will match the record established over the last three decades. Rising energy prices and fewer major breakthroughs in agricultural technologies were the most frequently mentioned reasons for a more conservative posture on future crop yield advances. These issues have been explored in some detail in a recently released report by the Congressional Office of Technology Assessment.

Several elements needed to improve the longrun sustainability of U.S. agriculture were suggested to the subcommittee. The local importance of slowing down the rate of conversion of prime farmland to nonfarm uses was explored on April 16, 1982, in a field hearing in Ontario, Calif. Witnesses described the gradual elimination of the citrus and dairy industries in the region. A number of witnesses expressed the view that the area would be better prepared to deal economically with severely depressed conditions periodically encountered in local heavy industries if agriculture production had stabilized at a higher level.

Additional hearings on the USDA's soil and water conservation programs, Federal agricultural land protection efforts, and conservation research programs were held on April 22 and April 27, 1982. The testimony demonstrated that resource constraints facing U.S. agriculture were, at this time, manageable. However, sizable current environmental and economic costs appear to be associated with inefficient farm management systems. Several ways were explored to enhance the degree of cooperation between the Soil Conservation Service, the Agricultural Stabilization and Conservation Service, and Cooperative Extension.

On July 23, 1981, a hearing on groundwater quality and quantity issues focused on several specific cases when existing agricultural operations were encountering serious water-related constraints. A team of scientists from Kansas State University described the major findings and conclusions stemming from a 2-year research project on the economic consequences to agriculture from overdraft of groundwater from the Ogallala aquifer. Other witnesses described cases where groundwater has become seriously contaminated with pesticides used to control the Colorado potato beetle and other potato pests on sandy soils. A major assessment of water issues is underway at the Congressional Office of Technology Assessment and we anxiously await its findings, due next year.

This is, of course, only a part of the Subcommittee on Department Operations, Research, and Foreign Agriculture's activities over the last 2 years. The subcommittee also held a hearing on June 23, 1982, to discuss the national Science Council Act, of 1981, a bill to establish a science court for resolving scientific controversies. Scientists representing several Federal agencies, research institutions, and private organizations discusssed the concept of a science court and alternative ways to handle scientific uncertainty in regulatory decisionmaking. With issues such as the food safety law rewrite effort sure to come up in the next Congress, a further examination of these risk-benefit issues needs to be undertaken.

The major legislative effort of the subcommittee during the 97th Congress was a bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The subcommittee spent 10 days of meetings on this bill, including one field hearing, and devoted many days of drafting and negotiations to the process. The resulting bill has passed the House and is pending in the Senate, where I hope we can come to some resolution this year. The subcommittee has an ongoing investigation of the pesticide registration

system at the Environmental Protection Agency which should be completed soon.

I would like to thank my colleagues on the subcommittee especially Mr. DE LA GARZA, the full committee chairman, and Mr. WAMPLER, the ranking minority member, for their support over the last 2 years. American agriculture is faced with some difficult times and there will be no quick and easy solutions to our problems. Only by taking a long, hard look at all of the factors involved can we fashion workable programs. The subcommittee has done its part to begin such a lengthy examination and it will continue to play a central role in the next Congress in issues of importance to agriculture.

A TRIBUTE TO MILLICENT FENWICK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LAGOMARSINO) is recognized for 5 minutes.

● Mr. LAGOMARSINO. Mr. Speaker, I rise to pay tribute to my dear friend and colleague on the Foreign Affairs Committee, MILLICENT FENWICK.

Anyone who knows MILLICENT knows she represents the fighting spirit of one who champions the cause of the underdog, the downtrodden and the disadvantaged. She is respected on the Foreign Affairs Committee and in this House because she is not afraid to speak her mind, to question or to challenge authorities or institutions.

MILLICENT's devotion to duty and to serving the people of her district are well recognized. She is conscientious in attending to all the varied functions of being a Member of Congress, and faithfully attends the meetings of her subcommittees and committees, asking probing questions and offering thoughtful comments and observations on the issues coming before us.

MILLICENT's personal style, her charm and grace have been a distinct asset for the Foreign Affairs Committee, particularly in our meetings with representatives of other countries, where she often carries on conversations fluently in the language of our foreign guests. Her presence will be sorely missed in the next Congress, and I can only hope this administration will have the presence of mind to use MILLICENT's talents in some appropriate way as a diplomatic representative of this country.

In whatever endeavor she undertakes, I know she will offer the same gracious style that marks her presence in the Congress. I am most pleased to join my colleagues in wishing MILLICENT a most successful and fulfilling future, a future I am sure that will be as rewarding as the past.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. LUKEN of Ohio (at the request of Mr. WRIGHT), after 3:30 p.m. on December 17 through December 19, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BEREUTER) to revise and extend their remarks and include extraneous material:)

Mr. FRENZEL, for 60 minutes, today.

Mr. LOTT, for 30 minutes, today.

Mr. PHILIP M. CRANE, for 15 minutes, today.

(The following Members (at the request of Mr. RALPH M. HALL) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 60 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. BROWN of California, for 5 minutes, today.

Mr. DORNAN of California, for 60 minutes, on December 19.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. BEREUTER) and to include extraneous matter:)

Mr. PETRI.

Mr. SHUMWAY.

Mr. GILMAN.

Mr. BROYHILL.

Mr. OXLEY.

Mr. PARRIS.

(The following Members (at the request of Mr. RALPH M. HALL) and to include extraneous matter:)

Mr. FORD of Tennessee.

Mr. AKAKA.

Mr. DINGELL.

Mr. MCDONALD.

Mr. ROE in two instances.

Mr. PHILLIP BURTON in 12 instances.

Mr. STARK in two instances.

Mr. LONG of Maryland.

Mr. PEPPER.

Mr. PICKLE in five instances.

SENATE BILLS AND CONCURRENT RESOLUTION REFERRED

Bills and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 2941. An act to authorize funds for the National Oceanic and Atmospheric Administration for fiscal year 1983 to carry out the provisions of the National Ocean Pollution Planning Act of 1978; to the Committee on Merchant Marine and Fisheries.

S. 3048. An act to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm; to the Committee on the Judiciary.

S. 3113. An act to make minor and technical amendments to the Job Training Partnership Act; to the Committee on Education and Labor.

S. 3114. An act to amend the act of March 3, 1869, incorporating the Masonic Mutual Relief Association of the District of Columbia, now known as Acacia Mutual Life Insurance Co., and acts amendatory thereto; to the Committee on the Judiciary.

S. Con. Res. 136. Concurrent resolution providing for printing a report by the Joint Committee on Taxation; to the Committee on House Administration.

ADJOURNMENT

Mr. BROWN of California. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 35 minutes p.m.) under its previous order, the House adjourned until Sunday, December 19, 1982, at 4 p.m.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII,

Mr. PETRI introduced a bill (H.R. 7448) to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 to improve retirement income security under private multiemployer pension plans and encourage employer participation in these plans by modifying the rules respecting funding, premium rates, asset sales, dispute resolution, and employer withdrawal liability, and for other purposes; which was referred, jointly, to the Committees on Education and Labor and Ways and Means.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 7359: Mr. WASHINGTON.

H. Con. Res. 425: Mr. LEVITAS.

SENATE—*Saturday, December 18, 1982*

(Legislative day of Tuesday, November 30, 1982)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the Honorable DAVID DURENBERGER, a Senator from the State of Minnesota.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Father in Heaven, as the confusion, tension, and frustration of the past 2 weeks come to a close, we pray that our families will have priority in our interests and schedules. Help the Senators and all who labor here, to unwind gracefully that these next 2 weeks will provide relaxation, rest, and renewal. As the responsibilities of legislation are put aside for a season, may families find new life together. May strained relationships be healed and strengthened and deepened. "May the hearts of fathers be turned to their children and the hearts of children to their fathers." (Malachi 4: 6).

Above all dear God, crown our family times with fresh assurance of God's love and the eternal significance for each of us of the birth of His Son whose name will be called, "Wonderful Counsellor, Mighty God, ehe Everlasting Father, the Prince of Peace." (Isaiah 9: 6). In the Saviour's name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., December 18, 1982.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable DAVID DURENBERGER, a Senator from the State of Minnesota, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. DURENBERGER thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SENATE SCHEDULE

Mr. BAKER. Mr. President, when the distinguished chairman of the Appropriations Committee reaches the floor, I will confer with him and with the minority leader and try to make an announcement about the schedule of the Senate this weekend.

I talked to him on the phone this morning, as I did with the Speaker of the House. I had thought when we finished last night that it might be possible to finish the continuing resolution by midafternoon and get to conference today on the continuing resolution.

I think that is now doubtful. It would look as if we are going to be on the continuing resolution most of the day if Senators offer all of the amendments that are on the list. So I guess, Mr. President, that it looks as if we will be in session today all day. I will try to devise a sensible and sane schedule for the Senate over the weekend, but almost surely there will be a requirement for either a session of the Senate on Sunday or at least for conferees to be in session on Sunday to try to finish the continuing resolution, bearing in mind, of course, that the present continuing resolution expired last night at midnight.

Mr. President, that almost certainly means that we will have to be in session Monday in order to finish the continuing resolution conference report.

I hate to make announcements of that consequence without great particulatory, but Senators should be aware of that growing probability, and I will have a further announcement to make in the course of the day.

TO UNWIND GRACEFULLY

Mr. BAkER. Mr. President, I have to say, parenthetically, that as I listened to the very excellent prayer of the Chaplain this morning, that portion he included saying that he hoped we could unwind gracefully struck me particularly. I must confess that the night before last, and last night, not only was I not able to go to sleep very easily but when I got up this morning I wound up grumpily instead of very gracefully. But once again I commend him on a very excellent prayer.

Now, Mr. President, I have no need or wish to use the remainder of my time under the standing order, and I am prepared to yield it back or to yield it to the minority leader if he wishes.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader.

Mr. ROBERT C. BYRD. Mr. President, I yield 3 minutes or as much time as he wishes to Mr. PROXMIRE.

Mr. PROXMIRE. I thank the distinguished leader.

A REMARKABLE MAN—THE SENATE CHAPLAIN

Mr. PROXMIRE. Mr. President, I would like to add to what the distinguished majority leader said about the Chaplain. He is a remarkable man. I noticed that in the New York Times this morning the quotation of the day was from the prayer yesterday which the Chaplain delivered to us. The majority leader is absolutely right. The Chaplain is so helpful in reminding us of where our real obligations should lie: to our families. He brings such a marvelous human touch into our deliberations. I join the majority leader in expressing our gratitude to him.

THE MANHATTAN PROJECT AND ITS LEGACY

Mr. PROXMIRE. Mr. President, on October 17, 1982, the Boston Globe published a special section entitled "War and Peace in the Nuclear Age." One article in this section, "Hiroshima Plus 37," by John Powers, concerns the Manhattan Project, which gave birth to the atomic bomb.

The scientists who gathered at Los Alamos from 1942 to 1945 were searching for a way to unleash the energy contained in mass in the form of an atomic bomb. Political considerations were uppermost in their efforts; they were commissioned to develop a weapon powerful enough to stop the Japanese and decisively end World War II.

When the A-bomb was finally ready for testing, the Manhattan Project scientists were still not sure how powerful the bomb would be. George Kistiakowsky, the head of the explosives division, predicted the blast would equal 1 kiloton of TNT. In fact, the bomb released energy equivalent to 20 kilotons of TNT. Clearly, then, the scientists had no inkling as to the dimensions of the technological Pygmalion they created.

When Robert Oppenheimer, head of the project, saw the test bomb rise in smoke, he murmured a quote from the Bhagavad Gita: "I am become death, destroyer of worlds," words that may be more prophetic than we would like to believe.

The bomb was dropped on Hiroshima shortly thereafter on a quiet summer morning on August 6, 1945. According to the authors of "Hiroshima and Nagasaki," "it is no exaggeration to say that the whole city was ruined instantaneously." Some 130,000 people died as a result of the explosion, and the center of the city was completly flattened. Black rain descended upon Hiroshima throughout that horrible day, and then a firestorm ravaged the remains for 6 hours.

The American public was largely unaware of the apocalyptic power of the A-bomb until the New York Times published an eyewitness account of the Hiroshima horror in 1946. I quote one excerpt, which gives some insight into the human pain suffered there:

(I saw) about twenty men . . . all in exactly the same nightmarish state: their faces were wholly burned, their eyesockets were hollow, the fluid from their melted cheeks had run down their cheeks.

Mr. President, that bomb was primitive by our present standards; today it would be classified as a tactical weapon. Moreover, the number of atomic weapons has grown so exponentially in the last 37 years that all the nuclear armaments in the world would create a bang over 1 million times bigger than the Hiroshima bomb.

Yet that first bomb, small though it was in relative terms, was perhaps more significant than any of those built thereafter. Why? Because it marked the dawning of an entirely new—and precarious—age in human history. With the birth of nuclear weapons, we are forced to reexamine and reshape our basic assumptions about two fundamental human activities: politics and war. A political advance must accompany the technological one, for violence may never be used again in major territorial conflicts without fear of a nuclear holocaust. As Jonathan Schell, author of "The Fate of the Earth" observed, we cannot afford to apply Newtonian politics in an Einsteinian world.

So the Manhattan project ushered in a new era of human history, and will unquestionably have a lasting impact on mankind. Its end product, the horror of Hiroshima, may serve as sufficient warning to mankind that the use of nuclear weapons can never be contemplated again. In that case, the world would undergo nothing less than a political transformation; conflicts between major powers would be resolved through nonviolence and diplomacy. We would follow in the footsteps of Gandhi, rather than Hitler.

The other path is blacker. The Hiroshima bomb may have unleashed a mad momentum of arms building that will not cease until they are used. Whether the legacy of the Manhattan project will be a political transformation or mankind's suicide is not yet clear. Let us do our utmost to insure the former.

THE HOLOCAUST: ART MUST NEVER UNDERMINE REALITY

Mr. PROXMIRE. Mr. President, last week I noted there has been a tremendous outpouring of artistic response to the Holocaust. Scores of books, films, and plays concern the human tragedies associated with the event. This is completely natural, for all great human dramas are eventually transformed into art. It is also valuable, because many gain greater understanding of important events through art.

But art regarding the Holocaust also has a dangerous tendency to trivialize or romanticize the past. Many critics question whether it is right to fictionalize such a ghastly chapter in human history. They point out that many Holocaust artists treat the Holocaust as a metaphor for evil, instead of a concrete historical fact. The late critic, T. W. Adorno, wrote that Holocaust art is "transfigured and stripped of some of its horror and with this, injustice is already done to the victims."

Mr. President, I recognize the role of art in society, but I also believe we can never forget the fact that 6 million people were victims of genocide only 40 years ago. For that reason, the Holocaust must not be allowed to become a blurry shadow in the background of love stories. It is so much more than that, Mr. President. It was the greatest evil committed in this century, and a lesson to us that the potential for genocide exists even in advanced societies. While the Holocaust is suitable for artistic purposes, it should also have a major impact on other areas of human endeavor: history, philosophy, and politics.

As any Auschwitz survivor can tell you, Mr. President, genocide is a gruesome, not a glamorous, experience. The people that live on to tell stories about it are the outstanding exceptions, not the rule. Most victims were brutally herded into trains, concentration camps, and finally, gas chambers. This is the reality that art must never undermine.

This reality must also inspire postwar generations to take a strong stand together against future genocides. We can do this by making genocide a crime under international law. I therefore urge the Senate to ratify the Genocide Convention without delay.

I thank the distinguished minority leader for so generously yielding the time.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

FURTHER CONTINUING APPROPRIATIONS, 1983

The ACTING PRESIDENT pro tempore. The clerk will report the pending business.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes.

The Senate resumed the consideration of the bill.

Mr. HATFIELD. Mr. President, I believe there is a 5-minute time agreement, is that correct?

The ACTING PRESIDENT pro tempore. When the amendment is called up, there will be 5 minutes on the amendment.

Mr. METZENBAUM. With the usual resrtictions?

Mr. HATFIELD. All of these have had everything put in the agreement initially.

Mr. METZENBAUM. I thank the Senator.

UP AMENDMENT NO. 1538

(Purpose: Making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes)

Mr. DANFORTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH), for himself, Mr. EAGLETON, Mr. DOLE, Mr. MELCHER, Mr. COHEN, Mr. MITCHELL, and Mr. KENNEDY, proposes an unprinted amendment numbered 1538.

At the end of the bill insert the following new section:

SEC. . Notwithstanding anything else on the bill, there is appropriated $200,000,000 for carrying out title XXVI of the Omnibus Budget Reconciliation Act of 1981, relating to low-income home energy assistance, which is in addition to amounts otherwise available for such title XXVI under this joint resolution.

Mr. DANFORTH. Mr. President, this amendment is offered by myself and Senators EAGLETON, DOLE, MELCHER, COHEN, MITCHELL, and KENNEDY. It increases the appropriation for low-income energy assistance by $200 million.

Yesterday the Senate agreed to an amendment by Senator CHAFEE increasing the low-income energy assist-

ance program by $25 million, but that amendment did no more than bring the program to last year's level.

Also yesterday the Senate agreed to a Warner amendment, which would make $200 million available to users of fuel oil. However, more than half of the homes in the United States do not use fuel oil, they use natural gas.

Since 1980, natural gas prices increased 70 percent. The low-income energy assistance program has increased only 15.6 percent. Because of the recession and the rapid rise of natural gas prices, the current funding level is clearly inadequate.

Mr. DOLE. Mr. President, I am pleased to join my distinguished colleagues from Missouri, in support of this amendment to increase funding under the countinuing resolution for the low-income energy assistance program. The amendment would appropriate an additional $200 million above the level currently in the bill, the same level we funded last year.

Unfortunately, Mr. President, that level—substantial as it seems—is simply inadequate. Those of us who represent Midwestern States understand that rapidly rising natural gas prices have diminished the effectiveness of the low-income energy assistance program. Nationwide, $1.875 billion is worth 35 percent less this year than last; if you want to buy natural gas. These rapid and often unexpected price increases have become an intolerable burden on many households, particularly low-income families and the unemployed.

This is not a problem that is exclusive to the poorest parts of the poorest communities. It is a widespread, nationwide problem. To illustrate my point, Mr. President, I ask unanimous consent that a letter I received last October form Mr. Ed Eilert, mayor of Overland Park, Kans., be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OVERLAND PARK,
October 14, 1982.

Hon. BOB DOLE,
U.S. Senate, Dirksen Office Building, Washington, D.C.

DEAR BOB: I would like to thank you for taking the time yesterday to discuss the natural gas pricing situation. As you know, I feel this is becoming a very critical issue, and we on the Council have had a lot of constituent input on the problem.

Subsequent to becoming involved in natural gas pricing matters last spring, it seems to me that the issue/problem is an ideal area for federal-local cooperative efforts. (This is on my assumption that the price of natural gas and its effect on consumers is a very serious economic issue.)

During the winter of 1982, low- and moderate-income families in Overland Park received approximately $54,000 in utility assistance programs. Of these monies, $47,000 was from the Low-Income Energy Assistance Program, a federally-funded program administered by the state and county. My source on this information is the United Community Services, and the attachment details that data.

At the present time, approximately 175 households in Overland Park are without gas service because of turnoffs due to nonpayment, and approximately 45 households have been cut off from Kansas City Power & Light electric service. According to the best information available, it will take approximately $40,000 to bring those delinquent bills current and get service turned on for those households.

Again according to best estimates available, the price for natural gas for the coming winter is going to increase somewhere between 36 and 45 percent over the preceding year. Here in Overland Park, then, we have a substantial problem for those low- and moderate-income homes needing heat and light for the forthcoming winter.

The City Council's Community Development Committee is considering a number of options to increase utility assistance for eligible families. I have directed the Overland Park staff to prepare contingency plans that would incorporate a communitywide private contribution effort, with the dollars raised in that effort to be possibly matched by the City of Overland Park. We will continue to explore all the possibilities at the local level.

For the near-term situation, the LIEAP federally-funded program is critical for Overland Park. We have received mixed signals as to whether Congress will continue the LIEAP program during the forthcoming lame duck session. I would ask that you lend your support to renewed funding of LIEAP.

At the time the so-called "windfall profits" tax was adopted, it was my understanding that there was discussion of a partial allocation of these funds for utility assistance. To the best of my knowledge, Congress has never authorized these additional funds. Is there any realism to securing a Congressional appropriation for utility assistance from a portion of the proceeds of the windfall profits tax?

According to news releases from the FERC and market information locally, there seems to be a significant oversupply of natural gas in some areas, yet prices for the product are increasing. It seems unusual that with a surplus of gas, the market price continues to increase. These price increases are a probable reflection of industry practices which include indefinite price escalator contract clauses.

In summary, I have outlined some possibilities for local-federal cooperation to address the near-term problem. For the long term, the answers to the economic problems associated with natural gas price increases rest with the Congress. Congress needs to readdress the Natural Gas Policy Act of 1978 and the noncompetitive pricing system which has developed in this industry.

My feeling is that Congress should take interim steps to status quo the price of natural gas and prevent additional price increases until such time as the NGPA can receive the attention of Congress. The FERC should also status quo price increases and receive a clear signal as to the legislative intent of Congress.

Bob, thanks again for taking the time to discuss this topic with me, and I would like to ask your support of the above proposals.

Sincerely,

ED EILERT, *Mayor.*

Mr. DOLE. Mr. President, Overland Park is not a poor community. It is a suburb of Kansas City in one of the 15 richest counties in the country. Nevertheless, with winter fast approaching 220 families were without heat and the city estimates it will take $40,000 just to have the heat turned on—much less pay this year's 42 percent higher bills.

Mr. President, the boxes of mail on natural gas speak to the gravity of this problem and I know my situation is not unique. Across the country, people are frightened at the prospect of losing their heat this winter. Consequently, many of us have been looking for solutions for months, and several of my colleagues have introduced legislation to freeze wellhead natural gas prices or abrogate take or pay contracts between producers and gas pipelines.

I commend the efforts of my colleagues to address a serious problem before the winter begins. Unfortunately, it is my belief that those proposals, however well thought and well meaning, would not lower prices or provide significant relief to those most in need in the coming months. I could not support those proposals. I believe it is crucial that we not fool ourselves into thinking we are helping the consumer, when in truth we are not.

There is only one way to help those most severely harmed by cold weather and fuel prices beyond their budget. We can help the poor who are unable to afford high cost gas by increasing the funding for the low-income nergy assistance program, and we can help them this winter.

As my colleagues know, earlier today the Senate approved an amendment offered by the distinguished Senator from Virginia, Mr. WARNER, to provide $200 million to the States from the oil pricing overcharge account for use in the low-income energy assistance program. Some may think that is enough. Let me assure you—it is not. Estimates of the amount needed to adequately fund the low-income energy assistance program run as high as $5 billion. If we adopt the Danforth amendment in addition to the Warner amendment we will reach a funding level of only $2.275 billion, less than half the estimated need.

Mr. President, the Senator from Kansas realizes that there are many good and worthwhile programs funded at far below optimum levels. But we are talking about survival here. If we are really serious about easing human suffering in the face of significant and unjustifiable increases in costs, Congress should make every effort to increase funding for the only program which will help consumers this winter. I encourage my colleagues to support this amendment.

Mr. EAGLETON. Will the Senator yield me 30 seconds?

Mr. DANFORTH. Yes.

Mr. EAGLETON. Mr. President, I am pleased to join with Senator DANFORTH as a principal cosponsor of this amendment to increase funding for the low-income home energy assistance program.

Tuesday evening this body rejected two amendments which would have done something about the scandalously high prices of natural gas. A majority of Senators told the Nation's gas consumers that they are going to have to continue to pay outrageous prices to make up for foolhardy business decisions on the part of pipeline companies.

Now that it is assured that the Senate does not intend to take action to stall the spiraling prices, at the very least, let us do something to lessen the plight low-income energy consumers are facing this winter.

Mr. President, since 1978, the average electricity bill has increased by 65 percent; the average natural gas bill has increased by 104 percent; and the average heating oil bill has risen by a staggering 140 percent. This growing percentage of household income which must go for energy bills is placing a burden on many families, but has literally become a nightmare for the poor.

In 1978-79, the average direct residential energy expenditure by a poor household was 10.9 percent of disposable income. By 1980-81, this had risen to 13 percent. And, under current policies, estimates based on Energy Information Administration data indicate that this percentage will rise to 15 percent.

Yet, the amount of low-income energy assistance contained in the continuing resolution before us is $25 million less than the amount available last year, an amount which, in constant dollars, is a decrease of 10.9 percent from the amount available in fiscal year 1981.

By every analysis I have seen, the current appropriation is woefully inadequate.

For example, a staff study prepared for the Subcommittee on Investment, Jobs and Prices of the Joint Economic Committee in February 1982, entitled "Oil Price Decontrol and the Poor, A Social Policy Failure," estimated that the loss in purchasing power of low-income Americans due to domestic oil decontrol was $9.1 billion, and the loss due to higher oil import costs was $5.6 billion. Totaled, oil price increases took $14.7 billion in purchasing power from the poor during the 1979-81 period. By contrast, Federal aid to the poor families to offset soaring energy prices through the energy assistance program totaled $3.6 billion for the same period. In short, the report estimates that the loss in purchasing power to the poor not offset by energy assistance programs reached $11.1 billion. That is a whopping 76 percent loss in purchasing power by the poor.

Another analysis of the problem, by the Committee for Economic Development, an independent research and educational organization of 200 business executives and educators, puts it this way:

* * * Our study has convinced us that no matter what old or new programs are used to deliver the resources, additional compensation ought to be channeled to the poor annually in order to cushion them against the loss of some $3 to $7 billion of purchasing power because of the energy price increases over the past decade.

The report goes on to say:

* * * A clear message emerges from the available data: Because the poor must spend a greater portion of their income to purchase energy, an energy price increase will affect them more than it does a family with a more average income. Welfare benefits must be redesigned to take these relatively larger energy consumption costs into account (at present, they do not). Until this is accomplished, assistance programs that do no more than keep up with averages reflected in the Consumer Price Index (CPI) * * *

Which I would add, we are not doing when we cut $25 million, "* * * will mean that the poor get poorer."

A further recent study by the National Council of Senior Citizens concluded that 70 percent of the Nation's low-income elderly households paid more than 23.7 percent of their income to pay energy bills during winter months. That expenditure is nearly four times the average 6 percent of income spent for energy by all households in the country. The NCSC study also pointed out that in 12 States, energy bills during the coldest months of winter equal or exceed the maximum supplemental security income payment to low-income elderly in those 12 States.

Sure, under the appropriation of $1.875 billion, 7 million American households were helped with their fuel bills last year. But that number represents only 36 percent of the number of households eligible for assistance.

Sure, almost $2 billion is a lot of money, but the average payment of $213 to each household is less than 20 percent of the average energy costs per year for those low-income households.

In fact, under the current appropriation, if 75 percent of the 20 million households currently estimated by the Department of Health and Human Services to be eligible for the program were actually served, each household would receive an average of $86 and $86 does not go very far when you are staring $1,000 worth of utility bills in the face.

This amendment raises the appropriation for low-income home energy assistance from $1.875 billion to $2.075 billion, a figure far short of the estimates of real need. But it does take a step in the direction of basic human decency and fairness to the poor to cushion the impact of the burden they disproportionately bear. Further, Mr. President, I should add that yesterday the Senate adopted the Warner amendment which added $200 million to assist needy people in the payment of their energy bills under a somewhat different formula. Thus, if you add up the $1.875 billion already in this bill, plus the Warner $200 million, plus this Danforth-Eagleton $200 million, the total appropriated funds to assist needy people in the payment of their fuel bills would come to the total of $2.275 billion.

So, Mr. President, I join my colleague from Missouri, and others, in urging adoption of this amendment. The Federal Government has made conscious decisions to deregulate oil prices and to deregulate natural gas prices. Hand in glove with those decisions is a political, a social, and a moral obligation to do something to help those people who are literally endangered by those Federal decisions.

Finally, Mr. President, I should point out that the other night the Senate passed Senate Resolution 515, which appears at page 30799 of the CONGRESSIONAL RECORD. The Senate, the overwhelming, lopsided vote of 90 to 3, voted in favor of maximum and immediate assistance to needy individuals to assist in the payment of their rapidly escalating utility bills.

Mr. President, I ask unanimous consent that Senate Resolution 515 be printed in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

S. RES. 515

Whereas, residential and commercial consumers of natural gas in some parts of the country are facing rapidly increasing gas prices;

Whereas, natural gas prices have increased to the extent that many consumers are unable to pay their monthly gas bills:

Whereas, natural gas prices are increasing at a time of reduced demand and ample short-term supplies of deliverable gas; and

Whereas, average natural gas prices are not adequately responding to these changed market conditions and are imposing financial hardships on this Nation's natural gas consumers: Now, therefore be it

Resolved, That it is the sense of the Senate that the Federal Energy Regulatory Commission should utilize its statutory authority to proceed immediately to review those administrative actions, in view of the current escalation of natural gas prices, that could result in the modification of certain standard provisions in pipeline-producer gas purchase contracts, such as take-or-pay, indefinite price escalator, and most-favored-nation clauses; and *be it further*

Resolved, That it is the sense of the Senate that natural gas pipeline companies and natural gas producing companies should jointly and immediately initiate efforts to renegotiate immediately the provisions of their gas purchase contracts relating to volumes and prices of gas, particularly, take-or-

pay, indefinite price escalator, and most-favored-nation clauses, in order to conform such provisions to changing conditions in the natural gas market and thereby reduce the rapid escalation of natural gas prices; and *be it further*

Resolved, That it is the sense of the Senate that available appropriations for direct financial assistance should immediately be provided on an expedited basis, to low income consumers of natural gas pursuant to the low-income energy assistance program established by title XXVI of the Low-Income Home Energy Assistance Act of 1981.

Mr. MELCHER. Will the Senator yield?

Mr. DANFORTH. Yes.

Mr. MELCHER. I thank the Senator.

The amendment I am cosponsoring today will increase the amount appropriated for low income energy assistance under the 1983 continuing resolution from $1,875,000,000 to $2,075,000,000.

Last year's continuing resolution provided $1,875,000,000 for low income energy assistance. This proved to be barely adequate. Less than 10 percent, $165 million, of these funds remained available at the end of the fiscal year.

The House of Representatives approved only $1,850,000,000 for the fiscal year 1983 low income energy assistance program—$25 million less than last year. The Senate Appropriations Committee has recommended retaining the same figure as in 1982.

Clearly, as things now stand, the amount to be appropriated in the continuing resolution is inadequate to meet the needs of the poor and the elderly this winter.

Here are some of the facts:

First. Nationally, the cost of natural gas to residential customers has increased from an average of $4.56 per mcf for 1981 to an average of $5.26 mcf for 1982. This is an increase in heating bills for those using natural gas of 15.4 percent.

Second. In many cities around the country the cost of natural gas for home heating is even higher: New York—$7.70/mcf; Philadelphia—$7.38/mcf; Baltimore—$6.70/mcf; Boston—$8.02/mcf; Denver—$6.35/mcf; Milwaukee—$5.95/mcf; and Seattle—$6.84/mcf.

The average for different areas of the country in October 1982 are: Northeast—$7.11/mcf; North Central—$5.28/mcf; South—$6.05/mcf; West—$5.98/mcf.

Third. The average cost of electricity to residential users has gone up 13 percent from 1981 to 1982.

But this is only part of the equation. Added to the increased cost of natural gas for home heating is the additional load on the low income energy assistance program caused by the increased unemployment and part-time unemployment as a result of the recession.

In October 1981 there were 8.7 million persons unemployed in the country. November of this year there were 12 million unemployed. That is an increase of 3.3 million unemployed persons. Business weeklies have estimated that there has been another 2 to 3 million workers who have been reduced to part time.

The 14- to 15-percent increase in natural gas heating costs means we will need to appropriate at least $200 million more in low income energy assistance for 1983 to meet the increases in heating costs. That leaves little or none to provide assistance to the 3.3 million people who have lost their jobs over the last year.

The situation in Montana is as follows according to our Human Services officials:

The average assistance in 1981 was $600 per household. It will take careful management to spread this assistance even with the adoption of this additional $200 million.

In spite of tightened eligibility, if the present crush of applications in Montana continues, the State will be out of money in midwinter. Energy assistance payments have been granted to about 17,000 households the past 2 years. Already this year, there are 17,000 participating and new applications continue to inundate the State office. Best case projections are that the total caseload will reach 23,000. Worst case projections is 30,000 by the end of April. Without additional help extreme hardship will result. Without additional help survival and health problems will result.

These projections are likely because the huge increase in applications is attributed almost entirely to the depressed economy with high unemployment. Unemployment is not dropping and as more and more people, particularly seasonal workers, run out of benefits, more will be applying for help with utility bills.

If Montana receives an allocation at last year's appropriation level, the amount will be $11.1 million. This was adequate for 17,000 households, with tightened eligibility. If the worst case projection of 30,000 households in need is reached, the cost will be $15.76 million or $4.7 million more than the State will receive at the 1982 level. What does this mean? Late applications being necessarily denied help even if desperately needed? Or the program running out of money in the middle of a severe winter that started early?

There is only one answer—more funds are absolutely essential. This amendment of a $200 million increase must be passed.

This amendment is an absolute must. The fuel assistance funds are very likely to run out before the winter is over. If there is not enough money available immediately in the pipeline to assure that the States can make the proper distribution, there are going to be a lot of people suffering during a very cold winter, and the needs are much greater due to high unemployment and due to the increase in natural gas prices and other fuel costs.

Mr. President, I hope the Senate can adopt this amendment and adopt it overwhelmingly very quickly.

Mr. DANFORTH. Mr. President, I ask unanimous consent that Senator RANDOLPH be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Will the Senator add my name as a cosponsor?

Mr. DANFORTH. Mr. President, I ask unanimous consent that the Senator from Ohio (Mr. METZENBAUM) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it so ordered.

Mr. PROXMIRE. Mr. President, all of us who live in Northern States—certainly in my State—recognize the importance of this program. On the other hand, I think we should all be fully aware of the cost. As I understand it, it is a $200 million add-on. It is not peanuts. It is by far the biggest amendment—and the chairman can correct me if I am wrong—that I think has been added on the floor.

As I say, it is for a very important program, very important in my State. It does go to poor people that otherwise would suffer serious health damage, as well as great pain.

Mr. DANFORTH. I would only respond to the Senator that this program has been frozen in the amount now for 2 years. Over the last year, in Kansas City, Mo., for example, there has been a 35-percent increase in claims on this program.

Mr. PROXMIRE. Last year, at least in my State, the State found it had more money than they could effectively dispense with. Maybe that was because it was a relatively mild winter.

But it seems to me that we should be assured that this is absolutely essential and without it there would be very serious hardships for millions of people. Is that the view of the Senator from Missouri? Has that been well documented?

Mr. DANFORTH. Yes, that is the view of the Senator from Missouri. There has been a very dramatic increase in claims in this fund. It is true, and I think it is typical on this kind of program, that there is a holdover by the States in block grant money at the very end of the year. The reason for that is they do not want to be absolutely dry at any given time. But I also think that it is clear that, given the rapid increase in energy cost, there can only be an increase in demand, and particularly in view of the recession.

Mr. PROXMIRE. Has there been that much increase in the last year?

Mr. DANFORTH. Yes. In the last year, there has been a 25-percent increase in the natural gas prices.

Mr. PROXMIRE. How about the cost of other fuels?

Mr. DANFORTH. I have a figure since 1980. Since 1980, this program has increased 15.6 percent. On the other hand, heating oil prices have gone up 28 percent; electricity prices, 54 percent; and natural gas prices, 70 percent.

Mr. PROXMIRE. I understand the carryover last year was $165 million. This amendment would put the program $200 million over the current level; is that right?

Mr. DANFORTH. That is correct. As I say, I think the reason for the holdover is that it is typical of this kind of a program.

Mr. DOMENICI. Will the Senator yield?

Mr. DANFORTH. Mr. President, how much time does the Senator have remaining?

The ACTING PRESIDENT pro tempore. The Senator has 30 seconds.

Mr. DOMENICI. Is there other time available on the amendment?

The ACTING PRESIDENT pro tempore. There were only 5 minutes equally divided.

Mr. DENTON. Mr. President, I appreciate the remarks——

Mr. HATFIELD. Mr. President, I ask unanimous consent that 3 additional minutes be allocated to this amendment to be controlled by the Senator from Alabama.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DENTON. I reserve the right to object, I am asking a question about the proposal. I understand there was a 5-minute unanimous-consent agreement, I have not had notice yet about the time——

Mr. HATFIELD. Originally there were 2½ minutes to a side. Now we have it so that the Senator will have 3.

Mr. DENTON. I thank the Senator.

Mr. President, I appreciate the sincerity and the compassion and perhaps reality involved in the proposal. If there is a need, I would not stand in the way, like Scrooge, in seeing it fulfilled.

Of course, those needy or elderly citizens who cannot afford enough heat to stay warm in the winter must be helped. However, as chairman of the Subcommittee on Aging, Family and Human Services, which has authorizing responsibility for the low-income home energy assistance program, I must ask Senators to consider a few pertinent facts before we consider raising the appropriation from its present level of $1.875 billion to $2.075 billion, which is $200 million above the authorization ceiling. Just yesterday we raised the appropriation $25 million.

The Department of Health and Human Services informs me that over $250,000,000 of the funds available in fiscal year 1982 for energy assistance to low-income persons was not used by the States for that purpose.

Many States, including some cold-weather States, transferred a total of almost $100,000,000 from the energy block grant to the community services block grant, the maternal and child health block grant, the social services block grant, or the alcohol and drug abuse block grant. It may interest the Senator from Missouri to know that last year his State transferred $4 million out of the low-income home energy assistance block grant to another block grant.

Not one State transferred any money from one of the other block grants into the low-income home energy assistance block grant to address a critical situation.

Other interesting data indicate that some States, again including some cold-weather States, carried over substantial portions of their fiscal year 1982 allotments into fiscal year 1983. The total carryover for the program was over $170 million. Although an argument can be made for carrying over a small portion of the allotment to insure that the program gets off to a flying start at the very beginning of the following fiscal year, carryovers of 15 to 25 percent seem excessive.

Mr. President, the $250,000,000 either transferred or deferred could have been used to provide needed assistance to a great many low-income recipients if that need had existed. The prerequisite to hastening to authorize a dramatic increase in program funds should be that funds provided were used and were in short supply. That does not appear to be the case here.

Furthermore, a most obvious and ominous fact that argues against raising the authorization by a full one-third over the current level is the $150 to $200 billion budget deficit now projected by economists both inside and outside the Government.

The subcommittee I chair will carefully monitor the use of the block grant funds during the coming months. Perhaps after careful analysis of the data, we will conclude that an increase is justified, but I strongly believe that it is ill-advised to rush this measure through during the lameduck session of the Congress.

Mr. President, the amendment offered by the distinguished Senator from Missouri increases appropriations for low-income energy assistance by $200 million above the amount authorized under section 2602(b) of Public Law 97-35 and a full $775 million above the President's request.

I urge my colleagues to reject the amendment.

I yield my remaining time to the Senator from New Mexico.

Mr. DOMENICI. I want to say to the Senator from Alabama that I do not think there is any chance that the Senate will deny the efforts of the Senator from Missouri, and I hope you will not think that my remarks indicate I am going to actively try to defeat it. But I hope the Appropriations Committee, if it has a little time, will take a look. I do not believe we need much more money. We have not spent the money which has been allotted to this program for the last 3 years. As a matter of fact, the States have rather regularly had money left over and, since it is flexible, they have put it into other programs.

I think the Senator's numbers are correct. As much as $250 million has not been used. That is not a question of the National Government not sending it out there. It is just that the need was not there and they put the money elsewhere, or it is being carried over.

Also, I hope the appropriators will take a look at the fact that if you see a long line in Virginia, and if the press is carrying the fact that there are long lines waiting for this money, you would inquire as to what they have done to maybe enhance the long lines. They have changed the criteria dramatically, such that many more people are entitled to it in that State. Whether that criteria is what you think is fair or whether they are just opening it up to many people we never intended to have, can be looked at.

I am not going to resist it. I really do not think this much money is needed.

Mr. MELCHER. Mr. President, I ask unanimous consent that I may proceed for 1 additional minute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. MELCHER. Mr. President, these comments must be responded to by somebody who lives in a cold part of the country. We had 17,000 households on the program in Montana last year, and there are more than 17,000 who have applied now. Montana officials believe there will be 30,000 valid applications this year.

Mind you, this is not because of looser restrictions. We have tighter restrictions because we know of the budget constraints.

If we want to set the circumstances here on this Senate floor where we have increased foreign aid by some $550 million just like a snap of our fingers, and turn down the people who are really cold and who have to make that desperate choice on whether they want to have either the capability for food in the house with no heat, or the capability of paying the heating bills whether wood, oil, electricity, natural gas, or coal—if we want them to have that tough choice all we have to do is turn down this amendment.

It will be a cold day here in this Chamber before this amendment does not pass on this continuing resolution. I hope we can do it without any more argument.

Mr. DOMENICI. Did the Senator hear me say I was not resisting it?

Mr. MELCHER. Yes; and I appreciate the Senator from New Mexico being in support, but I would like to make clear that we would like an overwhelming majority to be in support.

Mr. DANFORTH. Mr. President, I have a modification of the amendment, a technical modification, which I send to the desk.

The PRESIDING OFFICER. It requires unanimous consent.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the modification may be presented.

The PRESIDING OFFICER. Is there objection? Without objection, the amendment is so modified.

The amendment, as modified, is as follows:

At the end of the bill insert the following new section:

SEC. . Notwithstanding any other provison of this joint resolution, there is appropriated $200,000,000 for carrying out title XXVI of the Omnibus Budget Reconciliation Act of 1981, relating to low-income home energy assistance, which is in addition to amounts otherwise available for such title XXVI under this joint resolution.

Mr. DANFORTH. Mr. President, I ask unanimous consent that Senators PERCY, RIEGLE, and WARNER be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. DURENBERGER. Mr. President, I would like to be able to vote against the Danforth amendment to increase the authorization for the low-income energy assistance program. As a Senator from Minnesota, one of the coldest States in the Union, I know well the need for fuel assistance funds. In the past I have consistently voted to support additional funding for low-income energy assistance. It is an important program for thousands of Minnesotans. My State has a need for its full allotment under the current authorization and could well use the additional funds provided by the Danforth amendment.

But my State is not typical in that respect. Low-income energy assistance is a formula grant program. Under the formula designed here in the Congress every State and territory, including the Mariana Islands, receives some portion of the heating assistance funds whether they are needed for heating or not. And they would receive some portion of the additional funds authorized by the Danforth amendment.

Last spring my Subcommittee on Intergovernmental Relations held hearings on the block grants authorized by the 1981 Omnibus Reconciliation Act. The low-income energy assistance block grant was one program that we discussed at length. I believe that Senator DANFORTH who is a member of the subcommittee attended those hearings. The evidence we received causes me to question the need for additonal funds in the fuel assistance program. I would like to share that evidence with the Senate.

A provision included in the 1981 Omnibus Reconciliation Act allowed States to transfer funds from some programs to others to reflect a different mix of priorities as the States saw them. This transfer provision applied to the low-income energy assistance program. The Omnibus Reconciliation Act authorized States to transfer up to 10 percent of the funds they received for low-income energy assistance out of that program and into the other block grants, if they determined that needs served by the other block grants were of a higher priority.

This transfer provision applied to several of the block grants. In total 36 States took advantage of the transferability provision; 33 of those 36 States moved money out of the low-income energy assistance program and into other block grants. That is two-thirds of the States—33 States determined that they had social service priorities more pressing than fuel aid. A total of $99.5 million was transferred away from low-income energy assistance and into other programs. Most States moved the full 10 percent that was authorized by the Reconciliation Act.

To ignore this kind of evidence is foolish. It indicates that additional funds across the board for this program are not needed. Minnesota was not one of the 33 States that transferred money away from heating aid. As I said, additional funds for fuel assistance are needed in Minnesota. We used our full allotment last year and will certainly do so again this winter. But to get additional funds, about $8 million under the Danforth amendment will go to Minnesota, a Minnesota Senator has to vote for an amendment that would add some $625 million to the Federal deficit, knowing that in most of the States those dollars are not needed.

The people of Minnesota will have a hard time understanding why one of their Senators would oppose additional funds for fuel assistance. Just yesterday, I joined with other Members of this body in a letter to the administration indicating that I could not support a cut in the current appropriations level for this program. And I will not support a cut. Yesterday I joined with other colleagues to assure that heating aid, whether it comes from the Government or from private sources, will not reduce benefits under various public assistance programs including AFDC and food stamps. I also supported the Warner amendment to allocate $500 million in oil overcharge funds to the States for fuel assistance.

The people of Minnesota are taxpayers. In these times of economic distress, Minnesotans want their Senators to make sure that every public dollar taken from their pockets is put to the best possible use. Again I say, that the additional dollars that would be provided to Minnesotans by this amendment are needed. But for every $4 going to Minnesota under this amendment, $96 will be sent across the country, and across the Pacific islands, where many of those dollars are not needed. I trust we will reconsider the wisdom of this action.●

Mr. EAGLETON. I ask that Senator BRADLEY be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. I am cosponsoring this amendment which would increase by $200 million the appropriations to the Department of Health and Human Services for the low-income home energy assistance program.

My own State of Virginia closed its doors to some 25,000 qualified applicants for fuel assistance on December 10, 1982, due to lack of sufficient funds. This is tragic evidence of the desperate need for immediate aid to Americans overburdened with skyrocketing heating bills.

Passage of the Senator from Missouri's amendment, coupled with the passage of my amendment yesterday, will clearly signal the President and the conferees that we will insist that additional funds be provided for home heating needs. We are only beginning this winter season, and we cannot allow people to freeze this winter due to congressional inaction.

While the Senator from Missouri's amendment is compatible with my amendment, it is also quite distinct. Under my amendment which was overwhelmingly passed by this body yesterday, the Secretary of Energy would allocate $200 million to the Governors, giving them discretion to direct the funds to the highest priority energy related projects in their particular States. Priority should be given to the elderly and those with low incomes. The funds would be provided from the Department of Energy's account built up from settlements made as partial payments for petroleum pricing violations. This would be a one-time payment to the States which would not increase Federal appropriations. Priority energy related projects such as weatherization, in addition to low-income energy assistance, would be eligible to receive the funds under my amendment.

The Senator from Missouri's amendment would target the dollars specifically to the existing low-income home energy assistance program in each State. The source of the funds would

be the general revenues, and the funds would be administered through the Department of Health and Human Services.

Through passage of my amendment, and that of the Senator from Missouri, the Senate will be sending a clear message that we are serious about solving this problem of inadequate funds for the upcoming energy emergency that low-income Americans will be experiencing this winter.

Mr. COHEN. I rise to express my support for the amendment offered by the distinguished Senator from Missouri. As a Senator from a cold-weather, oil-dependent State, I am particularly sensitive to the hardship that has resulted from the unrelenting increases in home energy prices. These rapid increases were largely attributable to the removal of price controls on middle distillate fuels in 1976. Home heating oil prices have tripled from the 1976 average price of 40.6 cents a gallon to the current average price of $1.15 per gallon.

Although the price of home heating oil has finally begun to stabilize, the price of natural gas has recently skyrocketed. In many areas of the country, natural gas prices are 20 to 40 percent higher than they were a year ago.

While rising energy costs force all Americans to make some difficult choices—for example, whether to postpone the purchase of a new car until the end of the heating season or whether to forgo the necessary home repairs until next year—they often cause real hardship and suffering to low-income Americans.

Low-income families are forced to come to terms with an entirely different set of questions that plague them throughout the winter months. Where will the money come from for the next purchase of heating oil? What can I do without today so I might increase my chances of having enough money on hand to purchase some heating oil tomorrow or next week? Can I do without the medicine the doctor prescribed. Can I skimp on the nutrition I require?

While the average U.S. household spends about 5 or 6 percent of income on home energy costs, according to new data compiled by Project Energy Care of the National Council of Senior Citizens, The energy costs of low-income households—after low-income energy assistance is included—average 19 percent of annual income. The study also concludes that during the winter months, over 70 percent of low-income elderly individuals spend over 20 percent or more of their incomes on energy bills, and one of every four elderly poor individuals spends more than 30 percent of his income on heating bills. Only about one-half of low-income Americans eligible for energy assistance payments actually received them.

The study further points out that about 17 percent of the low-income population heats with fuel oil, while nearly 60 percent use natural gas. With the price of natural gas approaching that of home heating oil, the prediction that the percentages of income spent on energy costs by elderly and poor families will rise considerably seems inevitable.

I ask unanimous consent that the executive summary of the National Council of Senior Citizens' study be inserted in the RECORD at the end of my statement.

In recognition of the desperate plight of many low-income Americans, Congress last year appropriated $1.875 billion to assist these individuals in meeting their energy bills. Public Law 97-92, the continuing resolution for fiscal year 1982, provided $1.752 billion, and the additional funds—$123 million—were provided by an urgent supplemental appropriations bill passed by the Congress in February. Congress provided these additional funds in response to the large increase in applications for assistance nationwide. The severe winter weather, coupled with a rising unemployment rate, had forced program operators to deny assistance to many eligible applicants because funds had been depeleted.

Last year, the State of Maine served 45,000 needy households. In the first 4 weeks of this year's program, Maine has already received 23,000 applications for fuel assistance, more than half the total served last year.

While our country has enjoyed unseasonably warm winter weather thus far, this weekend's snow storm may be a prelude to a long, cold winter. In fact, many meteorologists have predicted that this winter will be more severe than last. Without an increase in the funding level for energy assistance, States will be unable to assist more families this winter than last.

Although an increase in the authorization level for energy assistance will not, by itself, make additional moneys available for the program, it will allow the Congress to increase funds early next year if this becomes necessary to avert a major crisis.

The amendment I am offering today would allow States to use up to 25 percent of their energy assistance funds to supplement their weatherization activities. While the energy assistance program is necessary to reduce the burden of rising fuel costs on low-income families, the weatherization assistance program is more effective in reducing fuel costs over the long run. By reducing home energy consumption by 15 to 30 percent, the weatherization assistance program has proved invaluable to our national conservation effort.

The low-income energy assistance block grant program was reauthorized for fiscal years 1982, 1983, and 1984, in Public Law 97-35, the Omnibus Reconcilation Act of 1981, at $1.875 billion. This program is quite similar to earlier energy assistance programs, with greater flexibility afforded the States because of fewer Federal requirements. Perhaps the greatest improvement in this program is the provision allowing States to use up to 15 percent of their allotments for weatherization activities. Since the adoption of this provision, 47 States have used portions of their fuel assistance allotments to weatherize an estimated 330,000 homes. Seventeen States have used up to 14 percent of their allotment for weatherization activities, 10 States have used from 10 to 15 percent, 10 States have used from 5 to 10 percent, and 7 States have used 1 to 5 percent.

Maine, which established the first weatherization assistance program in 1973, used 15 percent of its $25.1 million allotment—$3.5 million—for weatherizing 3,000 homes. This money has added greatly to the weatherization activities in Maine which, all told, have provided 33,062 Maine homeowners with weatherization improvements.

Despite administration attempts to terminate the low-income weatherization assistance program, support for its continuation remains strong in both Houses of Congress. For fiscal year 1982, $144 million was appropriated—a reduction of $37 million from the previous year's level of $181 million. The fiscal year 1983 funding level for the weatherizaiton assistance program is expected to be somewhere between the House-passed level of $147.5 million and the Senate-passed level of $114 million. While this appropriation is certainly helpful, it is not enough.

While the Department of Energy's low-income weatherization assistance program has weatherized 1 million homes since the program began in 1977, the Department has estimated that 12 to 13 million low-income Americans live in homes still in need of weatherization improvements. In Maine alone, there are 20,000 people on the waiting list for weatherization assistance.

The real value of the weatherization assistance program rests on its ability to dramatically—and permanently—reduce energy consumption in the home. With the continual rise in fuel prices, the cost of providing energy assistance will ultimately rise as well. But, if a portion of energy assistance funds are used for weatherizing homes, reducing fuel bills by about 20 percent, the value of the energy assistance will be greatly enhanced. And, as fuel prices continue to rise, the dollar value of the energy saved through weatherization improvements will continue to go up.

The Congress is to be commended for giving States greater flexibility and discretion in establishing their

own energy assistance program through the passage of the Omnibus Reconciliation Act. Yet, I believe States should be given even greater discretion in using allotted energy assistance funds to meet the fuel-assistance needs of their residents. Therefore, the amendment I am offering today to the Omnibus Reconciliation Act will authorize States to use up to 25 percent of their energy assistance block grant funds for weatherization or home repairs related to energy conservation. My amendment will not require States to use any of their funds for weatherization activities. Rather, States will have the option of providing more households with weatherization improvements or assisting more families in paying their fuel bills. This is consistent with the administration's policy of returning control of assistance programs to State and local governments. Additionally, the amendment will greatly improve the energy assistance program by allowing States to increase the value of their allotment by permanently reducing fuel bills. I urge my colleagues to support it.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SEARED HOPES AND FROZEN PROMISES

EXECUTIVE SUMMARY

Seared Hopes and Frozen Promises is a report prepared by Project Energy Care of the National Council of Senior Citizens (NCSC). Funded by the Community Services Administration in 1980, Project Energy Care was a national information and outreach program focusing on the home energy needs of the elderly and disabled poor. It has recently completed a national survey of 24,000 elderly households in 38 states. The findings are:

(1) The average U.S. household spends about five to six percent of income on home energy costs, but the energy costs of low-income households—after low-income energy assistance—average 19 percent of annual income. Only about one-half of such households receive any help from federal energy assistance programs.

(2) The percentage of income that poor elderly households spend on energy is much higher during the winter months. In the winter, over 70 percent of the low-income elderly spend over 20 percent or more of their income on energy bills. One of every four elderly poor households spends more than 40 percent of its income on heating bills during the winter. (See Table 1)

(3) For the poorest group of elderly—those on SSI—the situation is starker. In 12 states, the average energy bills during the coldest month equals or exceeds the maximum SSI payment. In nine additional states, less than $25 a week remains of the SSI payment after energy bills are paid. (See Table 2)

(4) The percentages of income used for energy bills are considerably higher for those who heat with fuel oil than for those who use natural gas. About 17 percent of the low-income population heats with fuel oil, while nearly 60 percent use natural gas. Over coming years, natural gas prices are expected to rise to the level of fuel oil prices, as natural gas is deregulated. The percentages of income spent on energy costs by large numbers of elderly and poor families are expected to rise considerably over future years as natural gas prices increase. (See Table 3)

For example, in the Southeastern United States, 23 percent of the elderly poor heating with oil spend more than 60 percent of their incomes to stay warm in winter, versus three percent of those who now heat with gas. As natural gas prices increase (over 21 percent last year in this region), more and more elderly poor will see dramatic increases in their home heating budgets. Like those using oil, one out of every four may soon be spending three-fifths of their income to stay warm in the South during the winter.

A key purpose of this sample, from the more than 600,000 elderly and disabled poor reached by Project Energy Care, was to look at the impact of rising energy costs on older Americans with low, fixed incomes and thereby assess the value of existing energy services directed to them. Were, in fact, such services needed by only a few who face a grim energy picture today and tomorrow? Or is the problem of home energy shared by the many elderly poor?

Taken together with the three other studies sponsored by Project Energy Care, the sample quite clearly shows that the problem of home energy affects thousands and thousands of people—not just isolated individuals—who live in every community of the United States, from the colder Northeast to the warmer Southwest and Southeast. The difficulties the elderly are having in affording adequate heating or cooling is bound to become more severe in the future, as funding for critical federal energy programs is reduced or eliminated and as prices for other energy sources that the poor depend upon, such as gas and electricity, begin to reach the equivalent cost of home heating oil.

The other studies reviewed in this report and prepared for NCSC's Project Energy Care are:

(1) Poor plus Old equal Cold, by the Grier Partnership. This report explores the economic impact of rising energy costs on low-income households. It contains extensive data on average energy expenditures, and compares these costs to maximum allowable SSI payments broken down by state.

(2) The Cost of Survival, by the Grier Partnership. If low-income Americans were to pay what the average American pays for home energy—roughly five percent of their income—over $7 billion in subsidies would be needed. The Report's purpose is to calculate on a state-by-state basis the amount of subsidy necessary to keep low-income persons from paying more than a certain percentage of their income for home energy. Frozen Promises contains a comparison between the state-by-state needs revealed in this study with current distribution of federal energy assistance funds.

(3) A Comprehensive Analysis of the Costs and Benefits of Low-Income Weatherization and Its Potential Relationship to Low-Income Energy Assistance by the Consumer Energy Council of America.

This report provides an in-depth analysis of the social and economic impact of weatherization on low-income households. The study explores data from numerous field sights to determine rates of energy savings at various levels of investment under different programs. The results show that weatherization is a lower cost alternative to increasing our national energy supply than is investment in new production. The study also shows that the Department of Energy's Weatherization program has been effective in reducing low-income households energy consumption at a reasonable cost.

For additional information, contact Project Energy Care, National Council of Senior Citizens, 925 15th Street, N.W., Washington, D.C. 20005, (202) 347-'8800, ATT'N: Michael Sandifer or Eric Shulman.

Mr. KENNEDY. Mr. President, I am pleased to join as a cosponsor of this amendment.

This would bring funding up to just over $2 billion level, an increase of $200 million over last year.

There is strong justification for increasing funding for this important and effective activity.

My colleagues all know of the enormous increase in natural gas prices over the last 12 months—as much as 40 percent in some areas. We have debated that issue yesterday and last week. I was pleased with the Senate's action yesterday on the Warner-Kennedy amendment, but I realize that needy families in many States would not be helped. The amendment we are considering today will address that need.

In the Metropolitan Boston area, gas prices are expected to rise between 20 and 40 percent this winter. If prices rise 25 percent, a typical family will pay $1,460 for heat, cooking and hot water—$334 more than last year.

And even though heating oil prices have temporarily stabilized, there are many more people in need.

Thousands of families, in Massachusetts and across the country have lost their jobs—and now face the prospect of having to choose between putting food on their table and heating their house.

Thousands of eligible families may receive no assistance or reduced assistance as a result of the great unmet need.

Mr. President, $200 million will still go to meet only part of the need, but it will help as many thousands of deserving American families meet the costs of heating their homes this winter. There is simply no justification for not taking this step.

I urge my colleagues to support this amendment.

The PRESIDING OFFICER. All time has expired.

The question is on agreeing to the amendment of the Senator from Missouri. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG), the Senator from Arizona (Mr. GOLDWATER), the Senator from Florida (Mrs. HAWKINS), and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr.

CRANSTON), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Washington (Mr. JACKSON), and the Senator from Hawaii (Mr. MATSUNAGA) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 80, nays 11—as follows:

[Rollcall Vote No. 444 Leg.]

YEAS—80

Abdnor	Glenn	Nunn
Andrews	Gorton	Packwood
Baker	Grassley	Pell

	Helms	Symms

NOT VOTING—9

Armstrong	Dodd	Heinz
Cranston	Goldwater	Jackson
DeConcini	Hawkins	Matsunaga

So the amendment (UP No. 1538), as modified, was agreed to.

Mr. DANFORTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

STATUS REPORT

Mr. HATFIELD. Mr. President, we have unanimous-consent agreements on about 10 more amendments, and we are seeking to clear up for unanimous-consent requests about 8 more. Without rollcall votes, that would mean that we have about 4 hours of amendments, that if all the time——

The ACTING PRESIDENT pro tempore. The Senate will be in order. Conversations may be conducted in the cloakroom. The Senator from Oregon is attempting to outline the course of the day for the Senate and I am sure he will appreciate our colleagues' consideration.

Mr. HATFIELD. Mr. President, I think if we could expedite this as quickly as possible and not get into a lot of extended time requests on these amendments, we could conceivably complete the continuing resolution and with no other additional ones that we are aware of at this time by 5 or 6 p.m. tonight.

With that in mind, I am hopeful that we could then have the paperwork ready for a conference with the House of Representatives tomorrow and complete the conference in one day and have them ready for floor action on both the House and Senate a report on Monday.

I do not know who we can make it sooner than that.

Then the President will have time to get up his message or whatever it may be.

So it is conceivable that we might have to reconvene the committee and come up with a new conference report, if the President vetoes it on Tuesday, and then act upon that and perhaps send that down on Wednesday.

I only mention those timeframes or time schedules because I am very anxious to get this completed as soon as possible today.

We have to have about 4 hours of paperwork before we can get to conference. By the time we finish conference it will take 5 to 6 hours of paperwork before we can have the conference report ready for the House action and then for the Senate action.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. HATFIELD, I yield.

Mr. ROBERT C. BYRD, Mr. President, if the Senate and House of Representatives pass the conference report on Monday there is no reason why it will take the President until Tuesday to determine whether he is going to veto it. There is no reason why it would take until Wednesday to pass a slimmed down conference report if that becomes a necessity.

I would hope if he is going to veto it he would do it, and do it fast, and the House of Representatives can quickly send over whatever has to be sent over and the Senate can finish its action on Monday, the same day, or no later than Tuesday.

Mr. HATFIELD. Mr. President, I would hope it can be done quickly, but all I am saying is those are reasonable timeframes that we might have to consider.

I would, therefore, only outline them to urge us to be as expeditious today as possible.

DISTRICT OF COLUMBIA APPROPRIATIONS—CONFERENCE REPORT

Mr. President, I wish to temporarily set aside the amendments with the approval of the leadership on both sides to take up the District of Columbia conference report on appropriations which will take only a very few minutes and get that out of the way.

I, therefore, yield to the chairman of the committee, Mr. D'AMATO, and the ranking minority member, Mr. LEAHY.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished chairman make the request for a time limit and also that there be no amendments to any amendments in disagreement that will not be germane.

Mr. HATFIELD. On the conference report?

Mr. ROBERT C. BYRD. The conference report. Are there amendments in disagreement?

Mr. HATFIELD. No.

Mr. ROBERT C. BYRD. There are not?

The PRESIDING OFFICER (Mr. GRASSLEY). The Chair notifies the Senate that there are amendments in disagreement.

Mr. HATFIELD. There are amendments in disagreement.

Five minutes?

Mr. STEVENS. It is my understanding that there are not going to be amendments now.

Mr. PROXMIRE. Mr. President, if the Senator will yield, will the Appropriations Committee give us assurance that Senator BUMPERS will be recognized after the conference report?

Mr. HATFIELD. That is correct.

Mr. BUMPERS. This is on the District of Columbia appropriations conference report.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, I do not need to repeat my reservation, but I wish some action.

Mr. STEVENS. Mr. President, I join the minority leader in that reservation and, reserving the right to object, and I will not object, unless this time agreement is limited to 5 minutes and there be no amendments submitted to this conference report.

Mr. ROBERT C. BYRD. At least no nongermane amendments.

Mr. STEVENS. No amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISTRICT OF COLUMBIA APPROPRIATIONS—CONFERENCE REPORT

Mr. D'AMATO. Mr. President, I submit a report of the committee of conference on H.R. 7144 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7144) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes, having met, after full and free conference, have agreed to recom-

mend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 15, 1982.)

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. D'AMATO. Mr. President, the conference report on the District of Columbia appropriations bill for fiscal year 1983, now before us, contains a total of $524.2 million in Federal funds. This is the same as the Senate bill and $21.3 million below the House version. This bill is also well within our allocation under the budget resolution and $55.7 million below the President's requested level.

This amount is made up of a Federal payment of $361 million as proposed by the Senate along with a payment for water and sewer services of $11.8 million; contributions to retirement funds of $52 million; loans to the District for capital projects of $145 million; $3.1 million for a special crime initiative; and a rescission of $48.8 million in unneeded capital authority.

In District of Columbia funds, the bill includes nearly $2 billion in operation authority. This includes the above Federal funds, as well as local tax collections.

The key provisions included are:

A $3.1 million special crime initiative to assist in efforts to reduce and control crime in the Nation's Capital. These funds will be made available to the Metropolitan Police Department to purchase needed equipment, and to the U.S. attorney's office for more prosecutorial help.

The conference agreement also includes $1.2 million for the District Fire Department to restore to full time status the four heavy duty rescue squads during the second half of the fiscal year.

A total of $306 million, the full budget request for the public schools; and $11 million for the Public Library.

The agreement also includes a total of $20 million for retirement of the accumulated deficit. This is $18 million more than requested and keeps the District on track in reducing this fiscal burden.

Mr. President, the conference report has been printed in the CONGRESSIONAL RECORD of December 15, 1982, on page H9935, so. I will not ask to have it restated here.

Mr. President, I also want to indicate on the record that, as always it was a pleasure working with the chairman on the other side, Congressman JULIAN DIXON and the ranking member Congressman LARRY COUGHLIN, they represented their side very well and this agreement certainly bears their stamp. They were supported by their most competent and able staff, Mr. Migo Miconi, Mrs. Mary Porter, and Mr. Kenny Kraft.

Before yielding the floor I want to once again express my thanks to all the members of the Subcommittee on the District of Columbia. And particularly to the Senator from Vermont for his continuing interest and help in formulating this bill. He has acted in a most bipartisan and responsible manner and the Senate owes him a debt of gratitude in this regard.

We are also indebted to the distinguished chairman of the Appropriations Committee, the Senator from Oregon. This bill would not be to this point today if not for his determined leadership against what must at times have seemed like insurmountable odds.

Also, I express appreciation to the Senate staff—Mrs. Lula Joyce, Jim Cubie, Tim Leeth, and Jane McMullan.

For the District of Columbia Retirement Board the conference agreement provides the budget request of $1,689,000 for the administrative expenses of the board. Of this amount $425,000 will be derived from the general fund of the District. The balance will come from the investment proceeds of the funds.

Also, additional amounts of $267,000 for the police and fire retirement fund and $4,483,000 for the teachers retirement fund in conformity with the agreement between the Mayor and retirement board of September 29, 1982. This agreement addresses fund shortfalls from previous fiscal years and how any future shortfalls will be handled.

For the Commission on the Healing Arts Licensure the conference provides 12 positions and $400,000 as recommended by the House. This will provide seven additional positions and $185,300 to improve oversight of the medical professionals in the District of Columbia.

For the superior court the conference report includes the $285,000 suggested by the Senate to hire three hearing commissioners and support staff. And in the District of Columbia court system one additional position was included to provide a training officer.

For the Public Library the House accepted the Senate allowance of $11,246,300, an increase of $70,000 to keep the Martin Luther King Library open on Sunday afternoon during the school year.

For the Department of Employment Services the conferees agreed to restore $664,000 to two jobs programs cut by the House. The conference agreement provides $3,337,300 for the out-of-school jobs for youth program and $4,714,900 for the job for adults with dependents.

For the Department of Human Services the conference agreement provides a total of $334,912,200. Included in this amount is $194,600 for the Office of Veterans' Affairs and $120,000 for the Special Olympics. Also provided is a total of $13,007,900 for child day care services, and $97,518,700 for medicaid/medical charities program.

For St. Elizabeths Hospital the conferees provide $24,748,700, this represents an even split between the levels provided in the two bills.

And finally, for the capital outlay appropriation title the conference agreement provides the full budget request of $83,885,600.

Mr. President, I would be happy to yield the floor to the Senator from Vermont, the ranking minority member, with regard to this bill.

Mr. LEAHY. I thank my friend from New York. I urge the adoption of the conference report. This conference report is within the 302(b) allocation and $55.7 million below the President's request.

I would also like to take a moment to express again my admiration for the Senator from New York. He is an excellent chairman with whom it has been a pleasure to work professionally and personally. I would also like to compliment the professional staff, Mr. Tim Leeth and Mr. Jim Cubic, for the excellent work they have done on this bill.

Mr. DOMENICI. Mr. President, I ask unanimous consent that two tables showing the relationship of the conference agreement to the congressional spending and credit budgets and the President's budget request be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

ATTACHMENT 1.—DISTRICT OF COLUMBIA SUBCOMMITTEE SPENDING TOTALS

[In billions of dollars]

	Fiscal year 1983	
	Budget authority	Outlay
Outlays from prior-year budget authority and other actions completed		0.04
H.R. 7144, conference agreement	0.5	.5
Total for District of Columbia Subcommittee	.5	.5
First Budget Resolution 302(b) allocation	.6	.6
Possible amount over (+)/under (−)	−.1	−.1
H.R. 7144:		
President's request	.6	.5
House-passed	.5	.5
Senate-passed	.5	.5
Conference agreement	.5	.5

ATTACHMENT 2.—DISTRICT OF COLUMBIA SUBCOMMITTEE CREDIT TOTALS

[In billions of dollars]

	Fiscal year 1983	
	New direct loan obligations	New primary loan guarantee commitments
H.R. 7144, conference agreement, with direct loan obligations resulting from prior-year commitments and other actions completed	0.1	
First Budget Resolution 9(b)(2) allocation	.1	
Possible amount over (+)/under (−)

Conference agreement	.1	

Mr. D'AMATO. Mr. President, I move adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. D'AMATO. I move to reconsider the vote by which the conference report was agreed to.

Mr. COCHRAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the amendments in disagreement be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. D'AMATO. Mr. President, I move that the Senate concur in the House amendments numbered 3, 7, 17, 33, 23, 34, 35, 39, 40, and 41.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New York.

The amendments in disagreement agreed to are as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 3 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SPECIAL CRIME INITIATIVE

For a Federal contribution to the District of Columbia to aid in the detection and prevention of crime, $2,342,600: *Provided,* That this amount shall be available to the Metropolitan Police Department.

For the Department of Justice for use in the Superior Court Division of the U.S. Attorney's Office for the District of Columbia, $800,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 7 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by said amendment, insert: *$69,545,500*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 17 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by said amendment, insert: *$466,890,500*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 23 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by said amendment, insert: *$17,364,100*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 33 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the number inserted by said amendment, insert: *33,268*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 34 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the number inserted by said amendment, insert: *32,211*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 35 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the number inserted by said amendment, insert: *28,616*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 39 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: *126*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 40 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: *127*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 41 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: *128*

Mr. D'AMATO. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FURTHER CONTINUING APPROPRIATIONS, 1983

The Senate continued with the consideration of House Joint Resolution 631.

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas is recognized.

UP AMENDMENT NO. 1539

(Purpose: To modify the payment limitation in existing law for payments for wheat, feed grains, upland cotton, and rice)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS) proposes an unprinted amendment numbered 1539.

Mr. BUMPERS. Mr. President, I ask unanimous consent to dispense with further reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 25, line 25, after the "." insert the following: "None of the funds appropriated under this joint resolution shall be used to make farm deficiency or diversion payments to any person for the 1982 crops of wheat, feed grains, upland cotton, and rice: *Provided, however,* That amounts made available to the Department of Agriculture by this Act for farm deficiency and diversion payments under section 1101(l) of Public Law 97-98 shall be available up to a limit of $100,000, per person, for the 1982 crops of wheat, feed grains, upland cotton, and rice."

The PRESIDING OFFICER. There will be 15 minutes equally divided.

Mr. BUMPERS. Mr. President, I want to remind my colleagues of some of the things we have considered since we have been on this continuing resolution. We have provided energy assistance to the poor, we have extended unemployment compensation benefits for the unemployed, we have talked endlessly about the state of the steel industry, about the state of the oil industry, about the number of unemployed people and how many poor people there are in the country who need assistance. But, to the best of my knowledge, not one time have we mentioned the most destitute industry in the United States, and that is agriculture.

In my State there are about 1,000 farms that are being foreclosed on right now. Thirty-seven percent of all of the Farmers Home loans in my State are delinquent, and the national average is between 25 and 30 percent.

We produce wheat, cotton, soybeans, and rice in Arkansas. We do not produce corn, but if we did, the same problems would exist. All five of those crops I just mentioned are selling at significantly lower prices than it costs to produce them.

When Franklin Roosevelt became President, he said the first order of business in eliminating the misery of this country was to provide people with relief. I am offering an amendment today, that will help our farmers, although I know it is going to be misunderstood in some quarters by those who do not understand farming. This amendment will not save all the farmers in this country, it will not save most of the farmers in the country, but it will save some pending the adoption of the President's payment-in-kind program or other agriculture policy changes. Although I have not had time to closely evaluate the payment-in-kind program, I expect to support it.

Our existing farm programs can be easily explained, and work as follows: The Government has a program for feed grain crops and cotton that says, "We will pay you a target price if you participate in the program and market prices do not rise to that level."

What do you have to do to participate in the program? You have to set aside a certain amount of land or comply with other requirements of the Agriculture Department. For the 1983 crop it is a 5-percent paid diversion and a 10-percent set-aside. If you do not set aside that 10 percent that the Government asked you to set aside, you are not eligible to participate in this program. But, if you do you are not only eligible to participate in it, you are eligible to get up to $50,000 in farm deficiency and diversion payments. But, these deficiency payments are not even triggered until the market prices fall below the target price, which is something that is supposed to be roughly equal to the cost of production.

Let my give you an example and you figure out where your farmers fit in. For wheat the loan rate is $3.55, and the target price is $4.05. So, a wheat farmer who participated in the program is entitled to a deficiency payment of $0.50 a bushel.

In the case of corn, the loan rate is $2.55. The target price is $2.70, so a corn farmer is entitled to 15 cents a bushel deficiency payment, if the market price drops below $2.55 per bushel.

If you raise rice, which my State happily does, the loan rate is $8.14 a hundredweight, and the target price is $10.85. These target prices are just about the cost of production. They are not designed to make anybody rich.

This is not a ripoff. So if you are raising rice, you are entitled to $1.22 a bushel or $2.71 per hundredweight. In cotton you are entitled a maximum deficiency payment of 14 cents per pound.

My point is this: Years ago when we discovered this program was open-ended and that certain big agribusiness corporations out West were ripping the Government off for millions of dollars a year, we put the $50,000 limitation in effect. I was in favor of it and, under normal conditions, that $50,000 is more than adequate.

However, these are not normal times, and these are not normal conditions. The Department of Agriculture says that to have a viable entity on feed grain crops you have to have about a 1,000-acre farm. If you have 1,000 acres, it means you have to have a combine and that is $100,000 to $120,000; you have to have a big tractor, and that is another $100,000.

I am not talking about big farmers; I am talking about little farmers who suddenly have had to pay big prices for everything they buy, and sell at prices that do not even get to the break-even point.

If you are a rice farmer in my State and have 400 acres, you are at the $50,000 level. Is that going to make somebody rich? I should say it is not. He is not even going to be able to pay his loan off.

My amendment will accommodate somewhere between 15 and 40 percent of the farmers of the country. They are not big farmers, do not misunderstand that.

Some of my colleagues, such as my distinguished friend, the Senator from Michigan might question the propriety of this amendment. I have voted for relief for the auto and steel industries because they need help. But, I can tell you something neither of those industries is in near the desperate plight the farmers of this country are in.

This is a 1-year program for the 1982 year crop, pending the President's program which, incidentally, it will cost two to three times as much as this will. I guarantee you, almost every Senator in this body will vote for the President's payment-in-kind program, and it is two to three times as expensive compared to what I am trying to do here right now.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. Mr. President, I yield 5 minutes to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, I want to make certain I understand the import of the amendment. I understand it would make farmers eligible for payment of $100,000 this year rather than $50,000.

Mr. BUMPERS. The Senator is correct.

Mr. DOLE. Are there a number of farmers who get that much in Federal subsidy?

Mr. BUMPERS. Possibly as much as 40 percent of the farmers in this country.

Mr. DOLE. The only question raised by the Senator from Kansas is there has been a great deal of debate from urban and rural Members on how much the Federal Government should pay to the American farmers, so after a lot of struggle, to satisfy the urban interests and others we put a lid of $50,000 upon them. It was $30,000, then $40,000, and $50,000, and then unlimited, and we found many of the Nation's largest farmers were getting the largest Federal benefits, but it was not helping the small farmers.

I do not quarrel with the comments of the Senator about 40 percent, but I wonder if it might not be better if we add this language to the so-called PIK bill which has now, as I understand, passed the House.

In that bill there is no payment limitation on the payment-in-kind, as the Senator from Mississippi will tell you, to whom I will yield in a moment.

Mr. BUMPERS. If I can respond to the Senator, I would like to say that I would be more than happy to do that. The reason I am offering this amendment is because based on the comments and discussions I have had with the Senator from Montana there is not going to be a PIK bill that will take care of the 1982 crop, and my amendment only goes to the 1982 crop because the PIK bill does not take effect until the 1983 crop is harvested.

Mr. DOLE. If, in fact, we could bring up the PIK bill, and the chairman is making an effort to do that, I would be willing, on this side, to try to accommodate the Senator from Arkansas. I know it is of particular concern in rice-producing areas. I do not think many wheat farmers would benefit. I know that rice production is different. If we are not going to bring up the PIK bill, then there is another problem.

Mr. BUMPERS. Maybe the Senator from Montana could enlighten us on that.

Mr. HELMS. Will the Senator yield?

The PRESIDING OFFICER. Who yields time?

Mr. HELMS. I want to know how much this will cost.

The PRESIDING OFFICER. The Senator from Oregon controls time.

Mr. DOLE. I yield the remainder of my time to the Senator from Mississippi.

Mr. COCHRAN. Mr. President, how much time remains on the 5 minutes yielded to the Senator from Kansas?

The PRESIDING OFFICER. Does the Senator from Oregon desire to be recognized for the purpose of yielding time?

Mr. HATFIELD. Mr. President, I yielded 5 minutes to the Senator from Kansas. How much time does the Senator from Kansas have remaining?

The PRESIDING OFFICER. The Senator has 3 minutes remaining.

Mr. COCHRAN. Mr. President, I thank the Senator for yielding.

We do have underway right now an effort to get this payment-in-kind program implemented through legislation here in the Senate and in the House. It probably would be more appropriate to discuss this in connection with that legislation. Even though the amendment of the Senator from Arkansas applies to the 1982 crop year, the PIK program, as proposed by the administration, is going to apply to crop years 1983 and 1984. But the agriculture appropriation part of our effort to fund programs for this next year has already been agreed to in a conference report.

This relates to appropriations under the jurisdiction of the Agriculture Ap-

propriations Subcommittee. I do not know whether that makes the amendment germane or out of order or what from a parliamentary point of view.

I sympathize with the arguments being made by the Senator from Arkansas. He is absolutely right. We need something like this done. I am not sure this is the appropriate vehicle.

I yield to the Senator from North Carolina, the chairman of the Agriculture Committee.

Mr. HELMS. Mr. President, I have only one question which I will pose to the distinguished Senator from New Mexico, the chairman of the Budget Committee. Does he have any idea of the budgetary implications of this?

Mr. DOMENICI. We have tried to figure out how much it might cost and we cannot tell you.

Mr. HELMS. Does the Senator from Arkansas know how much it will cost? The chairman of the Budget Committee has no earthly idea how much this will cost. Does the Senator from Arkansas know how much it will cost?

Mr. BUMPERS. We have asked the Department of Agriculture for an estimate and they said they simply could not give us one, except to say this: In 1978, 15 percent of the farmers who were in the program would qualify. They estimate now that probably somewhere in the area between 15 and 40 percent. But please bear in mind everybody is not going to get $100,000. Most of these people will be only slightly higher than the $50,000 limitation, and between 15 and 40 percent of them will qualify.

I have just made a sort of BUMPERS' estimate of things. My guess is that this can cost anywhere from $100 million to $250 million.

Mr. HELMS. Mr. President, as Senator DOLE and Senator COCHRAN have said, we are all sympathetic with the idea. They are trying to work in connection with the PIK program. I will be glad to say to the Senator from Oregon that we will entertain this amendment on the PIK bill and we are trying to work out calling that up immediately after this legislation. But we are just shooting in the dark.

Does the Senator from Oregon have any idea about the cost of this amendment?

Mr. HATFIELD. No. I would only say to the chairman of the Agriculture Committee that we just received a copy of this amendment, I believe, last night and we do not have any estimate.

Mr. HELMS. I say to the able manager of the bill that I saw it about 3 minutes ago.

Mr. BUMPERS. May I make this proposition to the Senator from North Carolina: If I thought we were going to get the PIK program through and it could be added to that, I would be willing to do so. As I say, maybe the Senator from Montana can tell us whether or not he is going to get the PIK program up. I will be on the conference committee on the continuing resolution. I would make this commitment: If we get that bill up and get it put on, that is where it ought to be. I would be happy to move to recede to the House position on this if I had any kind of assurance at all that we could get that done.

Mr. BUMPERS. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 1 minute and 42 seconds remaining.

Mr. BUMPERS. Mr. President, I yield the 42 seconds to the Senator from Montana.

Mr. MELCHER. Mr. President, I ask unanimous consent for 3 minutes in addition to the 42 seconds.

Mr. HATFIELD. Mr. President, reserving the right to object, we have sought diligently to push this bill and we have been on it for many, many hours and days. Already this morning, we have had an extension of time by about 6 minutes of unanimous-consent agreements. If we start adding 5 minutes and 3 minutes and 6 minutes, I am going to object—not on this one. But I just want to put the Senate on due notice that I am going to start objecting to extending the time agreements that have been worked out and on which we were trying to move in an orderly way. I will not object at this point to the request of the Senator from Montana but, respectfully, I will start objecting to extending time limits.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana for 3 additional minutes? Without objection, it is so ordered.

Mr. MELCHER. I thank the very patient and able chairman of the Appropriations Committee. I fully sympathize with his point of view and I hesitate to even ask for this time.

But, since a discussion of the PIK bill has come up, I should point out that we hopefully will have available for the first time today on the Senate floor the printed bill that would be considered. Now, I am on the Agriculture Committee and have had the typewritten amendment in the nature of a substitute that would be considered, but the printed PIK bill as approved by the committee has not yet been available until now. I understand it is not yet printed, but may be available today for every Member and for the public at large to study so as to understand what is being proposed in PIK, the payment-in-kind proposition.

If it is going to be considered, I have been working with the members of the Senate Agriculture Committee and other Senators and the Department of Agriculture to make sure that, in considering the bill for passage, that we do have real concern for the very crucial problems of the agricultural producers of this country.

In particular, help for wheat producers is not well laid out in the bill. The bill is very sketchy. It gives broad authority to the Secretary of Agriculture, as is necessary in some instances, but overal,l does not specify definite requirements to carry out congressional intent to improve agricultural producers income.

But, in the case of wheat, it simply has not met the test of meritorious proposal as of now. But I will continue to work with Senators and the Department of Agriculture and with the House Agriculture Committee in trying to get a proposal that is good. Because times are crucial for agriculture, as has been mentioned several times here this morning, I hope we can consider positive proposals to raise agriculture producers' income.

But to pass a bill without some understanding that it is going to help wheat and feedgrain producers throughout the country, then I think we would be making a mistake. There are some advantages I have found in the bill.

For chickens, there is a proposal to aid in the export of chickens by subsidizing the chicken sales.

There is some advantage in the bill for the egg producers. There is a subsidy set up for the exporting of eggs and also for long-term staple cotton. There is a particular provision in the foreign sales of long staple cotton with a subsidy proposal.

I think there are a number of advantages in the bill. However, I question many of its provisions, and, overall, it is a bill that is still not very well understood by agriculture producers throughout the country. I believe we can set the framework for a good understanding of that before we adjourn.

I would like to cooperate in doing so, but we are going to have to have some understanding with the Department of Agriculture on several points at this time. One of which, I might add, is its payment in kind for a new type of soil bank of massive land diversion. We want to be sure, in the conservative practices that will be followed on that land that is diverted, that there is some meaningful input by Congress and direction by Congress, through the Department of Agriculture and through the county ASCS committees, so that we do have sound conservation practices. Land just left idle and unattended, without conservation practices, would be a waste and risk deterioration of the Nation's greatest asset—our agricultural land base.

In addition, I think it is probably not clear now in the bill whether there would be Federal assistance in those conservation practices.

For these and other reasons expressed to me by agricultural leaders there is much more to consider in developing a sound PIK bill. For my part, I am open to constructive recommendations.

Mr. HATFIELD. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. Two and a half minutes.

Mr. HATFIELD. I yield 1½ minutes to the Senator from North Carolina and 1 minute to the Senator from Michigan.

Mr. HELMS. Mr. President, I want to ask the distinguished chairman if we should consider laying aside this amendment temporarily. Right now I am supposed to meet with the majority leader about the PIK bill. We could have passed the PIK bill 2 or 3 days ago, if we could have gotten all of the amendment problems straightened out. I think we have those problems straightened out, but I will have to consult with the majority leader.

Mr. BUMPERS. Mr. President, if I may say, I appreciate the action on this. I am perfectly willing to ask unanimous consent that the amendment be laid aside temporarily.

With regard to the PIK bill, I am going to vote for it. However, my amendment ought to be on it to take care of the 1982 problem.

Mr. President, I ask unanimous consent that the amendment be laid aside temporarily without prejudicing any Senator's rights.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, we are ready for the next amendment, which is to be offered by the Senator from South Carolina (Mr. THURMOND). On this amendment there is a 20-minute time limitation, equally divided.

Mr. President, I yield to the Senator from South Carolina.

UP AMENDMENT NO. 1540

(Purpose: To permit use of funds for the conversion of Army and Air National Guard civilian technician positions to full-time military positions)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The assistant legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND), for himself, Mr. TOWER, Mr. JEPSEN, Mr. GOLDWATER, Mr. NUNN, and Mr. EXON, proposes an unprinted amendment numbered 1540.

At the appropriate place in the bill insert the following new section:

SEC. . Within the total amounts appropriated in this Act for the Army National Guard and the Air National Guard, respectively, funds shall be available as necessary to provide for the conversion of Army National Guard and Air National Guard civilian technician positions to full-time military positions.

Mr. THURMOND. Mr. President, this amendment is offered by myself, Senator TOWER, Senator JEPSON, Senator GOLDWATER, Senator NUNN, and Senator EXON. It is offered at the request of the National Guard. The National Guard Association is supporting it, the Army is supporting it, and the Air Force is supporting it. I can go into more detail if Senators want me to. The managers have agreed to accept the amendment.

Mr. President, the Defense appropriations bill offered by the Senate Appropriations Committee deleted a total of $21.8 million for the conversion of military technicians to full-time military positions for the Air National Guard and Army National Guard. The technician positions being converted numbered 600 for the Air National Guard and 600 for the Army National Guard.

The amendment offered would allow the Army National Guard and Air National Guard to continue these conversions during fiscal year 1983. The amendment, however, does not seek restoration of the $21.8 million allocated for these conversions.

Initial Department of Defense studies and reports indicated that there might possibly be savings accrued from converting military technicians to full-time military positions. Subsequent studies, however, have indicated that cost savings are questionable. In fact, the most recent cost comparison done for the Department of Defense was completed in October of this year. The study found that comparative costs depend on comparative grade structure and that cost-effective full-time support can be developed if the force structure is designed for that purpose.

During testimony over the years, however, more compelling reasons than cost alone arose that showed a need for changing the technician program.

Labor union activity in technician programs adversely impacted on the military command authority, organizational effectiveness, discipline, and combat readiness of the units.

Furthermore, it was found that the technicians program encouraged an aging force and produced questionable mobilization assets.

Consequently, the House Appropriations Committee directed the Department of Defense to conduct a test to see which system was most efficient. The test results indicated that the full-time military program enhanced readiness, improved the deployability of the units, and was easier to manage. After 2 years of testing the conversion program and after numerous hearings the House Appropriations Defense Subcommitee terminated the test. In the House Appropriations Committee fiscal year 1982 Department of Defense appropriations bill reports the several Reserve components were directed to determine the apppropriate mix of full-time military and military technicians necessary to fulfill their missions.

Consistent with the directions of the Congress, the National Guard requested to convert 1,200 technicians to full-time military positions during fiscal year 1983. These positions are but a fraction of technician positions that are vacant. In fact, current vacant technician positions and projected losses total 4,500 during fiscal year 1983.

The National Guard intends to convert only those positions that are vacant, but will consider any technicians who voluntarily request to convert to full-time military. I would like to read to you a portion of a letter to me from Lt. Gen. Emmett H. Walker who is the Chief of the National Guard Bureau.

The SAC and the HAC have recommended the elimination of our FY 1983 budgeted conversions. I fully agree with their rationale that the conversion program should only continue where it is cost effective and where readiness is enhanced. It is true that in the beginning of the program there were a few instances where technician positions were converted to military that resulted in a higher rate of pay than that authorized by the technician grade. However, we corrected this situation by establishing military grades for our technician positions that could not be exceeded. At the same time we directed that those military personnel who held military grades higher than that authorized be reduced or reassigned. Additionally, in the distribution of our conversion spaces we have placed emphasis on converting technician positions that will enhance our readiness in the areas of training, administration, personnel and supply at unit level.

Mr. President, I will request unanimous consent that General Walker's letter be printed in the RECORD in its entirety at the conclusion of my remarks.

It seems to me that the National Guard is following the direction of the Congress in a prudent manner and cost effective manner.

Both the Senate Appropriations Committee and the House Appropriations Committee cited cost effectiveness as the reason for terminating the conversion of National Guard technicians in fiscal year 1983.

The 1,200 conversions that are programed are cost effective. A report prepared by Management Consulting Research, Inc., for the Deputy Secretary of Defense for Reserve Affairs concluded that the 600 Army Guard and 600 Air Guard military technician conversions scheduled for fiscal year 1983 are cost effective.

This study, dated October 29, 1982, shows that the Army National Guard conversions to full-time military positions will save more than $245,000 over the cost of the military technician program for the same positions. This results in a cost savings of 2 percent.

Additionally, the Air National Guard conversions will save more than $630,000 over the military technician program. This results in a cost savings of 3 percent.

Unfortunately, this report was not available to the Senate Appropriations Committee in September when the committee eliminated funding for the conversion of these technician positions for the National Guard.

Mr. President, I would like to read a portion of a letter from Hon. John O. Marsh, Jr., Secretary of the Army. In his letter, he outlines the adverse impact of the Senate Appropriations Committee's action.

Addition of a general provision to the fiscal year 1983 Appropriation Bill or a new "Continuing Resolution" to prohibit programmed conversions will impede the efforts of the Army to upgrade the readiness of its Reserve Component units and will deny to individual technicians the freedom to voluntarily assume military status.

The Secretary of the Army also points out that such a prohibition may be inconsistent with the labor management relations provisions of 5 U.S.C. 71 that grants authority to agencies to determine the number and kinds of positions to be used in accomplishing the duties of such agencies.

Additionally, Mr. President, I would like to read the views on this matter of Hon. Verne Orr, Secretary of the Air Force.

I strongly support the proposed conversions as both cost effective and mission enhancing. Our proposed mix of military technicans and full-time active duty guardsmen is based first and foremost on mission requirements; readiness is enhanced by the ability to provide a more dynamic full-time active duty guardsman resource in more military oriented areas and technicans where more stability is necessary. However, cost effectiveness has been and will remain a principal factor in the overall decision. Positions idenitifed for conversion require a wide range of experience in military duties and are better suited for full-time guardsmen.

I will request unanimous consent that both letters be printed in the RECORD in entirety at the conclusion of my remarks.

Mr. President, in my remarks here today I referred to labor union activity as a source of congressional concern in the military technician program and its adverse impact on command authority and discipline.

I would like to read to you a union flyer sent out by the American Federation of Government Employees. It is entitled "AFGE Victorious In Stopping Conversions."

AFGE has been successful in getting Congress to pass legislation which prohibits any further conversions of civilian technicians to military status for fiscal year 1983!

It goes on to say:

Our success on Capitol Hill would not have been possible without the extensive grassroots support which you provided and the thousands of letters which you sent to your Congressmen and members of the House and Senate Appropriations Committees.

Mr. President, we are all concerned about employment and the American Federation of Government Employees is rightly concerned about their members losing jobs.

No military technician will lose his job over conversion to full-time military status. The Chief of the National Guard Bureau and the Secretaries of the Army and Air Force have assured me that only vacant positions and those personnel requesting conversion will be converted.

Certainly in our democratic society the American Federation of Government Employees would not stand in the way of someone who voluntarily desires to wear the military uniform of his country on a full-time basis.

I would like to quote their assurances from the Chief of the National Guard Bureau.

If the conversion program is allowed to proceed as programmed, we will consider for conversion only vacant technician positions and assure that military technician positions will not be abolished while incumbered for the purpose of changing them to military status. Military technicians will be allowed to change to military status only voluntarily; no involuntary conversions will be directed.

The Secretary of the Army.

The Army, as a matter of policy, does wish to inform you that in 1983 it will consider for conversion only vacant positions or those technicians who volunteer for conversion, and will not eliminate any technician position as long as an incumbent chooses to remain in the technician program.

The Secretary of the Air Force.

. . . our proposal is not forcing any involuntary conversions to full-time active duty. Thus, we have minimized personnel turbulence that might otherwise result.

In summary, Mr. President, the 1,200 conversions scheduled for fiscal year 1983 could save the Army Guard and the Air Guard 2 percent and 3 percent respectively, and only vacant positions and voluntary conversions will be changed to full-time military status.

I ask unamious consent that the various documents to which reference has been made be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[The material referred to will appear in a subsequent issue of the RECORD.]

Mr. MELCHER. Mr. President, I want to express my concern over the proposal of Senator THURMOND'S amendment providing for the conversion of 600 Air National Guard and 600 Army National Guard technicians to full-time military positions. The proposal has been considered by the Appropriations Committee and found to be flawed and they rejected it.

The Defense Appropriations Subcommittee opposed the continued conversion of civilian technicians to full-time military positions. In its report on the defense appropriations bill, the committee said:

The cost effectiveness of any additional conversions * * * is questionable in light of the increased pay and allowances military members now receive. Accordingly, the Committee directs the Department to make no further conversions. * * *

The committee also directed the Department of Defense to increase civilian manpower ceilings in the Army and Air Force to fill these positions.

I have heard the arguments by the proponents of converting civilian technician positions to military slots. They say that it improves the Guard's capabilities and makes the Guard units more combat ready. That may be true, but is it worth the additional money it costs. The Defense Appropriations Subcommittee says no, and I agree with them.

I personally know many of the civilian technicians who work for the Air National Guard at Great Falls, Mont., during the week and serve in their allotted weekend duties in the Air National Guard. The same is true of civilian technicians for the Army. They are committed and capable people and they serve us well. There is no need that these positions be filled by full-time military personnel.

When I was first appraised of this situation, I was told that the civilian positions had been eliminated by the Appropriations Committee and therefore it would be necessary to create an equal number of full-time military slots to keep the Guard's manpower up to strength. However, that is not the case. The Appropriations Committee directed the Defense Department to raise the civilian manpower ceilings to make sure that we had sufficient numbers of civilian technicians available for the Guard's mission.

The amendment seeks to convert civilian technician positions to full-time military positions. I do not agree that this is a wise policy, and it is likely that the final decision of the conference committee considering the final report will also reject amendment.

CONVERSION OF NATIONAL GUARD TECHNICIANS TO FULL-TIME MILITARY POSITIONS

● Mr. EXON. Mr. President, I rise in support of the amendment offered by my colleague, the senior Senator from South Carolina.

As we come to rely more and more on our National Guard and Reserve Forces, it is imperative that we enhance the readiness and deployability of our Guard units. One way to accomplish this goal is to allow the limited conversion of certain civilian technicians to full-time military positions.

I believe that we must maintain the citizen-soldier concept of our National

Guard, Mr. President. If I thought that support of this amendment would, in any way, endanger that concept I would not be here today.

The plain and simple fact is that our Army National Guard provides approximately 30 percent of the combat divisions in our overall total Army Force; 70 percent of the separate brigades; 30 percent of our special forces groups; 40 percent of our armor battalions; and 60 percent of our field artillery battalions.

Our Air National Guard provides over 60 percent of our continental air defense; about 20 percent of our tactical fighters; roughly 20 percent of our aerial refueling; over 30 percent of U.S. tactical airlift; and over 40 percent of the tactical reconnaissance in our total Air Force.

Mr. President, we are today relying on our Army and Air National Guard as never before. These forces must be ready to go to war on a moment's notice. It is our job here in the Congress to insure that they have the resources—human as well as equipment—to get the job done. The full-time manning program is one of those resources which the Guard needs.

I urge the adoption of the amendment.●

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. Mr. President, I yield back the remainder of my time.

Mr. THURMOND. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1540) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, the next order would be for the Senator from Connecticut (Mr. DODD).

Mr. PROXMIRE. Mr. President, he is on his way to the Chamber. He should be here any moment.

Mr. HATFIELD. Mr. President, I yield to the Senator from Connecticut for his amendment.

Mr. President, I only want to say, first, that all Senators who have amendments should be on the floor because otherwise we are going to just drop the Senator to the bottom of the list and he will have to wait. We cannot just wait around for Senators to drift in. If any Senator has an amendment which has a unanimous consent agreement, he should be on the floor ready to take it up any moment because some Senators are withdrawing their amendments or planning to withdraw their amendments, and that means we drop down to the next slot.

We are going to push this bill through, and I am going to ask for third reading if we have no amendments.

UP AMENDMENT NO. 1541

(Purpose: To declare congressional support for restrictions on certain types of operations in Central America)

Mr. DODD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. DODD) proposes an unprinted amendment numbered 1541.

To the end of H.J. Res. 631, add a new section as follows:

"SEC. . Congress hereby declares that no funds should be obligated or expended, directly or indirectly, after January 20, 1983 in support of irregular military forces or paramilitary groups operating in Central America."

Mr. DODD. Mr. President, I think this amendment speaks for itself for those who heard it read. Basically, it amounts to a policy declaration by this body that no funds should be expended directly or indirectly in support of paramilitary activities operating in Central America.

I should say at the outset, Mr. President, that I offer this amendment with a degree of reluctance. I wish there was a more proper vehicle which would enable us to conduct a longer and more detailed debate about what I consider to be a very important matter.

Mr. President, I would prefer that we were offering this at another time when we had more than 30 minutes to debate. It is what I consider to be one of the most pressing and threatening foreign policy issues that this country faces.

Mr. President, I offer this amendment not because I am in any way interested in supporting, defending, or apologizing for Sandinistas in the Government of Nicaragua or the Government of Honduras, but because of my deep concern of what I believe our country is about to enmesh itself into unwittingly. It is sort of a deja vu of 20-odd years ago when we began a similar set of activities without the kind of public, open debate about a set of activities which eventually threw us into a larger conflict.

Had we then, at the outset, had a better opportunity to debate the rationale for our original decisions, we might have dealt with the larger issues we confronted later more intelligently.

I happen to believe, Mr. President, that we are presently involved, or could be involved, in a far more expanded conflict in Central America than already exists. We are all too well aware of the problems in El Salvador and Guatemala, and we certainly are aware of the potential threats that are posed by the Government of Nicaragua.

One of the reasons that we run the risk for an expanded conflict in Central America is because we may be supporting paramilitary groups in Central America which are determined in their way, whether or not we are, to overthrow the Government of Nicaragua.

I believe that that kind of activity is going to lead exactly to that result. There will be a substitute amendment offered to this amendment which I have offered this morning. The substitute amendment will say that none of the funds in this particular continuing resolution can be expended for the overthrow of the Nicaraguan Government. That amendment was offered in the other body as a substitute to an amendment not dissimilar from the one that I am offering. There are some major distinctions between those two propositions.

One is that the continuing resolution, while it contains funds or does potentially contain funds—we do not know the exact amount—to support paramilitary, covert activities, does not include all funds we have authorized for those activities. What I am suggesting is that, by putting a prohibition on these particular funds, we do not deal with all funds that could be used for those activities.

Second, the amendment that will be offered is limited to the overthrow of the Nicaraguan Government and to support a conflict between Hondorus and Nicaragua. That is the House language, and I assume that that will be the same language offered this morning. I suggest that there are any number of ways of circumventing that prohibition. In effect, it is going to provide a green light for the continued activity that we have seen reported, over and over again, in the last several weeks and months, suggesting that we are already deeply involved in a broader conflict in Central America.

Third, the extent of the substitute that will be offered as a substitute to my amendment is extemely restrictive. It says that none of the funds, notwithstanding any other provision of law, shall be expended for that particular purpose I have just identified.

My amendment is more open ended, more of a declaration of policy. It is a policy statement. It allows for greater flexibility in that sense than what will be offered by the substitute to this amendment.

For those three reasons, Mr. President, I believe that the approach I am suggesting this morning gives us greater flexibility, is not as binding as what will be offered, yet makes the clear policy declaration that we have to stop this activity before it expands even further and we find ourselves once again unwittingly drawn into a con-

flict far larger than what we already have in Central America.

I do not think there is anybody in this Chamber who has read a newspaper or magazine for the last month or so who does not believe that there are groups operating on the Honduran border that have as their purpose the overthrow of the Nicaraguan Government. I do not think anybody doubts that. There are the old Guardia troops, Somoza troops, operating on that border. What we are proposing to do is cut off our paramilitary support for them.

There will be arguments that we do not intend to overthrow the Nicaraguan Government. I do not think that avoids the responsibility that we are supporting those who are. That is what I believe we are doing and that is what my amendment is designed to curtail.

Mr. President, my amendment addresses the issue of covert support for military operations in Central America, and it addresses this issue with a clear-cut congressional policy declaration a declaration which puts Congress on record in opposition to support for irregular military forces or paramilitary groups operating in Central America.

Mr. President, going back to March of this year, there has been a growing number of authoritative press accounts which leave little doubt that the present administration is providing support, in one fashion or another, to paramilitary groups and irregular military forces operating in Central America.

On March 10, for example, the Washington Post reported that President Reagan had authorized the Central Intelligence Agency "to build and fund a paramilitary force of up to 500 Latin Americans, who are to operate out of commando camps along the Nicaraguan-Honduran border." Similarly, and more recently, Newsweek in its cover story of November 8, claimed that in December of last year, the Reagan administration approved a $20 million CIA plan to create a 500-man paramilitary force based in Honduras to cut off Nicaraguan supplies to Salvadoran leftists. In further describing this program Newsweek added, "The plan's unofficial goal: To undermine or overthrow the Sandinistas."

Shortly after the appearance of the Newsweek article, the New York Times said it had confirmation of the basic outline of the program from senior administration officials who, at the same time, disclaimed any administration intention of bringing down the Managua-based government. The Time article began this way: "The United States is supporting small-scale clandestine military operations against Nicaragua intended to harass but not to overthrow the Nicaraguan Government, senior administration officials said today." In providing additional details, the Times article went on to say:

A senior national security official insisted that the scope of clandestine operations was limited to hit-and-runs raids into Nicaragua by small paramilitary units based in Honduras, skirmishes with Nicaraguan troops along the Honduran border, and financial support for political opponents of the Sandinist government.

The official said that no Americans were directly involved in the paramilitary operations, but acknowledged that the CIA was providing money and military equipment to the units. He added that Americans were also helping to train anti-Sandinist forces, which are made up primarily of Nicaraguan refugees.

In keeping its readers informed and up to date, Time magazine reported earlier this month:

A U.S. intelligence source in Honduras estimates that there are not about 200 CIA personnel in Honduras, four times as many as previously reported. Biweekly flights from Panama bring in rifles, machine guns, mortars, and grenade launchers. The Contras themselves have grown in number from about 500 in 1980 to as many as 4,500 now.

Mr. President, I ask unanimous consent that various articles and editorials on this subject be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 10, 1982]

U.S. APPROVES COVERT PLAN IN NICARAGUA

(By Patrick E. Tyler and Bob Woodward)

President Reagan has authorized covert operations against the Central American nation of Nicaragua, which, administration officials have charged, is serving as the military command center and supply line to guerrillas in El Salvador.

According to informed administration officials, the president has ruled out the use of U.S. military forces in direct anti-Nicaraguan operations. But the authorized covert plan directs the CIA to begin to build and fund a paramilitary force of up to 500 Latin Americans, who are to operate out of commando camps spread along the Nicaraguan-Honduran border.

The officials stressed that it will take months for the paramilitary force to be recruited, trained and positioned to begin operations. They did not say precisely when the cross-border operations are scheduled to begin

As part of this plan, the commandos eventually would attempt to destroy vital Nicaraguan targets, such as power plants and bridges, in an effort to disrupt the economy and divert the attention and the resources of the government. CIA strategists believe these covert operations inside Nicaragua will slow the flow of arms to El Salvador and disrupt what they claim is a Soviet- and Cuban-controlled government in Nicaragua.

Operating under a $19 million CIA budget, the planned 500-man force could be increased in size if necessary, officials said. The CIA force would be supplemented by another Latin American commando force of up to 1,000 men—some of whom currently are undergoing training by Argentine military officials.

This is the plan for CIA covert operations first reported in The Washington Post on Feb. 14 as part of the Reagan administration's strategy in the region. At the time, it could not be determined whether the president had authorized the CIA's plan to build a paramilitary force against Nicaragua.

Several informed sources now say that the president did formally authorize the proposal, but the precise timing of his authorization could not be determined. It may have occurred late last year.

The covert action proposal was developed by the CIA and first presented in detail to President Reagan by CIA Director William J. Casey at the Nov. 16 meeting of the National Security Council. It was supported by Secretary of State Alexander M. Haig Jr. and Defense Secretary Casper W. Weinberger, according to knowledgeable officials.

Administration officials familiar with the CIA covert program stressed that the decision to focus on economic targets was based on a desire to disrupt the Nicaraguan arms supply line to El Salvador in a manner that is relatively inexpensive and least threatening to the civilian population.

"If you blow up a dam, you cause a lot of trouble, but you're not killing people," one high-level official said.

In his Feb. 18 press conference, Reagan was asked if the United States was planning covert operations in Nicaragua, but he declined to comment.

Nicaragua currently is ruled by the Sandinista National Liberation Front, whose guerrilla forces overthrew the government of dictator Anastasio Somoza in July 1979.

Honduras has a close military relationship with the United States, and Honduran officials fear that the political upheaval in El Salvador and Nicaragua will spill into their country. As a separate part of the U.S. stragedy in the region, the U.S. military currently is engaged in two operations in neighboring Honduras to indirectly support anti-Nicaraguan efforts, informed administration officials said.

According to highly classified NSC records, the initial CIA proposal in November called for "support and conduct of political and paramilitary operations against the Cuban presence and Cuban-Sandinista support structure in Nicaragua and elsewhere in Central America." The CIA, in seeking presidential authorization for the $19 million paramilitary force, emphasized that "the program should not be confined to that funding level or to the 500-man force described," the records show.

Covert operations under the CIA proposal, according to the NSC records, are intended to:

"Build popular support in Central America and Nicaragua for an opposition front that would be nationalistic, anti-Cuban and anti-Somoza.

"Support the opposition front through formation and training of action teams to collect intelligence and engage in paramilitary and political operations in Nicaragua and elsewhere.

"Work primarily through non-Americans" to achieve these covert objectives, but in some cases the CIA might "take unilateral paramilitary action—possibly using U.S. personnel—against special Cuban targets."

After the initial presentation, the CIA proposal was turned over to the national security planning group, a subcommittee of the NSC, as a draft "presidential finding," which states the need for specific covert operations. Under national security statutes, no funds can be expended for covert actions "until the president finds that each such op-

eration is important to the national security of the United States."

Senior U.S. defense and intelligence officials have said in recent weeks that without a slowdown in the arms supply to El Salvador by air, land and sea routes from Nicaragua, the position of government forces in the war-torn country could deteriorate rapidly, potentially prompting an escalation of Salvadoran requests for U.S. military assistance. Such requests are likely to run into strong congressional and public resistance.

According to administration officials, the covert plan is part of a broader program through which the administration hopes to achieve long-term stability in Central America by creating, nurturing and supporting new political coalitions of centrist forces in Nicaragua and other key countries.

Central America currently is experiencing a series of armed rebellions, and officials here say U.S. intelligence has obtained detailed outlines of Soviet and Cuban long-term financial, military and political plans to support armed insurgencies in the region. This outline of Soviet intentions—along with intelligence of current Soviet and Cuban activity in the area—has alarmed the president's national security advisers and, according to officials, is a central reason for the administration's covert program.

Several senior officials argue that intelligence gathering efforts in Central America lapsed significantly under presidents Nixon, Ford and Carter and that each of those administrations underestimated the problems of Central American governments and the strength of opposition movements.

The CIA station in El Salvador, for example, was closed for about five years—roughly from 1973 to 1978—to save money, and the United States had virtually no intelligence sources there during that period.

"It takes a long time to develop this intelligence, spread money around and put people in crucial places and make the kind of friends we need," one official said last week.

Only in the pastn crucial places and make the kind of friends we need," one official said last week.

Only in the past year, officials said, has the United States learned details of what the Soviets and Cubans hope to gain in the region. U.S. intelligence reports now show that in 1978 the Soviets and Cubans committed the money and resources for a major effort to support Cuban-style rebellions in Central America.

One senior official said, "If you look what the goals were in 1978 and realize how far they have come by 1982, then where they want to be in 1987 has to be taken seriously and that would concern anyone" in the United States.

Other officials said they are alarmed by convincing intelligence reports that one Soviet-Cuban goal in the region is the development of an active insurgency to destabilize Mexico during this decade.

Some intelligence reports reaching the president support the administration charge of an increased Soviet and Cuban threat in Central America. One recent report indicates that the Soviet Union is training Latin American pilots to fly the most advanced Soviet fighter, the Mig 25 Foxbat, which has a radar system capable of directing other planes in a large battle area.

The nationalities of the Latin American pilots being trained on the Foxbat are not clear. Cuba already has acquired a squadron of Mig 23 supersonic fighters, and previous intelligence reports have confirmed that Nicaraguans have trained on less sophisticated Mig fighters.

Further, Guatemala, potentially the most prosperous Central American country, is also being threatened by a leftist insurgency and the most current CIA estimate is that the government will undergo a major change of status within 18 months.

While some members of the administration remain skeptical about broad claims of spreading Soviet and Cuban influence in the region, knowledgeable officials say this is the interpretation that has been largely adopted by President Reagan.

[From Newsweek, Nov. 8, 1982]

A SECRET WAR FOR NICARAGUA

The smoky bar in Tegucigalpa was a cousin to Rick's Café in "Casablanca," a nightly gathering place for the dangerous and the desperate in Honduras. Squeezed into a corner one evening last week were four Argentine military advisers, speaking machine-gun Spanish and occasionally stealing furtive glances around the room. A half-dozen Americans stood in a loose line at the bar, drinking beer and talking too loudly about guns. In the center of the room, grouped around a table that listed far right, were seven men drinking rum. One of them wore a gold earring. He explained that the seven men were Nicaraguan exiles who belonged to various factions of la contra, a band of counterrevolutionaries trying to topple the leftist Sandinista regime. They were ready to move toward Managua, one of the men said. "We just need to hear from The Boss that it's time to go." Who was The Boss? The man with the earring was impatient with stupid questions. "He's the man you call 'Mr. Ambassador'."

The envoy in question was John D. Negroponte, the American ambassador in Honduras. Official sources told Newsweek last week that Negroponte is overseeing an ambitious covert campaign to arm, train and direct Nicaraguan exiles to intercept the flow of arms to leftist guerrillas in El Salvador. But the operation has another objective: to harass and undermine the Cuban-backed government of Nicaragua. The project traces back to Jimmy Carter's efforts to support Nicaraguan moderates. Ronald Reagan added the task of cutting the Cuban-Nicaraguan arms pipeline to El Salvador. The plot, launched mostly with popguns and machismo, now threatens instead to destabilize Honduras, to fortify the Marxists in Nicaragua and to waste U.S. prestige along the tangled banks of the Coco River. Worse, U.S. officials concede there is a danger that the operation could provoke a Nicaraguan counterattack on Honduras that could drag the United States directly into the conflict. "This is the big fiasco of this administration," says one U.S. official. "This is our Bay of Pigs."

Reports of secret operations along the Nicaraguan-Honduran border have circulated for months. But Newsweek has uncoverd extensive details of a campaign that has escalated far beyond Washington's original intentions. Administration sources told Newsweek that there are now almost 50 CIA personnel serving in Honduras—certainly the longest manifest in Central America. That team is supplemented by dozens of operatives including a number of retired military and intelligence officers. Argentine military advisers are supporting the operation in Honduras; separate anti-Sandinista activities are underway in Mexico and Venezuela.

Camps: The fighting forces are drawn from 2,000 Miskito Indians, an estimated 10,000 anti-Sandinistas in Nicaragua itself and an assorted group of former Nicaraguan National Guardsmen and supporters of deposed dictator Anastasio Somoza. They have set up 10 training camps divided between Honduran and Nicaraguan territory. Their hit-and-run forays against Nicaraguan bridges, construction sites and patrols are designed to harass the Sandinistas while CIA operatives cast around for a moderate new Nicaraguan leadership. Among others, the United States tried to cultivate Edén Pastora—the former Sandinista hero known as Commander Zero—after he resigned from the government in July 1981. That effort failed. "Pastora is a man who would not accept a penny from the CIA," swears one associate. "If he did, I would kill him."

The operation posed some very disturbing questions: did it violate the spirit if not the letter of congressional restrictions on dirty tricks—and would it only make a bad situation in Central America even worse? A congressional-committee spokeman said that CIA Director William Casey (who personally inspected the operation in Honduras) has adequately briefed congressional oversight committees. But some congressional sources complained that the CIA's briefings had been bland and disingenuous. And others wondered pointedly whether the administration had used approval for plans to cut off the flow of Cuban arms to rebels in El Salvador as a cover for a more reckless plot to topple the Sandinistas. "This operation's just about out of control and people are getting panicky," said one source. According to one U.S. official, Secretary of State George Shultz was "fuming" over the mess. Said another, "Only Shultz can change it—if there is still time."

Moderates: Washington's covert involvement in Nicaragua began even before Somoza fled the country. In 1978, with the dynasty nearing collapse, Jimmy Carter signed a "finding," as required by post-Watergate law, authorizing under-the-table CIA support for democratic elements in Nicaraguan society, such as the press and labor unions. The Carter administration correctly recognized that with the Somoza regime crumbling, Cuban-backed leftist forces would try to squeeze out more moderate elements. American financial support for Nicaragua's opposition forces has continued, and it remains one of the many items on the CIA's yearly "Classified Schedule of Authorizations."

After the Sandinistas seized power anyway, the Reagan administration took office worried that Nicaragua would become a platform for Cuban-sponsored subversion. Ronald Reagan's first national-security adviser, Richard Allen, set to work on plans to harass the Sandinistas. Former Secretary of State Alexander Haig and Thomas O. Enders, assistant secretary of state, became increasingly concerned that the Sandinistas were providing weapons to leftist rebels in El Salvador—much of the hardware shipped across Honduras. In several meetings, a well-placed administration source says, Enders spoke about the need to "get rid of the Sandinistas." "The driving forces behind this operation were Haig and Enders," said one insider. "Both the agency and the Pentagon had qualms."

Joint action: At first, the administration's planning focused entirely on how to cut the Salvadoran rebels' supply lines from Cuba and other communist nations through Nicaragua and Honduras into El Salvador. Haig directed then State Department counselor Robert McFarlane to prepare a series of

option papers. Senior Defense Department officials rejected a blockade of Cuba or Nicaragua, pointing out that much of the arms traffic moved by air. Administration officials say McFarlane then asked the CIA to explore possible covert action against the rebels' supply lines, an option that proved more promising and less politically risky than the direct use of U.S. forces. Early on, Haig's ambassador at large, Gen. Vernon Walters, and other officials discussed possible joint covert operations with conservative Latin American governments, including Argentina, Guatemala and Honduras.

Last December Reagan signed his own "finding," expanding on Carter's and authorizing the CIA to contact dissident Nicaraguans in exile and to conduct political and paramilitary operations to interdict weapons shipments from Nicaragua to Salvadoran guerrillas. A second document, known as a "scope paper," outlined permissible operations and their estimated cost. In its first stage, the plan was to create a 500-man, U.S.-trained paramilitary force at a cost of $19.9 million. Argentina would train an additional 1,000-man force. "The focus was on action which would interdict the flow of arms to guerrillas in the friendly countries, "said one source who has read both documents." "Nowhere does it talk about overthrow." But one senior official involved in the decisions conceded that "there are secondary and tertiary consequences which you can't control"—such as the fall of the Sandinista government.

As U.S. officials tell it, the size of the CIA station in Honduras doubled, bringing it to about 50, with orders to help interdict the arms supplies by training the Honduran intelligence and security forces in intelligence gathering and interrogation, providing logistical support for raids into Nicaragua, aiding the Honduran coast guard and helping the Argentines and other non-Nicaraguans train anti-Sandinista Nicaraguans in sabotage operations using small arms supplied by the Americans.

Washington had used Honduras once before as a base for a destabilization program: in 1954, when the United States toppled the reformist government of Jacobo Arbenz in Guatemala. In the view of the Reagan administration, Honduras itself had become dangerously vulnerable to the Cuban-backed spread of communism. Honduras had managed to remain relatively calm and largely unaffected after the 1979 Nicaraguan revolution by simply looking the other way as Cuban-Nicaraguan arms passed through to El Salvador. "There was kind of an understanding that if we looked the other way, the subversivos wouldn't look our way, "said one Honduran Army officer.

Spearhead: That changed when John Negroponte arrived. He was handpicked for the job and reported to Enders, with whom he had worked in Southeast Asia during the Vietnam War and later under then national security adviser Henry Kissinger. "Negroponte is the spearhead," said one Washington insider. "He was sent down there by Haig and Enders to carry out the operation without any qualms of conscience."

Negroponte forged close ties with powerful Hondurans, especially the commander of the armed forces, Gen. Gustavo Aldofo Alvarez, who is still the most powerful Honduran in the country despite the election in January of President Roberto Suazo Córdova, the first civilian president in nine years. "They discuss what should be done, and then Alvarez does what Negroponte tells him to," a member of the military high command said matter-of-factly. The two appear to dislike each other personally, said one aide to Alvarez, because "they both run the Army, although only one of them has the title for that job." Alvarez's G-2 military-intelligence agents act as liaisons to the contras and Alvarez himself reports to Negroponte. In addition, two officials in Washington said, Alvarez's military is the main conduit for small arms being delivered to the Nicaraguan exiles and is the main link to Argentine military advisers in Honduras. Alvarez has reason to cooperate: in the past two years, total U.S. assistance to honduras has totaled $187 million. A $78.3 million aid package has been proposed for 1983.

The interdiction project proved more difficult than expected. The rebel supply lines were elusive: as the Honduran Army cracked down on arms shipments across land, the leftists began receiving aid by sea and air. At the same time, the Sandinistas undertook a massive military buildup. Under the new pressures, the plan spread beyond its original bounds. "It became clear that cutting the roads from Nicaragua wasn't enough," said one source. "It was necessary to raise the cost to the Sandinistas and the Cubans of meddling in El Salvador."

Problems: That meant, at the least, cross-border harassment—and that, too, proved more difficult than Washington planned. First, according to sources in Honduras, the Argentines reduced their participation in the covert training program and in the overt training of the Honduran Army after the outbreak of the Falklands War. (Washington officials said, however, that there were about 20 Argentine trainers in the country last week and that the numbers had not changed appreciably during the Falklands War.) Then the Miskito Indians, who had been forcibly driven from their homes along the Honduran-Nicaraguan border, proved eager but unpromising modern soldiers. "The Indians aren't very quick learners," says one knowledgeable source.

Such problems soon led to strange bedfellows. When the covert policy was first developed, direct U.S. dealings with exiled Somocistas were officially ruled out. "Our guidelines are pretty damn firm," says one senior U.S. official. "At no time has there been any authorization to deal with the Somoza people." But Negroponte, under pressure from Haig and Enders to produce some successes against the Sandinistas, turned to the only promising group available—the Somocistas "It was Negroponte who began dealing with the guardsmen and the Somocistas," says one U.S. official, "That wasn't the original plan. He had to improvise." Sources in both Washington and Honduras say the ambassador has been careful to deal with the Somocistas through intermediaries to preserve his deniability. Asked about U.S. support for Somocistas or other contras last week, Negroponte said: "No comment, no comment and a big fat no comment." Of his own contacts, he said, "The only Nicaraguan I know personally is the Nicaraguan ambassador to Honduras. The only Nicaraguan I deal with in any official way is the ambassador."

At the same time, the Reagan administration looked for a leader around whom to build the opposition. No one connected with the hated Somocistas would do. The most attractive candidate was Pastora—Commander Zero. After leaving the government in 1981, he suddenly surfaced in Costa Rica last April, denounced his former comrades as "traitors and assassins" and announced: "I will drag them with bullets from their mansions and Mercedes-Benzes." The CIA first tried to cultivate Pastora after he left the Sandinista government, but he would not cooperate. After Negroponte began to deal with the Somocistas, any chance of recruiting Pastora probably was lost.

Alienated: Negroponte now has frozen him out of the action. Pastora and other disillusioned Sandinistas, such as former junta member Alfonso Robelo, have been told that "Honduras is closed to us, we cannot work here," says one of them. Newsweek has learned that Pastora has made two clandestine trips to Honduras since spring to try to win support and establish base camps. Both times he was kept under virtual house arrest by the military. "He couldn't make a phone call, let alone organize a contra group," says one Honduran military officer. "The orders came from Alvarez himself that our American friends did not want this guy to have any part of the game." As a result, despite Washington's intentions, Negroponte has alienated the only group likely to attract widespread support inside Nicaragua. "There's no question that Nicaragua is ripe for a change," said one European observer in the region. "But the U.S. is supporting the only wrong, the only truly evil alternative."

After Negroponte and the Somocistas became partners, the new American allies began to force Washington's hand. The Somocistas bivouacked in Honduras were already trained soldiers, backed by wealthy exiles in Miami. With the added boost of tacit U.S. support, they soon took a commanding position among competing contra groups. They also developed their own private plan numero uno: to move the contra camps that remain in Honduras across the border into Nicaragua, then move the camps already established in Nicaragua farther down toward Managua and, finally, past the capital into the south. When the time is right, the Somocistas say, they will draw their loose circle of camps together in toward Managua and force the Sandinistas out. And then? "Come the counterrevolution, there will be a massacre in Nicaragua," promises one contra officer. "We have a lot of scores to settle. There will be bodies from the border to Managua."

That obviously was not what Washington had in mind. Despite the dirty little war on the ground, there is little support in Washington either for a massive contra invasion or for a border war between Nicaragua and Honduras. Instead, the constant pressure on Nicaragua from the border areas is designed to keep the four-year-old Sandinista government in a jumpy state of alert. While U.S. officials maintain that the primary objective of the operation remains cutting off the supply routes, they also hope that a threatened Sandinista government will bring itself down by further repressing its internal opposition, thereby strenghening the determination of moderate forces to resist. If that happens, says one U.S. official in Central America, "then the Sandinistas will fall like a house of cards in a wind."

Thin line: Although the Reagan administration and the Somocistas disagree on strategy, U.S. involvement with the contras has escalated. When equipment—helicopters and radios for example—breaks down, Americans repair it. Americans established the guerrillas' training regime, and arming the contras was easy: the massive American buildup of the Honduran military freed older Honduran equipment, which was

shipped off to counterrevolutionary bases. The Americans were soon treading the thin line between instructing insurgents and plotting the missions they were being trained for. Though Americans are expressly forbidden to go out on operations, one veteran of other paramilitary operations said: "Inevitably that happens . . . You lose your credibility with the people you're training if you hole up entirely."

Negroponte insists that his strategy precisely follows Washington's orders. But other sources claim that Negroponte censors embassy cables so that Washington will only know what he wants it to know, and that he seems to operate with little interference or second-guessing from superiors. "Haig and Enders gave Negroponte full autonomy," said one high-level insider in Honduras. Added another: "A lot of us think the ambassador should have a little more E.T. in him—that he should phone home now and then. But I'm sure his contention would be that 'home' would say, 'Go ahead and do what you think is best.' He only has to answer to himself."

In either case, virtually every knowledgeable official says that the operation needs firmer restraints. "It is reminiscent of the cable that went out, 'Order turkeys for the division' but got garbled so we ordered a division to Turkey," said one official.

The Hondurans themselves fear that their country might slip into the Central American line of fire. In September Honduran leftist guerrillas took more than 100 businessmen and officials hostage for eight days in San Pedro Sula. Tegucigalpa was blacked out after a power plant was dynamited. The Hondurans say they have evidence that both operations were masterminded by Salvadoran and Nicaraguan leftists. The Hondurans also claim to have cracked six safe houses in the past two months and found huge stocks of weapons and literature that connects the caches with the Sandinistas.

Any more violence could touch off a confrontation over security measures between General Alvarez and the still unsteady civilian government. Guerrilla attacks already have led to growing repression. For the first time in Honduras's modern history, right-wing death squads now appear to be operating. "There is a low level of violence and subversion now, and it would be an easy step to more aggressive government actions than are needed," worried a U.S. official—"followed by more aggressive subversion." America's secret war might thus have the intended effect—in the wrong country.

The operation has stirred up its intended target as well. The Sandinistas have used the contra attacks as an excuse to spend an estimated $125 million on defense this year, beefing up the Army and civilian militia while attacking what remains of a free press and private business. But Sandinista repression has not led to a noticeable upsurge of anti-Sandinista activity inside the country—perhaps because Nicaraguans now only see a choice between the Sandinistas and the hated U.S.-backed Somocistas. "Our operations along the Honduran border have only played into the hands of the Sandinistas," says one dismayed U.S. official.

Terrified: But other American officials see light at the end of the tunnel. The Sandinista leaders are "terrified to their Marxist cores," says one. They have made their first attempts in months to try to re-establish communication with the private sector—and with the United States. U.S. Ambassador to Nicaragua Anthony Quainton, who had been refused any official meetings with the Sandinista leaders, was astonished to find junta member Bayardo Arce waiting for him, unannounced, in the Foreign Ministry recently. On the verge of panic, one source said, Arce asked, in effect, "What is the price we have to pay to stay in power?"

Tensions could peak within the next few weeks. On Dec. 5 the United States and Honduras will begin joint military maneuvers near one of the most sensitive stretches of the Nicaraguan-Honduran border. The five-day maneuvers will include the U.S. Army, Navy and Air Force; they will simulate the freeing of an army garrison from cross-border invaders. A growing number of people on both sides of the border fear the simulation might preview a real war. Ronald Reagan will be visiting nearby Costa Rica on Dec. 4. Two months after he authorized the operation against Nicaragua, Reagan was asked how he felt, generally, about covert action to destabilize regimes. His answer: "No comment."

[From Newsweek, Nov. 8, 1982]

OUR MAN IN TEGUCIGALPA

John Negroponte, the U.S. ambassador in Honduras, doesn't look like the Ugly American. At 43, he is tall and baldish; his manner is studiedly bland. His deliberate, pause-filled conversation, says one frequent dinner guest, "prompts a keen desire for coffee." But another who knows Negroponte better calls him "a Machiavelli—only shrewder." He is street smart. He speaks fluent Spanish, French, Greek and Vietnamese. He reads Shakespeare. Says one Honduran official who has followed his progress, "He must love 'Julius Caesar'."

Negroponte's 12-month tenure in Honduras has been a bit imperious. At the Inauguration of President Roberto Suazo Cordova last January—the first civilian president in nine years—a messenger handed the new leader a four-page letter from the U.S. Embassy drafted by the new American ambassador. Encouraging a prompt "revitalization" of the ailing economy, the letter—using the imperative form of Spanish—directed the government of Honduras to take 11 specific actions, such as reducing taxes on mining companies and lifting some price controls. The government dutifully complied with many of the demands. Negroponte's influence steadily grew, and, it appears, so did his involvement in covert action against Nicaragua. "I'm not saying that the guy who gives all the orders here, even for covert ops, is Negroponte," says a Western source who knows. "But that guy wears Negroponte's suits and eats his breakfast. Do you get the picture?"

Negroponte's arrival in Tegucigalpa was something of a surprise. Few expected an ambassador of quite his caliber. "Anyone who thinks that I'm extremely ambitious just doesn't know me very well," he says mildly. But no one has ever called him an underachiever. "Knowing this administration's preoccupation with Central America and its worries about Honduras in particular, he set out to make a mark in Honduras that would be noticed all the way to the top," says a colleague who has known him for years.

Career: Educated at Exeter and Yale, Negroponte joined the Foreign Service at the age of 21 and rose quickly. He was a favored political officer in Saigon at the height of the war in Vietnam. He was sent as an emissary to the Paris peace talks, where he insisted that the United States was giving up too much to the communists. The young Negroponte was rewarded with a post at the National Security Council. After a falling-out with his onetime mentor, Henry Kissinger, who was then national-security adviser, Negroponte was exiled to Ecuador as political counselor, but he bounced back to become U.S. consul general in Thessaloniki, Greece.

Since coming to Honduras, Negroponte has worked hard to establish himself as something more than our man in Tegucigalpa. Fellow envoys are particularly galled by his habit of sending upbraiding cables when he disapproves of their actions. His efforts have not been as successful as he might have hoped: Hondurans in frequent contact with the ambassador say he was "deeply disappointed" and "personally hurt" that President Reagan chose to make Costa Rica his only stop in Central America during a planned five-day tour of Latin America at the beginning of December. The ambassador may be in for more disappointment. "His obsession to get to the top fast will be the very thing that brings him crashing down," concludes a foreign diplomatic colleague in Honduras. "The question is whether he might not bring a policy and the fragile government of Honduras down with him."

[From Newsweek, Nov. 8, 1982]

GETTING IN DEEPER—A TIMELINE FOR TROUBLE

Although the United States as steadily increased its military and economic commitments in Central America, the troubled region has only grown more volatile.

1978. The Carter administration authorizes the CIA to support moderate opposition groups in Nicaragua opposed to the dictatorship of Gen. Anastasio Somoza.

July 1979. Leftist Sandinista guerrillas topple Somoza and seize power. Hoping to influence the Sandinistas, the Carter administration continues U.S. aid.

March 1980. The junta in El Salvador announces agrarian reforms, triggering an upsurge in left- and right-wing violence. Congress freezes U.S. aid to Nicaragua, which is backing Salvadoran leftists.

January-March 1981. The Reagan administration takes office as the Salvadoran leftists launch a major offensive. U.S. Secretary of State Haig declares Washington will not remain passive in the face of communist subversion and threatens to "go to the source"—Cuba. The United States sends more military advisers and increased military aid to El Salvador.

August 1981. U.S. Assistant Secretary of State Enders visits Managua and promises aid and U.S. noninterference in Nicaraguan affairs if the Sandinistas will end their support for the Salvadoran leftists. The Sandinistas ignore the offer.

December 1981. At an OAS meeting in St. Lucia, the Nicaraguan foreign minister outrages Haig by flatly denying Managua is helping the Salvadoran rebellion. The Reagan administration announces it will train 1,500 Salvadoran government troops; secretly, it authorizes a $20 million CIA plan to create a 500-man paramilitary force based in Honduras to cut off Nicaraguan supplies to the Salvadoran leftists. The plan's unofficial goal: to undermine or overthrow the Sandinistas.

February 1982. Reagan unveils the $350 million Caribbean Basin development plan.

March 1982. The Sandinistas declare a state of emergency after antigovernment guerrillas infiltrating from Honduras dynamite two key Nicaraguan bridges.

April 1982. Edé Pastora, the legendary "Commander Zero" who defected from the Sandinistas in 1981, surfaces in Costa Rica; the CIA tried unsuccessfully to enlist him to lead the Honduran-based opponents of the Sandinistas. At about the same time, U.S. Ambassador Negroponte makes contact with former members of Somoza's Nicaraguan National Guard living in exile in Honduras.

August 1982. U.S. Air Force C-130s ferry Honduran troops to the Nicaraguan border where they can protect the anti-Sandinista forces from Nicaraguan retaliation. Washington plans to increase military aid to Honduras to $40 million in fiscal 1983. The Nicaraguan ambassador in Washington tells reporters a virtual state of war exists between Nicaragua and Honduras.

October 1982. Reagan sends letters to Mexico and Venezuela expressing his "great interest" in their recent proposal for restoring peace along the Nicaraguan-Honduran border and his support for a "fully verifiable regional agreement" that will ban arms imports and the use of foreign advisers in Central America.

[From Newsweek, Nov. 8, 1982]

THE CUBAN CONNECTION

Nicaragua's Sandinistas have always had their reservations about Fidel Castro. But the revolutionary bond between them is tight. U.S. officials say some 4,000 Cuban doctors, teachers and other civilian specialists help make Nicaragua run, while 2,000 military advisers bolster the police and Army. Cuban backing has fueled Nicaragua's own, extensive military buildup. And Cuban support has bolstered Nicaraguan assistance to leftist guerrillas in El Salvador. As Assistant Secretary of State Thomas Enders sees it, revolutionary Nicaragua has become little more than "a forward base of operations" for Cuba.

The administration has argued its case in a Haig-era report ominously titled "Cuba's Renewed Support for Violence in Latin America." According to the report, Castro helped unite the three Sandinista rebel factions under an effective fighting command in 1978. Cuba then pumped arms and advisers to the rebels through bases in Costa Rica. After the Sandinista triumph in 1979, Julián López Díaz, the head of Cuba's support mission in Costa Rica, became the first Cuban ambassador to the new Sandinista regime. "Nicaragua really did something to the Cuban leadership," says one U.S. official. "It was a psychological shot in the arm for Castro and his guerrilla elite."

Unprecedented: The Sandinistas promptly netted $28 million in military equipment funneled through Cuba from the Soviet Union and Eastern Europe, according to U.S. sources. The military buildup included 25 Soviet-made T-55 and T-54 tanks, 12 Soviet BTR armored personnel carriers, light airplanes, helicopters and SAM-6 and SAM-7 antiaircraft missile batteries. Tons of arms also arrived to supply a beefed-up 25,000-member Sandinista Army, backed by an unprecedented 80,000-strong civilian militia. Photographs from U.S. spy planes showed the Sandinistas lengthening airfields at Puerto Cabezas, Montelimar and Bluefields to carry MiG-21 fighters. U.S. officials claim that 50 Nicaraguan pilots are being trained in Bulgaria to fly the jets in at a time of the Sandinistas' choosing—threatening to overtake Honduras' air superiority in Central America.

Despite Cuban and Nicaraguan denials, the administration remains convinced that Salvadoran insurgents are supplied through Nicaragua with air, land and sea shipments of arms. Evidence has been harder to deliver, but in one U.S. example, Honduran police reportedly intercepted a truck coming from Nicaragua in January 1981 that carried Salvadoran rebel supporters, 100 U.S.-made M-16 rifles, 50 81-mm motar rounds and 100,000 other rounds of rifle ammunition. U.S. intelligence also charges that Nicaragua helped establish one of Honduras's new rebel bands, the Morazanist Front for the Liberation of Honduras.

The United States draws a formidable picture of the Cuban-Nicaraguan threat. But some experts are not so impressed. During a recent visit to Nicaragua, Lt. Col. John Buchanan, a retired Marine Corps pilot and critic of U.S. policy, was flown on an inspection tour in a Nicaraguan Air Force Cessna that crashed after landing. Buchanan found the Sandinistas' T-55 tanks decidedly ill-suited to tropical warfare. "With friends who would supply you T-55s," he told one Sandinista commander, "who needs enemies?"

Rhetoric: The Cubans have repeatedly offered to help the United States ease tensions over Nicaragua and throughout Central America—but Castro has always insisted on ground rules, including an end to U.S. covert assistance to Nicaraguan counterrevolutionaries. Critics charge that Washington's alarmist rhetoric has distorted American perceptions. Wayne Smith, retired head of the U.S. interests section in Havana, observes: "We have tended to exaggerate the level of Cuban involvement and assistance in El Salvador—but there is no question there has been some." The Sandinistas argue that the U.S. hostility forces them to take any allies they can get. "Some people here say Cuban assistance is an excuse to maintain a Sandinista dictatorship," says Father Xavier Gorostiaga, director of the Institute of Social and Economic Research in Nicaragua. "But in Nicaragua we say this is the only way to survive."

[From Newsweek, Nov. 8, 1982]

IS COVERT ACTION NECESSARY?

Why not destabilize Nicaragua? The Sandinistas are no friends of ours. They have cozied up to Castro and Brezhnev. They have funneled arms to the leftist rebels in El Salvador. They are building an army larger than they need for their own defense. By example, if nothing else, they pose a threat to right-wing rulers in places like Honduras and Guatemala—bad guys, to be sure, but our bad guys, and arguably no worse than the other kind. Which is the lesser evil: to unleash a little thuggery on the Sandinistas, who play by those rules, or to wash our hands of dirty tricks, for fear of getting into deeper trouble?

Why not arm the rebels in Afghanistan? As a matter of fact, we're doing that. Why not make trouble for Muammar Kaddafi? We're doing that, too. Why not send secret financial aid to Solidarity? If we're doing that, most Americans would approve—and would rather not know. There are worse things than covert action. But if a democratic nation is to meddle in the affairs of another country, it must abide by certain rules: don't violate your own principles. Don't make things worse. Don't get caught.

Subversion: The Central Intelligence Agency defines covert action as "any clandestine operation or activity designed to influence foreign governments, organizations, persons or events in support of United States foreign policy." That covers everything from planting a pro-American editorial in a foreign newspaper to staging coups or raising secret armies. Democratic ideals often do not square with covert action. Some conspiracies launched in defense of American democracy end up subverting democracy elsewhere. In Chile, for example, the CIA destabilized the government of an elected president, Salvador Allende, a Marxist who eventually was deposed and assassinated. But no covert action is a complete success unless it remains a secret, and secrets are hard to keep in an open society. In the case of Chile, the CIA tried to cover up by lying to Congress, and eventually a loyal American, former CIA Director Richard Helms, had to plead no contest to a false testimony charge. Covert action can turn out for the best, but the only truly successful operations run by the CIA are the ones we still don't know about.

Before World War II, intelligence work consisted mostly of gathering information and thwarting enemy spies. The wartime Office of Strategic Services, the CIA's predecessor, broadened the franchise to include propaganda, political action and dirty tricks of almost every description. After the war, the CIA helped the democracies of Western Europe to stave off communist subversion by subsidizing socialists, Christian Democrats and labor unions. In its heyday, which lasted until the mid-1970s, the CIA launched literally thousands of secret programs, most of them low-budget political and propaganda operations. But it didn't hesitate to stage coups and raise private armies, especially in the Third World. There were fiascoes, notably at the Bay of Pigs. Yet the CIA also managed to overthrow leftist regimes in countries like Guatemala and Iran and to wage a long "secret war" in Laos by transforming primitive tribesmen into a surprisingly effective army.

Rebirth: In the wake of Vietnam and Watergate, there was a virtual moratorium on the messier kinds of covert action. CIA operatives were discharged by the hundreds. Congress required that it be informed of every covert action. It was Jimmy Carter, the champion of human rights and open government, who presided over the rebirth of covert action. With Soviet troops occupying Afghanistan and American diplomats held hostage in Iran, the CIA began to rebuild its secret sources of power and persuasion. In Ronald Reagan's first year, the intelligence budget was increased by 20 percent, but according to one knowledgeable source, the number of clandestine operations has not increased dramatically since Carter left office.

In addition to the Nicaraguan adventure, Newsweek has learned, the CIA is currently running paramilitary operations in about 10 countries, including Afghanistan. The Afghanistan mission involves only a handful of CIA agents, but it has spent hundreds of millions of dollars on weapons shipped to the rebels through third parties, such as Egypt. Two separate covert actions have been aimed at Libyan leader Kaddafi. One was designed to stir up trouble for him in Chad (Libya has since withdrawn its occupation forces from that country). The other authorized contacts with Libyan dissidents in exile, in hopes of putting together a legitimate opposition. Briefing one congressional committee, CIA Director William Casey said such activities might lead to the "ultimate" removal of Kaddafi.

As a last resort, the destabilization or overthrow of a foreign government may be necessary, whether it involves subtle subversion or something nastier. Perhaps the same

result could be achieved in broad daylight by military action or overt diplomacy. But if the public doesn't want to go to war, and if diplomacy offers insufficient leverage, covert action is the only alternative to backing down. Such plots may offend a democracy's sense of decency—and seem expedient all the same. If the aim of a covert action is in line with what Americans generally consider necessary, prudent and moral, most of them will tolerate the means.

Plot: Even so, a free society should not sacrifice its principles lightly. Plots against foreigners may not be as necessary as some practitioners of the covert arts would have us believe. In 1960 the CIA decided to kill Patrice Lumumba, the former prime minister of the Congo, who appeared to be on the verge of regaining power and handing his country over to the Soviet Union. The U.S. plan to poison Lumumba was never carried out—in part, perhaps, because key CIA operatives thought murder was going too far. "I didn't regard Lumumba as the kind of person who was going to bring on World War III," CIA station chief Lawrence Devlin told a congressional committee years later. "I saw him as a danger to the political position of the United States in Africa, but nothing more than that." Eventually, Lumumba was arrested by his political opponents, who announced in due course that he had been killed after escaping from jail. "Murder corrupts," said another reluctant CIA officer, but "I'm not opposed to capital punishment." The Congo, now known as Zaire, remains a loyal, if politically shaky, friend of the United States.

Another drawback to covert action is that it often makes things worse—or at least no better. The killing of South Vietnamese President Ngo Dinh Diem, after a U.S.-sponsored coup, did not leave us with more effective allies in Saigon. Flirting with supporters of the hated Somoza clan will probably weaken the U.S. position in Nicaragua, not strengthen it. Furthermore, in a democracy, it is almost impossible to guarantee that a covert action will remain covert.

Keeping secrets requires the acquiescence, if not the connivance, of the press. In 1953 a New York Times reporter named Kennett Love decided not to write about the CIA's role in deposing leftist Iranian Prime Minister Mohammed Mossadegh—out of "misguided patriotism," Love said later. The story came out anyway. In 1961 John F. Kennedy persuaded the Times that a lot of what it knew about the impending Bay of Pigs operations shouldn't be printed. The Times withheld a big part of the story, the invasion was a disaster, and Kennedy concluded that the newspaper would have done him a favor if it had blown the whistle.

Whistles are blowing more frequently these days. Covert actions almost always come to light—in news reports from distant countries now wired into the global village, or in leaks from critics in Congress, the administration or the intelligence agencies themselves. Reporters know that the story will come out, and that if they don't print it, a competitor will. Even today, the news media will generally suppress a story if publication would put lives at risk or expose a secret that is indisputably vital to the national interest. Beyond that, some reporters and editors say that they will withhold a story if the covert action in question strikes them as necessary, prudent and moral. The press has no business making such value judgments. Its role in an open society is to print the news, fully and fairly, not to calculate the incalculable consequences and shave the truth a bit here and there.

Policy: A nation with global responsibilities still needs covert action as a third tool of foreign policy—one more forceful than diplomacy and less hideous than war. It is possible to conduct secret operations in a society like ours, but only the great difficulty. That is the way it should be for missions that so commonly violate basic democratic principles. The CIA may be at a disadvantage in competing with the machinations of closed societies, but no instrument of democratic government can be allowed to operate totally at odds with the ideals it is supposed to espouse and protect.

[From the New York Times, Nov. 2, 1982]

U.S. BACKING RAIDS AGAINST NICARAGUA

(By Philip Taubman)

WASHINGTON, NOVEMBER, 1.—The United States is supporting small-scale clandestine military operations against Nicaragua intended to harass but not to overthrow the Nicaraguan Government, senior Reagan Administration officials said today.

The officials denied a report in Newsweek magazine that the central Intelligence Agency was trying by covert means to topple the leftist Government in Managua.

A senior national security official insisted that the scope of clandestine operations was limited to hit-and-run raids into Nicaragua by small paramilitary units based in Honduras, skirmishes with Nicaraguan troops along the Honduran border, and financial support for political opponents of the Sandinist Government.

The official said that no Americans were directly involved in the paramilitary operations, but acknowledged that the C.I.A. was providing money and military equipment to the units. He added that Americans were also helping to train the anti-Sandinist forces, which are made up primarily of Nicaraguan refugees.

WITHIN LIMITS OF PLAN

The official contended that the military and financial aid fell within the limits of an overall plan for convert operations in Central America approved by President Reagan almost a year ago.

The plan, parts of which were disclosed in press accounts earlier this year, called for formation of a small paramilitary unit in Honduras to interdict Cuban supply lines to guerrillas in neighboring El Salvador and financial support for moderate political and business institutions and leaders in Nicaragua, according to Administration officials.

"We are not waging a secret war, or anything approaching that," a senior intelligence official said. "What we are doing is trying to keep Managua off balance and apply pressure to stop providing military aid to the insurgents in El Salvador."

Administration officials reacted strongly to assertions in Newsweek that the covert operations were "out of control" and that an expansion of the activities had been "improvised" by the American Ambassador in Honduras, John D. Negroponte.

CLEARED WITH WASHINGTON

"Negroponte, as the chief of mission, oversees the operations, but nothing is done without clearing it in Washington first," a senior intelligence official said.

Some Administration officials have advocated a more ambitious effort against the Sandinist Government, which seized power in 1979 after overthrowing the Government of Gen. Anastasio Somoza Debayle.

But Mr. Reagan and other top officials reportedly rejected the use of greater force partly because they considered it potentially counterproductive to overall American policy, and partly because intelligence officials said that the CIA did not have adequate resources to undertake a major paramilitary operation.

The result, some Administration officials said, was a limited covert operation, designed to sting but not incapacitate the Sandinists.

According to national security officials, the clandestine military activities were to have been supervised primarily by Argentina, which had organized anti-Sandinist paramilitary forces in Honduras 18 months ago, before the American involvement.

Initially, Argentina did take the lead in supplying and directing the units, which number 2,000 to 4,000 men, dispersed in several camps along the Honduras-Nicaragua border, according to American officials. But Argentine assistance waned after disputes developed between American and Argentine advisers and after the United States supported Britain in its war with Argentina over the Falkland Islands, Administration officials said.

[From Time Magazine, Dec. 6, 1982]

FEARS OF WAR ALONG THE BORDER

(By James Kelly)

The rumors are everywhere: a whisper in a café here, a banner headline in a newspaper there. Throughout Nicaragua and Honduras, there is fearful talk of a war breaking out between the two neighbors. In Nicaragua, the Sandinista government has declared five provinces bordering Honduras "military emergency zones." The regime is advising citizens to stockpile rice and other foods, while the papers in the Nicaraguan capital of Managua are filled with stories about alleged CIA plots. In Honduras, airfields are being built close to the border and soldiers gather in bars in the capital city of Tegucigalpa to talk strategy. The mood was perhaps best captured by a priest during Mass at the Church of St. Nicholas of Tolentino in Managua. "Please, God," he intoned, "do not let an invasion happen."

Nicaragua's war jitters are being fueled by the country's increasingly edgy, leftist Sandinista regime. Managua, however, has received a boost from a U.S. covert operation that began modestly enough as an effort to cut off the arms flowing through Nicaragua to leftist guerrillas in El Salvador, but that now appears to have grown into an attempt to topple the Sandinista government. As a result, the border between Honduras and Nicaragua has suddenly become a tinderbox where a few skirmishes could easily erupt into a full-scale shooting war. Even if war does not break out, critics contend, not only have the U.S. activities strengthened the resolve of the Sandinistas in Managua but the operations now threaten to destabilize Honduras itself.

Though the Sandinistas overthrew Dictator Anastasio Somoza Debayle and seized control of Nicaragua in July 1979, it was not until Ronald Reagan took office in January 1981 that relations between the two countries seriously deteriorated. The Administration began charging that the Sandinistas, backed by Cuba and the Soviet Union were funneling arms to leftist guerrillas in El Salvador, often shipping the weapons across the southern heel of Honduras. In December 1981, Reagan gave the go-ahead for a series of covert operations to snip the supply line and intimidate the Sandinistas. Included were financial aid for opposition groups within Nicaragua and military assist-

ance to the various contras (counterrevolutionaries) who conduct raids into Nicaragua from bases in Honduras. For a "covert" operation, the U.S. effort was curiously, perhaps deliberately, open. News of Reagan's decision began to leak out in Washington last March. In Honduras, the American agents were easily spotted because of their jeans, plaid shirts and short haircuts.

Until the U.S. came along, the contras could hardly be considered a threat to Managua. In the years following Somoza's downfall, small bands of former National Guardsmen operated along the Honduran border, making hit-and-run attacks inside Nicaragua. The Somocistas, as they were known, were demoralized and poorly organized. The U.S. set about forcing the various factions to unite under a central command, while the CIA began recruiting students, farmers and other civilians to beef up the force. Then, early this year, the Fuerza Democrática Nicaragüense (F.D.N.) was established to serve as a respectable political front group for the contras. Though the Guardsmen supposedly do not hold leadership positions in the F.D.N., they do, in fact, run some military operations.

The exact extent of U.S. involvement with the contras remains unclear. One option paper presented by the CIA to the National Security Council in November 1981 projected expenditures of $19.95 million to support a 500-man force. It is unknown what was eventually approved, but the strength of the contras has grown impressively in recent months. A U.S. intelligence source in Honduras estimates that there are now about 200 CIA personnel in Honduras, four times as many as previously reported. Biweekly flights from Panama bring in rifles, machine guns, mortars and grenade launchers. The contras themselves have grown in number, from about 500 in 1980 to as many as 4,500 now. Until last month, they operated from ten camps set up on the Honduras side of the border. But after the Sandinistas pinpointed the bases, they were moved to other locations, usually just a few miles away.

The Sandinistas have helped the insurgency with their heavyhanded campaigns agains the Miskito Indians and campesinos (peasant farmers). Suspecting separatist sentiments among the country's 100,000 Miskitos, most of whom live in the northeast region, Managua ordered the Indian towns burned and the villagers interned, but the measures only drove more Miskitos over to the contras. The campesinos are disgruntled by the Sandinistas' attempts to force them into communal farming; as a result, many of the 1,500 F.D.N. troops operating in the north-central section of Nicaragua are peasant farmers. Once recruited, they undergo a five-week CIA training course in Honduras. The instruction emphasizes ambush maneuvers but also includes marksmanship, compass work and radio operations. The campesinos return to Nicaragua in groups of 40 (including both men and women) under the supervision of five former Guardsmen.

In addition, the Reagan Administration enlisted the aid of Argentina to act as a sort of bagman for the operation. U.S. funds first were sent to the Argentines, who in turn funneled them to the contras. Argentina also sent 200 military advisers to Honduras, but it reduced its contingent to a skeleton crew during the Falklands war last spring. Meanwhile, Washington established its own links with the Honduran military. Honduran soldiers were sent to training camps in Panama run by the U.S. Army's Southern Command Group (SOUTHCOM) and standard field equipment was provided.

But at some point, according to a U.S. intelligence source in Honduras, the U.S. started to lose its grip on the entire effort and its goals. The F.D.N., for one thing, is interested not just in intimidating the Sandinistas but in starting a real war against Nicaragua. "We will start to pick up the tempo before December," predicted an F.D.N. official. "We will be in Managua by spring."

War or no war, the operation has already had unfortunate side effects on Honduras' fragile democracy. After years of military rule, the Hondurans elected Roberto Suazo Córdova last January as their first civilian President since 1971. The troubles in neighboring countries have given Chief of the Armed Forces Gustavo Alvarez Martínez an excuse to extend his authority. He has won changes in the constitution that broaden his power, and is using the threat of a Sandinista invasion to bolster his military forces and consolidate his power within the country.

In spite of all its efforts, Washington, ironically enough, may be backing the wrong contras. "They are making the biggest possible mistake," observed a leading opposition figure of the Sandinistas in Managua. "The Nicaraguan people are first anti-Somocista, and only secondly anti-Communist." It is commonly believed that for the contras to succeed, a considerable number of Sandinista soldiers would have to enlist in the cause. One of the few men who could make that happen is Edén Pastora Gómez, 46, a popular hero of the Sandinista revolution who grew disenchanted with the revolution and fled Nicaragua in July 1981. Pastora has since surfaced in Costa Rica, and the CIA would apparently like to enlist his aid. But Pastora adamantly refuses to sign up. He shuns the F.D.N., which he sees simply as a front for the CIA and the Somocistas. Alvarez Martínez, for his part, wants nothing to do with the one-time Sandinista, whom he considers a Communist.

Meanwhile the fear of war remains. If there is a shooting war between the two countries, Honduras will be at a decided disadvantage against the larger and better equipped Nicaraguan army. In that case, the U.S. could be tempted to intervene more openly. For Washington, that prospect underscores the perils of becoming too deeply involved in the region's complex and volatile affairs.

[From the New York Times, Dec. 8, 1982]

THE WORST-KEPT SECRET WAR

When asked the other day if he could confirm a report in The Times that the C.I.A. is mobilizing a secret war against Nicaragua, President Reagan replied: "No, and I don't think The New York Times can." But the growing evidence of American involvement can't be shrugged off so blandly. There's nothing secret any more about the training of exile armies in Florida and the recurrent border raids into Nicaragua by insurgents claiming C.I.A. help; all this has been widely reported for months.

Whatever American agents may be doing to help Honduras prevent the use of its territory for arms smuggling to El Salvador, it seems beyond doubt that they are also engaged in some direct actions in Nicaragua. The manifest purpose is to threaten a frontal assault on the leftists Sandinist regime. Undeniably, some of the leaders of the insurgent force are Nicaraguans associated with the discredited Somoza dictatorship.

These are, to begin with, illegal activities. The Neutrality Act expressly forbids the raising of secret armies to unseat a regime that the United States recognizes as lawful. Flouting that law is no way to rally the hemisphere against meddling by Cuba and Nicaragua in other nations' conflicts.

Even if these secret armies were never meant to be used in a big way, they are a dangerous instrument of diplomacy. Give people with a political grudge a gun and they maneuver to fire it. If they do, they are impossible to disown. Even if they don't, they are extremely difficult to disband.

If the idea here was to use the threat of insurgency to win bargaining concessions from Nicaragua, the idea is bound to misfire. Such threats tend to confirm the darkest fears of suspicious adversaries and make them more truculent, not accommodating.

It is perfectly true that an acceptable doctrine of non-intervention has to be respected by all parties. If it were proven that Nicaragua is indeed violating the territory of Honduras to funnel weapons to El Salvador, some reprisal in kind might be justifiable. But the evidence suggest that it is Nicaraguan territory, not Honduran, that is being systematically violated.

A final justification for covert warfare might be a clear showing that truly vital American interests are at risk, and beyond the reach of diplomacy. No such showing has been made, either to the American people or to our Latin friends. To the contrary, President Betancur of Colombia, an independent-minded conservative, last week risked Mr. Reagan's displeasure by appealing for negotiations with both Nicaragua and Cuba.

That was a foretaste of how Latin America would react to unilateral United States interventions. Mr. Reagan, by way of polite reply, expressed his wish to see "the withdrawal of all—I repeat all—foreign military advisers in Central America."

Nicaragua contends that it is prepared to negotiate. A proper response would find Washington testing that claim, documenting its charges of Nicaragua's interference in other countries and persuading other Latin nations to join in condemning the import of Communist arms. The improper response is to deny the undeniable, in the false hope that the C.I.A. hand can somehow be hidden. That illusion should have died at the Bay of Pigs.

Mr. DODD. Mr. President, what does it all add up to? What do these and similar reports mean? Well, there does not seem to be much mystery about it—the administration, through the Defense Department and the intelligence community, is supporting if not sponsoring an "overt-covert" military operation in Central America. All in all, it adds up to "The Worst-Kept Secret War", as the New York Times labeled it in a very thoughtful editorial on December 8.

Mr. President, for a variety of reasons, U.S. involvement in "The Worst-Kept Secret War" provides additional evidence that, when it comes to Central America, this administration is hell-bent on pursuing the wrong policy at the wrong time in the wrong place:

It belies any fundamental understanding of the social, economic, and political forces at work in the region;

It signals our interest in promoting military solutions to political problems;

It identifies us with the status quo, if not reactionary, forces in the region;

It puts us at loggerheads with the major democracies in the region, namely Mexico, Venezuela, and Colombia;

It plays into the hands of Fidel Castro and his cohorts who, while they did not create the deplorable conditions in Central America, are fully prepared to take advantage of them; and

It evidences a complete disregard for binding treaty commitments which bar us from intervening in the internal affairs of the nations of this hemisphere.

Mr. President, let me put the administration's policy in political perspective.

To believe that U.S. support for paramilitary forces in Central America is sound policy is to believe that Tacho Somoza and his crowd were Jeffersonian Democrats who simply got a bum rap;

To believe that covert military operations in Central America make good sense is to believe that democracy is more a function of bullets than of ballots; and

To believe that military aid to right-wing insurgents provides a foundation for democratic rule in Central America is to believe that if you leave the airport lights on long enough, Amelia Earhart will return.

None of these is true. And no amount of wishful thinking, or of slick rhetoric, or of ideological commitment, or of under-the-table military assistance will make them true.

What is true is that when it comes to Central America, this administration has yet to untie its shoelaces;

What is true is that this administration is prepared to the last man to defend the military slum landlords of Central America, just as it is prepared to label those who stand up for human rights as dupes of an alien ideology; and

What is true is that when the cheering stops and the smoke clears, this administration's epitaph for Central America will read: "We had to destroy this region in order to save it."

Mr. President, the time has come to put a stop to this underhanded military adventurism—to call a halt to it—to say, "Enough is enough; no more." For this purpose I offer the amendment before us.

Simply put, this amendment lays out a straightforward policy position. I draw my colleagues' attention to the actual language of the amendment:

Congress hereby declares that no funds should be obligated or expended, directly or indirectly, after January 30, 1983 in support of irregular military forces or paramilitary groups operating in Central America.

Clearly, this provision is directed exclusively at the question of U.S. support for extra-legal military and security operations in the Central American nations. On the other hand, this provision would not—I repeat, would not—affect our normal, ongoing military assistance, training and sales programs, which are designed to aid and assist the regular, duly-authorized armed forces within the region. No, these programs are not at issue in the amendment I am offering.

Mr. President, the time has come for the Senate to face up to the issue of U.S. support for covert military operations in Central America. It is an issue of paramount importance and it deserves to be divorced from the ideological caste in which it has been placed.

If we cannot make this separation, if we cannot divorce the substance of the issue from its ideological bearings, then the issue itself will continue to be defined in terms of "One man's terrorist being another man's freedom fighter." And so today, the Reagan administration, because of its particular ideological moorings, has decided to aid and abet the remnants of the old Somoza national guard. But what about tomorrow? And what about the ideological underpinnings of future Presidents and future administrations? They may decide to provide covert military aid to a peasant militia in Brazil or to radicalized Christian Democrats in Chile.

In my view, Mr. President, it makes no sense to support either. Such support simply gets us embroiled in a local situation over which we have no control. Nor should we. Ultimately, the people of Nicaragua, or the people of Honduras—of El Salvador—Brazil or Chile must determine their own fate. The best we can do is set an example, a standard—and make sure that that example, that standard, faithfully embodies and reflects the traditions and values which our people and our country strive to uphold.

Support for extralegal military or security forces is not a part of our value system. And it should not be—it is a road to nowhere—it takes is into an ideological wasteland.

Mr. President, for these reasons I offer my amendment to put Congress on record as opposing U.S. support for paramilitary groups operating in Central America.

To sum up: Such support is contrary to our national interests; contrary to the values of our people and contrary to our normal governmental processes and procedures. It lays the groundwork for an unmitigated foreign policy disaster. Commonsense ought to tell us that gunboat diplomacy is no more popular in Central America today than it was at the turn of the century.

Mr. President, I hope my amendment will be adopted by a wide margin.

Mr. President, I would like to urge, if I may, that the proponents of the substitute come forward because I would like the opportunity to question them about a number of points that I think should be raised with regard to their substitute. I urge my colleagues to take a close look at both of these amendments, the one that I have offered and the one that will be offered as a substitute.

Mr. MOYNIHAN. Mr. President, it is my understanding that there is a time agreement in this matter which is not divided. My distinguished friend from Rhode Island (Mr. CHAFEE) is on the floor. He and I shall share the time in a collegial manner with the Senator from Connecticut (Mr. DODD).

Mr. President, may I ask, how much time has expired?

The PRESIDING OFFICER. Will the Senator be clear on whose time he is speaking?

Mr. MOYNIHAN. Mr. President, it is my understanding that there is no agreement on time sharing, but that we will simply share in a friendly manner.

The PRESIDING OFFICER. The Senator is correct.

Mr. MOYNIHAN. Mr. President, may I inquire how much time has expired of the 30 minutes?

The PRESIDING OFFICER. The Senator from Connecticut has 7 minutes and 50 seconds left.

Mr. MOYNIHAN. I thank the Chair.

UP AMENDMENT NO. 1542

Mr. MOYNIHAN. Mr. President, I send to the desk an amendment in the form of a substitute and ask for its consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN) for himself and Mr. CHAFEE, proposes an unprinted amendment numbered 1542 as a substitute to amendment numbered 1541.

The amendment of Mr. DODD is amended as follows:

Strike entire amendment and inset in lieu thereof the following:

"None of the funds provided in this Act may be used by the Central Intelligence Agency or the Department of Defense to furnish military equipment, military training or advice, or other support for military activities, for the purpose of overthrowing the government of Nicaragua or provoking a military exchange between Nicaragua and Honduras."

Mr. MOYNIHAN. Mr. President, I shall speak briefly, then hope to hear from my colleague, the Senator from Rhode Island (Mr. CHAFEE).

The PRESIDING OFFICER. The Chair wants to correct a mistake he made on the time. The time is not

equally divided. There are 22 minutes now remaining as previously stated.

Mr. MOYNIHAN. I thank the Chair; that was my understanding.

Mr. President, may I ask my colleagues to hear me when I say that Senator CHAFEE and I are speaking for the Select Committee on Intelligence. I see another distinguished member of that body, the Senator from New Mexico (Mr. SCHMITT) is present, also. When Congress established the select committee in 1976, it was created to oversee and make studies of and to provide vigilant legislative oversight over the intelligence activities of the United States. This committee was properly designed to be bipartisan and to be select, in evidence of which you find me speaking on behalf of the committee as vice chairman. The rules, singular in this regard, provide that in the absence of the chairman, the vice chairman presides. I wish to report to this body two things.

First, in this Senator's judgment, our committee had provided vigilant oversight of U.S. activities in Central America as well as elsewhere and we have given, in confidential annexes and classified annexes to the appropriations bill under which the Central Intelligence Agency now operates, the most explicit instructions as to what it may and may not do in Central America.

Those instructions obtained, and, Mr. President, those instructions were repeated by the House at the behest of the chairman of the House select committee, our distinguished friend, Representative BOLAND, and language in the present resolution to that effect is before us.

It is the judgment of the select committee that that language is adequate and it is also our judgment, unhappily, that it is necessary to repeat it, but that it is sufficient to do that. The more generic proposals such as the one of the Senator from Connecticut, while one might not differ from their purpose, would not serve the objective of intelligence oversight and instruction in the present law.

I see the Senator from Rhode Island is on the floor. I welcome his further thoughts.

Mr. CHAFEE. I thank the Senator.

Mr. President, may we have order?

Mr. MOYNIHAN. May we have order, Mr. President? This is a matter of very gravest concern to this body.

The PRESIDING OFFICER. The Senate will suspend and give time for Senators to either be seated or to leave the Chamber.

The Senate will be cognizant of the request of the Senator from New York that the Senate is not in order and that this is a very important issue.

The Chair believes that the Senator from Rhode Island now wants to be recognized.

Mr. CHAFEE. Mr. President, what is the time situation?

The PRESIDING OFFICER. The time situation is that the Senator from Connecticut has 18 minutes—

Mr. CHAFEE. It was a half-hour evenly divided, was it not?

The PRESIDING OFFICER. That is not the understanding of the Chair.

Mr. DODD. Will the Senator yield?

Mr. CHAFEE. I want to know what the time is. How much time do we have on this side?

The PRESIDING OFFICER. As the Chair was beginning to state, we have 18 minutes 49 seconds remaining.

Mr. CHAFEE. Are we not dividing this time evenly?

The PRESIDING OFFICER. It was not divided equally is the understanding of the Chair.

Mr. CHAFEE. This is a curious arrangement.

Mr. MOYNIHAN. We were just being accommodated.

Mr. CHAFEE. All right, Mr. President, if the Chair would be good enough to alert me at the end of 4 minutes, I would appreciate it.

The PRESIDING OFFICER. The Chair will do that.

Mr. CHAFEE. Mr. President, I think there are two factors to consider here: first, what is the proposal of the Dodd amendment?

The Dodd proposal says, "Congress hereby declares that no funds should be obligated or expended, directly or indirectly."

Mr. President, that is an extreme injunction to impose on the activities of the United States, directly or indirectly.

Now, I was not able to hear the presentation of the Senator from Connecticut, but in previous discussions he has indicated that this is only laudatory language, just language admonishing, that the language is just that the Congress declares and that no funds "should" rather than no funds "shall."

But, Mr. President, we do not pass language like this without having a severe impact on the activities of the United States. When we say no funds should be obligated or expended, directly or indirectly, in support of the irregular military forces operating in South America, that is in effect an injunction about any activities of the United States aiding or abetting or in support of irregular military forces or paramilitary forces.

Mr. President, I do not think we have ever had an injunction like this.

Mr. President, may we have some order in the Chamber?

Mr. MOYNIHAN. Mr. President, we must have order.

Mr. CHAFEE. I wish those Senators wanting to negotiate would negotiate elsewhere.

The PRESIDING OFFICER. The Chair will try to accomplish what the Senator from Rhode Island and New York request. The Chair tried once before. He evidently was not successful, so I think we should just stop until the necessary quiet is obtained, because it is a foreign policy issue and requires reliance upon the expertise of our colleagues who are on the Intelligence Committee.

Is the Senator from Rhode Island satisfied now?

Mr. CHAFEE. Yes. I appreciate the Chair's accommodation.

The PRESIDING OFFICER. The Senator from Rhode Island asked the Chair to remind him when he used up 4 minutes. The Senator still has about 2½ minutes remaining.

Mr. CHAFEE. Mr. President, a similar suggestion like this came up in the House of Representatives, and the chairman of the House Intelligence Committee, Congressman EDWARD BOLAND from Massachusetts came forward with a substitute, which is the substitute in effect which we have at the desk today.

What this says is that none of the funds provided in this act may be used by the Central Intelligence Agency or the Department of Defense to furnish military equipment, military training or advice, or other support for military activities for the purpose of over throwing the Government of Nicaragua or for military exchange between Nicaragua and Honduras.

The Senator from Connecticut, I presume, is going to say, "Well, that is big enough to drive a truck through."

Mr. President, the question really before us is, is this body going to insert a complete prohibition of activities against this Nation? We are making no concession that activities are taking place anywhere, but are we going to tie the hands of the President? After all, it is the President who is at the top of the heap in this. And those of us on the Intelligence Committee do not believe that we should do so.

I do not believe we have ever imposed a draconian restriction such as proposed by the Senator from Connecticut in the past with "no activities, direct or indirect."

Mr. President, speaking also in behalf of the Intelligence Committee, which, as the distinguished Senator from New York indicated earlier, is a nonpartisan committee, we have a situation where, when the chairman, a Republican, of the committee cannot be present because of illness in Arizona, the vice chairman, a Democrat under the rules of the committee, which we all approve of, speaks for the committee. I am here speaking as the ranking Republican on that committee.

Mr. President, I rise in support of the substitute which the Senator from New York has, I presume, sent to the desk. This has the support of our com-

mittee and I believe takes care of the situation that concerns some Members of this body.

Mr. MOYNIHAN. Mr. President, may I be allowed 1 second to say the amendment at the desk is submitted by me on behalf of myself and the Senator from Rhode Island.

Mr. PELL addressed the Chair.

Mr. MOYNIHAN. Mr. President, I observe that the distinguished ranking member of the Committee on Foreign Relations desires 1 minute; our colleague from New Mexico desires 1 minute. I desire no more time until the Senator from Connecticut shall have had a chance for rebuttal.

Mr. DODD. Mr. President, is it my understanding that the substitute of the Senator from New York has at this juncture been reported at the desk?

Mr. MOYHIHAN. That is correct.

May I ask the Chair, is that not correct?

The PRESIDING OFFICER. The Senator from New York is correct.

Mr. MOYNIHAN. May I yield a minute to the Senator from Rhode Island and then a minute to the Senator from New Mexico.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. I thank my colleague from New York.

I strongly support the thrust of both amendments because I would certainly vote against the heinous activity of overthrowing governments. If I did not have to leave for family reasons, I would have voted for the Moynihan language because it is the strongest and more specific of the two proposals.

If it by any chance failed, I would most certainly have supported the amendment of the Senator from Connecticut of which I was a cosponsor.

Mr. MOYNIHAN. I thank the Senator from Rhode Island.

The PRESIDING OFFICER. Did not the Senator from New York yield to the Senator from New Mexico?

Mr. MOYNIHAN. One minute.

Mr. HELMS. Mr. President, will the Senator yield for that purpose?

Mr. SCHMITT. I am happy to yield.

Mr. President, we have a confusing set of circumstances here. We have two amendments double tracking, neither of which should be considered without adequate discussion, and the situation that has now developed is that any of us who want to point out that we are playing with fire with either one of them will not have a chance.

I hope we can divide this time so I can have at least 5 or 6 minutes to discuss the implications of both of these amendments.

The PRESIDING OFFICER. Is the Senator making a request that he gets 5 minutes of the time remaining?

Mr. HELMS. I am trying to get the Chair to tell me how both of us who question both amendments can have a say.

Now the ball is being bounced between the two amendments as it now stands, Mr. President, and we are playing with fire in foreign policy.

I happen to be chairman of the Western Hemisphere Affairs Subcommittee, and I know a little bit about the situation in Central and South America, and I think we should have a chance to express our opinion on both of these amendments and not play them off one against another.

The PRESIDING OFFICER. Is the Senator requesting time?

Mr. HELMS. I request that I have 7 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. RUDMAN. Mr. President, reserving the right to object, I cannot agree to that without talking to the distinguished chairman of the Appropriations Committee, which I will.

If the Senator sets his request aside, I will try to get information from him. My instructions from the chairman are that no time agreements entered into are to be modified without his consent.

Mr. HELMS. That is a fair proposition. I know the Senator to be fair. I thank him very much.

Mr. SCHMITT. Mr. President, before I speak on my time, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SCHMITT. Could we have the specific language of the time agreement read to the Senate that concerns this particular matter?

The PRESIDING OFFICER. If the Senator will withhold we can send for a transcript.

Mr. SCHMITT. Yes. I think there may be time on the substitute amendment. The waiting may allow for discussion on this. I have no idea.

Mr. PROXMIRE. Mr. President, I apologize to my good friend, if the Senator will yield for 1 minute for a procedural request.

Mr. SCHMITT. I am happy to yield.

Mr. PROXMIRE. Mr. President, Members told me they have to leave and they will object to any additional time on this amendment. It is an important amendment. They want to be here to vote. That is their privilege. They are going to object.

So there will be no further time allowed on this amendment.

Mr. SCHMITT. Mr. President, on my 1 minute, the Senate established the Intelligence Committee to act as its oversight arm relative to intelligence activities conducted by the United States and counterintelligence activities conducted by the United States.

It is extremely important that we recognize this committee for what it is, a bipartisan literally, as the Senator from Rhode Island has said, a nonpartisan shield.

Again, Mr. President, this bipartisan and indeed nonpartisan committee was established specifically to be a shield between the Intelligence Committee and abuses or misjudgments that might come from that community. It is really the only mechanism that I have been able to conceive of, and I am extremely proud of this body for having conceived of it long before I arrived here, the only mechanism by which a democracy, a representative democracy can have such a shield to protect itself and its people from abuses during activities that are counter to the basic principles of a democracy but activities that we must have in order to protect ourselves in this world.

So I hope this body not only on this matter but on other matters in the future will rely on the judgment of the Select Committee on Intelligence. We must do that. There really is no other way to handle this kind of a problem.

I thank the Senator for yielding.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, may I inquire what time remains?

The PRESIDING OFFICER. Eleven minutes and nineteen seconds.

Mr. DODD. Eleven minutes?

The PRESIDING OFFICER. Eleven minutes and nineteen seconds.

Mr. DODD. I thank the Chair.

Mr. President, first of all, let me point out to my colleagues there is a substantial difference, as I noted, between what was offered in the other body by Mr. BOLAND of Massachusetts and what is being offered here.

I draw my colleagues' attention to an extremely important clause included in the House language that is not included in the Senate language.

The House language reads:

Or other support for military training.

The first part of its is exactly the same as the Senate substitute.

Or other support for military activities to any group or individual not part of a country's armed forces.

That clause is missing in the Senate language.

In effect, what we are doing with the Moynihan substitute is prohibiting any funds from going to the Honduran Army, for that matter, from the Department of Defense in this general area. That is far broader than anything I intended to do.

I am talking in my amendment specifically about paramilitary groups, insurgency groups, and this clause missing in this particular proposition I think makes it even more dangerous than what I had suggested at the outset.

I remind my colleagues it is a simple enough proposition. I am merely offer-

ing a sense-of-the-Senate resolution putting us on record in a very flexible way that says we do not belive that there should be funds expended in Central America to support counterinsurgency groups or paramilitary groups at this particular hour. It also allows, if the agencies or others come back or they want to make a case for it, for flexibility.

What is being proposed by the distinguished Senator from New York and the distinguished Senator from Rhode Island is more restrictive in one sense and yet it allows for that activity to go on virtually unchecked.

The Senator from New York has said in his amendment that we will not support or fund activities which would result in the overthrow of the Nicaraguan Government or promote a conflict between Nicaragua and Honduras.

I ask my distinguished colleague from New York or the distinguished Senator from Rhode Island, does support for groups who support and are actively involved in the overthrow of another government constitute a violation of the law should the Senator's amendment be adopted?

Mr. MOYHIHAN. I answer yes, and I take the further position and say that the reason the clause in the House amendment has been left out is that it could be read to interpret that we are free to provide funds to the government of the army of Honduras or name which country you will for the purpose of overthrowing the Government of Nicaragua, et cetera.

We deny any such rights.

Mr. DODD. I would not object to the unanimous-consent request to modify the Senate substitute to include that operative paragraph. That was included in the House language.

Mr. MOYNIHAN. I might say my friend misunderstood me. If he would read it carefully it suggests it is all right to give it to the army but not to irregular forces. We deny either.

Mr. RUDMAN. Mr. President, if the Senator from New York will withhold for 1 minute, I ask unanimous consent that the Chair not charge this time against this amendment or against the floor managers.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUDMAN. Mr. President, the problem with time has now arisen. There is an objection being lodged against the granting of some additional time to accommodate the request of the Senator from North Carolina. Presently there is something in the vicinity of 8 minutes remaining under this time agreement. The Senator from North Carolina has requested he have at least a few moments to speak.

I wonder if we might accommodate him since there is some confusion as to how this time agreement is presently being allocated.

Mr. DODD. Mr. President, I certainly do not object to asking for it. I will yield to him or others for a period of time. We all wish to be able to explain our proposition here. I wish to have several days to discuss this, quite frankly, and I wish there were another vehicle to do it on; 30 minutes is hardly enough time to discuss all of this.

Mr. RUDMAN. Mr. President, I am going to ask unanimous consent that we extend 5 minutes to this time agreement.

Mr. PELL. Mr. President, I must object specifically to extension of time to this time agreement.

Mr. MOYNIHAN. Mr. President, I will tell the manager that we are happy to yield 2 minutes to the Senator from North Carolina.

The PRESIDING OFFICER. The Senator will be in order.

Mr. MOYNIHAN. There is little time remaining.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from New Hampshire has the floor.

Mr. RUDMAN. Mr. President, I made my request, there has been objection. I understand the sponsors of the amendment are willing to yield 2 minutes to the Senator from North Carolina, and I will let him speak for himself, and again until we settle this, this should not be charged against this amendment.

The PRESIDING OFFICER (Mr. SYMMS). Without objection, it is so ordered.

Mr. HELMS. Mr. President, am I to understand I am to be granted 2 minutes out of 30 to oppose the amendment?

Mr. MOYNIHAN. Mr. President, we must have order. We have to hear the Senator from North Carolina, it is so important and so abbreviated.

Mr. HELMS. I do not know whether it is important, but it is important to me, and I thank the Senator from New York.

Let me tell Senators they had better not consider these amendments as just a roll-through because we are playing with fire. We are about to lose Latin America.

I know the Senate would like to detach itself from this question, have nothing to do with it, and make it long ago and far away in Nicaragua, in Honduras, Costa Rica, Guatemala, and all the rest. But we have been debating this matter in the Foreign Relations Committee for months, and for us to now undertake to adopt a foreign policy matter on this continuing resolution is playing with fire.

We are about to lose to the Marxists the entire length and breadth of South America. To tie the hands of the intelligence forces, and to tie the hands of the administration, when the administration is trying to work this thing out is utter folly.

Now, Senators may do what they wish, but I warn you, you will rue the day when you start enacting foreign policy decisions into a continuing resolution.

So, Mr. President, I reiterate my opposition to the proposed amendment. Of course, many of our colleagues sympathize with any Senator who wants to keep the United States as far away from the tumult in Central America as possible; but there is far more to this matter than the immediate conflict in that region, and we cannot consider this matter today without allowing the discussion of some pertinent points.

First of all, Mr. President, the Sandinista government of Nicaragua is patently, de facto, committed to anti democratic principles. In fact, on many occasions, their leaders brag about their affection for Marxism-Leninism, and they practice very well the systematic terror and control which characterize such totalitarian regimes; they practice it at home, with block committees, persecution of the church, forced separation of family members, and wholesale forced marches of whole populations from their traditional homelands; abroad they perpetrate all manner of encouragement and supply of guerrilla movements throughout Central America, all ordained to overthrow democratic regimes whose combined defenses do not amount to the number of men under arms in Nicaragua.

Second, Mr. President, the Sandinista government is collapsing of its own weight. Once the heir of a revolution which promised democracy in Nicaragua, the Sandinistas now will have nothing of elections, and are constantly fighting any group on record in favor of basic human rights—free speech, free exercise of religion, democratic processes, and so on. And the people of Nicaragua, far from happy with the situation, are, as one would expect, anxious to find another path to the freedom and democracy which their revolution sought 3 years ago. In fact, Mr. President, the Sandinista government is an illegitimate government; it came to power by force of arms, and maintains its power by brute force. It is the Nicaraguan people, Mr. President, who want to restore legitimacy to the Government of Nicaragua.

Now, Mr. President, I want to ask a question: If we—the United States—are supportive in any way to the forces of freedom in Nicaragua—if we provide information, moral support, encouragement and cooperation and the like, to the groups seeking legitimate institutions within Nicaragua—could this not be interpreted by eneimies of freedom in that country as aiding the

overthrow of the Sandinista government? I am specifically mindful of President Reagan's speech in London on June 8 of this year, where he called for the establishment of democratic and free regimes throughout the world, including those behind the iron curtain—where Nicaragua is quickly becoming an unwilling addition. Does President Reagan, in calling for democracy in Nicaragua, help to overthrow its antidemocratic, totalitarian regime? Personally, I hope that the United States will always stand for freedom, how attractive the cause that would thwart it.

Mr. President, I think it is clear that the President needs no admonition on how much to spend on what dimensions of the ongoing struggle for freedom and democratic institutions in Central America. He certainly needs no moralistic pronouncement like that before us today, which will do nothing but serve the friends of the Sandinistas as they continue to trumpet their disinformation and vituperative propaganda against the United States around the world.

The United States does not, and should not, try to overthrow the Sandinista government, in my judgment, unless the Sandinista government proves irreconcilably and belligerently devoted to the destruction of the peace, harmony, and freedom of all the countries in Central Ameria, a goal which is central to U.S. interests in the region. Perhaps the Sandinistas have already passed the point of no return—sometimes they seem determined to make us think so, in any case. But, in the last analysis, it is President Reagan who is responsible for the conduct of our foreign policy, and he should be free to exercise that direction by all the means normally open to the Chief Executive, especially in such a tense situation as that in Central America, where so many interests of the United States and all the countries who love freedom in this hemisphere are at stake.

I do not know whether I used up that grand 2 minutes or not, but that is my message.

Mr. DODD. Mr. President, let me say what I said at the outset. I wish you did not have to deal with it on this particular vehicle, but we do not have another vehicle before us.

I would say to my friend from North Carolina that in one sense I agree with him. I think failure to adopt language and make it clear to certain elements of this Government that we are not going to tolerate the kind of behavior of conducting a secret war in this hemisphere would be disastrous. I would join with the Senator in saying that we will lose this war to the Marxists if we proceed on the course we are pursuing, if we conduct and encourage a war in Central America. This body had better take a stand, if we find the stories that they are telling us, are true.

In that event we are the ones who are encouraging and goading the elements into it. We are going to be right back here in months deciding whether or not to back up our initial actions, and I will tell you we had better know what we are doing there in terms of supporting or encouraging guerrillas as counterinsurgency forces. We are supplying them, we are encouraging them to destabilize and to overthrow a government. After they do that, do you know what we will do? We will leave them there and we will find other countries coming into Nicaragua and attacking them. We will then sit back and say, "We do not know what you are talking about," and you will have Marxist governments in Central America, mark my word. This could be a second Gulf of Tonkin resolution if we do not put a stop to it now.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. DODD. I yield.

Mr. HELMS. Yes; mark my words. Let me hark back to the delivery of $75 million of American money to the Sandinistas that propped them up. They were on their last legs, and I think the Senator knows that, and there was an effort made to gird them up and help them so that they could move over into Honduras and do their dirty work, along with Castro in Cuba.

I say we are playing with fire if we adopt either of these amendments.

Mr. DODD. Mr. President, does the Senator from North Carolina believe it is in our interest to support the Somoza counterinsurgency forces on the Honduran borders? Does the Senator think we ought to do that?

Mr. HELMS. Will the Senator repeat that, will you repeat that question?

Mr. DODD. Does the Senator from North Carolina believe we ought to financially back, train, and advise the Somozista forces on the Honduran border?

Mr. HELMS. The Senator from North Carolina is simply saying do not try to tie the hands of those who are trying to keep——

Mr. DODD. That was not my question. Does the Senator from North Carolina think we ought to be doing that?

Mr. HELMS. I think the Senator from Connecticut and the Senator from New York ought to let the Intelligence and Foreign Relations Committees try to deal with this sensitive subject, and not try to pass it on the floor at this crucial time when it cannot possibly be given adequate consideration.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, so that there will be no confusion, the substitute which has been sent to the desk by the Senator from New York on behalf of himself and the Senator from Rhode Island has the support of the administration. Second, this is the same resolution, with even a tighter provision in it, that was adopted by the House by 411 to 0, the so-called Boland language.

So I do hope when the vote comes and the procedure, if I understand it correctly, Mr. President, will be that the first vote will be upon the substitute, and I urge my colleagues to vote aye on the substitute and then, Mr. President, parliamentary inquiry, just to see if I have this correct, the first rollcall, vote will be on the Moynihan-Chafee substitute; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. CHAFEE. The vote will be yea or nay. If the yeas prevail then the next thing that will come up will be a vote on the total amendment which, in effect, will be another vote on the Moynihan-Chafee substitute?

The PRESIDING OFFICER. The Senator is correct.

The PRESIDING OFFICER. It will be on the Dodd amendment, as amended.

Mr. DODD. Mr. President, what time remains?

The PRESIDING OFFICER. Three minutes.

Mr. DODD. Mr. President, let me just——

Mr. DENTON. A parliamentary inquiry, Mr. President. I would request a response as to what the time agreement was by which the Senator from Connecticut propounds an amendment for which the Senator from North Carolina spoke to for about 2 minutes in rebuttal and the rest of the time has been given to propounding of an amendment to that amendment by the Senators from New York and Rhode Island? I do not understand how there is any equality or proportionality with respect to the kind of issue being discussed here. It seems that although the administration may support one view there are points of view here positive and negative. There is no proportionality to the representation being given by the procedure.

The PRESIDING OFFICER. There originally was an order for 30 minutes equally divided. After the amendments were offered then there was an order that the time be abrogated and no provisions remained for divided time.

Mr. DENTON. May I suggest to the floor manager that perhaps some other more altruistic and useful unanimous-consent agreement can be obtained.

Mr. RUDMAN. Mr. President, will the Senate be in order? We cannot hear the Senator from Alabama.

The PRESIDING OFFICER. Will all Senators please suspend. Can we have order in the Chamber? Will all those Members of the staff in the back

please suspend conversations. All Senators will remain quiet so we may hear the floor managers and the Senator from Alabama. The Senator from Connecticut has the floor.

Mr. RUDMAN. I want to respond to the Senator from Alabama as the acting floor manager. Let me point out what occurred here was that amendments were proposed by the Senator from Connecticut which was opposed by the Senator from New York, the acting chairman of the Intelligence Committee, and joined in by the ranking Republican, the Senator from Rhode Island. They opposed that, and had a substitute, and thus when the time agreement was made it was divided essentially between those two parties, who then among themselves decided to aggregate their time. That may be unusual but it was probably reasonable under the circumstances.

Mr. PELL. Mr. President, I ask for the regular order.

The PRESIDING OFFICER. The regular order is a half-minute remaining to the Senator from Connecticut.

Mr. DODD. Thank you. This happened last night when we were working out the unanimous-consent agreement time allocations. Objection was raised when an extension of the time allotted to my amendment was suggested. We then tried to work out some agreement between the respective sides here, and it was finally understood that there would be 30 minutes for both amendments and we tried to equally divide the time which we have done fairly well.

Let me finally say in support of my amendment, I am not here this morning or this afternoon to support the Sandinistas or other groups or the Hondurans, for that matter, or the groups residing in their country at this time.

What I am concerned about is our foreign policy, and all I am suggesting by this amendment is that we have a better understanding of what we are starting. If we do not have a sense of what we are doing when we start, we inevitably run into the problem of how we deal with events as they overtake us.

All I am concerned about here is I believe, based on information I have outside of the intelligence community, that we are encouraging certain paramilitary groups operating in Central America, particularly on the border of Honduras, to conduct certain forays into Nicaragua to overthrow that government. That is what they want to do.

Whether or not that is our intention is irrelevant at this point. We are supplying and supporting those elements and they are provoking a conflict.

All I am suggesting here is, if that happens, if, in fact, the conflict develops, are we then prepared to follow up with what we have started?

The PRESIDING OFFICER. All time has expired.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I move to table the underlying amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from North Carolina (Mr. HELMS) to table the amendment of the Senator from Connecticut (Mr. DODD). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. BRADY), the Senator from Arizona (Mr. GOLDWATER), and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Washington (Mr. JACKSON) and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

I further announce that if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea."

I further announce that if present and voting, the Senator from Massachusetts (Mr. KENNEDY) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 56, nays 38—as follows:

[Rollcall Vote No. 445 Leg.]

YEAS—56

Abdnor	Ford	McClure
Andrews	Garn	Murkowski

NOT VOTING—6

Brady	Goldwater	Jackson
Cranston	Heinz	Kennedy

So the motion to lay on the table (UP amendment No. 1541) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Will the Senate please be in order?

Mr. HATFIELD. Mr. President, when we began debate on this measure, I asked unanimous consent that an explanatory statement in lieu of a report be printed in the RECORD. For some reason, this was not done. This statement includes all our guidance and direction to agencies with the full force and effect of that usually included in the form of a formal written report.

It is most important, therefore, that this statement be printed in the RECORD.

I ask unanimous consent that the statement of the floor managers be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

EXPLANATORY STATEMENT OF THE RECOMMENDATIONS OF THE COMMITTEE ON APPROPRIATIONS ON H.J. RES. 631, MAKING FURTHER CONTINUING APPROPRIATIONS AND PROVIDING FOR PRODUCTIVE EMPLOYMENT FOR THE FISCAL YEAR 1983

The Committee on Appropriations, to which was referred the joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes, reports the same to the Senate with various amendments and presents herewith a statement in explanation of the changes recommended, in lieu of a written report.

INTRODUCTION

The recommended joint resolution provides for further continuing appropriations for programs and activities which otherwise would be funded in 10 regular appropriations bills. Of these 10, 3 have already completed conference committee consideration and, when enacted into law, will drop from the coverage of this measure. It appears unlikely that the seven remaining bills will be passed in this session and will consequently die upon sine die adjournment of the Congress. Enacting any of these seven bills in the next Congress will require the complete reintroduction and reconsideration of each measure in the midst of consideration of the budget for fiscal year 1984. The Committee notes that in the past 15 years, only one appropriations bill has been passed by a succeeding Congress under similar circumstances and that the likelihood of further action on the regular appropriations bills for fiscal year 1983 is very remote. The Committee, therefore, recommends that the continuing resolution be extended from the termination date of March 15, as recom-

mended by the House, to the end of the fiscal year.

Inability to enact appropriations bills on a timely basis

The continuing resolution is a device employed to provide funding for agencies and programs for which regular appropriations bills have not been enacted on a timely basis. Before fiscal year 1979, continuing resolutions were used almost exclusively as a short-term, stop-gap funding measure. Only rarely were programs covered by this measure for a full fiscal year. However, in recent years, an increasing number of regular appropriations bills have failed to be enacted. Furthermore, since fiscal year 1977, when all 13 regular appropriations bills were last enacted prior to the start of the new fiscal year, Congress' track record in timely enactment of appropriations bills has steadily deteriorated. In fact, no regular appropriations bill for fiscal year 1982 was enacted by the start of that fiscal year.

The Committee deplores this trend and has implemented novel strategies and procedures to expedite consideration of appropriations bills, including concurrent House and Senate Committee consideration of bills despite the tradition of House initiation of appropriations bills. Despite these actions, only one of the fiscal year 1983 regular appropriations bills was signed into law prior to the start of the fiscal year.

There are numerous factors which contribute to the delays in considerations and enactment of regular appropriations bills. One of the most significant of these is the increasing budgetary constraints imposed on discretionary, domestic, and nondefense activities. As these constraints preclude even maintaining ongoing Federal commitments and responsibilities, decisions on adjusting priorities, as well as addressing new issues and problems, become all the more divisive and difficult. The resulting controversy necessarily prolongs the consideration of appropriations measures.

Contributing to the delays is the lengthening period in which it takes Congress to adopt the first concurrent budget resolution, an action which, under current House and Senate rules of procedure, is a prerequisite to consideration of any spending measures, including appropriations bills. For the first 4 years under the Congressional Budget Act, the budget resolution was adopted by the stipulated May 15 deadline. Since then, Congress has failed to do so, and in this session consumed more than 5 extra weeks to complete its consideration of the First Concurrent Budget Resolution for Fiscal Year 1983. This left Congress in the curious position of consuming 50 percent more legislative days in adopting a general budgetary plan than is left, prior to the start of the fiscal year, for implementing such a plan.

This disproportionate allocation of limited congressional time becomes even more inappropriate in light of how poorly the first budget resolutions have actually served as workable budget plans. Almost invariably, the economic assumptions underlying recent budget resolutions have proven to be overly optimistic. This and other unrealistic program assumptions quickly make necessary adjustments in the budget resolution. This is evident in the fact that it has become commonly accepted that not only a second budget resolution be adopted in the fall, but that a third, making still further revisions, must be adopted in the spring. When Congress fails to make such revisions, as has been the case this year, the estimating errors contained in the previous budget resolution becoming increasingly obvious. Congress is now in a position where any spending measure, including all the remaining appropriations bills, are subject to a point of order on both the House and Senate floors, even though they are within the spending allocations of the budget resolution. This is because the total outlay estimate under the budget resolution has already been breached.

Beyond the procedural impediments of the Congressional budget process is still another serious and growing obstruction to the timely enactment of appropriations bills—this is the wide acceptance of the use of appropriations bills as a vehicle for legislative "riders." The inability of the normal authorizing and legislative process to provide an adequate forum in which to address these issues has led to increasing pressure on appropriations measures which must be enacted on a regular basis.

The subjects of these legislative riders range from the divisive issue of abortion to the regulation of used car sales, and now include almost every major concern facing the Congress. This whole panoply of issues is also accompanied by less mundane but equally, and sometimes even more blatant, attempts by legislation on appropriations bills. The Committee has become such an accepted forum for nonappropriations business that it now must confront attempts to modify and revise legislative provisions which were previously enacted in appropriations bills.

The growing interest in using appropriations bills as vehicles for legislation only detracts from the primary responsibility of this Committee—to provide funds for the necessary operations of the Government. Not only must the Committee grapple with issues and provisions outside its area of expertise, it must frequently endure the prolonged debate and consideration surrounding controversial issues.

The Committee believes that it is imperative that these obstacles to the timely enactment of appropriations bills be addressed by the Congress. Unless effective measures are taken to correct these problems, only further delays in the consideration and adoption of appropriations bills can be expected in the future. Such delays are the reason that continuing resolutions are necessary, despite the inefficiencies they engender in the management and operation of Government programs.

Summary of the Joint Resolution

The recommended joint resolution contains two titles. Title I includes the provisions of the continuing resolution and levels of funding for the maintenance of programs for which regular appropriations bills have yet to be enacted as well as necessary adjustments in other programs. Title II comprises the additional funding needed to initiate a productive job stimulus program on a comprehensive basis through existing Federal programs.

(1) Programs and activities under the Treasury, Postal Service appropriations bills are continued at the lower of the House or Senate rate. (sec. 101(a)).

(2) Programs and activities, under the Foreign Assistance appropriations bills are continued at the level provided in the fiscal year 1982 Appropriations Act level with certain adjustments to conform it to that which was recommended in the Senate reported version of the bill for fiscal year 1983. (sec. 101(b)).

(3) Programs and activities under the Commerce, State, Justice, the Department of Defense, and the Labor-Health and Human Services-Education appropriations bills are continued at the level recommended in the Senate reported versions of these bills for fiscal year 1983 with certain adjustments. (sec. 101 (c), (d), and (e)).

(4) Activities under the Energy and Water Development Act are continued at the current rate. (sec. 101(f)).

(5) Adjustments are made for programs funded in the Housing and Urban Development Appropriations Act which has already been signed into law. (sec. 101(g)).

(6) Activities, programs, and projects under the Interior appropriations bills are continued at the level recommended in the Senate reported version of the fiscal year 1983 appropriations bill. (sec. 101(h)).

(7) Programs and activities under the Agriculture and Related Agencies, the District of Columbia, and the Transportation appropriations bills are continued at the rate established in the conference agreement on those measures, as if these measures had been enacted into law. (sec. 101 (i), (j), and (k)).

TITLE I—FOREIGN OPERATIONS

Section 101(b) of this joint resolution provides for the funding of programs and activities contained in the Foreign Assistance appropriations legislation. The Committee is recommending that these programs for foreign assistance be at the rate contained in the fiscal year 1982 Foreign Assistance Appropriations Act, except for changes which were recommended in S. 3075, as reported by the Committee on December 2, 1982.

The Committee has already made a report on these recommendations, which the Committee incorporates here by reference, as found in S. Rept. 97-672. The overall recommendations for funding of foreign assistance programs is below the budget authority which was enacted in fiscal year 1982 by nearly $500,000,000. Funding under this subsection is included for programs such as the World Bank; UNICEF; the Agency for International Development functional programs; military assistance programs for Egypt, Israel, Spain, Portugal, Turkey, Greece, and the Philippines; and the Peace Corps.

The Committee has on several occasions in the past expressed its concern over certain United Nations programs. It has been brought to the attention of the Committee that the United Nations Council for Namibia, in its budget for 1982-83, budgeted more than 64 percent on travel. These funds, needless to say, could be spend on much more productive activities. For example, at an average cost of $10,000 per year each, nearly 200 young people could be educated at the finest universities in the world.

It is this type of activity by United Nations funded organizations which the Committee believes has turned a substantial number of Americans away from the United Nations. More must be done by the United States, including especially the withholding of funds, to make sure this type of activity by the United Nations organizations does not continue.

The House of Representatives, in action taken on the floor, added a provision which appears to have significant policy implications for the operation of the Agency for International Development.

The provision entitled, "Targeting Assistance for Those Living in Absolute Poverty," evidently directs the Agency for Interna-

tional Development to use not less than 40 percent of the funds available in fiscal year 1983 and not less than 50 percent in fiscal year 1984 for aid which "directly benefit(s) those living in absolute poverty (as determined under the standards for absolute poverty adopted by the International Bank for Reconstruction and Development and the International Development Association." This is the first instance the Committee has been made aware of this suggested policy, and is not in a position to recommend on the basis of merit that this new policy be either accepted or rejected. What little information the Committee has been able to gather at the last minute indicates that the matter is of substantial controversy, and, therefore, at this time, the Committee would recommend against including this House-added provision. The Committee makes this recommendation without prejudice, and also on the basis that as purely policy, it should be considered in connection with the authorization legislation and not appropriations.

DEPARTMENT OF DEFENSE

The Committee recommends a revision of the House provision on the Department of Defense appropriation bills to continue such activities at a level as recommended by the Committee in the Senate reported version of that bill.

The Committee has included a provision in section 101(c) of the resolution prohibiting the obligation or expenditure of funds available to the Department of Defense for the procurement of the MX missile until Congress adopts a concurrent resolution approving a permanent basing mode. The provision is not intended to impede or delay research and development efforts on the missile or any basing plan.

The Committee is concerned that in agreeing to close the U.S. Public Health Service hospitals and clinics and in removing the entitlement of free health care for our Nation's U.S. merchant seamen, Congress may have precipitously jeopardized the morale of the maritime service. American merchant seamen have been entitled to this important care since 1798, and it is the Committee's understanding that all other categories of former recipients, such as Coast Guard personnel, have now been provided comparable coverage under other Federal health programs. Accordingly, the Committee directs the Department of Defense to review this matter and provide a report on the feasibility of providing these individuals with health care within the Department's ongoing programs, such as CHAMPUS.

The Committee expects the Air Force to expeditiously execute a firm fixed-price contract for 50 C-5B aircraft, subject to the annual availability of funds. The recommended provision does not constitute approval to enter into a multiyear contract without the specific authority required by section 768 of the Senate-reported Defense appropriations bill.

COMMERCE, JUSTICE, STATE, THE JUDICIARY

For the Departments and agencies funded under the Departments of Commerce, Justice, State, the Judiciary, and Related Agencies Appropriation Act, the continuing resolution provides funding at a rate for operations and to the extent and in the manner provided in S 2956, as reported to the Senate on September 24, 1982 (S. Rept. 97-584). Due to the passage of time since consideration of this legislation, the Committee has found it necessary to include in the continuing resolution some changes from the earlier Committee action. The most significant of these changes is the recommendation to provde $153,190,000 in additional funds for various units within the Department of Justice. Thus, the Committee recommends funds for activities for which amendments were submitted by the administration on November 30, 1982, including $127,500,000 for a new appropriation entitled Interagency Law Enforcement, Organized Crime Drug Enforcement." These funds will provide resources for 12 regional task forces, operating under the direction of the Attorney General, to combat organized criminal activity in drug trafficking. The Committee recommendation does not include $2,500,000 requested for the operations of a proposed commission to study organized crime. The Committee understands that the Department has made no final or irrevocable decision regarding the selection of the "core cities" for the regional task forces to be established under this account. The location of these regional headquarters will inevitably have an impact not only on the actual allocation of the additional resources made available, but more importantly, on the interstate and interagency cooperation upon which the success of the program will hinge. The Committee is especially concerned about the designation of the core city for the Southwest Regional Task Force. The Department's preliminary plans would put their regional headquarters in California, including San Diego, which would be the core city for the Southwestern Region. The Committee believes that the Phoenix region has a similarly strategic location insofar as drug trafficking is concerned. The Committee expects the Department to make a careful and continuing review of Phoenix and other possible sites as alternatives to San Diego and to consult with the Committee on an ongoing basis in this connection.

The Committee is concerned that insufficient funds are made available to the DEA offices in land-border States for the purchase of information and evidence. For instance, in fiscal year 1982 only $2,000 was available for such purposes in the State of Vermont in spite of the great amount of illegal drugs entering that State. The Committee directs that DEA allocate a minimum of $10,000 to each land-border State for the purchase of information and evidence and expects such funds to be made available unless DEA notifies the Committee of the reasons why efficient drug law enforcement would be impaired by such minimum allocation.

Other changes in the recommendation for the Department of Justice include an additional $18,351,000 for the Federal Bureau of Investigation, of which $12,115,000 is for voice privacy equipment and $4,161,000 is for technical field support associated with its increased responsibilities in narcotics investigations; and $2,075,000 in order that the Bureau may proceed with automation of the Fingerprint Identification Division.

The Committee also recommends an additional $3,550,000 for "Support of United States Prisoners"; an additional $975,000 for the "Drug Enforcement Administration"; and an additional $300,000 for "Fees and Expenses of Witnesses" to cover increased expenses associated with the South Florida Task Force. In the "General Administration" account, the Committee recommends an increase of $8,312,000. This amendment provides for the transfer of the judicial review function from the Immigration and Naturalization Service to the Board of Immigrations Appeals to form a new organization, the Executive Office for Immigration Review. Of the amount provided, $5,798,000 is transferred from INS. The continuing resolution contains an offsetting reduction reflecting this transfer. The remaining $2,514,000 in budget authority provides additional support positions requested by the administration.

For the Department of Commerce, Bureau of the Census, "Periodic Censuses and Programs," $93,744,000 is provided. The Committee allowance includes $150,000 which, together with $50,000 from non-Federal sources, will fund a new monthly apparel survey.

The Committee has also provided up to $20,000,000 in guaranteed loan authority for the Economic Development Administration to continue its steel loan program. In 1982 the Committee provided $30,000,000 in direct loan authority to the Economic Development Administration. Approximately half of these funds were obligated through fiscal year 1982, and the Committee directs that the balance be obligated in fiscal year 1983.

The continuing resolution includes $166,426,000 for the "Operations and Administration" account of the International Trade Administration. The $3,000,000 above the amount provided under S. 2956 is necessary to begin research and engineering in preparation for U.S. participation in a 1985 International Trade Fair in Beijing, China. The Committee directs the Secretary of Commerce to report by June 1, 1983, on the progress of preparations for this trade fair.

The Committee has included an additional $500,000 for "Salaries and Expenses," United States Travel and Tourism Administration, which shall be used solely to provide financial assistance to the State of Hawaii. The $500,000 will provide a substantial travel marketing and promotion effort to reverse the adverse effect of the recent hurricane on Hawaii's major industry—tourism.

Language in the continuing resolution clarifies that of the funds provided for science and technical research, $475,000 shall be for robotics research and $700,000 shall be for work in metals processing. The continuing resolution also provides that of the funds provided to the National Telecommunications and Information Administration for fiscal year 1983, $502,911 shall be derived by transfer from prior year unobligated balances in the appropriation entitled "Public telecommunications facilities planning and construction." Recent GAO communications to the Committee indicate that these unobligated balances are unlikely to be expended due to an ambiguity in the authorizing statute.

A proviso has been included in the continuing resolution which bars the use of appropriated funds to sell any loans in the Economic Development Administration portfolio to private interests except with the consent of the borrower. The recent EDA experience with the sale of assets should be closely studied by the Congress prior to any further sales.

Recent information from SBA indicates that the direct cost of disaster loan making activities is higher than anticipated and that an additional $5,000,000 would more accurately reflect this. Therefore, the transfer from the disaster loan fund is increased to

$31,600,000. This makes available $5,000,000 in funds under the "Salaries and Expenses" appropriation, which the Committee directs be used to implement the veterans programs authorized by Public Law 93-237, as interpreted by section 116.3, title 13, U.S. Code of Federal Regulations. The Committee also directs the Small Business Administration to report within 60 days on its implementation plans to the relevant committees in each House of Congress.

Language is also included in the continuing resolution clarifying that the Commission on Wartime Relocation and Internment of Civilians shall submit its findings to Congress by June 30, 1983.

The Committee believes that further clarification of its action on the Federal Trade Commission appropriation may be necessary. The amount recommended by the Committee in S. 2956, $63,638,000, is $2,800,000 more than the budget estimate. The Committee also denied $800,000 requested in increased GSA rental payments in fiscal year 1983; but left these funds available for the purpose of offsetting proposed personnel reductions, the majority of which are associated with the closure of four regional offices. It is the Committee's intent that the $3,600,000 available shall be applied to maintaining the regional offices in Boston, Seattle, and Los Angeles. To the extent that additional funds may be required, the Committee directs that funds be reprogramed from headquarters to the regional offices.

The Committee recommendation also includes a provision requiring the Legal Services Corporation to issue grants in fiscal year 1983 to grantees or contractors funded in 1982 on the same proportionate basis as the grantees received in 1982. This provision is to take effect notwithstanding any regulation currently in effect and grants issued shall be valid until reexamined under existing statute by a duly confirmed board of directors.

The Committee directs the Department of State to avoid any action which has the effect of eliminating or prohibiting nonstop commercial air service between New Orleans and London.

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, EDUCATION AND RELATED AGENCIES

For activities under the Labor, Health and Human Services, Education and Related Agencies bill, the House provided appropriations levels and authority assuming that H.R. 7205, as passed in the House, was enacted into law. The Senate Appropriations Committee recommends, instead, the levels provided in the Senate version of H.R. 7205 as if that measure, as reported to the Senate, were enacted into law. The recommended amendment will allow the Senate and the House to meet in conference in the context of the continuing resolution and agree on appropriate funding levels and program direction for the vital programs under the Committee's jurisdiction.

The Committee action also recommends deletion of the House bill language which directs that programs in the Labor-HHS-Education measure be administered "to the extent and in the manner provided for in House report 97-894".

Carl Albert Center

The Committee recommends that no funds be appropriated for the Carl Albert Center at the University of Oklahoma and recommends deletion of the provision for this in the resolution. The House had recommended a level of $3,000,000 for the center although there is no authorization or budget request. The Committee recommendation is consistent with its action on H.R. 7205. The Committee also has included technical bill language which deletes from H.R. 7205, the reference to H.R. 3598, which would have authorized the Carl Albert Center, if enacted.

Refugee assistance

The Committee recommends deletion of the House provision for Refugee Assistance and has substituted language which allows the program to continue at the current rate of $670,670,000.

The Committee recommends a rate of $120,000,000 for Social Services and Targeted Assistance to areas severely impacted by refugee populations, $85,000,000 of which is for Social Services. The amount for Social Services is $17,000,000 more than the House allowance and is designed to speed the assimilation of refugees with deficiencies in basic skills into the job market. The Committee views Social Services as a priority activity in reducing refugee dependence on already strained resources in cash and medical assistance. The Social Services programs provide English-as-a-second language education and some job training activities. The Committee notes that the largest barrier to refugee employment has been the lack of proficiency in the English language. Funds under this program provide for achieving that proficiency, thus removing an important impediment to employability.

The Committee recommends deletion of $16,600,000 for grants for school districts whose enrollments are swelled by the presence of refugee children. These funds cannot be expended until the 1983-84 school year. The Committee will address the amount for the next school year in the fiscal year 1984 bill. The Committee notes that funding for the school districts in the present school year continue on a grant basis.

Refugee admission

The Committee believes that a level of $77,000,000 for Cuban-Haitian entrants may be necessary, but wishes to make it clear that changing conditions of refugee admission elsewhere in the Nation may require that funds be shifted to meet such contingencies. In that circumstance, the Committee will consider reprogrammings as may be necessary.

Advances to Unemployment Trust Fund

The Committee recommends deletion of a House provision which would have appropriated $5,411,000,000 for Advances to Unemployment Trust Fund. This provision is redundant, since the Senate version of H.R. 7205 as referenced in the continuing resolution provides these resources under title I.

Health planning

The Committee recommends concurrence with the House provision regarding the health planning program with an amendment to assure full-year effect. As no legislation has yet been enacted by the Congress, the Committee believes provision must be made to maintain the continuation of the program and to prevent the triggering of penalties which could ensue in the absence of authorizing legislation.

Utilization and quality control peer review

The Committee recommends deletion of the portion of section 101(d)(2) regarding the amounts necessary for carrying out utilization and quality control peer review activities authorized by Public Law 97-248. The Senate reported version of H.R. 7205, referenced by this resolution, includes $25,000,000 for program management for the approximately 145 PSROs which must be maintained under the provisions of Public Law 97-248. The Committee expects that the transition from PSROs to the utilization and quality control peer review organizations mandated in Public Law 97-248 will not take place until fiscal year 1984. For this reason, the Committee believes it is not necessary to provide authority and funds for this activity in fiscal year 1983.

Occupational Safety and Health Administration

The Committee recommends deletion of a House provision that would have nullified a provision agreed to by Congress in Public Law 97-257, the Supplemental Appropriations bill enacted September 10, 1982, and reaffirmed in the first continuing resolution. This provision, agreed to by the House without objection, on the Supplemental Appropriations bill, permits the Secretary of Labor to grant final approval to those State plans under section 18 of the OSHA Act that have staffing levels that are at least equivalent to Federal staffing levels.

ENERGY AND WATER DEVELOPMENT

Pending enactment of the regular appropriations act for fiscal year 1983, energy and water development activities are continued at the current rate of operations. In order to provide greater program direction, agencies under the jurisdiction of the Energy and Water Development Subcommittee shall be fully cognizant of House Report 97-850 and Senate Report 97-673 which accompany the fiscal year 1983 appropriations bills and shall utilize both reports for guidance in implementing the provisions of this resolution.

Meramec River Basin

In light of recent severe flooding in the Meramec River basin in Missouri, the Committee directs that, within available funds provided by this joint resolution, $800,000 be made available to initiate action to provide flood control measures along the Meramec River basin authorized by section 2(h) of Public Law 97-128.

Severe flooding around Utah Lake

The Committee is aware of recent projections by the National Weather Service, the State of Utah water engineer, and other involved local entities, which strongly indicate the potential for severe flooding in and around Utah Lake, its tributaries and outlets during the winter and spring of 1983.

Above average snow accumulation, coupled with mountain reservoirs whose storage capacity is full, have led the State of Utah Emergency Management Agency to determine the level of Utah Lake to be likely to exceed the 100-year flood projections of the Federal Emergency Management Agency. Such a flood, if it occurs, would directly threaten at least three public waste water treatment systems, the Provo city airport and surrounding business and residential areas, and the State's major north-south Interstate Highway System.

The Committee is aware of preparations now underway by the State of Utah and numerous local communities to begin flood prevention measures. Accordingly, the Committee directs the U.S. Army Corps of Engineers to assist the State of Utah and other affected local communities by devoting sufficient funding and other forms of flooding on Utah Lake, its tributaries, and outlets.

Funding for such assistance is to be derived in accordance with Public Law 84-99. The Congress urges the Corps of Engineers to consult with State and local officials in an effort to develop the most effective measures of flood mitigation.

Tug Fork project

Within available funds provided by this joint resolution, $16,400,000 shall be available for projects authorized by section 202 of Public Law 96-367. Further, the provisions included in Senate Report 97-673 with respect to section 202 shall be in force during the term of this joint resolution.

Maximizing recreational benefits

The Committee is aware that limitations on available funds and manpower resources over the next several years could require reductions in the program for construction and operation and maintenance of recreation facilities at Corps of Engineers projects. However, the Committee feels that substantial benefits are derived from these public use facilities and that additional emphasis should be placed on those recreational areas where local economic and unemployment conditions could be benefited. Accordingly, the Committee has included in the amount recommended $4,000,000 and directs the Corps of Engineers to utilize those funds to maximize the recreational benefits at projects nationwide.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Housing programs

Annual Contributions

The Committee recommends $5,732,355,689 in new budget authority and $715,331,146 in additional contract authority for the Department's assisted housing program within this account. These authorities, when combined with estimated budget authority carryovers of $1,590,358,901, deobligations of $4,600,000,000 and permanent authority of $24,665,665 would result in a fiscal year 1983 program level of $12,697,421,887.

Given the program structure proposed by the Committee, the recommended funding would result in the reservation of 118,860 housing units in fiscal year 1983. Under the Committee's recommendations, 16,000 units would be reserved for housing for the elderly or handicapped (section 202), as opposed to the 10,000 requested by the administration and the House and the approximately 16,900 made available in fiscal year 1982; reservation of 3,000 units of Indian housing as opposed to the 1,000 provided by the House (the administration did not request any Indian housing in fiscal year 1983), compared to approximately 2,400 units in fiscal year 1982; 24,860 units of section 8 existing, as opposed to the 47,270 units proposed by the House (the administration did not request any in fiscal year 1983); and 75,000 unit reservations in 1983 associated with conversions and property disposition. As far as Indian housing is concerned, the Committee expects these funds to cover the full costs of construction, including the provision of water and sewer facilities.

The Committee also recommends $1,000,000,000 in new budget authority and $50,000,000 in new contract authority for public housing modernization. Although the Committee rejected the concept of funding the entire modernization program for fiscal year 1983 from recaptures, such recaptures would be used to augment the basic $1,000,000,000 in new authority. Based on the Department's December estimates, approximately 70,000 units of public housing within an associated $9,000,000,000 in budget authority are in the pipeline and currently not under construction. Many of these project are unlikely to go to construction and, therefore, the funds should be recaptured and applied to other housing needs. Consequently, the Committee included bill language requiring the Department to apply the first $1,000,000,000 in public housing recaptures to modernization and 30 percent of the recaptured thereafter for additional modernization. As a result of this policy, it is estimated that $2,600,000,000 will be available for public housing modernization.

In connection with the funds provided for public housing modernization, the Committee has been made aware of a serious problem confronting a number of public housing authorities. This problem has arisen because selected public housing authorities have found that although substantial development money for new public housing has been allocated in the past, too often the most urgent needs are in the modernization program. Complicating the problem is the fact that the Department has notified various public housing authorities that funds provided for a new project may not be transferred to another new project if the former is unable to go to construction and may not be converted to modernization work. This prohibition results in the recapture of public housing development funds. The St. Louis public housing authority, for example, will lose $8,500,000 of moneys made available for new public housing, which cannot be used for that purpose, but which could be used to restore one of its largest public housing projects. The Committee strongly urges the Department to make available from within the funds provided, sufficient moneys to those public housing authorities that can make use of such funds within 12 months.

In addition, the Committee also included a provision requiring the use of $89,321,727 of budget authority in fiscal year 1983 for the modernization of 5,073 vacant uninhabitable public housing units. A similar provision appeared in two previous appropriation acts (Public Laws 97-216 and 97-272).

The Senate language also requires that the Department apply 70 percent of the funds recaptured from public housing (after the first $1,000,000,000) be used for the reservation of section 8 existing units. The Department estimates that this proviso could result in the availability of $1,400,000,000 in budget authority and, consequently, the reservation of 24,860 section 8 existing units. The House action provides $2,662,495,910 in budget authority and an associated 47,270 units (the administration did not request any section 8 existing units for fiscal year 1983).

The following table compares the House and Senate recommendations on assisted housing.

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING—COMPARISON OF PROPOSED PROGRAMS—HOUSE VERSUS SENATE

	House		Senate	
	Units	Budget authority	Units	Budget authority

[1] Estimated. [2] Actual. [3] Excludes GNMA targeted tandem budget authority of $500,000,000 to support an estimated 10,169 units.

Rent Supplement
(Rescission)

The Committee recommends a rescission of $2,830,360,000 in budget authority and $105,160,000 in contract authority as proposed by the administration.

The Committee agrees with the basic thrust of the administration's proposal to accelerate the conversion of units from the rent supplement program to section 8. In Public Law 97-216, the Congress authorized the conversion of 60,000 units in fiscal year 1982. The Committee recommends the same rate of conversion in fiscal year 1983.

The Federal Government has entered into long-term contractual commitments and obligations for assistance under the rent supplement program to owners and tenants of projects which are secured by mortgages insured by FHA or financed under a State or local program. Project owners, lenders and bond holders have acted directly in reliance on those commitments.

The Committee has reviewed the Department's actions this past fiscal year in regard to meeting rent supplement shortfalls and is concerned that HUD is not now able to assure the continued availability of adequate funding resources to these projects. Due to a severe shortage of available rent supplement resources this past fiscal year, the Department, with the Committee's concurrence, had to tap its funding authority under the U.S. Housing Act of 1937 to meet rent supplement contract shortfalls as they arose. This year, demands on those resources may be far greater and their availability for this purpose thus less assured.

Accordingly, the Committee directs the Department, before the expiration of this continuing resolution, to develop a comprehensive funding plan for meeting these obligations. The plan shall include data and projections which demonstrate the degree to which the additional funds to be recaptured are needed for these obligations and shall include the method of the plan's implementation. The Committee expects the Department to work closely in this interim period with those affected in order to assure an adequate, permanent resolution of this problem.

In the interim, the Committee directs that the Department reserve such additional amounts as necessary, from the $208,160,160 provided for section 8 existing amendments to augment the funds available for rent supplement amendments.

The Committee recognizes that a long-range solution may lie at least in part in conversion of State-aided, bond-financed projects from rent supplements to equivalent assistance under the permanent authority of the section 236 rental assistance program. Therefore, the Committee believes that the Department should look closely in conducting its analysis and developing its plan, at both the rent supplement and the rental assistance programs.

Housing for the Elderly or Handicapped Fund
(Limitation on loans)

The Committee recommends $724,800,000 as the loan limitation for the elderly and handicapped program. This would provide for a total of 16,000 units in fiscal year 1983, as opposed to the requested level of 10,000 units and $453,000,000 of loan limitation proposed by the administration and contained in Public Law 97-272.

The Committee has recently learned that the Department intends to begin reserving section 8 authority for section 202 units at an interest rate of 11.75 percent. The Committee further understands that this interest rate is the current Treasury borrowing rate charged to the section 202 fund and it does not reflect the rate at which the Department may have to borrow when construction, on projects reserved in 1983, is completed in late fiscal year 1985 or early fiscal year 1986. If interest rates continue to decline, it appears unreasonable to the Committee to reserve units in fiscal year 1983 at an inflated interest rate. Reservations thus made would be at a higher interest rate resulting in fewer units reserved than would have been under current procedures where the reservation interest rate is based upon a reasonable projection of interest rates to be in effect at the time of closing (about 2 years after reservation). The Committee feels that the proposed increase in the reservation interest rate is an attempt to reduce the number of units to receive assistance under the program. Therefore, the Department is directed to continue using the current procedure and interest rate for reserving section 202 units in fiscal year 1983 and subsequent years.

The Committee has included bill language to assure that the Department will provide loans at 9.25 percent for those section 202 pipeline units that go to closing during fiscal year 1983.

Federal Housing Administration Fund

The Committee has included bill language increasing the FHA limitation on guaranteed loans from $39,800,000,000 to $45,900,000,000. In its fiscal year 1983 budget request, the administration proposed a $35,000,000,000 limitation on FHA commitments for mortgage insurance. The HUD-Independent Agencies appropriation bill for fiscal year 1983 (Public Law 97-272) contained a limitation of $39,800,000,000. However, the Committee has recently been informed by HUD that on the basis of the Department's latest projections that the FHA commitment level will exceed the current limitations. The Committee believes that without this increase in the limitation, the FHA program could be shut down in mid-July during the peak of the housing season.

The Committee has also included bill language which will allow HUD to exceed the FHA mortgage limit for multifamily mortgages by 140 percent in areas across the country where housing costs are the highest. Current law establishes three categories for FHA mortgage limits. The first category is in areas where the basic FHA limits apply. The second is in those areas in which HUD may exceed the FHA limit by 75 percent. The third is in those high-cost areas where the mortgage limit may be exceeded by 90 percent. The Committee believes that increasing the FHA mortgage limits will help stimulate housing construction in these highest cost areas.

Government National Mortgage Association Special Assistance Function Fund

The Committee has not recommended providing any additional funds for the Government National Mortgage Association's (GNMA) special assistance function program. The House has provided $500,000,000 for the program.

The Omnibus Budget Reconciliation Act of 1981, Public Law 97-35, set the GNMA limit at $1,973,000,000. The fiscal year 1982 HUD-Independent Agencies Appropriations Act, Public Law 97-101, provided the entire amount authorized.

Of the $500,000,000 added by the House, $350,000,000 is for targeted tandem projects and thus, will provide no assisted housing for low-income individuals, and $150,000,000 is for 20 percent section 8 projects—on these 20 percent projects, GNMA pays a subsidy on all of the units—this means that middle income tenants are being subsidized.

The Committee has not recommended the appropriation of this additional $500,000,000 for several reasons. First, the funds are not authorized. Second, to fund all of the lottery losers, other than 100 percent section 8 units, would require another $1,270,000,000 ($678,000,000 for targeted tandem and $592,000,000 for partially assisted, 20 percent projects). Each unit assisted through GNMA will cost $40,000. Finally, for each $100,000,000 appropriated in fiscal year 1983, the outlays in fiscal year 1985 will be $97,500,000.

DISTRICT OF COLUMBIA

The Committee anticipates that final action will be taken on the District of Columbia appropriations bill for fiscal year 1983, H.R. 7144, prior to completing the action on this joint resolution. For this reason the Committee recommends that the District proceed at a rate of operation pro-

vided under the conference report on H.R. 7144.

GENERAL PROVISIONS

Veterans Administration

The Committee recommends deletion of House bill language (sec. 109) which would direct the Veterans Administration to terminate the development of a centralized hospital-wide information system (Computerized Medical Information Support System—COMISS) and implement a decentralized minicomputer system (called MUMPS).

Each of these systems has a different focus. The centralized system (COMISS) is more suited for aggregating data and providing information for management decisions such as resource allocation among regions and hospitals. The decentralized system (MUMPS) is an essential tool needed for the day-to-day operations of individual Veterans Administration medical centers.

Payment to the Postal Service Fund

The Committee has recommended that postal rates for all preferred-rate mailers be maintained in fiscal year 1983 at Step 14. This will have the effect of requiring an annual appropriation of $789,000,000. At a time when the President is relying on nonprofit groups, charities, veterans groups, and volunteer organizations to fill the gap left by reductions in social program spending, the Committee believes that the phaseout of postal rate subsidies for these organizations should be stablized and put back on the track envisioned when the Congress mandated such a phaseout in 1970.

Child Support Enforcement

The Committee recommends acceptance of House bill language which allows no reduction in AFDC grants to States if States are not in compliance with Child Support Enforcement rules relating to operations and procedure. The Committee is informed that the rules in question may penalize effective State Child Support Enforcement offices which technically are out of compliance with the rules, but not penalize ineffective State Child Support Enforcement offices which are in compliance. The Committee urges that the relevant authorizing committees review these rules for possible changes to avoid the need for temporary corrective legislation.

International Financial Institutions

The Committee is recommending the deletion of section 115, a provision which is also in the existing continuing resolution. This provision allows the President to reallocate the total amount of funds provided for international financial institutions, so long as the total reallocated is equal to the total which is provided under the resolution. The Committee reallocates these funds by making specific appropriations for each of these international financial institutions, and thus section 115 is not necessary under the Committee's version of this joint resolution.

Power Marketing Administrations

Recent reports from the Department of Energy have indicated that a restriction placed in the first 1983 continuing appropriation with respect to studying the pricing of hydroelectric power by the six Federal public power authorities or other agencies or authorities of the Federal Government may lapse when the continuing resolution expires. While the Committee strongly believes that restriction was permanent and thus should not lapse, a similar legislative provision has been included in this resolution to clear up any ambiguity.

Bonneville Power Administration

The Committee has included the full amount of new borrowing authority for the Bonneville Power Administration, as proposed in the budget request for fiscal year 1983. The recommendation provides borrowing authority which is needed to finance both the multi-year conservation and renewable program and the transmission construction program.

Treasury, Postal Service, General Government—Department of the Treasury

Internal Revenue Service

It is the Committee's intention that there be available for Taxpayer Service and Returns Processing of the IRS $1,000,778,000, which is the same amount appropriated by the House in its regular fiscal year 1983 appropriations bill.

Further, the Committee has provided $170,510,000 for the Salaries and Expenses account of the IRS. This will alleviate a backlog in the Legal Services area. Finally, the Committee has allowed $1,009,409,000 for the Examinations and Appeals appropriations for the IRS. The Department of the Treasury indicated that these funds are needed to collect the revenues estimated in the President's budget for 1983. Without this increase, an estimated $100,000,000 in revenues might be lost.

The Committee has included language in the joint resolution regarding Internal Revenue Service treatment of proceeds received by charitable organizations in North Dakota resulting from a State gaming law. The intent of the amendment is to prohibit the IRS from taxing the proceeds received by charitable organizations in North Dakota from gaming activities, until such time as an appropriate legislative or administrative solution is reached.

U.S. Customs Service

The Committee concurs with the House in recommending an appropriation of $553,700,000 for the U.S. Customs Service. This level of funding will allow the Customs Service to carry out a number of important activities in fiscal year 1983 and will help restore the full-time permanent Customs work force to fiscal year 1982 levels in all principal categories of activity. The appropriation recommended by the Committee will also cover the administration's amended budget request of $30,000,000 for continuation of Operation Exodus. The Committee also believes that the funding recommended in this joint resolution should be sufficient to initiate the establishment of a second air interdiction module in Tucson, Ariz., and to create a special operations fund to be used for posse comitatus law enforcement operations with the Department of Defense and other Federal law enforcement agencies.

Finally, the Committee has included language in the bill that would prohibit the closing, relocation, or consolidation of critical Customs offices in Milwaukee, Wis.; Duluth, Minn./Superior, Wis.; Bridgeport and Hartford, Conn.; Anchorage, Alaska; Miami, Fla.; St. Albans, Vt.; and Portland, Oreg. These offices are vital to the successful activities of the exporting and importing communities in all of these parts of the country and shall remain opened and operating in their current status during fiscal 1983.

It is the Committee's intention that none of the funds provided in this joint resolution are to be used by the United States Customs Service to collect inspection and/or clearance fees on commercial aircraft as outlined in the proposed amendment to Part 6, Customs Regulations (19 CFR, Part 6), adding a new section 6.26 establishing a schedule for commercial aircraft fees. For policy reasons, the Committee is not in agreement with this proposal, and directs that it be vacated.

U.S. Secret Service

The Committee has concurred with the House in recommending an appropriation of $235,000,000 for the U.S. Secret Service. However, the Committee has also included language in the resolution directing the hire of 200 new special agents in fiscal year 1983 within the total appropriation provided.

The Service is a labor intensive organization whose success depends on having an adequate number of special agents to properly execute mission responsibilities. The critical resource of the Secret Service is the special agent criminal investigator who has the dual responsibility of guarding against those who would take the life of public officials holding the highest offices of this country, as well as those would undermine the integrity of the Nation's currency and securities.

The Committee recognizes that the Service is critically understaffed in special agents assigned to field offices. This deficiency, if ignored, will adversely impact on every phase of operations.

Unlike most Government agencies, the Secret Service must replenish the physically demanding permanent protective details on a systematic basis. While it is a temporary phenomenon for the agents, it is a regular, recurring problem for the organization.

Traditionally, the Service has sought to maintain a renewable base or pool of qualified field agents. In all but 2 of the last 6 years, the number of agent separations exceeded new hires. Of additional concern is the fact that due to limited hiring of new agents and a low attrition rate, the number of special agents between 21 and 34 years of age continues to decline. There has been a steady decline in the number of special agents between the ages of 25 and 34 and a corresponding increase in the number of agents 35 years of age and older. Agents 35 years of age and older account for 60 percent of the Secret Service agent force.

This trend must not be allowed to continue in view of the physical and psychological demands of the missions.

In order to remedy this critical problem, the Committee directs that the Service recruit an additional 200 special agent positions for the fiscal year 1983.

General Services Administration—Rental of Space

The Committee recommends that the Rental of Space activity in the Federal Buildings Fund be increased from $722,439,000 to $770,000,000, the amount of the original President's budget request. This request was based on the administration's goal of reducing Federal employment thus leading to an expected reduction in the inventory of leased space. This leased space reduction has not occurred as anticipated; GSA therefore must pay private sector lessors for leased space currently occupied. The level of $770,000,000 is required for this purpose. The Committee encourages GSA to continue efforts to improve space utilization and thereby reduce its leased space needs. This action increases the aggregate limitation level of the Federal Buildings Fund.

Contracting Out of Veterans Jobs

The Committee has included language in the bill that would prohibit the General

Services Administration from contracting out certain types of blue collar jobs where 50 percent or more of the GSA jobholders are preference-eligible veterans as identified in title 5, 2108 U.S.C. At a time of devastating unemployment, particularly in the blue collar trades covered by this provision, the Committee does not believe it is appropriate to support GSA's decision to lay off more than 10,400 veterans currently employed in various trades at the agency. The Committee also notes that GSA has failed to comply fully with the provisions of OMB Circular A-76 that governs such decisions on whether or not to contract out certain classifications of jobs. For all of these reasons, the Committee directs GSA not to contract out these jobs that are so heavily occupied by veterans.

The Committee is concerned that directions given to the General Services Administration in Senate Report 97-192 the report that accompanied H.R. 4121 the fiscal year 1982 appropriations have not been followed. These directions require GSA to take all steps to retrofit the Government motor pool fleet with energy-conserving devices and the Committee is concerned that little progress has been made since those directions were given in September 1981.

While many energy-conserving devices are ineffective, the EPA has certified the several such devices which are proven to work. The several devices which are certified to be effective are listed in appendix V of the GAO report entitled, "Consumer Products Advertised To Save Energy—Let the Buyer Beware."

The Committee expects the Administrator of GSA to take action on this matter and by the time of the hearings on 1984 budget proposals, the Committee expects progress to have been made. Had GSA followed the direction of the Committee in September 1981, several millions of dollars and thousands of gallons of fuel would have been saved.

Office of Personnel Management

The United States Foreign and Commercial Services in the Department of Commerce counsels U.S. businesses on exporting through 48 U.S. Commercial Service District offices in the United States and through Foreign Commercial Service offices in 67 countries overseas. The goals of the United States Foreign and Commercial Services are to increase the number of new-to-market firms as well as the number of firms that are successfully following up on previous activities with continued promotion overseas. Other goals include (1) providing business with information on U.S. and foreign government procurements through the Commerce Business Daily, and (2) encouraging and sponsoring additional involvement by the private sector and the States in export promotion activities. The recent merger of the district and overseas offices gave the United States, for the first time, a thoroughly integrated and professional commercial service dedicated to assisting American industry to expand its economic bases at home and to increase its share of the world marketplace. The Director General supervises approximately 1,100 employees worldwide.

The Office of Personnel Management recently completed a survey of Federal wage board supervisory pay and found the distinction between supervisory and nonsupervisory pay to be inadequate. OPM intended to raise the supervisory pay but felt the 4-percent pay adjustment enacted as part of the prior continuing resolution prohibited them from doing so. Therefore, the Committee recommends exempting this group of Federal blue collar supervisors from the 4-percent pay restriction. This does not, however, exempt them from the pay cap covering top executive personnel and Members of Congress

Property Review Board

The Property Review Board is made up of the President's most senior advisors. The Executive Director is responsible for the day-to-day operation of the Board and coordination of policy for the executive branch. It is appropriate and necessary that the individual who is discharging these responsibilities have the rank of Executive Level III. In order to execute the program effectively, the White House must have someone with extensive experience in managing large organizations involved in the management of real property. The Committee has recommended that the Executive Director have the rank of Executive Level III.

National Aeronautics and Space Administration—Research and Development

The Committee agrees with the House and has included language (sec. 126) establishing a cap on expenditures for the tracking and data relay satellite system (TDRSS). This provision to prohibit, without prior approval, NASA from entering into a contract of this type differing from the arrangement described to the Committee earlier this month. The language also prohibits the Administrator of NASA from exceeding both the total case of TDRSS and the cost of restructuring the existing contract to specific amounts without the approval of the Committees on Appropriations.

Outside Earned Income

The Committee has stricken section 127 of the House bill, which placed a limit on outside earned income of Members of Congress. The Committee notes that both the Senate and House have dealt with this issue through internal rules governing outside earned income, and believes reliance on rules is preferable to the creation of additional statutory restrictions.

Pay Cap

SEC. 128. The Committee has deleted the House provision which would raise senior executive, legislative, and judicial salaries by up to 15 percent. In its place, the Committee extended the existing pay cap until September 30, 1983, the expiration date of the continuing resolution.

Federal Labor Relations Authority

Finally, and again within the purview of the Treasury bill, the Committee has included the following: "provided further, $15,500,000 is appropriated for the Federal Labor Relations Authority."

When the Treasury-General Government bill was marked up, it was thought that $14,500,000 would be sufficient for the FLRA during 1983. However, on the basis of newly discovered evidence, the Committee believes that the FLRA should have $15,500,000 for fiscal year 1983.

Foreign Assistance Provisions

The Committee is recommending inclusion in the continuing resolution of five new sections which, taken together with the provisions of section 101(b) of the joint resolution and the deletion of section 115, conform the resolution to the Senate-reported version of the Foreign Assistance legislation, S. 3075.

Section 130 has the affect of delaying disbursements and obligations totaling $275,000,000 of direct loans for Israel under the Foreign Military Credit Sales program and $100,000,000 of direct Export-Import Bank loans until fiscal year 1984 in order to conform to 302(b) allocation numbers.

Section 131 conforms to section 522 of existing law as it relates to certain instructions the Secretary of the Treasury must give to U.S. directors of international financial institutions, except that it includes the International Monetary Fund in accordance with the new provisions of S. 3075.

Section 132 prohibits funding for operating expenses of the Agency for International Development, except for those funds which are appropriated under the specific operating expense account. Again, this is added in order to conform to the Senate version of S. 3075.

Section 133 is a provision which limits foreign assistance to any country which is not taking adequate steps to cooperate with the United States to prevent the introduction of illegal drugs. A similar provision is in the current continuing resolution, and this specific provision conforms with S. 3075.

Section 134 adjusts per capita gross national product figures to the current levels, which if not changed would have the affect of limiting loans to Thailand and the Philippines.

Senate Administrative Provision

Public Law 97-346, signed by President Reagan on October 15, 1982, changes the formula for computation of the Government's share of employee health benefits costs. The Office of Personnel Management has informed the Senate that it will be billed an additional $38.40 in 1983 for each employee enrolled in a Government-sponsored health benefits plan. Section 130 permits these added costs to be paid from the contingent fund of the Senate, out of the account for Miscellaneous Items.

Transportation

Amtrak will assume responsibility for operation of rail passenger service on the Northeast corridor on January 1, 1983. Pursuant to section 1165 of the Northeast Rail Services Act of 1981, Amtrak has indicated its intent to begin assuming responsibility for operation of rail passenger service off-corridor as well.

Under section 405 of the Rail Passenger Service Act of 1970 and contracts entered into pursuant to the Rail Passenger Service Act between Conrail and Amtrak, Conrail may be liable for employee protection as outlined in appendix C-1 to those contracts, for any Conrail employee adversely affected or deprived of employment by a discontinuance of rail passenger service or an assumption of rail passenger service by Amtrak, not withstanding the passage of the Northeast Rail Services Act of 1981, which generally relieved Conrail of employee protection. Without clarifying legislation, it might have been necessary for Conrail to pay employee protection benefits (1) to any employee not hired by Amtrak who was not able to hold a position with Conrail through the exercise of seniority or could hold a position but not with comparable pay; and (2) any employee who was hired by Amtrak but not with equivalent pay. Conrail may have been placed in the position of paying for any changes in the collective-bargaining agreements between Amtrak and its employees resulting in a reduced need for crews or low pay. In addition, it had the anomalous result of treating Conrail employees en-

gaged in intercity passenger service differently than Conrail employees engaged in commuter service. These results clearly were not intended when the Northeast Rail Services Act of 1981 was enacted.

The recommended new section numbered 137 is meant to put employees of Conrail who are adversely affected or deprived of employment as a result of Amtrak's direct operation and control of intercity rail passenger service on an equal footing with other Conrail employees adversely affected or deprived of employment as a result of changes made in Conrail's freight and passenger operations pursuant to the NERSA in 1981.

There have been indications from some quarters that SEPTA and perhaps the other commuter authorities and their commuter rail employees will not be subject to the Railway Labor Act, the Railroad Retirement Act and other similar laws after transfer of Conrail commuter service to the commuter authorities on January 1, 1983. This is contrary to the intent of the laws and would strip some 10,000 employees of their existing collective bargaining and railroad retirement rights as of midnight December 31, 1982, unless this amendment is enacted before that time.

An additional recommended provision (section 136) clarifies existing law and reaffirms that commuter agencies operating service after December 31, 1982 pursuant to part 2 of the Northeast Rail Services Act shall be subject to applicable laws, including the Railway Labor Act, the Railroad Retirement Tax Act and the Railroad Unemployment Insurance Act and employees who work for such agencies also shall be covered by those laws.

Federal Debt Collection

The Committee recommends a new general provision which permits certain Federal agencies to enter into contracts with private collection agencies for the repayment of debts owed the Government. This provision is necessary because the Debt Collection Act of 1982, which authorizes these contracts, requires that such contracts be limited to the extent authorized in advance in appropriation acts.

Since this requirement was enacted into law this fall the Committee has not had the opportunity to fully examine agency proposals to implement the act. The Committee, therefore, recommends an open ended authorization for contracts effective for this fiscal year only. The Committee directs the affected agencies to submit, as part of the fiscal year 1984 budget cycle, requests for individual dollar limitations.

The Committee also recommends a limit of 40 percent that a private contractor can receive of the collections made as well as require that contracts be open for competitive bid.

Air Traffic Controllers

Public Law 96-347 provides that civilian air traffic controllers of the Department of Defense, who are actively engaged in the separation and control of air traffic, and who are performing like duties to those air traffic controllers in the Department of Transportation, should be treated the same as their counterparts in the Department of Transportation.

However, under the provisions of Public Law 97-276, Congress gave a special pay differential to only air traffic controllers of the Department of Transportation for their service during the air traffic controllers strike of 1981, and for their continued assistance in rebuilding the National Airspace System.

The Committee believes that this oversight should be remedied and therefore recommends a new provision (sec. 139) which includes air traffic controllers of the Department of Defense in the special differential provided for all other civilian air traffic controllers of the Department of Transportation.

Capital Construction Funds for Fishery Facilities

The Committee also includes shoreside fisheries facilities in the Capital Construction Fund program of the National Oceanic and Atmospheric Administration. The fund currently consists of the deposits of before-tax profits which can be used to rebuild or rehabilitate the fishing vessels of participants. The new provision provides equitable treatment for those elements of the fisheries industry with onshore facilities.

Federal Trade Commission

The Committee recommendation includes a provision barring the Federal Trade Commission from using appropriated funds to invalidate certain State laws as they pertain to the regulation of licensed professionals.

Federal Employees Health Benefits

SEC. 142. The Committee recommends a new provision which prevents the incorporation, in the continuing resolution, of a provision in the House- and Senate-reported bills on Treasury, Postal Service, and General Government which prohibit funds to pay for an abortion under any health plan of the Federal employees health benefit (FEHB) program. The Committee rejected this provision in its consideration of the fiscal year 1982 bill. The Senate has never adopted this prohibition on the use of funds.

FEHB coverage is compensation earned by Federal employees and not Federal payment for abortions. The Committee believes that unless and until Congress or the courts determine that abortion is in fact illegal, Congress should not meddle in determining how any Federal employee—or any private citizen—spends his or her money.

It is the view of the Committee that the restriction constitutes an unwarranted attempt by the Congress to inject itself into the collective bargaining process by eliminating a medical benefit which Federal employees have negotiated as part of their total compensation package. In addition, the effect of such controversial legislative riders has been to impair, if not cripple, the appropriations process which funds the Federal Government.

Viper

SEC. 143. The Committee recommends a new section in the resolution prohibiting the obligation of any funds for the development or procurement of the Viper light antitank weapon. This limitation restates the Committee's funding recommendations in the Senate-reported Defense appropriations bill for fiscal year 1983.

Military Bonuses

SEC. 144. Absent the conventional method of implementing bonuses, the Committee has recommended a provision extending the authorization of certain military bonuses until expiration of the continuing resolution. Because the enlistment and reenlistment bonus programs have had major positive impact on recruitment and retention, the Committee favors the continuation of the requisite authorization.

Mineral Production Incentives

SEC. 145. The Committee recommends a provision to utilize current budget authority for the Department of Defense in the amount of $50,000,000 for purchases or purchase commitments of metals, minerals, or materials under title III of the Defense Production Act of 1950. This is not a new appropriation but will renew the authority of the Department of Defense to implement a program to stimulate needed domestic production of critical and strategic minerals.

Fort DeRussy

SEC. 146. The Committee recommends a provision which would deny use of any funds to sell, lease, or rent any portion of Fort DeRussy, Honolulu, Hawaii.

European Troop Strength Limitation

SEC. 147. The Committee has recommended a revised limitation on U.S. troop strength in Europe, partly as an outgrowth of discussions with those in Congress who view any kind of force reduction as a retreat from our NATO alliance commitment. Accordingly, the limitation included in the joint resolution would put an end-strength ceiling on active military personnel regularly stationed on shore in Europe at the actual level at the end of fiscal year 1982. This would not require any force reduction but would halt planned growth in 1983.

Further, the provision would permit the President to waive the end-strength limitation upon a declaration to Congress of overriding national security requirements.

The Committee recommendation will help the Congress control the steady growth of U.S. forces stationed overseas and permit annual review and specific approval of any substantial change in these force levels.

MLRS Multiyear Procurement

SEC. 148. To permit the expeditious execution of a multiyear procurement of the multiple-launch rocket system, the Committee recommends specific enabling language as adopted in the House-passed fiscal year 1983 Defense appropriations bill (H.R. 7355). Further, the Army is directed to look into the requirement for production of insensitive high explosive materials by conducting a feasibility study of the facilitization requirements for the production thereof, at a cost of approximately $1,000,000. The results of this study should be provided as expeditiously as possible to the Committee on Armed Services and Appropriations, but not later than June 1, 1983.

Bradley Lake Hydroelectric Project

SEC. 149. The purpose of this section is to deauthorize the Bradley Lake hydroelectric project. It was originally authorized as a hydroelectric project by the Flood Control Act of 1962.

As currently proposed, the project would provide 135 megawatts of power to the Kenia Peninsula, an area of south-central Alaska badly in need of electrical power. The project during its construction phase is expected to create about 550 jobs. The construction period will be 4 to 5 years.

The reason for deauthorizing the project at this time is the lack of Federal funds for its construction.

The State of Alaska, through the Alaska Power Authority, has expressed a strong interest in constructing the project. In order to make the best use of preliminary work which has already been completed, the Federal Energy Regulatory Commission should allow the Alaska Power Authority to incorporate in its application the environmental

impact statement and general design memorandum prepared by the Corps of Engineers.

Runaway and Homeless Youth

SEC. 150. The Committee recommends inclusion of a new section under title I of this joint resolution to increase the appropriation from $18,000,000 to $25,000,000 for activities authorized under the Runaway and Homeless Youth Act (RHYA). The additional funds will be used for 25 new programs in unserved communities and to strengthen many of the 166 existing grantees. No funds will be spent on national training and technical assistance, rather such services shall be provided on a State-by-State basis. Networking grants designed to better coordinate the array of local services assisting runaway and homeless youth shall be on a State-by-State basis. These services shall be equally available to all runaway serving agencies regardless of their status as RHYA grantees. No funds will be spent for interstate travel by RHYA grantee staff except to assist runaways and their families directly. Demonstrations for reuniting and strengthening families, including those headed by a single parent, promoting independent living for 17-year-olds who cannot return home, combating juvenile prostitution, and developing detached youth work to reach runaway youth initially unwilling to go to a runaway center shall be funded. The Department of Health and Human Services shall continue to support the national runaway switchboard including the agency information service.

Alaska Railroad

SEC. 151. Funds are necessary to insure the continued operation of the Alaska Railroad, which has been operated under substandard conditions due to inadequate Federal appropriations during the last 10 years. Because of the extreme financial difficulties faced by the Alaska Railroad during the last 10 years, the railroad has been forced to consume capital to supplement operating requirements and to marginally maintain outdated and inefficient equipment.

The cost of operating an outdated plant and equipment has severely hampered the ability of the Alaska Railroad to meet its congressional mandate of providing military, freight, and passenger service into the interior of Alaska. The Committee, because of the uncertain status of legislation to transfer the railroad to the State of Alaska, that the Federal Government must continue to meet its ongoing responsibility to operate a viable railroad in Alaska.

Cable Broadcasting

SEC. 152. The Committee has included language which will delay the effective date of the decision of the Copyright Royalty Tribunal of October 20, 1982, Docket No. 81-2, and thereby enable the U.S. Court of Appeals to issue its decision on the Copyright Royalty Tribunal's broadcast signal rate increase prior to the effective date of such an increase.

The Committee believes that cable broadcasting systems have introduced a healthy, competitive stimulus to the telecommunications marketplace and believes this judicial review to be in the best interest of the consumer.

The Committee believes that its actions are in accord with recent Federal deregulatory efforts and that adoption of this language will insure that the appropriate balance is maintained between the interest of copyright owners, copyright users, and the public benefits derived from alternative programing choices.

TITLE II

The Committee has recommended a separate title providing additional funds to stimulate employment in productive jobs. Confronting Federal budget deficits of unprecedented magnitude, the Committee remains determined to exercise fiscal restraint in all areas of Government expenditures, and firmly believes that the amounts provided in this continuing resolution and the regular appropriations bills reflect this determination. The Committee has reported no appropriation bill in excess of its allocation under section 302(b) of the Budget Act, and has gone to some lengths to insure that the bills conform to those allocations.

The Committee is deeply concerned, however, that millions of Americans are out of work, and believes that, within the constraints of fiscal prudence, additional funds can and should be provided to employ people in productive jobs. This effort becomes even more important in view of the alarming deterioration of our capital assets and the need to restore the physical wealth of our Nation.

The Committee's recommendations in title II strike a balance between these twin responsibilities of fiscal restraint and increased employment. While making reductions in the amounts approved by the House, the Committee has recommended nearly $1,200,000,000 for a variety of established programs that will create additional jobs in a relatively short period of time and yield tangible benefits of lasting value to the Nation.

Transportation

The Committee recommends $100,000,000 for Interstate Transfer Grants—Highways, and $25,000,000 for Interstate Transfer Grants—Transit. These funds will help to reduce the outstanding Federal commitment to fund the remaining balance owed to State and local governments on these accounts, and constitute a significant contribution toward rebuilding our transportation infrastructure as well as employment.

The Committee is aware that the Tucson interstate substitution projects can readily absorb an additional $16,200,000. The Committee expects the Federal Highway Administration to give priority to these projects when allocating funds under this account.

The Committee amendments also include $10,000,000 be appropriated for the construction of the Washington Metropolitan Area Transit Authority's subway system. The subway's construction has been slowed in past years to accommodate Federal budget reductions and, as a result, the construction is several years behind schedule and the cost of the project substantially increased. Funding of the system during times of lower construction costs will help recover the escalated cost of the subway due to delays caused by reduced Federal spending, while providing substantial employment benefits in the Washington metropolitan area.

VA—Hospital rehabilitation

The Committee does not agree with the House in providing an additional $50,000,000 for the VA's nonrecurring maintenance and repair program in fiscal year 1983.

In acting on the regular HUD-Independent Agencies appropriations bill for fiscal year 1983, Public Law 97-272, the House on September 15, approved reducing the VA-minor construction account by $50,000,000. The Senate agreed with this reduction, due to the fact that there was an unobligated balance at the end of fiscal year 1982 of over $156,000,000. The VA has indicated to the Committee that the agency does not currently have a system for prioritizing construction needs. Therefore, the Committee does not believe that the additional $50,000,000 added by the House will help stimulate jobs.

HUD—Public housing modernization

The Committee does not agree with the House in providing an additional $200,000,000 for public housing modernization. The Committee has provided $2,600,000,000 in title I of the resolution for public housing modernization. HUD has informed the Committee that they could effectively review and process 1,800,000,000 dollars' worth of modernization requests, and that amounts above that level could be reserved by the Department for use by PHA's during the maximum allowable 5-year period. Thus, the Committee does not believe that the additional $200,000,000 proposed by the House will help create additonal jobs.

HUD—Community development block grant

The Committee does not agree with the House in providing an additional $1,000,000,000 for the Community Development Block Grants.

On December 7, the President transmitted a deferral of $221,000,000 for the Community Development Block Grant program. The Department has calculated that $426,000,000 in unobligated balances will be carried over in fiscal year 1983.

The Committee does not believe that the House's proposal would create additional jobs immediately because there is no guarantee communities would use the funds for this activity since they are permitted to select activities based on their needs; employment may not be granted immediately since construction projects require a planning stage; and the proposal to emphasize small construction projects would generate temporary—not permanent—employment.

Economic Development Administration

The Committee recommends that an additional $100,000,000 above the level provided by S. 2956 be appropriated for the public works grants program of the Economic Development Administration.

Small Business Administration

The Committee recommends an additional $2,000,000 as provided in the House bill to finance debentures issued by small business development companies under section 503 of the Small Business Investment Company Act.

The Committee believes that the Small Business Administration's section 503 program has not reached its full potential because of the Administration's policy prohibiting the use of tax-exempt financing with 503 projects. In the conference report to Public Law 96-302, the Congress said that the SBA should not disapprove the guarantee of any debenture solely because the project's other sources of financing come from, or are collateralized by, tax-exempt industrial revenue or development bonds. Although SBA regulations also would permit tax-exempt projects, the Administration has refused to approve projects which use tax-exempt financing. Consequently, the Administration has expended only a fraction of the funds appropriated by Congress for this program. To insure that the 503 program reaches its optimum potential in creating and retaining jobs, the Commit-

tee is directing the administration to approve projects whose other source of financing includes tax-exempt financing, if the project otherwise complies with the rules, regulations, and procedures of the program.

Forest Service

National Forest System

The Committee recommends funding in the amount of $35,000,000 for site preparation, reforestation, and timber stand improvement activities on Forest Service lands. These funds would be expended on the very labor-intensive activities associated with preparing sites and planting additional trees on deforested Forest Service lands, as well as thinning brush and other stand improvement activities intended to improve the growth of timber on FS lands. This recommendation includes about $15,000,000 for site preparations work for reforestation and an additional $20,000,000 for timber stand improvement. These investments will return positive economic returns over the next 50 years, as growth rates improve on existing timber inventories and on deforested areas.

The Committee also recommends $27,500,000 for national forest system road and bridge construction, reconstruction, repair, and improvement and an additional $10,000,000 for facility construction, reconstruction, and administrative facilities and associated water, sanitation, and other supporting utility systems. The funds would be distributed as follows:

Roads and bridges	$227,500,000
Facilities	10,000,000
Total	37,500,000

The Forest Service road system includes 281,000 miles of roads, used for recreation, firefighting, administrative, wildlife, timber, minerals, and other purposes. Repair and maintenance has been budgeted annually at about $60 to $75 million in recent years and the Forest Service only does its highest priority work.

These funds can be expended in fiscal year 1983 via contract with local construction or timber operators for additional construction or maintenance work, thereby alleviating some of the unemployment in the timber industry associated with the low level of housing construction.

Road improvements put in place through this program add to the value of the Federal investment on these lands and will remain available for long-term use by the American public.

The Forest Service has identified $125,000,000 in facility construction, reconstruction, and repair needed to protect the health and safety of the recreation user of Forest Service lands and the Forest Service employees staffing those areas. The Committee recommendation would provide for the highest priority items and could be expended through small business contracts for obligation in fiscal year 1983.

The Committee would normally fund some of the road and facility maintenance projects included in this section in the "National forest system" account but has provided all funding in one account to allow the Forest Service maximum administrative flexibility in order to implement this section. Projects normally eligible for either maintenance of construction funding are eligible for funds provided herein.

Improving Indian health facilities

Of the amount provided for Indian health facilities, $39,000,000 is for the construction of sanitation facilities for existing homes and units built by the tribes and by the Bureau of Indian Affairs. Over 1,000 jobs will be provided in areas experiencing unemployment for in excess of the national average.

Construction of Bureau of Indian Affairs' schools

Construction on the Hopi High School will begin in early spring. In addition to providing employment, the $27,500,000 contained in the Committee recommendation will fulfill the Government's obligation to provide a secondary educational facility on the Hopi Reservation.

Improving Indian housing

There are an estimated 92,000 Indian families in need of housing assistance. In many instances, the other Federal housing programs are unable to meet the needs of isolated reservation locations which require a relatively small number of units. The Committee, therefore, recommends additional funds to provide for 800 repairs and the construction of 150 new units. Approximately 600 direct and several hundred indirect jobs will be created. The funds shall be distributed according to HIP regulations by the central office.

USDA rural development activities

The Committee agrees with the House that Farmers Home Administration programs for the construction of water and sewer systems are critical to the development of rural America. The numerous pending applications for construction assistance provide evidence of the great need for essential water and waste systems in rural areas throughout the country. Since many of these projects are ready for construction, and since the appropriate FmHA mechanisms are already in place to initiate assistance, the Committee recommends an appropriation of $100,000,000 for grants; $300,000,000 for loans; and $3,250,000 for 200 additional positions to support these program increases. The Committee believes that this additional funding, together with funds made available in the fiscal year 1983 appropriations bill (H.R. 7072) now pending in Congress, will provide much needed assistance in rural areas, while also producing additional job opportunities.

The Committee believes that funds provided in the fiscal year 1983 appropriations bill for resource conservation and development and for watershed and flood prevention activities are adequate at this time. New activities in these programs stimulated by additional funding may take longer to commence than desirable to achieve the effect of creating new jobs. Consequently, the Committee recommends no additional funding for these programs beyond the levels in the fiscal year 1983 appropriations bill.

Emergency productive jobs

The Committee recommends no funding for the $1,000,000,000 emergency productive jobs program included by the House. There is no authorizing legislation for this program and no budget request. The Senate voted in September against including a similar program in the current continuing resolution.

Funding this program would essentially re-create a Labor Department public service jobs program, much like the CETA title II-D and title VI programs which Congress abolished in 1981. The new Job Training Partnership Act, which replaces CETA, authorizes no such program.

Public service jobs programs have not been very successful in helping enrollees obtain full-time, nonsubsidized employment. There is considerable doubt about the net job-creating impact of such programs, due to the tendency for local governments to substitute Federal funds for local resources, rather than actually expanding employment. Since the jobs are only temporary and provide no real training to develop employment skills, enrollees often return to public assistance and the unemployment rolls. In place of this ineffective approach, Congress could provide funding over the level included in the House version of the bill for existing programs which emphasize vocational training, as authorized under the transition provisions of the Job Training Partnership Act.

Employment and training assistance

The Committee recommends deletion of House bill language providing an additional $32,400,000 for the Job Corps, as well as $200,000,000 for the newly authorized dislocated worker program under title III of the Job Training Partnership Act.

Under title I of this joint resolution, the current rate of $585,600,000 is already provided for the Job Corps. Although Job Corps has been an effective vocational training program for disadvantaged youth, the Committee has chosen to give priority to expanding other lower cost vocational training activities in order to insure that the maximum number of individuals will be served with limited Federal resources.

The Labor Department has not yet developed regulations for implementing the dislocated worker program, nor has there been a budget request or Committee hearings to examine this new program. It is, therefore, too early to determine how much, if any, funding can be effectively utilized during the balance of fiscal year 1983.

Job training programs

The Committee recommends an additional $250,000,000 for vocational training programs authorized under the transition provisions of the Job Training Partnership Act. The current rate for these activities, provided for under title I of this joint resolution, is $2,180,672,000.

These programs are already fully operational throughout the country, providing an array of employment and training services to disadvantaged, jobless workers. The additional funds provided can be quickly utilized by the existing project sponsors whereas the House approach would require time-consuming development of new regulations.

The additional amount recommended by the Committee would serve an estimated 109,000 individuals, approximately half of whom would be disadvantaged youth. This is about two-thirds of the number proposed to be served by the House "emergency productive jobs" program, but only at one-fourth of the cost of the House version. The Committee approach in funding job training for occupations where there is a strong demand for skilled workers has proven more effective in providing permanent employment than the public service jobs that have been proposed.

Older workers

The Committee recommends $19,400,000 for the Community Service Employment Program for Older Americans, in addition to the amounts already provided under the Senate version referenced in title I of this joint resolution.

This recommendation would bring fiscal 1983 funding to $296,500,000, providing an

estimated 58,000 jobs during the period from July 1, 1983 through June 30, 1984. The House has recommended $277,100,000 for this program, which the administration proposed for block grant consolidation. In order to make this increase effective immediately, the Committee provides this higher level of jobs effective January 1, 1983, 6 months earlier than usual. Under terms of the current continuing resolution, the existing level of 54,200 jobs would be maintained. In a time of high unemployment, the Committee recognizes the need for special employment assistance for those hard-to-place workers over the age of 55, who are served by this program. As with the existing program, bill language maintains the current 78 percent set-aside for national contractors, with 22 percent earmarked for the States.

Job Service/Unemployment Insurance Service

The Committee recommends deletion of $339,000,000 added by the House for State administrative costs of the Job Service and the Unemployment Insurance Service. Of this amount, $75,000,000 was earmarked for the Job Service, and $264,000,000 was for the Unemployment Insurance Service. The House recommendation would have raised the Job Service staffing total to 28,100, an increase of 3,300 positions over the current level. The Committee intends to stabilize Job Service staffing at the 24,800 position level agreed to earlier this year.

The $264,000,000 House allowance for additional unemployment insurance State claims staff does not appear to belong in a job-creating initiative. The Committee's recommendation for the regular bill, incorporated by reference into this joint resolution, already provides $75,400,000 more than the House regular bill for processing unemployment benefits. If additional funding is necessary, a supplemental would be required to insure proper handling of mandatory caseload.

Day Care Services

The Committee recommends deletion of the $50,000,000 House add-on for day care services under the Title XX Social Services Block Grant; such funding exceeds the authorization ceiling of $2,450,000,000 established for fiscal 1983.

In the regular bill, the House provided only $1,974,126,000 for this program, compared to the $2,450,000,000 Senate recommendation. With the Senate level of $2,450,000,000, the States would be free to shift emphasis toward increased child care activities, if they were deemed of sufficiently high priority. This course of action is highly preferable to altering the work of the authorizing committees through back door changes to the substantive legislation.

Health Services activities

The Committee recommends deletion of a House amendment providing $15,000,000 for home health care activities under both the Community Health Center and Migrant Health programs. These funds would add to amounts already in both the Committee and the House versions of H.R. 7205. In the Senate Committee's case it has provided $302,500,000 for the Community Health Center program, the authorized level and $21,283,000 more than the House. The Committee recommendation for migrant health is also above the House amount. The Committee allowances in the regular bill make sufficient funds available for authorized activities, of which home health services is one.

FEMA—Food distribution and emergency shelter

The Committee does not agree with the House in providing $50,000,000 to FEMA for emergency food and shelter programs. Under the House proposal, the $50,000,000 would then be given, in 45 days after enactment of the resolution, to the United Way of America which would constitute a special board to determine how the funds are to be distributed to local private voluntary organizations.

Based on the proposal by the House, it would be impossible for FEMA to comply with the terms of the resolution concerning a grant award within 45 days of enactment of the resolution.

Finally, Federal funding has never been given to private nonprofit organizations in the manner proposed by the House. The Committee does not believe a procedure of this nature should be established at this time and has not included funding for this program.

Military construction

The Committee recommends $250,000,000 for Military Construction, Family Housing. This amount is expected to provide some 10,000 jobs in the construction industry while at the same time cut into the enormous backlog of maintenance and repair projects on our military family housing inventory. The funds are distributed as follows:

Army	$125,000,000
Navy	25,000,000
Air Force	100,000,000
Total	250,000,000

All of the projects recommended can be started prior to the end of fiscal year 1983. Most are fully planned and many can be accomplished without regard to the weather conditions during the upcoming winter months. Further, all of the funds recommended are to be utilized only for projects in the United States.

The Committee recommendation is approximately $240,000,000 below the House proposal. The Committee believes that the projects proposed by the House in the areas of new construction and major improvements should be reviewed more carefully as part of the annual budget process. Also, it should be noted that the fiscal year 1983 Military Construction Appropriations Act (Public Law 97-323), signed October 15, 1982, provides some $1,340,000,000 (an increase of over $200,000,000 from fiscal year 1982) for projects in the same categories as proposed by the House.

The Committee believes that under normal circumstances military construction funds should not be categorized by the number of jobs created, but instead should be considered for the valid requirements which are accomplished particularly during these times of budgetary constraint. However, since the funds recommended in this bill can do both, the Committee believes the $250,000,000 proposal to be worthwhile.

Family Housing, Army

The Committee recommends $125,000,000 for maintenance and repair of family housing units in the Army inventory. Listed below are the locations of the proposed projects:

Alabama: Redstone Arsenal, Fort McClellan.

Alaska: Fort Richardson, Fort Wainwright, Fort Greely.

Arizona: Yuma Proving Ground, Fort Huachuca.

California: Ford Ord, Fort Irwin, Presidio of San Francisco.

Colorado: Fort Carson.

Georgia: Fort Benning, Fort McPherson.

Illinois: Joliet Army Ammunition Plant, Rock Island Arsenal, Fort Sheridan.

Indiana: Fort Benjamin Harrison, Jefferson Proving Ground.

Iowa: Iowa Army Ammunition Plant.

Kansas: Fort Leavenworth, Fort Leonard Wood, Fort Riley.

Kentucky: Fort Campbell, Fort Knox.

Louisiana: Louisiana Army Ammunition Plant, Fort Polk.

Maryland: Aberdeen Proving Ground, Fort Meade.

Massachusetts: Fort Devens, Army Materiels and Mechanics Research Lab.

Michigan: Selfridge Army National Guard.

New Jersey: Fort Dix.

New Mexico: White Sands Missile Range.

North Carolina: Fort Bragg.

Oklahoma: Fort Sill.

Pennsylvania: Carlisle Barracks.

South Carolina: Fort Jackson.

Texas: Fort Bliss, Fort Hood, Fort Sam Houston.

Utah: Dugway Proving Ground.

Virginia: Fort Lee.

Washington: Fort Lewis.

Family Housing, Navy

The Committee recommends $25,000,000 for maintenance and repair of family housing units in the Navy inventory. Listed below are the locations of the proposed projects:

California: Public Works Center, San Francisco, Public Works Center, San Diego.

Connecticut: Naval Submarine Base, New London.

Family Housing, Air Force

The Committee recommends $100,000,000 for maintenance and repair of family housing units in the Air Force inventory. Listed below are the locations of the proposed projects:

Alabama: Maxwell AFB.

Alaska: Eielson AFB, Elmendorf AFB.

Arkansas: Little Rock AFB, Blytheville AFB.

Arizona: Davis Monthan AFB, Williams AFB.

California: Beale AFB, Castle AFB, March AFB, Mather AFB, McClellan AFB, Travis AFB, Vandenberg AFB.

Colorado: Lowry AFB, Peterson AFB.

Delaware: Dover AFB.

Florida: Eglin AFB, Homestead AFB, MacDill AFB, Patrick AFB.

Georgia: Moody AFB, Robins AFB.

Guam: Andersen AFB.

Hawaii: Hickam AFB.

Idaho: Mountain Home AFB.

Illinois: Chanute AFB, Scott AFB.

Indiana: Grissom AFB.

Kansas: McConnell AFB.

Louisiana: Barksdale AFB, England AFB.

Massachusetts: Hanscom AFB.

Michigan: K. I. Sawyer AFB, Wurtsmith AFB.

Mississippi: Keesler AFB.

Maryland: Andrews/Bolling AFB.

Missouri: Whiteman AFB.

Montana: Malmstrom AFB.

North Carolina: Pope AFB, Seymour Johnson AFB.

North Dakota: Grand Forks AFB, Minot AFB.

New Hampshire: Pease AFB.

New Jersey: McGuire AFB.

New Mexico: Cannon AFB, Kirtland AFB.

New York: Griffiss AFB, Plattsburgh AFB.
Nebraska: Offutt AFB.
Ohio: Wright-Patterson AFB.
Oklahoma: Altus AFB, Tinker AFB.
South Carolina: Charleston AFB, Myrtle Beach AFB, Shaw AFB.
South Dakota: Ellsworth AFB.
Texas: Bergstrom AFB, Brooks AFB, Carswell AFB, Dyess AFB, Kelly AFB, Lackland AFB, Laughlin AFB, Randolph AFB, Reese AFB, Sheppard AFB.
Utah: Hill AFB.
Wyoming: F. E. Warren AFB.
Washington: McChord AFB.

Schools and Hospitals Weatherization Assistance

The Committee recommends an appropriation of $150,000,000 for the schools and hospitals weatherization assistance program. Since its inception in 1978, some 15,400 schools and 1,700 hospitals have received comprehensive energy conservation audits. With these additional funds, the Department of Energy has estimated some 7,185 schools and 315 hospitals can be weatherized, resulting in annual savings of 6,000,000 barrels of oil equivalent. Moreover, such weatherization activities can result in as many as 31,500 jobs when the full Federal grant of $150,000,000 is matched by the States in accordance with law.

Alaska Railroad

The Alaska Railroad, extending 370 miles from Anchorage to Fairbanks, is operated by the Federal Government under the Act of March 12, 1914. The major activity of the rail line operation program is transportation service; the principal supporting activities are maintenance of way, structures, and maintenance of equipment. To the extent possible, programs are financed by revenues earned from freight and passenger services and other incidental services. Appropriations to the Alaska Railroad are required to sustain the railroad's operating plant and facilities at a minimum level.

Funds are needed to restore and renovate the existing track and attendant structures of the Alaska Railroad. The Committee has reviewed capital needs of the Alaska Railroad in light of the railroad's needs, and as a means of generating employment. These funds are to be primarily utilized during the upcoming maintenance season on the Alaska Railroad. It is anticipated that these funds will generate between 600 and 700 new jobs on the Alaska Railroad. The Committee takes note of the recent layoffs of over 30 percent of the Alaska Railroad's work force which was effective on November 30, 1982. These funds will facilitate much needed capital improvements and restoration on the Alaska Railroad, as well as create substantial new employment on the Alaska Railroad.

UP AMENDMENT NO. 1543

(Purpose: To correct a technical error in section 128 relating to the extension of enlistment and reenlistment bonuses)

Mr. HATFIELD. Mr. President, I send a technical amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment numbered 1543.

Mr. HATFIELD. Mr. President, I ask unanimous consent that further reading of the technical amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Mr. HATFIELD. Mr. President, in the bill there was a reference made in one part to a continuing resolution, and it should have been made to the undersupporting law. This is a technical amendment for that purpose. It has been cleared on both sides of the aisle. I move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The amendment (UP No. 1543) was agreed to.

Mr. BAKER. Mr. President, will the Senator yield to me for a moment?

Mr. HATFIELD. I yield.

ORDER FOR RECESS UNTIL SUNDAY, DECEMBER 19, 1982 AT 6 P.M.

Mr. BAKER. Mr. President, if I could have order in the Senate, I have an announcement I would like to make.

Mr. President, it is clear there is a need for a Sunday session. I regret to say that.

The Speaker has indicated to me that he will ask the House to return on Sunday at 4 p.m.

I ask unanimous consent, Mr. President, that when the Senate completes its business today it stand in recess until the hour of 6 p.m. on Sunday, tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEPSEN. Mr. President, reserving the right, does that mean the majority leader is going to call us back in?

Mr. BAKER. Mr. President, the primary purpose for the extraordinary request for a Sunday session is to hope that we can deal with the conference report on the continuing resolution. It is my expectation that we will finish that resolution in the Senate today. It is unlikely that we will get to conference tonight just because of the physical necessity for putting this matter in shape to do so.

The House of Representatives has adopted a rule which permits the designation of conferees when they receive a request from the Senate for a conference. What that means is I think we will go to conference Sunday morning.

The House hopes to have a conference report to act upon at 4 p.m. Sunday. I have asked that the Senate return at 6 p.m. on Sunday.

It would be my intention to be here, as indeed I will be here, and I can assure Senators that there is no need for them to be here unless I call from my cloakroom the Members on this side and notify the minority member to proceed as he may wish on his side to notify them when we are in a position to deal with the conference report.

I am advised by the chairman that he has a conference committee tentatively set for 10 o'clock in the morning.

Once again, the effect of this is to provide for a Sunday session to begin at 6 p.m. I do not know much reason for Senators to be here at 6 o'clock, except to know that they are on call to return to deal with the conference report at that time, if it is available.

Mr. ROBERT C. BYRD. Mr. President, I hope there would be no objection to this request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I indicated that Senators would not be called back on Sunday except to take care of the conference report. Can I have just a moment to speak to the distinguished chairman of the conference committee? In the meantime, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask that the Chair withhold putting my request to the Senate until I can have another conversation on this matter. In the meantime, I would suggest to the chairman of the committee that he may proceed with another amendment.

Mr. HATFIELD. Mr. President, I yield to the Senator from Maine for the purpose of his offering an amendment.

UP AMENDMENT NO. 1544

(Purpose: To increase the amount available for weatherization under the Low Income Emergency Assistance Program)

Mr. COHEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Maine (Mr. COHEN) proposes an unprinted amendment numbered 1544.

Mr. COHEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment insert the following:

Insert "(a)" before "section 2602(b) of the Omnibus Reconciliation Act of 1981".

(b) Section 2605(K) of the Act is amended by striking out "15 percent" and inserting in lieu thereof "15 percent for fiscal year 1982, and 25 percent for each of the fiscal years 1983 and 1984".

Mr. COHEN. Mr. President, this involves no money. We have been talking for several days about trying to help out families that have difficulties in paying their heating bills, their gas bills. This is designed to amend the existing limitation of 15 percent of whatever moneys are spent toward home heating assistance to allow States up to 25 percent instead of the 15 percent cap to deal with weatherizing their homes.

It is not mandatory. Any State would be free to use anywhere from zero up to 25 percent of the funds allocated under existing law. It is consistent with allowing States to control their own destiny in this regard.

While the energy assistance program is necessary to reduce the burden of rising fuel costs on low-income families, the weatherization assistance program is more effective in reducing fuel costs over the long run. By reducing home energy consumption by 15 to 30 percent, the weatherization assistance program has proved invaluable to our national conservation effort.

The low-income energy assistance block grant program was reauthorized for fiscal years 1982, 1983, and 1984 in Public Law 97-35, the Omnibus Reconciliation Act of 1981, at $1,875 billion. This program is quite similar to earlier energy assistance programs, with greater flexibility afforded the States because of fewer Federal requirements.

Perhaps the greatest improvement in this program is the provision allowing States to use up to 15 percent of their allotments for weatherization activities. Since the adoption of this provision, 47 States have used portions of their fuel assistance allotments to weatherize an estimated 330,000 homes. Seventeen States have used up to 14 percent of their allotment for weatherization activities, 10 States have used from 10 to 15 percent, 10 States have used from 5 to 10 percent, and 7 States have used 1 to 5 percent.

Maine, which established the first weatherization assistance program in 1973, used 15 percent of its $25.1 million allotment—$3.5 million—for weatherizing 3,000 homes. This money has added greatly to the weatherization activities in Maine which, all told, have provided 33,062 Maine homeowners with weatherization improvements.

Despite administration attempts to terminate the low-income weatherization assistance program, support for its continuation remains strong in both Houses of Congress. For fiscal year 1982, $144 million was appropriated, a reduction of only $37 million from the previous year's level of $181 million. The fiscal year 1983 funding level for the weatherization assistance program is expected to be somewhere between the House-passed level of $147.5 million and the Senate-passed level of $114 million. While this appropriation is certainly helpful, it is not enough.

While the Department of Energy's low-income weatherization assistance program has weatherized 1 million homes since the program began in 1977, the Department has estimated that 12 to 13 million low-income Americans live in homes still in need of weatherization improvements. In Maine alone, there are 20,000 people on the waiting list for weatherization assistance.

The real value of the weatherization assistance program rests on its ability to dramatically—and permanently—reduce energy consumption in the home. With the continual rise in fuel prices, the cost of providing energy assistance will ultimately rise as well. But if a portion of energy assistance funds are used for weatherizing homes, reducing fuel bills by about 20 percent, the value of the energy assistance will be greatly enhanced. And as fuel prices continue to rise, the dollar value of the energy saved through weatherization improvements will continue to go up.

The Congress is to be commended for giving States greater flexibility and discretion in establishing their own energy assistance programs through the passage of the Omnibus Reconciliation Act. Yet, I believe States should be given even greater discretion in using allotted energy assistance funds to meet the fuel-assistance needs of their residents. Therefore, the amendment I am offering today to the Omnibus Reconciliation Act will authorize States to use up to 25 percent of their energy assistance block grant funds for weatherization or home repairs related to energy conservation. My amendment will not require States to use any of their funds for weatherization activities. Rather, States will have the option of providing more households with weatherization improvements or assisting more families in paying their fuel bills. This is consistent with the administration's policy of returning control of assistance programs to State and local governments. Additionally, the amendment will greatly improve the energy assistance program by allowing States to increase the value of their allotment by permanently reducing fuel bills. I urge my coleagues to support it.

Mr. MITCHELL. Mr. President, I am pleased to be a cosponsor of the amendment offered by my good friend and colleague from Maine, Mr. COHEN, to give States greater flexibility in using funds provided them under the low-income energy assistance program. Under current law, States may use up to 15 percent in low-income energy assistance funds for weatherization purposes. This amendment would simply increase this percentage to 25 percent. As such, it would not cost the Federal Government a penny. It would, however, give the States greater flexibility in determining how best to meet the long-term energy needs of its citizens and, I believe, is consistent with this administration's efforts to give States more flexibility in spending Federal dollars.

My home State of Maine has made excellent use of current law allowing it to transfer up to 15 percent of low-income energy funds to the weatherization program. Last year, Maine originally received $23 million in low-income energy assistance funds. Of this, $3.5 million, or the full 15 percent, was used for weatherization efforts.

Since the oil embargo of 1973, Maine has been a leader in reducing its—and consequently the Nation's—dependence on foreign oil. Part of these efforts include an ambitious weatherization program utilizing both State and Federal funds. To date, more than 32,000 homes have been weatherized in Maine; however, 22,025 homes remain on the State's waiting list and will hopefully be weatherized over the next several years.

Mr. President, I have long been a supporter of the low-income weatherization program. Last year, during consideration of the Interior appropriations bill, I offered an amendment to add $37.5 million to the $112.5 million recommended for the program by the Senate Appropriations Committee. Although that amendment failed narrowly, by a vote of 46 to 49, I was pleased that more than $30 million was added back in conference.

Both the weatherization program and the low-income energy assistance program are designed to meet the same overall goal; that is, to help low-income families meet their energy needs. I recognize that in the short term, low-income energy assistance is indeed necessary to assist the poor and elderly in meeting their energy needs. In fact, I have constantly supported efforts to increase funding for this important program. At the same time, it is clear that the best long-term way to assist a household in meeting its energy needs is through investments in weatherization. One Department of Energy study has concluded that a $1,000 investment in weatherization can reduce a household's energy consumption by an average of 25 percent.

For too long, Mr. President, we have attempted to treat the symptoms of the disease—that is, rising energy costs—rather than the disease itself—our continued dependence on costly, unstable sources of foreign oil. Nowhere is this more clear than in the relative amounts we spend on low-income energy assistance and weatherization. Last year, for example, Congress appropriated $1.875 billion for energy assistance, but only $144 mil-

lion for weatherization, or more than 10 times as much.

The amendment before us would not address that disparity directly. I will leave that debate for another time. It would, however, address it indirectly by giving the States greater flexibility in determining how best to spend low-income energy assistance funds. At the same time the amendment would retain the Federal Government's commitment to provide low-income persons with energy assistance by requiring that at least 75 percent of low-income funds be used for that purpose. It is important to note that no State would be required to spend its low-income energy assistance funds on weatherization; it merely gives States greater flexibility to do so.

Mr. President, I commend the Senator from Maine for raising this issue, and I urge the amendment's adoption.

Mr. President, I ask unanimous consent that the Senator from Minnesota (Mr. DURENBERGER) and the Senator from Maine (Mr. MITCHELL) be added as cosponsors of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, this amendment has been gone over by staff of both sides of the aisle. It is a part of a program of which I have been personally involved for a long time. As the Senator from Maine says, it is discretionary.

It is being supported on both sides of the aisle and I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maine (Mr. COHEN).

The amendment (UP No. 1544) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. COHEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I yield, on behalf of the floor managers, to the two Senators from Illinois, Mr. DIXON and Mr. PERCY.

The PRESIDING OFFICER. Will the Senate please come to order? The Senator from Illinois is prepared to offer his amendment.

Mr. HATFIELD. Mr. President, this has a 10-minute time agreement, equally divided.

Mr. WARNER. Mr. President, I cannot hear.

The PRESIDING OFFICER. The business of the Senate is the Senator from Illinois is recognized to offer his amendment under a 10-minute time agreement.

Mr. HATFIELD. Mr. President, would the Senator yield for just a minute?

Mr. DIXON. Yes.

Mr. HATFIELD. Mr. President, we are working under very difficult circumstances. I would ask the Chair to please remove those people from the floor who do not have seats to sit in and ask all other people, Senators included, to please retire to the cloakroom if they have business to conduct.

We are surrounded on the whole Senate floor today by people who are standing in conversation and doing business. We cannot do the business of the Senate down here efficiently without some kind of cooperation.

I urge the Chair to use the Sergeant at Arms, if necessary, to clear this Senate.

The PRESIDING OFFICER. The Senator from Oregon is correct.

Will all Senators and all members of the staff that are not seated by the Senators please take a seat? Those staff people who do not have seats, please remove yourselves from the Chamber. The Chair will request the Sergeant at Arms to make the assistance that is necessary.

The Senate Chamber is becoming unruly.

Mr. GLENN. Mr. President, will the manager yield for a question?

Mr. HATFIELD. Yes.

Mr. GLENN. Is there an order we can document here or is this informal or was it agreed to or is it catch-as-catch-can? We are all trying to get amendments up here. What is the order?

Mr. HATFIELD. I say to the Senator that we have here all of the unanimous-consent agreements that have been achieved. We try to keep three or four in sequence ahead, alternating between the two sides.

But let me say, as I said earlier, I hope all Senators who have time agreements on their amendments will remain on the floor because we have had cases of Senators not calling up their amendments, pulling them aside, and then we quickly drop down to the next one.

Now we are to proceed to the Dixon-Percy amendment, to be followed by the Boren amendment. The Boren amendment has a time agreement, if it is all used, and there will be a rollcall, I believe, on the Boren amendment. I do not believe there will be on the Dixon amendment.

Mr. DIXON. We will ask for a rollcall.

Mr. HATFIELD. There will be a rollcall on the Dixon amendment.

That is to be followed by the Quayle amendment, on which there is a 5-minute agreement, and that is to be followed by a Bradley amendment, on which there is a 10-minute agreement, to be followed by Mr. GLENN, who has two amendments at 20 minutes each.

Mr. GLENN. I thank the Senator.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. I would like now to complete what I began a moment ago.

The PRESIDING OFFICER. Will the majority leader please suspend? The Senate has made considerable improvement toward maintaining order, but we would appreciate it for the Chair to be able to hear the majority leader.

Will all those Senators who wish to have conversations please remove themselves to the cloakroooms so we can hear the majority leader?

Mr. BAKER. I thank the Chair.

SUNDAY SESSION—CLARIFICATION OF SCHEDULE

Mr. BAKER. Mr. President, earlier I put the request that the Senate convene at 6 p.m. tomorrow after the recess at the conclusion of business today. I am going to renew that request in a moment, but I want to modify the accompanying statement I made at that time.

I indicated that I would be here and would advise Senators when we got to a conference report if, indeed, we do receive it tomorrow. It has been pointed out to me by other Senators that there are other matters that very well should be taken up tomorrow and may be taken up in advance of the time we receive the CR. So I simply wish to retract that statement and to make a new one instead.

We will convene and, if matters are to be transacted that require the attention of the Senate, Senators will be notified. But they should not assume that only the conference report will be dealt with.

ORDER FOR RECESS UNTIL 6 P.M. TOMORROW

Mr. BAKER. With that accompanying statement, I renew my request that when the Senate completes its business today it stand in recess until the hour of 6 p.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair and I thank the chairman of the committee.

Mr. WARNER. Mr. President, I ask the manager of the bill, I understand the unanimous-consent request establishes a 10-minute time limit, equally divided on this particular amendment.

Mr. HATFIELD. That is correct.

Mr. WARNER. The Senator from Virginia might wish to inquire how much time of that 5 minutes might he expect to receive? I am in opposition to the amendment.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the Senator from Virginia (Mr. WARNER) be given the time to control for the opposition.

The PRESIDING OFFICER. Without objection, the Senator from Virginia controls 5 minutes and the Senator from Illinois controls 5 minutes.

Mr. WARNER. I thank the Chair.

UP AMENDMENT NO. 1545

(Purpose: To prohibit use of funds for the procurement of certain aerial reconnaissance cameras under a sole-source contract until a report by the General Accounting Office has been submitted to the Congress)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Illinois (Mr. DIXON), for himself and Mr. PERCY, proposes an unprinted amendment numbered 1545.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title I add the following new section:

SEC. . (a) None of the funds appropriated by this or any other act may be obligated or expended for the procurement of low altitude aerial reconnaissance cameras for the RF-4B aircraft under a sole-source contract until the Comptroller General of the United States has conducted a study of the proposed action of the Navy to procure such cameras under a sole-source contract and a period of 30 days has elapsed after the date on which the Committees on Appropriations of the Senate and the House of Representatives have received a report from the Comptroller General containing the results of such study.

(b) The Comptroller General of the United States shall conduct a study of any proposal of the Navy to procure low altitude aerial reconnaissance cameras for the RF-4B aircraft under a sole-source contract and report the results of that study to the Committees on Appropriations of the Senate and the House of Representatives as soon as practicable after the date of the enactment of this Act. The Comptroller General shall include in such report his findings regarding the necessity and propriety of awarding a sole-source contract for the procurement of such cameras.

(c) As used in this section, the term "sole-source contract" means a negotiated contract for the purchase of goods or services which is entered into or proposed to be entered into after issuance of a Request for Proposal for the purchase of goods or services to only one contractor.

Mr. DIXON. Mr. President, I will make a short statement, then yield to my senior colleague, the distinguished chairman of the Foreign Relations Committee.

This amendment is offered by my senior colleague and myself, and is supported by every Member of the Illinois congressional delegation.

This question impacts on the district of my warm friend and distinguished colleague in the House, Representative PHIL CRANE, who is present. The amendment is simple. It directs the Comptroller General to study a contract that has been awarded by the U.S. Navy to a German camera manufacturer and to report back on the sole source nature of that contract very shortly—I am told the Comptroller General can do it in 90 days—and that nothing further shall be done on the contract until 30 days after the Senate Appropriations Committee and the House Appropriations Committee have examined the report.

This pertains to an aerial camera for the RF-4B aircraft which has been awarded to a German firm on a sole-source contract to the detriment of a firm in the State of Illinois that employs 780 Americans that are prepared to develop a better camera.

Now, I want the Senate to know this. A couple of months ago we held a meeting in the office of this Senator with the Secretary of the Navy, John Lehman. I want to tell you he is a fine gentleman. He came to that meeting. The distinguished chairman of the Foreign Relations Committee, who stands on the other side, was in that meeting. The distinguished Congressman from my State, PHIL CRANE, who is in this hall, was at that meeting; and I was at that meeting.

The Secretary of the Navy said, "This came to me up through the system and I don't know much about it. But I want to hear from you folks." And we talked to him and when we were finished we went out in the hall in front of TV cameras and the Secretary of the Navy said, "These gentlemen have made a good case and we will give it every consideration."

Here is what we told him: That an American firm in our State, CAI, spending $2 million of its own money, would develop this camera and have a fly-off against the German camera, and may the best camera manufacturer win.

After that, and without consultation with us, the Navy granted a contract in November to this German manufacturer, even though the procurement schedule would have allowed time for competitive bidding and a fly-off.

We are only asking you 90 days to let the Comptroller General study the contract and that work under the contract not begin until we have studied the GAO recommendations. I think that is simple justice and in the interest of the American taxpayers.

Now it will be said by the opponents that this is an off the shelf camera. That is totally untrue. This is not an off the shelf camera and you should all understand that. This is a camera that is being custom made and not in production. It was tested recently. And the Senate should know the German camera failed that test.

To repeat, Senator PERCY and I, along with Congressman PHILIP CRANE, have for some time attempted to obtain factual information from the Navy in response to specific questions we posed concerning the Navy's conduct in this procurement action. The replies from the Secretary of the Navy have not provided the facts requested.

One of the questions the Secretary has not answered is why he will not release the full report of the Navy/Air Force evaluation group regarding the camera proposed to be built by CAI, an Illinois company which has not been permitted to bid on this contract.

The Secretary in his letter to us of December 13 alleged past procurement difficulties with the Illinois company.

However, in my view, any such problems stem largely from the Navy's reliance on sole-source contracts, a mistake the Navy is now compounding with a questionable sole-source award in the current procurement.

The Navy's purchase request justifying procurement on a sole-source basis is replete with errors.

The justification for sole-source negotiations deals with the KA-107C camera, yet the authorization to award a sole-source contract is for the KS-153A camera. Two different cameras.

Further, the Navy asserts there is no alternative supplier to Zeiss Avionics, Inc. for the camera required.

In fact, CAI is developing and has offered to sell to the Navy a camera, designated the CA-810, meeting the Navy's 13 announced criteria. The Commerce Business Daily notice of September 1, 1981, called for an off-the-shelf camera meeting 13 criteria. Neither the KA-107C camera nor the KS-153A camera is an off-the-shelf camera. Both required further testing and modification and neither camera fully meets the stated criteria.

The Navy alleges that the cost of research development test and evaluation (RDT&E) plus procurement of a camera from an alternate supplier would be too great compared to the value of the procurement.

CAI has indicated to the Navy in its formal presentation that it would absorb all the RDT&E costs for the CA-810 camera, and has offered to sell the camera to the Navy at a price competitive with that charged by Zeiss Avionics.

The way to remedy the Navy's difficulties is not through a sole-source contract, but by holding an open and fair competition. The Navy's urgent need for this camera has me wondering why they are buying an off-the-shelf camera and not requiring delivery of the first camera for 2 years.

Mr. President, I think the many unanswered questions raised over the last few months by Senator PERCY, Congressman PHIL CRANE and I, acting on behalf of the Illinois congressional delegation, cry out for a complete General Accounting Office investigation. Until the appropriate congressional committees can review the findings of the GAO, the Navy should be prohibited from spending money on this project.

Mr. President, I ask unanimous consent to have printed in the RECORD Secretary Lehman's letter, my response to that letter and copies of Department of Defense form 448—the determination and findings used by the Navy to justify a sole-source contract award to Zeiss Avionics, Inc.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., December 16, 1982.

Hon. JOHN LEHMAN,
Secretary of the Navy,
Washington, D.C.

DEAR MR. SECRETARY: We are writing this letter in response to your letter of December 13, 1982.

Senator Percy and I, along with Congressman Philip Crane, have been attempting to obtain factual information in response to specific questions concerning the Navy's conduct in procuring a low-altitude aerial reconnaissance camera on a sole-source basis from Zeiss Avionics. Your reply does not provide facts as we requested, but merely a series of unsupported conclusions. In that connection we have attached a response from CAI RECON/OPTICAL, INC. to the points in your letter, and once again we are also attaching a copy of our unanswered questions from our letter of November 24, 1982.

The Illinois Delegation is not interested in conclusional assertions—we on the delegation's behalf simply asked for certain facts from the Navy. The answers to those questions would have allowed us to draw our own conclusions objectively.

We do not believe your allegation about past camera procurement problems is a factor in this specific case. In our view any such problems stem largely from the Navy's reliance on sole-source contracts—a mistake which the navy is now compounding with a very questionable sole-source award in the Zeiss procurement.

The way to remedy the Navy's difficulties, it seems to us, is not through another sole-source contract but by holding an open and fair competition from the very beginning—not in FY 85/86.

Since we have yet to receive the necessary information we requested in our letter of November 24, 1982, let us reiterate that Senator Percy and I will introduce an amendment requiring the Comptroller General to investigate all the facts surrounding the sole-source contract to Zeiss.

The amendment will halt all funding for the RE-4B cameras until the Appropriations Committees of both houses have received the Comptroller General's factual report and determined an appropriate course of action.

Given the history of this case, we feel this action is appropriate since it appears to be the only course left open to us.

Senator Percy and Congressman Philip Crane have reviewed this letter and concur with its content.

Sincerely,

ALAN J. DIXON.

FACT SHEET IN RESPONSE TO NAVY SECRETARY LEHMAN'S 13 DECEMBER 1982 LETTER REGARDING LOW ALTITUDE AERIAL RECONNAISSANCE CAMERA

Secretary Lehman, in his letters to Senators PERCY and DIXON dated 13 December, 1982, has made several conclusory assertions concerning the camera procurement at issue. No facts have been provided by Secretary Lehman to support his allegations. The following factual information is submitted for the record in response to Secretary Lehman's letter.

1. NAVY ASSERTION

The Navy has worked hard for four years in a competitive environment to procure a camera to satisfy the Marine Corps' requirement.

Facts:

The Navy awarded a sole source contract to Zeiss in March, 1979, for one KA-107 camera and one KA-108 camera.

The Navy awarded a second sole source contract to Zeiss in July, 1980, for an Automatic Test Set of a type which indicated Navy's intent to equip the center RF-4B fleet with Zeiss cameras.

The Navy completed and approved an Integrated Logistics support plan for the KA-107 camera in April, 1981, again an action that normally is taken only after a procurement decision has been made.

Despite inquiries, CAI was not advised at any time prior to September 1, 1981, of the Marine Corps' requirement for, or the Navy's interest in, a new generation low altitude camera. (No other U.S. sources are known to have been made aware of the need, either.)

The Commerce Business Daily (CBD) notice on September 1, 1981, was the first public announcement of the Navy/Marine Corps camera requirement.

The camera criteria listed in the CBD were tailored to the Zeiss camera, precluding CAI or any other U.S. company from responding to the notice.

Questions submitted by the Illinois Congressional Delegation to Secretary Lehman on November 24, 1982 requesting factual information as to the Navy's efforts to obtain competition (sources solicited, by whom, when, what were they told, etc.) remain unanswered.

2. NAVY ASSERTION

Even after it determined that a modified Zeiss KA-107 camera satisfied its needs, in September, 1981 the Navy placed a notice in the CBD seeking sources to procure a low altitude camera. Only Zeiss responded with a camera meeting the CBD criteria.

Facts:

Not only was the CBD notice drafted around the Zeiss camera specifications, but it called for an "off-the-shelf" camera (i.e., one already developed and proven), and required response within 14 days.

The Zeiss camera differs in material respects from the criteria listed in the CBD.

Far from being proven, the modified Zeiss KA-107 camera was only made available to the Navy for bench testing in late 1981, and it was not flight tested by the Navy until September 1982.

More than a year after Zeiss responded to the CBD notice, the Zeiss camera has experience hardware failures, has required substantial systems redesign, and is still encountering fundamental technical difficulties.

3. NAVY ASSERTION

CAI chose not to compete with the proven Zeiss camera in 1981. The CA-810 camera CAI subsequently proposed in 1982, has not been built or tested, and could not meet the Marine Crops' current urgent need.

Facts:

Upon publication of the CBD notice, CAI asked the Navy for detailed camera requirements and specifications; and it commenced development of the CA-108 camera as soon as it received a copy of the RFP given to Zeiss in 1982 (which copy had to be obtained from the Navy by Sen. Dixon).

The CA-810 camera meets all of the Navy's announced criteria, and is already well along in development (at CAI's own expense).

CAI is prepared to match its camera in a competitive test fly-off against the Zeiss camera, and has offered to sell the camera to the Navy at a competitive firm fixed price without any slippage in the delivery schedule imposed on Zeiss.

Contrary to its claim of urgency, the Navy has taken over four years to design and develop a new RF-4B camera with Zeiss, and it has now given Zeiss almost two more years to deliver the first production camera.

4. NAVY ASSERTION

The Navy's experience shows that CAI's past contract performance has been poor.

Facts:

The KS-87B camera, which the Navy alleges was a major maintenance problem as recently as 1981, is a sophisticated opto-mechanical device requiring high maintenance skills. Between 1968 and 1982, however, the Department of Defense did not have its personnel trained by CAI to maintain the camera. (CAI also submitted an unsolicited proposal to the Navy in 1980 for modification kits designed to enhance maintainability and reliability of the KS-87B; only now are those kits being installed in the cameras.

The price per unit for the KS-87B camera, which the Navy claims jumped 600 percent, increased from $17,000 (production run of 1000 cameras) in 1966 to $54,000 in 1982 (production run of only 100 cameras) in 1982 (production run of only 100 cameras) in 1982, or an average annual increase of only 13.6 percent over 16 years. (Moreover, even that increase is greatly attributable to CAI's fixed costs being spread over much smaller production quantity being purchased in recent years.)

Similarly, the unit price of the KS-116B camera, which the Navy says rose 91 percent, increased from $75,750 (production run of 34 cameras) in 1977 to $135,116 (production run of only 7 cameras) in 1980, or an average annual increase of 26 percent, again with a much smaller production base.

5. NAVY ASSERTION:

The Navy is proceeding with only initial procurement of the Zeiss KA-107C camera; and assuming CAI or another contractor develops a satisfactory camera, the Navy will welcome competition to satisfy future RF-4B requirements.

Facts:

In letters to Senators Percy and Dixon on November 15, 1982, Secretary Lehman implied that only 10 cameras in fiscal year 1982 were being purchased from Zeiss. The contract awarded is a mult-year procurement for 38 cameras covering fiscal year 1982 through fiscal year 1986.

In his November 15, 1982 letters, Secretary Lehman stated that the "Navy will definitely conduct a competition for the remaining twenty-eight camera procurement." The Secretary now says that the Navy will hold a competition, provided that CAI or another contractor develops a camera meeting its RF-4B requirements. (It must also be noted that the Navy still has not told U.S. industry sources what those requirements are.)

6. NAVY ASSERTION:

Throughout the review of this procurement, the Navy has endeavored to provide Senators Percy and Dixon with full information concerning the RF-4B requirement and the basis for the Navy's procurement decisions.

Facts:

On November 24, 1982, Senators Percy and Dixon, together with Congressman Crane, acting for the entire Illinois Congressional Delegation, addressed 18 specific questions to Secretary Lehman concerning this procurement, with a full response requested by December 6, 1982. Not one of those questions has been answered to date.

Despite requests by Senator Dixon's staff, the Navy has not provided a copy of the multi-year contract awarded to Zeiss in mid-November 1982.

Despite requests by both Senator Dixon's office and CAI, the Navy has refused to release the detailed evaluation reports on the CA-810 camera which are in the Navy's possession.

7. NAVY ASSERTION:

CAI was fully aware of Navy's interest and met with Navy on numerous occassions during 1978 and 1979 to discuss how their KS-87B might be modified for low altitude use.

Facts:

CAI met with Navy numerous times in the 1978 and 1979 period to discuss operations, and maintenance aspects of the KS-87B. One result of these discussions was an unsolicited proposal by CAI to provide modification kits to affect the maintainability and reliability of the KS-87B. This resulted in a contract in August, 1980 for these kits which have been delivered and are being installed. During this same period, CAI was aware that the Navy was buying one KA-107 and one KA-108 cameras from Zeiss. The Navy's stated purpose for this procurement during the 1978 to 1980 time frame was bench and flight tests to determine the capabilities of these cameras. The advertised capabilities of the KA-107 (proven true in the 1980 flight tests) did not afford any greater (in fact less) capability for low altitudes and high speeds than the KS-87B with a three inch lens.

The first indications CAI had that the Navy was seeking greater flight parameters than this was upon receipt of the September 1, 1981 Commerce Business Daily.

DEPARTMENT OF THE NAVY,
Washington, D.C., 13 December 1982.

Hon. ALAN J. DIXON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DIXON: I am writing in response to your November 24, 1982, letter regarding the Navy's decision to procure low altitude reconnaissance cameras from Zeiss Avionics. I take exception to the content of your letter as the Navy Department has worked hard for 4 years in a competitive environment to procure a camera that satisfies the Marine Corps low altitude camera requirement at lowest possible cost to the taxpayer.

The facts show that CAI Recon/Optical, Inc., was involved in the competitive process from the very beginning. In 1978, the Navy began to work with industry—including CAI—to improve the performance of low altitude cameras. CAI was fully aware of Navy's interest and met with Navy on numerous occasions during 1978 and 1979 to discuss how their KS-87B might be modified for low altitude use. The Navy even put funds in the budget to cover expected modification costs. However, CAI chose not to pursue the photo system development. Zeiss Avionics on the other hand invested their own funds to modify an existing off-the-shelf KA-107 camera to meet the USMC need. This development effort proved successful and later testing verified that the camera meets our requirements. Even after we determined that the modified Zeiss camera was satisfactory, in September 1981 the Navy announced by Commerce Business Daily (CBD) the intent to procure a low altitude camera. CAI did not respond to the CBD announcement or ask for additional time to respond. While CAI subsequent proposed a new development camera, the CAI-810, that camera has not been built or tested and could not meet our current, urgent need. In summary, we have accomplished the development with full knowledge by CAI of Navy's intent. They chose not to compete with a proven camera that meets the needs of the Marine Corps now.

We pursued the competitive process with CAI even though experience shows CAI's past contract performance has been poor. On their last aerial camera contract in 1977 for the KS-116B, CAI delivered the first four units in 780 days when schedule called for 240 days. Further, quality assurance, reliability and cost growth problems have continued to plague CAI cameras. As recently as early 1981, the KS-87B camera was one of the top 3 maintenance problems on the F-4 aircraft. Costs have risen on the KS-87B and KS-116B cameras by 600% and 91% respectively, far in excess of actual inflation rates over the years the Navy has been buying CAI cameras. I expect these facts have not come to your attention. They certainly make a strong case for vigorous camera competition.

As I explained in my November 15, 1982, letter, the Navy was faced with a time-sensitive requirement for ten cameras which only the Zeiss KA-107C camera could satisfy. For this reason I decided to proceed with initial procurement of the Zeiss KA-107C camera. The contract that was awarded is a multi-year contract which provides for a total of thirty-eight cameras (10 in FY-82, 8 in FY-83, 14 in FY-84 and 6 in FY-85). Assuming CAI or another contractor develops a camera that satisfies the USMC RF-4B requirements, the Navy will welcome competition to satisfy these future requirements.

Throughout the review of this procurement my staff and I have endeavored to provide you with full information concerning the Navy's requirement and the basis for its procurement decisions. I am satisfied that the Navy has made a sound business decision fully in accordance with applicable law and regulation.

Best regards,

JOHN LEHMAN,
Secretary of the Navy.

FACTUAL ERRORS IN THE DETERMINATIONS AND FINDINGS USED BY THE NAVY TO JUSTIFY A SOLE SOURCE CONTRACT AWARD TO ZEISS AVIONICS, INC., FOR 39 LOW ALTITUDE AERIAL RECONNAISSANCE CAMERAS

1. The justificaton for sole source negotiations is for the KA-107C camera. The authorization to award a sole source contract is for the KS-153A camera. The two cameras are different.

2. The Navy claims the KA-107C camera received full approval for Service Use in April, 1982, although flight testing of the modified KA-107C by USN/USMC did not commence until September, 1982. Granting full ASU without flight testing by USN/USMC would appear to violate the Navy's own ASU requirements.

3. The KS-153A camera, which is the camera actually being purchased by the Navy, has not received approval for service use. The KS-153A camera differs from the KA-107C camera (e.g., the KS-153A includes a different shutter and lens cone, which have not been tested by USN/USMC).

4. The Commerce Business Daily notice of September 1, 1981 called for an off-the-shelf camera meeting 13 criteria. Neither the KA-107C camera nor the KS-153A camera is an off-the-shelf camera (both required further testing and modification). Neither camera fully meets the 13 stated criteria, either. Finally the first production camera which the Navy is buying from Zeiss Avionics, Inc. will not be ready for delivery until almost two years from now.

5. The Navy asserts that there is no alternative supplier to Zeiss Avionics, Inc. for the type of camera required. In fact, CAI, a division of Recon Optical, Inc., is developing—and has offered to sell to the Navy—a camera, designated the CA-810, meeting the Navy's 13 announced criteria.

6. The Navy also alleges that the cost of RDT&E plus procurement of a camera from an alternate supplier would be too great compared to the value of the procurement. CAI Recon/Optical is absorbing all RDT&E costs for the CA-810 camera, and has offered to sell the camera to the Navy at a price at least competitive with that charged by Zeiss Avionics.

7. The Navy claims, in its findings, that adequate technical data is not available to assure manufacture of an item of equal capability with the Zeiss camera. In fact, CAI Recon/Optical's CA-810 camera is of equal capability with the Zeiss Avionics' KA-107C/KS-153A cameras.

DETERMINATION TO USE THE MULTI-YEAR CONTRACTING METHOD ON A NONCOMPETITIVE ACQUISITION

1. The Naval Air Systems Command, Washington, D.C. has submitted MIPR N00019-82-MP-27133 to initiate the acquisition of 38 each KA-107C, Camera, Still Picture including supporting equipment and associated data to satisfy a documented operational requirement from the United States Marine Corps for a low altitude photographic capability for the RF-4B aircraft. The most beneficial method to acquire the above requirements is to use multi-year contracting.

2. Pursuant to DAR 1-322.1(C)(2), and OO-ALC DAR Supplement 1-451.52, it is hereby determined that (i) changes to an extent that would have a major impact on the contract price, e.g., design and specification changes or changes in production methods, are not expected to occur, and (ii) the items are expected to be obtainable only from a sole source, Zeiss Avionics Systems Inc., during the entire multi-year period. (See attached sole source justification.)

PAUL H. REID,
Contracting Officer.

PURCHASE REQUEST—CONTINUATION SHEET

Sole source:

Zeiss Avionics Systems, Inc., 2223 Avenida De La Playa, La Jolla, CA 92037, representing the Carl Zeiss Foundation, Oberkochen, FRG.

Justification:

The Naval Air Systems Command is initiating the procurement of the KA-107C to satisfy a documented operational requirement from the USMC for a low altitude photographic capability for the PF-4B aircraft. Low altitude and standoff operations represent the most survivable modes for the tactical air reconnaissance mission.

In 1978, the USN/USMC investigated available aerial cameras to satisfy the need. The option of initiating a development was ruled out because of the relatively small force level of RF-4B aircraft, its expected remaining service life, and the probability that the development costs for such a camera would exceed the dollar value of the RF-4B procurement. No satisfactory product, however, was found to be available from domestic U.S. suppliers. The promulgation of a Dept. of Defense MOU with the Federal Republic of Germany (subsequently incorporated into the ADPR/DAR in Defense Acquisition Circular #76-25) permitted the scope of the investigation to be extended.

In 1980, a USN/USMC/USAF team evaluated a KA-107C in accordance with a prescribed, formal test and evaluation plan. The camera had been added to a production run at Carl Zeiss for a Canadian program. It excelled in all aspects of testing, but exhibited certain limitations due to its design complexity. As a result, the manufacturer modified the camera, replacing mechanical assemblies with electronic drive components developed under a separate NATO program. The modified KA-107C was tested in a W. German RF-4E, requalified, and submitted to the USN for further testing—all at no expense to the U.S. Government. Again, test results were excellent; and the camera was found to be better suited to the operational need. Accordingly, it has been processed for formal service approval and has received provisional service approval to permit the FY-82 procurement. Full service approval is withheld, pending approval of two support documents; it is expected by July 1982.

On 1 September 1981, the Naval Air Systems Command issued a notice in the Commerce Business Daily, as a final effort to solicit sources of the required camera. None were submitted other than that from Zeiss Avionics Systems, Inc., for the KA-107C.

Accordingly, the sole-source procurement of the KA-107C is justified based on (a) the absence of an alternate supplier of the type camera required, (b) the dollar value of the procurement versus the cost of RDTSE plus procurement, and (c) the small force level (i.e. 28 A/C) and programmed service life of the host aircraft, the FR-48. ((RDTSE would not result in the delivery of a production item until the RF-48 phase out). Carl Zeiss owns proprietary rights to the KA-107C aerial camera.

AUTHORITY TO NEGOTIATE AN INDIVIDUAL CONTRACT

Upon the basis of the following and determination, the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 USC 2304(a)(10), as implemented by paragraph 3-210.2(xiii) of the Defense Acquistion Regulation.

Findings

1. The Department of the Air Force proposes to acquire by negotiation 38 each KA-107C Camera, Still Picture and 47 other line items of supporting equipment and data. The estimated cost of the proposed Acquisition is $10,835,000.00.

2. Acquisition by negotiation is necessary as the items are identified only by the manufacturer's model number as designed, developed and manufactured by Zeiss Avionics Systems Inc. Technical data is not adequately available to assure manufacture of an item of equal capability and there are no known Governmental or other specifications applicable to this requirement to provide data for design and manufacturing process.

3. Use of formal advertising for acquisition of the above described equipment is impracticable because it is impossible to draft, for a solicitation of bids, adequate specifications or any other adequately detailed description of the equipment.

Determination

The proposed contract is for property or services for which it is impracticable to obtain competition by formal advertising.

PAUL H. REID,
Contracting Officer.

Findings

1. The Department of the Air Force proposes to acquire by negotiation 38 each RS-153A Camera. Still Picture and 51 other line items of supporting equipment and data. The estimated cost of the proposed Acquisition is $10,835,000.00.

2. Acquisition by negotiation is necessary as the items are identified only by the manufacturer's model number as designed, developed and manufactured by Zeiss Avionics Systems Inc. Technical data is not adequately available to assure manufacture of an item of equal capability and there are no known Governmental or other specifications applicable to this requirement to provide data for design and manufacturing process.

3. Use of formal advertising for acquisition of the above described equipment is impracticable because it is impossible to draft, for a solicitation of bids, adequate specifications or any other adequately detailed description of the equipment.

Determination

The proposed contract is for property or services for which it is impracticable to obtain competition by formal advertising.

JAMES C. MCCOWAN,
Contracting Officer.

Mr. DIXON. Mr. President, I ask the support of my colleagues on this amendment, and I reiterate my strongly held feeling that sole source contract awards rarely serve the best interest of the American taxpayer.

I am honored to yield to my distinguished warm friend and senior colleague, the chairman of the Foreign Relations Committee, for his comments.

The PRESIDING OFFICER. The Senator from Illinois yields to the chairman of the Foreign Relations Committee 1 minute and 19 seconds remaining.

Mr. PERCY. Mr. President, I thank my distinguished colleague for his leadership in this, and I wish to pay deep respect also to the Congressman in the district of this company, PHIL CRANE.

I appreciate their handling it because it made it look like a conflict of interest for the senior Senator from Illinois to handle it, having spent 28 years of my life in the camera business and making reconnaissance cameras and spent 3 years of my life in the Navy, 1 year of it right here in Washington in World War II in procurement in photographic products.

So at least I do know something about it.

Let my make the record clear the company involved would be a competitor of Bell & Howell Co. I am fighting to protect the interest of a competitor, a former competitor but the principles at the Navy, my own branch of service should be ashamed of what they are doing in this case. They are giving a sole source contract. They misled us in a meeting that we had with the Secretary of the Navy. They told us they would fly off on this, and then they said they would give their first 10 camera contracts to the German company.

Now, what sense does that make? Who are we trying to fool.

Mr. President, the purpose of this amendment is very simple: It is to prohibit the Navy from proceeding with a sole-source contract for aerial reconnaisance cameras for the RF-4 fighter until the GAO has had an opportunity to conduct a review of the contract award. As my colleague from Illinois, Senator DIXON, has pointed out in previous speeches on the floor, there are a number of circumstances associated with this contract that raise serious questions about the propriety of the contract award, circumstances that warrant the scrutiny of the GAO. Under our amendment, the Appropriations Committee will have 30 days after the GAO report is submitted to determine the appropriate course of action. If no action is taken during this 30-day period, the Navy is free to proceed with the contract award.

Mr. President, I submit that this amendment provides a fair and impartial mechanism for resolving this dispute, and I would hope that my colleagues would support it.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from Congressman CRANE, and a letter from Senator DIXON and myself that we sent to the Secretary of Navy Lehman.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

CONGRESS OF THE UNITED STATES,
Washington, D.C., December 17, 1982.

Senator CARL LEVIN,
U.S. Senate
Washington, D.C.

DEAR CARL: I am writing to request your support for the Percy-Dixon amendment to the continuing resolution which would put on hold the Navy plans to begin acquisition of a third generation low altitude aerial reconnaissance camera until the GAO has had an opportunity to review the questionable circumstances regarding the way in which this sole source contract was awarded.

There is no stronger Congressional advocate of the Defense Department than I, but

in all honesty there are two very disturbing aspects to this procurement.

One is the fact that United States will be dependent on foreign sources of supply for a critical third-generation reconnaissance camera.

Second, and of equal importance is the apparent underhanded nature of many personnel in soliciting this contract.

According to the best information which I have been able to attain over the past six months, Naval personnel worked secretly and exclusively with a German firm and its West Coast subsidiary to exclude all U.S. competitoin for this camera.

When Senators Percy, Dixon and myself attempted to get information about this procurement, the Navy repeatedly refused to respond.

I know that the Navy has given some Senators a different version of this procurement, but I can only say that after countless hours of investigation by myself and my staff over the past six months that there are many serious questions which need to be resolved.

Page S 13550 of the Congressional Record of November 30, 1982 contains some of these questions which the Navy has refused to acknowledge.

Please support Senators Percy and Dixon in their efforts to take a second look at this procurement.

Sincerely,

PHILIP M. CRANE,
Member of Congress.

THE ILLINOIS DELEGATION,
Washington, D.C., November 24, 1982.

Hon. JOHN LEHMAN,
Secretary of the Navy,
Washington, D.C.

DEAR MR. SECRETARY: We are writing to express our dismay over your action with respect to the Navy's acquisition of a new low level reconnaissance camera for the RF4B. Particularly distressing is the fact that you did not consult with us—as you said you would—prior to taking this action. In our opinion, the decision which the Navy has reached does not provide for fair and open competition.

Equally disappointing has been the response of Navy personnel to the specific concerns which we raised on this issue. Not only were our questions to your staff repeatedly not answered, and not only was information deliberately withheld; but, based upon our own assessment of this mater, we can only conclude that the facts and observations about this case which we raised were, in our view, improperly conveyed to others for the purposes of thwarting our efforts to get to the bottom of this matter.

As we stated at the outset, our only objective has been to secure fair and honest competition in this procurement. As you pointed out in our meeting, this buy by the Navy has far reaching consequences. We well appreciate and applaud your efforts to encourage additional competitive sources of supply for the United States Navy but in all candor, Mr. Secretary, the actions which the Navy has taken with respect to this procurement and our legitimate efforts to gather information about it, far exceed the bounds of propriety, and perhaps the letter of the law.

Accordingly, we—as well as other members of the Congress—shall proceed with the necessary steps to ventilate this entire matter; and if the evidence thereby revealed so warrants, reverse the effect of this decision.

Enclosed you will find a list of specific questions which have been directed to the Navy in various forms on previous occasions. Would you be so kind as to have specific and complete answers provided to each of us no later than the close of business on December 6?

We do have one immediate question, however. Your letter of November 15 stated that the Navy has decided to buy ten of the 38 cameras from Zeiss on a sole source basis and that the "Navy will definitely conduct a competition for the remaining twenty eight camera procurement." But even this statement does not seem to square with the facts. We have learned that the Navy has instructed the contracting authority to sign a two year procurement contract (FY82 & FY83) which, according to the Navy's RFP, provides for *eighteen* cameras from Zeiss—not ten as staed in your letter to us. Mr. Secretary, what are we to believe?

In closing we wish to express our regret over the necessity for this letter and our attendant future actions; however, based on the long and disquieting experience of attempting to resolve this matter by reasonable and diligent effort, the Navy has left us with no other choice. Only more regretful is the failure of Navy personnel to live up to your personal commitment.

Please feel free to call on us. Our goal as I'm sure yours is, is to serve the people of Illinois and the nation.

Respectfully,

CHARLES H. PERCY.
ALAN J. DIXON.
PHILIP M. CRANE.

Mr. DIXON. Mr. President, I ask unanimous consent to have printed in the RECORD a letter that I sent to Secretary Lehman dated, December 16, 1982.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., December 16, 1982.

Hon. JOHN LEHMAN,
Secretary of the Navy, Pentagon Building,
Washington, D.C.

DEAR MR. SECRETARY: We are writing this letter in response to your letter of December 13, 1982.

Senator Percy and I, along with Congressman Philip Crane, have been attempting to obtain factual information in response to specific questions concerning the Navy's conduct in procuring a low-altitude aerial reconnaissance camera on a sole-source basis from Zeiss Avionics. Your reply does not provide facts as we requested, but merely a series of unsupported conclusions. In that connection we have attached a response from CAI RECON/OPTICAL, INC. to the points in your letter, and once again we are also attaching a copy of our unanswered questions from our letter of November 24, 1982.

The Illinois Delegation is not interested in conclusional assertions—we on the delegation's behalf simply asked for certain facts from the Navy. The answers to those questions would have allowed us to draw our own conclusions objectively.

We do not believe your allegation about past camera procurement problems is a factor in this specific case. In our view any such problems stem largely from the Navy's reliance on sole-source contracts—a mistake which the Navy is now compounding with a very questionable sole-source award in the Zeiss procurement.

The way to remedy the Navy's difficulties, it seems to us, is not through another sole-source contract but by holding an open and fair competition from the very beginning—not in fiscal year 1985–86.

Since we have yet to receive the necessary information we requested in our letter of November 24, 1982, let us reiterate that Senator Percy and I will introduce an amendment requiring the Comptroller General to investigate all the facts surrounding the sole-source contract to Zeiss.

The amendment will halt all funding for the RF-4B cameras until the Appropriations Committees of both houses have received the Comptroller General's factual report and determined an appropriate course of action.

Given the history of this case, we feel this action is appropriate since it appears to be the only course left open to us.

Senator Percy and Congressman Philip Crane have reviewed this letter and concur with its content.

Sincerely,

ALAN J. DIXON.

The PRESIDING OFFICER. The Senator from Virginia is recognized for 5 minutes.

Mr. WARNER. I thank the President.

Mr. President, I find myself in somewhat of an unusual position.

Fifty-seven percent of this contract will be performed in the United States and of that percentage the majority in California by the winning contractor, Zeiss. So I suppose that I am speaking for my California colleagues more so than for myself.

But really I rise in defense of the Navy procurement system, having had some modest experience in that area for over 5 years. I have personally gone back and studied every aspect of this contract.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from the Secretary of the Navy.

There being no objection, the letter was ordered to be printed in the Record, as follows:

DEPARTMENT OF THE NAVY,
OFFICE OF THE SECRETARY,
Washington, D.C., December 13, 1982.

Hon. ALAN J. DIXON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DIXON: I am writing in response to your November 24, 1982, letter regarding the Navy's decision to procure low altitude reconnaissance cameras from Zeiss Avionics. I take exception to the content of your letter as the Navy Department has worked hard for 4 years in a competitive environment to procure a camera that satisfies the Marine Corps low altitude camera requirement at lowest possible cost to the taxpayer.

The facts show that CAI Recon/Optical, Inc., was involved in the competitive process from the very beginning. In 1978, the Navy began to work with industry—including CAI—to improve the performance of low altitude cameras. CAI was fully aware of Navy's interest and met with Navy on numerous occasions during 1978 and 1979 to discuss how their KS-87B might be modified for low altitude use. The Navy even put funds in the budget to cover expected modi-

fication costs. However, CAI chose not to pursue the photo system development. Zeiss Avionics on the other hand invested their own funds to modify an existing off-the-shelf KA-107 camera to meet the USMC need. This development effort proved successful and later testing verified that the camera meets requirements. Even after we determined that the modified Zeiss camera was satisfactory, in September 1981 the Navy announced by Commerce Business Daily (CBD) the intent to produce a low altitude camera CAI did not respond to the CBD announcement or ask for additional time to respond. While CAI subsequently proposed a new development camera, the CAI-810, that camera has not been built or tested and could not meet our current, urgent need. In summary, we have accomplished the development with full knowledge by CAI of Navy's intent. They chose not to compete with a proven camera that meets the needs of the Marine Corps now.

We pursued the competitive process with CAI even though experience shows CAI's past contract performance has been poor. On their last aerial camera contract in 1977 for the KS-116B, CAI delivered the first four units in 780 days when schedule called for 240 days. Further, quality assurance, reliability and cost growth problems have continued to plague CAI cameras. As recently as early 1981, the KS-87B camera was one of the top 3 maintenance problems on the F-4 aircraft. Costs have risen on the KS-87B and KS-116B cameras by 600 percent and 91 percent respectively, far in excess of actual inflation rates over the years the Navy has been buying CAI cameras. I expect these facts have not come to your attention. They certainly make a strong case for vigorous camera competition.

As I explained in my November 15, 1982, letter, the Navy was faced with a time-sensitive requirement for ten cameras which only the Zeiss KA-107C camera could satisfy. For this reason I decided to proceed with initial procurement of the Zeiss KA-107C camera. The contract that was awarded is a multi-year contract which provides for a total of thirty-eight cameras (10 in fiscal year 1982, 8 in fiscal year 1983, 14 in fiscal year 1984 and 6 in fiscal year 1985). Assuming CAI or another contractor develops a camera that satisfies the USMC RF-4B requirements, the Navy will welcome competition to satisfy these future requirements.

Throughout the review of this procurement my staff and I have endeavored to provide you with full information concerning the Navy's requirement and the basis for its procurement decisions. I am satisfied that the Navy has made a sound business decision fully in accordance with applicable law and regulation.

Best regards

JOHN LEHMAN,
Secretary of the Navy.

Mr. WARNER. Mr. President, that letter clearly outlines the procedure followed and the fact that it was a competitive procedure and that the contractor today being spoken for by the distinguished colleague from Illinois had an even and fair chance to compete in this contract, although they lost. Nevertheless, the procedures were followed.

Mr. President, I also ask unanimous consent to have printed in the RECORD a document from the U.S. Navy which states in effect that if the relief sought by the delegation from Illinois is granted, in effect it will break the contract which has now been awarded to Zeiss.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NAVY ASSESSMENT OF IMPACT OF 120-DAY DELAY IN FUNDING THE KS-153A (KA-107C) CONTRACT

1. Delaying payment to Zeiss Avionics Systems for the 120 day investigation period would result in a termination of the contract at a cost, estimated by the Contracting Officer, to be in excess of $2.5M.

a. Zeiss Avionics Systems has a legitimate contract with the government. In addition to liabilities to Zeiss for work already accomplished and for obligations to subcontractors, the Government would owe Zeiss for cancellation charges under the contract. Further, if the GAO decision after 120 days is favorable to the Navy position, new contract negotiations would probably not commence until existing Government liabilities to Zeiss were resolved. Adding the administrative delays built into negotiating a new contract, it is estimated that a new contract could not be executed for at least a year.

b. Zeiss Avionics Systems (ZAS) is a small business currently indebted for approximately one million dollars. They are at the limits of their credit and are submitting to the Government a $217K progress payment request in December. Unless these funds are received, January salaries cannot be paid and ZAS would be required to close down and furlough/layoff all employees.

c. TRICOR is also a small business in Illinois whose major source of funds is from ZAS as a subcontractor for the KS-153A procurement. They would also be required to shut down and furlough/layoff all employees.

d. The delay—which is estimated to be 120 days—could in fact be much longer because shut down/start up time (and associated costs) would be required. Some materials were ordered in anticipation of the KS-153A contract. These would probably be diverted to other projects or the orders cancelled, resulting in significant delays beyond the 120 days.

2. There are numerous aspects of a delay which cannot be fully evaluated, such as: full limit of legal liability to ZAS and its subcontractors; and loss of any competition in U.S. for CAI (in recent years this company's prices have greatly increased while their product has not met all design specifications). The end result of the proposed delay would be cancellation of the KA-153A camera procurement, which is exactly what CAI is improperly trying to bring about. In effect, CAI wins even though they have no current camera which the Marines can now use.

Mr. WARNER. That will mean a $2.5 million loss to the U.S. Navy and perhaps as much as 6 to 8 months delay in the camera being received by the Navy and perhaps even a greater delay because I am informed by the Navy that the contractor represented by my colleague from Illinois has only a paper camera, that is, a concept of a camera and as such it is in competition with a camera which has been in use and redeveloped by the winning contractor for the Navy.

Mr. President, in quick summary, I know the distinguished chairman of the Appropriations Committee is aware of the fact that there are other Members of the Senate ready to come forth with contracts with the Department of Defense which likewise are disappointing to them. We can sit here in the context of the continuing resolution as a procurement office for the Department of Defense if you so desire, but I strongly urge that you do not do that and that we have to accept at face value the representations in writing of the Secretary of the Navy, that the Department of Navy that this competition was fair.

Mr. PERCY. Mr. President, will the Senator yield for a question?

Mr. WARNER. Mr. President, I yield to the chairman of the committee.

Mr. HATFIELD. Mr. President, I only wish to say, without addressing the merits of the case whatsoever, that the continuing resolution, is a very poor vehicle upon which to try to make this kind of determination. Early on in this process Senator BAUCUS had raised a similar question and he has in effect been diverted to another procedure which would probably be a better procedure for all these matters to be handled.

But I only want to say, without addressing the merits of the case, this is not the vehicle or forum to go into and scrutinize this type of thing as it should be. I am very hopeful that somehow we can find an appropriate committee in which these matters can be handled rather than here on this continuing resolution.

That is the only point I want to make.

Mr. PERCY. Mr. President, will the Senator yield for a question?

Mr. DIXON. Mr. President, will the chairman yield?

The PRESIDING OFFICER. The Senator from Virginia controls the time.

Mr. WARNER. Mr. President, how much time remains?

The PRESIDING OFFICER. There is 1 minute and 18 seconds.

Mr. PERCY. Mr. President, will the Senator yield to me for a question?

Mr. WARNER. I yield 18 seconds to my colleague from Illinois.

Mr. PERCY. I thank the Senator.

I say to the distinguished chairman of the Appropriations Committee a procedure was worked out in Senator DIXON's office and Congressman CRANE was there.

The problem is the Navy violated the agreement that was worked out.

May I ask a question of the distingusihed colleague, my friend and colleague from Virginia?

The PRESIDING OFFICER. The time is expired.

Mr. PERCY. Does Zeiss have any operations in Virginia?

Mr. WARNER. Yes; they do.

Mr. PERCY. Is there any possibility there could be from this California company that the Senator mentioned a subcontract that would be done in the State of Virginia?

Mr. WARNER. As I said at the opening, it is made in California, and Virginia does have a subcontractor.

The PRESIDING OFFICER. The Senator will suspend.

Thirty seconds remain. Does the Senator wish to yield?

Mr. WARNER. Mr. President, there were so many interruptions by the Chair while the distinguished Senator from Illinois and I were talking I missed the instructions from the Chair.

The PRESIDING OFFICER. The Senator from Virginia now has 30 seconds.

Mr. WARNER. Mr. President, I simply suggest we not perform the duties of the Navy or Department of Defense Procurement Office.

I yield back my time because I think the issue is relatively simple as framed by the distinguished chairman of the Appropriations Committee. I yield back my time.

Mr. President, I ask for a tabling motion and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Virginia to lay on the table the amendment of the Senator from Illinois.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea".

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PELL) would vote "nay."

The PRESIDING OFFICER (Mr. CHAFEE). Are there other Senators in the Chamber desiring to vote?

The result was announced—yeas 48, nays 46, as follows:

[Rollcall Vote No. 446 Leg.]

YEAS—48

Baker	Hart	Quayle
Baucus	Hatch	Randolph
Biden	Hatfield	Rudman
Boschwitz	Hayakawa	Sasser
Brady	Kassebaum	Schmitt
Bumpers	Kasten	Simpson
Byrd, Harry F., Jr.	Lugar	Specter
Cannon	Mathias	Stafford
Chafee	Mattingly	Stennis
Cohen	McClure	Stevens
Danforth	Melcher	Thurmond
Domenici	Mitchell	Tower
Durenberger	Murkowski	Wallop
Garn	Nickles	Warner
Glenn	Nunn	Weicker
Gorton	Pressler	
	Proxmire	

NAYS—46

Abdnor	Eagleton	Levin
Andrews	East	Long
Armstrong	Exon	Matsunaga
Bentsen	Ford	Metzenbaum
Boren	Grassley	Moynihan
Bradley	Hawkins	Packwood
Burdick	Heflin	Percy
Byrd, Robert C.	Helms	Pryor
Chiles	Hollings	Riegle
Cochran	Huddleston	Roth
D'Amato	Humphrey	Sarbanes
DeConcini	Inouye	Symms
Denton	Jepsen	Tsongas
Dixon	Johnston	Zorinsky
Dodd	Laxalt	
Dole	Leahy	

NOT VOTING—6

Cranston	Heinz	Kennedy
Goldwater	Jackson	Pell

So the motion to lay on the table was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WARNER and Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. WARNER. I wonder if the distinguished manager of the bill might defer just a moment to my colleague from Illinois (Mr. PERCY) and perhaps Mr. DIXON. This vote——

Mr. HATFIELD. Mr. President, I ask unanimous consent at this point that we divert from the normal schedule to provide 2 minutes for a colloquy for the Senator from Virginia.

The PRESIDING OFFICER. I am advised that there is no unanimous-consent order at this point.

Mr. HATFIELD. Mr. President, I yield 2 minutes to the Senator from Virginia then.

The PRESIDING OFFICER. The Senator from Virgina.

Mr. WARNER. Mr. President, I think, for the benefit of those who have participated in this vote and others, I should point out that it was very close for the reason that there is an enormous amount of dissatisfaction within this Chamber respecting the procurement policies of the Department of Defense, and I think this is an example. While I made my case very clearly and factually, I do defer to my colleague from Illinois, who feels that in this instance there was a wrong done and a strong signal was sent by virtue of this very close vote that I hope the Department of Defense will heed henceforth.

I yield to my distinguished colleague.

Mr. BAUCUS. Will the Senator yield?

Mr. PERCY. I thank my distinguished colleague.

The PRESIDING OFFICER. The Senator from Illinois has the floor.

Mr. PERCY. It is very interesting that the Presiding Officer, the President of the Senate today, is a former Secretary of the Navy and Senator WARNER is a very distinguished former Secretary of the Navy.

I spent 3 great years in the U.S. Navy in World War II, one of them right here in Washington. I was proud, in the middle of a war, the way we had competition, the procedures that we followed. But when the GAO wants to have the time to take a look at the procedures used in this case, it is a test case and it is a classic case of what I consider arrogance and breach of faith with Members of the Senate and the Congress.

Senator DIXON, Congressman CRAIG, and I sat in that room and we walked out with an agreement.

The PRESIDING OFFICER. The Senator from Oregon has the floor.

Mr. HATFIELD. Mr. President, we are going to bring this to a halt. We have had the debate on this.

I want to say that the Senator from Minnesota is refraining from offering a similar amendment on 60 helicopters being transferred to Iraq. The Senator from Montana (Mr. BAUCUS) is restraining himself from offering a similiar amendment about scrapes being constracted for in Illinois.

Mr. President, I understand that my distinguished colleague from Tennessee (Mr. BAKER) had intended to offer an amendment dealing with cash management. I have been advised that he will not now offer the amendment but rather will engage in a colloquy with his distinguished colleague from Kansas (Mr. DOLE).

Mr. BAKER. Mr. President, I thank the Senator for yielding. As the distinguished chairman of the Appropriations Committee indicated, I had originally intended to offer an amendment to temporarily prohibit the further implementation of the so-called delay-of-drawdown cash management system. I have been informed by numerous States, including my own, that the imposition of this federally mandated system may prove to be onerous. I have also been contacted by several national organizations representing our States, including National Governors Association and the National Association of State Budget Officers. In

addition, the National Conference of State Legislators and the National Association of State Treasurers have passed resolutions opposing further implementation of delay-of-drawdown.

The delay-of-drawdown, Mr. President, essentially allows States to withdraw funds from the Federal Treasury as checks disbursed by States under Federal programs are cashed. Under the old system, States were allowed to draw Federal funds at the times the checks were issued. The objective of the change is simply to hold funds at the Federal level as long as possible to reduce interest costs.

I have no quarrel with that objective, Mr. President—indeed, prudent cash management, as practiced in much of the private sector, dictates such practices.

I am concerned, however, with several aspects of delay-of-drawdown. First, the grant allocation procedure, which sets overall limits on the amount a State can draw, needs to be streamlined. Presently, if allocation ceilings prove to be inadequate, States must make up for the difference until an application for a higher ceiling is approved. Thus, through no fault of their own, States must carry the funding of the Federal programs that they administer. While this is not a criticism of delay-of-drawdown, per se, it is obvious that these systems must operate in tandem to efficiently manage cash at both the Federal and State level.

A second concern of many States is that they may be constitutionally or statutorily prohibited from implementing delay-of-drawdown. Simply stated, many States cannot issue checks unless they have sufficient funds in the bank at the time. Thus they may be forced to use their own funds, or borrow, to cover the checks until Federal funds become available.

Finally, and perhaps most importantly, Mr. President, delay-of-drawndown is presently being selectively applied. The Department of Health and Human Services, which has traditionally supplied advance funding for programs under their jurisdiction, is the only Federal agency presently attempting to implement this system.

Many other agencies, however, do not provide advance funding. Rather, States must advance funds to meet obligations and apply for reimbursement. Other programs provide funding on an accrued cost basis. The net result of this potpourri of cash management systems is very often detrimental to the States.

Not only is there an administrative burden in meeting these various program requirements, but also the States may be advancing funds to the Federal Treasury. One study preformed in Tennessee, for example, revealed that Federal agencies owed the State several times the amount of funds advanced by HHS. While some of the inequity was due to delayed billing by the State, it is clear that the State, and not the Federal Government, was providing advance funding for Federal programs.

All of this argues, Mr. President, that we must take a cautious and studied approach to Federal cash management as it impacts subnational governments. We urgently need Government-wide cash management that strives to achieve equity within our federalist system. It is not equitable to focus on one or two programs in which we provide advance funding and ignore those with delayed reimbursement. And any system that is developed must have the active participation of all affected parties.

It was for these reasons, Mr. President, that I thought some delay might be desirable. However, after discussions with both HHS amd OMB, I will forego offering a legislated freeze at this time. I have urged both agenices to redouble their efforts at working with the States in reaching an equitable solution. We need not rush to impose a piecemeal approach to this problem. OMB, which presently has a cash management initiative underway, has given assurances that they will expedite their considerations and submit the necessary proposals as soon as possible next year. Early consideration ought to be given to programs within the Department of Transportation, with which the States report their largest backlog.

In short, we need a uniform, Government-wide cash managment system that treats all parties fairly and equitable. To achieve such a result, OMB and HHS, along with other Federal agencies, must work closely with the States in the design implementation of the system.

Mr. President, I see that my distinguished colleague from Kansas (Mr. DOLE) is on the floor. I understand that his State may be experiencing some of the same problems as Tennessee.

Mr. DOLE. Mr. President, the Senator from Tennessee might take some solace in the knowledge that he is not the only one to hear from the States. As chairman of the committee with jurisdiction over the major HHS programs involved with delay-of-drawdown, I have received every resolution passed by the many national organizations representing the States. My own Governor, Governor John Carlin and Ross O. Doyen, president of the Kansas Senate, have attempted to enlighten me on this subject on several occasions.

Like my colleague before me, I cannot fault any attempt to improve cash management techniques. But I believe that any such program should be implemented, to the extent possible, on a uniform and equitable basis. In the current iteration of New Federalism, where we expect the States to share in some of the responsibilities of providing public serivces, we should not simply impose management systems that look good from Washington. I am encouraged by the OMB initiative and I trust that in the meantime my friends at HHS will work closely with the officials of my State to reach a mutually agreeable solution.

Mrs. HAWKINS. Mr. President, I would like to underscore the sentiments expressed by my distinguished colleague from Tennessee.

Over 20 States, including my State of Florida, face statutory and/or constitutional constraints against implementing the Department of Health and Human Service's delay of drawdown procedure. The procedure, which would force States to draft fund warrants for AFDC and medicaid before receipt of Federal funds, is inconsistent with prudent cash management practices.

While I support the efforts of DHHS aimed at reducing the outlay of Federal funds, I feel that changes in Federal cash management should only be made after thorough consultation with State officials to determine the most pragmatic and equitable approach. These changes must recognize State statutory and constitutional concerns and be applied to all Federal programs funded through the States.

The current inequities that exist at both the State and Federal levels need to be addressed. However, if we are truly committed to revisions which are beneficial to the State and Federal administration of Federal funds, we must take the steps I have outlined above before such implementation.

Mr. BOREN. Mr. President, the delay of draw-down requirement now being imposed by the Federal Government is an especially difficult problem for the State of Oklahoma. Oklahoma, unlike the Federal Government, has a constitutional provision which requires a balanced budget. In addition, article X, section 23 of the Oklahoma Constituton states that agencies "shall not incur an obligation in excess of the unemcumbered balance of cash on hand." Under Oklahoma law, neither the director of State finance nor the State treasurer may authorize or draw a check on the State treasury unless there is cash in the appropriate fund sufficient to cover the total of that check. There is no procedure under the Oklahoma constitution whereby a Federal "promise to pay" can be used in lieu of cash.

I urge that this delay of draw-down requirment be immediately rescinded, and a waiver be granted to those states whose constitutions prohibit compliance.

Mr. LUGAR. Mr. President, I have been advised by the treasurer of the

State of Indiana of the State's position on the delay of drawdown issue. Delay of drawdown is a practice which raises financial and legal difficulties for State governments across the country.

It is of course admirable for Federal departments and agencies to attempt to save Federal taxpayer dollars. What is required at the present time, however, is an agreement between the Federal Government and State governments about how to proceed in this area. For this reason, I would like to indicate that the State of Indiana opposes implementation of delay of drawdown for all Federal agencies until an overall agreement between the Federal Government and State governments has been achieved.

I am hopeful that it will be possible to achieve such an agreement in the near future, and that a mutually satisfactory arrangement for State governments and the Federal Government can be realized.

Mr. QUAYLE. Mr. President, the Department of Health and Human Services is currently implementing delay of drawdown disbursement procedures for several programs funded through cooperative agreements between the States and Federal Government. These new procedures will have an inequitable and harmful effect on State programs and agencies in many States.

Under these new procedures, no money will leave the Federal Treasury until recipients under affected programs present State warrants and no Federal money will be deposited in the State treasuries. A number of States, including my own State of Indiana, because of State laws governing the issuance and payments of warrants on the State treasury, will have to draw on State funds in order to comply with these procedures. In the case of Indiana, State statutes forbid the Treasurer of the State to make payment on any warrant for which there is insufficient money on hand in the fund on which the warrant is drawn.

I urge the Federal Government to delay implementation of the delay of drawdown procedures until a reasonable overall policy can be developed which would treat the different States fairly and equitably. These procedures relate directly to cash management on the State level and should be worked out in consultation with the States, reflecting the requirements of different State laws and State constitutions.

Mr. THURMOND. Mr. President, I would like to voice my concern on the complicated delay-of-drawdown procedure by which the Department of Health and Human Services is now disbursing funds to the States for several programs.

The South Carolina State treasurer, Mr. Grady L. Patterson, one of the most distinguished and respected State financial officers in this country, has been in touch with me concerning this matter. Mr. Patterson informs me that this new cash management system would pose an especially difficult problem for the fiscal policies and statutes of the State of South Carolina.

In view of the uncertainty facing many of the States with constitutional or statutory problems if this implementation of delay-of-drawdown proceeds, I would like to join a number of my Senate colleagues in urging that the Office of Management and Budget and the Department of Health and Human Services, in consultation with the States, give very careful consideration to these concerns and strive to alleviate them.

Mr. DURENBERGER. Mr. President, I would like to join with my colleagues in expressing concern about the changes in drawn down letter-of-credit procedures being implemented by the Office of Management and Budget.

OMB has made great strides over the past year in improving the Federal Government's cash. At a time when the Federal deficit is a pressing problem retarding economic recovery, any contribution to reducing the deficit is appreciated and to be applauded.

But in the case of letter-of-credit procedures with State governments who implement Federal programs, one has to be careful that zeal to reduce the deficit does not simply increase costs at other levels of government. Cost shifting of ths type will not benefit the taxpayer and would simply further damage our relationship with our partners in the intergovernmental system—a relationship already strained by other budget actions taken at the Federal level. OMB assures me that the changes that it is implementing are not intended to shift costs, but simply to make sure that the Federal Government gets full advantage of the interest that might be made on the use of its funds. I hope that is the case.

But the issue deserves further inquiry. And in that regard, I would like to indicate to my colleagues my intentions to hold hearings on this subject early in the next Congress. My staff spoke with the Associate Director for Management at OMB earlier today, and it is my understanding that they would welcome this hearing. I will report back to the Senate on the results of that hearing in the first few days of the next Congress.

Thank you, Mr. President.

Mr. CRANSTON. Mr. President, I join my Senate colleagues in expressing concern about the efforts of the Department of Health and Human Services to implement a new cash-management procedure—the so-called delay-of-drawdown program—for the medicaid and AFDC programs. This new accounting procedure would require a State to advance funds for both the State and Federal share of these assistance programs without the Federal share of the funds having been first transferred to a State's treasury. Several States have indicated that the implementation of such a procedure would violate their State constitutions or statutes, or both.

As a former controller of the State of California. I am very aware of the cash-flow problems and disruption in services this type of procedure could create for programs in certain States. Partially as the result of the Reagan administration's budget cuts and the recession, California is facing a budget deficit that could run as high as $1.2 billion in fiscal year 1982 and $3 billion next year. Many other States are facing similar budgetary crises. Under these circumstances, it is not fair or reasonable for the administration to shift additional fiscal responsibilities to the States by requiring them to advance the Federal share of funds for federally mandated programs.

I congratulate the distinguished majority leader (Mr. BAKER) on his statesmanship and keen understanding of the problems created by the administration's implementation of the delay-of-drawdown program on a selective basis for only programs that would benefit the Federal budget while working a financial detriment on the States. I agree with him that we must develop efficient and effective cash-management procedures for all Federal-State programs and that the administration should intensify its efforts to work with all the States—in consultation with the Congress—to develop a uniform cash-management system.

Mr. President, I strongly support the majority leader's efforts and those of the other participants in this colloquy to find a fair and effective resolution of this matter.

Mr. HATFIELD. Mr. President, the Senator from Oklahoma is next to be recognized.

UP AMENDMENT NO. 1546

Mr. BOREN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Oklahoma (Mr. BOREN), for himself, Mr. ROBERT C. BYRD, and Mr. BRADLEY, proposes an unprinted amendment numbered 1546.

Mr. BOREN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment, add the following: The nation's economy is entering the seventeeth month of a severe recession, with few signs of recovery;

Nearly 20 million people are underemployed or unemployed due to this recession;

Our nation's steel, auto and housing industries and our agricultural sector remain mired in a depression;

Given the current underutilization of both labor and capital, lower interest rates will not rekindle inflation;

Lower interest rates are the key to higher employment, higher production and sustained economic growth;

Therefore, be it declared that it is the sense of the Congress that: In recent months, the Board of Governors of the Federal Reserve and the Federal Open Market Committee have made a significant contribution to lower interest rates without rekindling inflation, and that with due regard for controlling inflation so as not to have an opposite effect of driving interest rates upward, they should continue to take such actions as are necessary to achieve and maintain a level of interest rates low enough to generate significant economic growth and thereby reduce the current intolerable level of unemployment.

Mr. BOREN. Mr. President, I offer this amendment on behalf of myself, the distinguished minority leader, Mr. ROBERT C. BYRD, and Mr. BRADLEY.

This amendment commends the Federal Reserve Board for its recent efforts to reduce interest rates, and expressing the sense of Congress that the Fed should continue to keep interest rates low enough to stimulate significant economic growth and reduce the current level of unemployment.

We are now halfway through our 17th month of the current recession, with no clear path toward recovery yet in sight. The November figures for industrial production and capacity utilization were down once more, and the steel industry continues to operate at slightly more than 30 percent its capacity.

Our great agriculture producers are in their worst straits since the Great Depression. We have recently learned that farm income across the Nation is at lows not seen since the Great Depression, and that my home State of Oklahoma is suffering from average farm earnings of only $14,000 per farm. We cannot expect our farmers to remain in business if their hard work and honest sweat leave them without any return.

The resolution that I am offering as an amendment was included in the House-passed continuing resolution, but was unfortunately eliminated by the Senate Appropriations Committee. It was eliminated along with all other sections of title II, so I believe the full Senate should have a chance to choose low interest rates and stronger growth by supporting this resolution.

The resolution simply states the sense of Congress that interest rates should be maintained at levels sufficient to allow our economy to begin its long climb toward recovery. It also encourages a more stable and reasonable interest rate policy than has been followed since October 1979. Since the Federal Reserve Board altered its policies that fateful day, the prime rate has changed 84 times. That is more than two prime rate changes a month for the last 3 years. Drastic and rapid changes such as these cause uncertainty and timidity in investors and retard the possible recovery that we are looking for.

Interest rates have played a large part in bringing us to our current depressed economic condition. People cannot afford to buy houses, cars, or other consumer goods at high interest rates. Furthermore, our Nation's goods and services—including agricultural goods—are harder to sell abroad since high interest rates in this country make the dollar more expensive in other nations. Thus we are preventing our own citizens, and citizens throughout the world from buying our goods because of unreasonably high interest rates.

As an example of the terrible toll that high interest rates exact on our consumers, consider what high rates do to the cost of houses and automobiles.

On a standard 30-year, $60,000 mortgage, monthly payments would be $855 at 17 percent, but only $711 a month at 14-percent interest. This would mean a $51,000 difference in the total cost of a house over the term of these mortgages. For many working Americans this $51,000 difference spells the difference between a house they can afford and a house that is above their range. It is this difference that has led many of our finest builders into bankruptcy.

Turning to automobile sales, we find a similar difference between high interest rate payments, and those required at more moderate rates. For instance, payments on a $10,000 car would be $273 a month at 14 percent interest, but only $258 a month at 11-percent interest. This would amount to a $720 difference in payments over the standard 4-year term of auto loans.

It is obvious that lower interest rates would mean higher sales, and a chance to climb out of our current intolerable recession. We have long said that an economic recovery could be encouraged by lower interest rates, and—indeed—the first signs of recovery have been sighted in two of our Nation's most hard hit sectors. Domestic auto sales were running at a mere 5.14 million annual rate in July, before interest rates headed down, but auto sales have increased to a 6.82 million annual rate as of this November.

Turning to housing, we find that lower interest rates has also helped here. In July, the annual rate of new house sales was pegged at 352,000, but after dramatic rate improvements for home mortgages we find that new houses were selling at a rate of 487,000 in October.

Mr. President, this resolution, which deserves bipartisan support, does not tell the Federal Reserve Board to encourage a renewed bout of inflation. We are too deep in a recession for inflation to begin during the next few months. This resolution simply expresses the sense of Congress that the Federal Reserve Board started down the right track earlier this year, when it brought rates down and that a path of moderate rates should be maintained during the next coming months. This is not a call for renewed inflation, rather it is an affirmation of renewed growth and a ray of hope for the millions of unemployed citizens throughout our land.

I hope that all of my colleagues can support this measure—it has been carefully drawn; it is balanced in its presentation—and that we can join our Democratic and Republican colleagues in the House who have already acted on similar language in sending the correct message to the Federal Reserve Board: We need more jobs, more growth, and lower interest rates.

I yield to the distinguished minority leader.

Mr. ROBERT C. BYRD. Mr. President, I thank my distinguished friend and colleague from Oklahoma (Mr. BOREN) for offering this resolution and for joining me as a principal coauthor.

This amendment expresses our belief that the Federal Reserve Board should achieve and maintain interest rates low enough to promote economic growth and reduce our current intolerable level of unemployment, without rekindling a new bout of inflation.

Language was included in the House-passed continuing resolution, but was stripped from the resolution by the Senate Appropriations Committee.

I would hope that the Senate now would put language in so that there is no question but that both bodies are interested in this approach. It will certainly relieve the tensions and the problems that might otherwise arise in conference.

I should mention, at the outset, that with our current level of unemployment and our low plant and equipment usage there is little danger of a new inflationary spiral.

Steel companies are at 40-percent capacity utilization. Capacity utilization in the automobile industry is at around 50 or 56 percent, though I may be wrong on that figure. Overall capacity utilization in this country is under 70 percent. With such a low level of employment and such a low level of plant and equipment usage there is little danger, in my judgment, for a new inflationary spiral.

The more acute danger is that our Nation, and other nations, will sink deeper into a recession that is now the longest in postwar history.

I believe this amendment is particularly appropriate at this time, because we lie somewhat suspended in an economic twilight between depression and recovery. The Federal Reserve Board seemed to abandon monetarism a few months ago, after the Senator and I and 40 others in this body, including Mr. BRADLEY, joined in offering legislation—not just a sense-of-the-Senate resolution but legislation—that would require the Federal Government to take such action as would promote economic growth and put people back to work, bring interest rates down, without rekindling the fires of inflation.

After I talked with the majority leader of the House, Mr. WRIGHT, that legislation was introduced in the House. He was able to get close to 70 cosponsors on it.

So there is very real support for this type of legislation. I am talking about legislation that goes beyond a sense-of-the-Senate resolution.

The Federal Reserve Board then began to move.

When they moved to drop monetarism, interest rates and the stock market recorded their strong approval. Interest rates dropped swiftly, and the stock market soared to record levels.

Then, just as the Christmas sales season was approaching, the Federal Reserve Board began to send mixed signals that left both the stock market and interest rate levels hovering nervously in anticipation, awaiting a clear signal.

Through this amendment, we want to express to the Federal Reserve Board our approval of the policy change made in October and the lower interest rates that resulted. But we also want to warn the Fed that a renewed bout of monetarism or a spike in interest rates will not be tolerated by this Congress. Legislation has been introduced in both the Senate and House, by Democrats and Republicans—and there has been public support by Democrats and Republicans—to force the Federal Reserve Board to target real interest rates. That legislation will become increasingly necessary if interest rates begin to move upward by late winter or early spring.

The amendment we are proposing tells the Federal Reserve Board that Congress will not tolerate a return to monetarist prescriptions in the coming months.

We hope that a resolution now will avoid the need for legislation early next Congress, but if legislation is needed no one should believe we will shrink from it.

I believe we can save much pain and unemployment in the next few months by telling the Federal Reserve Board that Congress is committed to a strong economic recovery, to put this Nation on the move again, to put people back to work, to encourage big industries such as steel, coal, and the automobile industry, to invest so as to modernize and increase productivity which, in turn, has a good effect both on inflation and employment.

There are signs that the Federal Reserve may doubt that it has a mandate to encourage recovery. First is the long delay between discount rate reductions that confused and concerned the financial markets throughout the fall. These delays were interpreted by market analysts as signals that the Fed intended to restrain money growth in the coming months to forestall a strong recovery.

The second reason for concern is found in Chairman Volcker's statement to the Senate Banking Committee on July 20 of this year. At that time, Chairman Volcker said that money growth above the 1982 target ranges could be tolerated because of the recession and because of the confusion that new money market developments created in interpreting the monetary aggregates. But, the Chairman warned, money growth would have to be slowed dramatically in 1983. In telling the Banking Committee that the Board had decided to use the 1982 targets as temporary 1983 targets, Chairman Volcker said:

Because monetary aggregates in 1982 more likely than not will be close to the upper ends of their ranges, or perhaps even somewhat above them, the preliminary 1983 targets would be fully consistent with a reduction in the actual growth of money in 1983.

This amendment says that while a reduction in the actual growth of money in 1983 may be consistent with Fed targets, if it were to result in higher rates, it would be inconsistent with Congress wishes, and inconsistent with the best interests of our Nation.

In essence, we do not believe that a monetary policy designed to stimulate capital investment and purchases of credit-related goods such as cars and homes, stands any danger of being inflationary in our current circumstances. I fully agree with last week's Business Week which says:

The combination of tight money and huge deficits has proved toxic to economic growth in the first two years of President Reagan's Administration. It would take a miracle to change that fact in the second two years . . . the time has come to go for growth.

The tragedy of unemployment, vastly underused plant and equipment capacity, and the danger of world economic collapse, has been much discussed, but cannot be overrated. The Federal Reserve Board made a terrible error in October 1979 when it converted to monetarist prescriptions for lowering inflation. It partially corrected that mistake in October of this year.

This amendment will encourage those members of the Federal Reserve Board of Governors who know that a more balanced monetary approach must be taken in the face of a still-declining economy. It will discourage those diehard monetarists on the Board who may not believe that the fate of 12 million unemployed and 6.6 million underemployed Americans is enough to cause a change in monetary policy.

Most importantly, this amendment will prevent a return to simplistic monetarist prescriptions and offer a ray of hope to our international allies who have suffered greatly under the monetarist regime and a ray of hope to our businesses who are waiting for a chance to invest in new production for America.

A vote for this amendment is a vote to climb out of the 17-month recession that is upon us.

I ask unanimous consent that the Business Week editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From Business Week, Dec. 13, 1982]

GO FOR GROWTH

With the world economy now mired in a near-depression and in desperate need of a U.S.-led recovery, Federal Reserve Board Chairman Paul A. Volcker's decision to abandon mechanical monetarism and ease interest rates down deserves broad support (page 90).

The advantage to hanging on with a monetarist policy of gradual reduction of monetary growth would be to obviate any chance that double-digit inflation will again rear its ugly head. The danger is that a recovery strategy based solely on lowering inflation will not bring interest rates down enough to turn the economy around, particularly when the markets must finance a structural deficit in the U.S. budget, which could amount to $200 billion in fiscal 1984 alone. The combination of tight money and huge deficits has proved toxic to economic growth in the first two years of President Reagan's Administration. It would take a miracle to change that fact in the second two years.

The advantage of direct moves to push interest rates down is economic revival. Housing and autos are already showing signs of life, and interest rates do not have to come down much further for them to soar. And when they do, the U.S. should get the consumer-led recovery that the Administration has been promising for more than a year. A further cut of 1% to 2% in long-term interest rates now could quite conceivably lead to the kind of strength in Christmas sales that would lay the ground-work for sustained progress in 1983.

The risk in pushing rates down is a revival of inflation. But even if money were to become much easier, there is enough unemployment and excess capacity around the world to limit price rises strictly in 1983. And if recovery should be strong enough to threaten inflation in 1984, there will be plenty of time to take corrective measures.

The world has paid a stiff price for ending the threat of hyperinflation. That price was probably worth paying. But the time has come to go for growth.

Mr. ROBERT C. BYRD. Mr. President, I compliment the Senator (Mr.

BOREN) again on his having offered this amendment. I urge the Senate to support it.

Mr. BOREN. Mr. President, I thank the distinguished minority leader. I am very proud to be associated with him. He is a leader in the effort to bring about a more reasonable monetary policy. I believe his efforts have had great impact in terms of opening a new dialogue between Mr. Volcker and those in the Congress who have similar concerns.

I would like at this time to reserve the remainder of my time on this side so that I might yield and allow the distinguished chairman of the Banking Committee, the Senator from Utah, to proceed.

He has participated in the consideration of this particular amendment.

Mr. GARN. Mr. President, I thank the distinguished Senator from Oklahoma.

I would say at the outset that I appreciate his cooperation on this amendment. Originally, when he first proposed the amendment, I did disagree and had intended to oppose. However, he was very cooperative and was willing to make some modifications in that amendment which make it acceptable to me.

I have no objections to the amendment as now written, or at least as a sense of the Senate.

Let me extend my remarks beyond this particular sense-of-the-Senate resolution because this subject comes up quite often.

In many cases we have those even within our Banking Committee, within the House and within the Senate, who desire to pass specific legislation mandating monetary targets, and infringing upon the independence of the Federal Reserve Board. This I will continue to oppose every time it comes up and every time anyone tries to use the Fed as a scapegoat for the problems of the fiscal policy of this country and the mistakes over many, many years of the Congress of the United States in creating the economic problems of this country.

I do not always agree with the Fed and their policies and I have never been unafraid, as chairman of the Banking Committee, to express publicly those concerns about Fed policy. But it is one thing for us to express our opinions and to advise the Fed and tell them what we may like them to do.

Again, I have no objection to this amendment today and I am extending my remarks to those who would try and control the Fed and take away their independence. We simply cannot separate the problem of interest rates in the matter of fiscal and monetary policy. They have to go hand in hand. They must work together. You cannot totally blame one side or another, and yet many of our colleagues over the last couple of years have tried to use the Fed as a scapegoat to cover up the problems of the Congress in fiscal policy and our ridiculous spending habits.

Because I do not care who the Chairman of the Federal Reserve is—we could make Senator PROXMIRE Chairman of the Federal Reserve tomorrow and, regardless of what his policies are, and as long as this Congress spends $150 to $200 billion a year more than we take in, the Fed has to monetize that debt—they have no debt whatsoever—and that certainly has an impact on interest rates.

I just want to make the point very strongly, although I support this sense-of-the-Congress resolution by Senator BOREN, and let it be known loud and clear once again that I will oppose all attempts to take away the independence of the Federal Reserve.

I like to use the example that Senator PROXMIRE has already heard too many times, but let us put it in the RECORD once again.

When I was mayor of Salt Lake City, I needed a new fire chief at one point. I did not go to the Utah State Prison to hire the No. 1 arsonist to be head of the Salt Lake City Fire Department.

So we may not like some of the actions of the Fed, but when we compare their actions over a period of decades to the actions of the Congress of the United States on fiscal policy, the last thing on Earth we want to do is to turn over the control of monetary policy to the burglars who have robbed the American people of their savings and their dollars through these exorbitant deficts year after year after year, through both Republican and Democratic administrations. We do not ever want to turn the Fed over to the burglars who have robbed us on fiscal policy.

Once again, I commend the Senator from Oklahoma for his sense-of-the-Congress resolution. I would be willing to accept it. It is not even necessary, as far as I am concerned, to have a rollcall vote.

But let us not ever go beyond advising the Fed, as we are doing today, to attempt to control them and dictate to them how they should function with the monetary policy of this country when we have had such an incredibly poor record on the fiscal side of the coin.

I yield now to the distinguished Senator from Wisconsin, who will come back to the Banking Committee in the 98th Congress, and I am happy that he is going to be the ranking minority member of the Banking Committee.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I thank the chairman of the Banking Committee. I agree with much of what he had to say.

I think this is a useful resolution, but I think we should carefully recognize the great power the Congress has with respect to the Federal Reserve Board.

Just 2 days ago in West Virginia, Mr. Volcker was asked at a public meeting, "To whom are you accountable?"—the charge being he is not accountable to anybody. "Well," Mr. Volcker said, "the Congress created us and they can uncreate us." And of course Chairman Volcker was right.

The fact is that this body, the Congress of the United States, has absolute control over monetary policy, according to the Constitution. So I think we should be extremely careful in how we word resolutions on monetary policy, because the Fed is our creature. They have to follow what we say. We are their boss and they recognize that, as Mr. Volcker indicated 2 days ago.

The resolution before us is a sense-of-the-Congress resolution and does not have full force or effect of law, although it does express the sentiment of the Congress. I think it is a balanced resolution that indicates that we are in a very serious recession, with unemployment at a record high for the last 40 or 50 years, and with a farm depression and business failures that are heartbreaking. And it is also an interest rate-caused recession. There is no question about that.

The chairman of the Banking Committee was 100 percent correct in indicating that you cannot blame the Fed entirely for that. This is an interest-rate recession that has been caused by a fiscal policy featured by continuous and massively growing deficits that have made the Federal Government the dominant figure in the credit market. The Federal Government is borrowing more than 50 percent now of the entire economy's new credit. So what can the Fed do? Either they monetize the debt and pave the way for future inflation—and I am delighted to see this resolution recognizes the danger of that action—or they put the brakes on in such a way that interest rates go through the roof.

For years now, the Fed has been the only game in town in fighting inflation, and I think Mr. Volcker has done a good job under difficult circumstances. I would have done it a little differently than he did as would many of us. But all in all, I think he is on the right track in trying to hold down the rate of increase in the money supply.

I thank my good friend, the chairman of the Banking Committee, and congratulate him on the part he has played in modifying this resolution to make it crystal clear we are not suggesting that the Fed abandon its fight against inflation.

Mr. GARN. I would be happy to yield to the distinguished minority leader on their time.

Mr. BRADLEY. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from Utah has 3 minutes and the Senator from Oklahoma has 31 seconds remaining.

Mr. GARN. I would be happy to yield, then, if the minority leader no longer seeks recognition, to the Senator from New Mexico.

Mr. DOMENICI. Mr. President, I think it is good for the country and good for the Federal Reserve Board that this resolution be adopted, and in particular in the form that it is drawn. There is not any question that the Federal Reserve Board, at least since August, has conducted itself such that they are obviously aware that we are in a deep recession, that we have significant unemployment, and that, at least in the short term, what this country has to do is to start to grow. And I think the reductions in interest rates that have come from their policies and from their lowering of the discount rates is the only way to get out of the deep depression in some industries and the recession that we have generally.

However, I think I would be remiss if I did not mention that at least this Senator believes that over the long run—that is, over 3 or 4 years—that kind of policy is not going to work all by itself. Because the reality of future deficits, the result of our fiscal and tax policies will soon become more than a prediction. It will become a living reality that no one will be able to ignore.

I am not talking out of school as to the new numbers. I will just quote our President, who has now recently said that the future or outyear deficits are monstrous. A monetary policy of the type we are asking for right now, and that we expect to be the result of what we are asking for right now, may be considerably different in 12 or 18 months if we have not controlled the future deficits in a realistic manner. Because they will be so large that they will be acting consistent—that is, the Federal Reserve—consistent with this resolution and yet interest will go up rather than down, because they will be confronted with $185 billion to $250 billion to $275 billion annual deficits based upon current law, and I say to my good friend from Oregon, even with and assuming reasonable prolonged growth, which is going to be an inconsistency. Therefore the deficits would only be larger and thus the interest rates coming down in compliance with this policy will not be real. I thank the Senator for yielding.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Oklahoma has 31 seconds remaining.

Mr. BOREN. Mr. President, I ask unanimous consent that the Senator from Alabama (Mr. HEFLIN), the Senator from Montana (Mr. MELCHER), and the Senator from Tennessee (Mr. SASSER) be added as cosponsors of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SASSER. Mr. President, I rise in strong support of the amendment by Senator BOREN and by the Democratic leader to add the basic content of Senate Concurrent Resolution 128 to the pending legislation.

Mr. President, I support this amendment because I have, from the very adoption of the Fed's new monetary policy in October 1979, been a critic of the Federal Reserve Board's tight money policies.

Indeed, I was the first Senator to bring a monetary policy resolution to the floor of the Senate in May of 1931 that would have signaled the Fed to change its monetary policies.

My resolution called for the Fed to reverse its monetary policy, ease up on interest rates, and consider the adoption of a dual prime rate policy that would help reduce interest rates for small business, agriculture, and the homebuilding industry.

Now my resolution failed by a 57-to-37 vote.

But I think that the events of the last 3 years have proved that my concerns about interest rates are right on the mark.

Mr. President, because of high interest rates the level of our real gross national product is $30 billion lower than it was in the first quarter of 1981.

Because of high interest rates, we have 12 million unemployed and an unemployment rate of 10.8 percent.

Because of high interest rates we are using only 68.4 percent of our industrial capacity.

Because of high interest rates, we experienced over 17,000 small business failures in 1981 and we will probably see 25,000 business failures recorded this year.

Indeed, the weekly rate of business failures now stands at 526 per week, more than double that recorded when the Reagan administration came into office.

High interest rates have meant that businesses do not have the ability to invest nor are consumers willing to borrow in order to buy houses, automobiles, or other durable goods.

And lest anyone think that our interest-rate problems are behind us, I would remind my colleagues that "real" interest rates are still at extraordinarily high levels.

My colleagues, consider if you will the level of real interest rates since the Fed adopted its tight money policies at the end of 1979.

Between 1960 and 1978, real interest rates averaged 2.1 percent.

In 1979, the real interest rate stood at 4.1 percent.

In 1980, it stood at 6 percent.

In 1981, it stood at 9.5 percent.

And for each of the first three quarters of 1982, the "real" prime rate has been over 10 percent.

It is small wonder to me that business investment fell by 4.8 percent in 1982 and that many private forecasts expect that business investment may fall by another 5 percent in 1981.

Mr. President, I believe that the Federal Reserve Board itself is even beginning to realize that its tight money policies are an economic failure.

The discount rate has dropped by 4 points within the last 4 months. And just yesterday, the Fed dropped the discount rate to 8½ percent.

The Fed has indicated that it will exceed the overly stringent monetary targets that they adopted for 1982.

The Fed knows that, both domestically and internationally, their high interest-rate policy cannot be sustained.

They know that high interest rates are a prime cause of the projected $70 billion trade deficit.

They know that overly high interest rates are pricing our exports out of the world market and escalating the international debts of our trading partners.

They know that high interest rates at home have caused record numbers of small business failures.

They know that high interest rates are the main reason we are only going to build 1.1 million housing units this year and only 1.3 million units next year when we should have built 4 million units in order to house a growing and changing population.

And of course our automobile industry has been devastated by high interest rates.

Indeed, a recent National Journal article on the impact of high interest rates noted that since 1979, sales of cars and trucks have dropped by 900,000 units a year for every percentage point increase in interest rates. As a consequence, the average age of the car on the road today is about 7 years.

Mr. President, we have an economy that has been shackled by high interest rates.

We have businesses waiting to invest and consumers ready to borrow when interest rates come down and stay down.

And it is my hope that this amendment will send a strong message to the Fed that they should reverse their high interest-rate policies and adopt a monetary policy that does not run our economy onto the rocks.

The Byrd-Boren amendment does just that. I urge passage of the amendment.

Mr. BENTSEN. Mr. President, I strongly support the resolution offered by Senator BOREN on monetary policy. You and my other colleagues here may recall that I have been critical of Federal Reserve actions on monetary policy for over a year now. Indeed, I believe I was one of the first, if not the first, Senator to urge moderation in monetary policy by the Federal Reserve Board of Governors early in 1981.

My criticism of the Federal Reserve last year focused initially on their decision to freeze monetary policy during the second and third quarters of 1981. That extreme policy resulted in an actual decline in the money stock variable called M_1 during that 6-month period—and quite properly is pointed to as the fundamental cause of what has now become our longest postwar recession. I confess amazement, even today, with that period of monetary contraction. It resulted in the Federal Reserve coming in well beneath its stated M_1 growth target range for that year of 3.5 percent to 5.5 percent. And, it seemed to puzzle monetarists and nonmonetarists alike in its needless severity and duration as an anti-inflation action.

That episode sent interest rates soaring and began the downward spiral in our economy which continues today. The Federal Reserve dropped the ball another time in 1981, as well—blowing an opportunity to cut short the recession exactly 1 year ago.

Thanksgiving, 1 year ago, interest rates began sliding downward, promising a quick end to the recession. Yet, in a repetition of its earlier tight-money episode, the Federal Reserve halted that slide last Christmas. In fact, it sent interest rates soaring up a point and more just as we entered 1982—insuring continuation of the recession far longer than necessary.

I am aware that a tighter Federal Reserve policy compared to the late 1970's was needed and necessary to stem inflation. Yet, I cannot disagree more with both the magnitude and timing of Federal Reserve actions over the past 18 months.

It is no coincidence that our recession began just as the growth of M_1 ceased in the spring of 1981.

It is no coincidence that the prime rate fell to 15.75 percent from 20.5 percent a year ago once the freeze on M_1 was lifted.

It is no coincidence that the prime rate jumped right back up again last Christmas as M_1 growth was tightened again.

And, it is no coincidence that the thankful decline in interest rates this fall paralleled a more accommodative money posture by the Federal Reserve.

The Fed overreacted and paid a higher price than necessary for its welcomed progress against inflation. Let me hasten to add, however, that Chairman Volcker's task has not been an easy one.

The Federal Reserve has stood alone like Horatius at the bridge in the fight to slow inflation. It alone was willing to pursue contractionary policies while the White House and Congress piled deficit upon deficit—deficits which may now threaten any hopes for a robust recovery—or any recovery at all. In fact, we face a prolonged period of economic stagnation if we do not aggressively trim spending and raise taxes. The Federal Reserve Board of Governors knows that. And we know that, too.

Our economic outlook is grim. Morgan Guarantee's annual survey, for example, projects such sluggish growth next year that unemployment may not slip below 11 percent until July. We have enjoyed real economic growth in only one of our last four quarters. And, Commerce Secretary Baldrige yesterday predicted that the fourth quarter would see little or no growth either.

It is to Chairman Volcker's credit that he is now acting to accommodate somewhat more economic growth. The Federal Reserve's action on Monday to lower the discount rate to 8.5 percent was its most aggressive action yet to stimulate a recovery. It occurred even though the Federal funds rate on Interbank loans was above 8.5 percent—a sharp departure from previous patterns when the discount rate was reduced by the Fed. We have needed that sort of action for a long while. It is long overdue for our domestic economy and for the world economy, where debtor nation after debtor nation is frantically seeking credit; credit which can only come from the U.S.-led bloc of advanced industrial democracies.

The resolution before us is designed to encourage Chairman Volcker and his fellow Board members to permit the further easing of interest rates. Lower interest rates are critical to an economic recovery here and across the world. No Member of this body wants to see inflation generated anew. But our bulging food stocks and tank farms plus record-level excess plant capacity, promise many months of low inflation ahead. The Federal Reserve should seize this opportunity to move our Nation onto a path of robust growth now when it would not regenerate inflation. It is an opportunity not to be missed. And, the resolution before us is intended to insure that this opportunity is not missed.

Mr. MELCHER. For the past 34 months I have pointed out the dangerous results of the high interest- rate policy set in motion by the Federal Reserve Board. I voiced my objections personally to the Board's Chairman, Paul Volcker, during a White House dinner early in 1980.

Mr. Volcker stated then, as he so often has since, that high interest rates were the "medicine the economy must swallow to cure inflation." The man has a certain majesty in his massive bearing, but I have never wanted majestic decisions to veto commonsense. So, I argued with Mr. Volcker that a cure that halted housing and the forest products and construction supply industries, a cure that caused agriculture producers and small business to go broke was a cure that led to massive unemployment with a deep recession or even a depression.

Mr. Volcker dismissed those arguments with courteous disdain.

But even with inflation dropping for the past 2 years the Volcker high interest- rate policy continued until the middle of this past summer.

Using the historic spread of no more than a four-point spread between the rate of inflation and ordinary business and consumer interest costs, the rates are still too high. The inflation rate is approximately 5 percent and interest rates should be at 9 percent—instead of 11 to 14 percent.

Obviously, the Federal Reserve Board's policy must be to continue a policy of reducing rates more. The combination of high unemployment, business failures, and depressed agriculture prices has caused sharp drops in Federal revenues from income and business taxes with an overwhelming budget deficit.

That is not only a tough cure, it has caused tragic results to millions of America's families. We must keep interest rates declining. There are other policies that must be followed such as a reduction in foreign aid and defense spending, an increase in our export sales, a reduction in our foreign imports, and a reduction in costly Federal redtape. These along with a continued drop in interest rates are the cure for economic recovery. Diligent attention to these matters are required.

Mr. BOREN. I yield to the Senator from New Jersey the remainder of my time.

Mr. BRADLEY. Mr. President, this amendment underscores the strong feeling in the Senate that the Federal Reserve can play an important role in generating economic growth. It is a recognition that, indeed, money does matter. The rate of growth of the money supply—somehow defined—does exert a powerful influence on the performance of the economy. If it is too stimulative it can contribute to inflationary pressures. If it is too restrictive it produces high unemployment. Unlike several of the bills introduced earlier in the session by Representatives of both sides of the aisle, bills which I did not support—this amendment does not attempt to assert congressional control of the money supply. This amendment, unlike earli-

er versions, does not set numerical targets, nor does it recognize that the reduction even mandate real interest rates in historical ranges.

This resolution calls for such actions as are necessary to achieve and maintain a level of interest rates low enough to generate significant economic growth and thereby reduce the current intolerable level of unemployment. Many of us recognize that while there is continuing and obvious disagreement between the two polar positions on monetary policy, there is an emerging consensus that neither rigidly tight nor wildly expansive monetary policy is called for. Except for the most doctrinaire proponents of the two extreme positions, most people agree on the benefits of a moderate and flexible growth rate of the money supply. Sure there will continue to be arguments about how you measure the quantity of money, but we can agree on the basic policy thrust. The general policy thrust is toward interest rates that will achieve significant and sustained growth. This is the policy called for in this amendment.

Let us look at the recent performance of the Fed's monetary policy. For the past year, the Fed's target range for the rate of growth of M_1 has been 2½ to 5½ percent. The rate of growth has not fallen below the 2½-percent lower target; and, except for a brief period between June and August last summer, the rate of growth has been above the 5½ upper target. Further, since June, M_1 has grown at an annual rate of about 15 percent. Some argue that the recent growth rate may provide too much money to the system and refuel the fires of inflation, especially in concert with the large impending budget deficits forecast by the administration. Rising inflation would push interest rates back up. The amendment we are now discussing calls for lower interest rates, not higher.

On the other hand, the Fed has no direct control over M_1; it can, however, influence the monetary base, a narrower measure including currency and bank reserves. This measure of money supply tells a different story than the M_1 story. While M_1 has been expanding at a 15-percent annual rate, the monetary base has been kept within the 4- to 6-percent range since last August. Too tight a lid on money supply will force up the price of money, that is, interest rates. The amendment we are proposing calls for lower interest rates, not higher.

Again, Mr. President, there are few among us any more who call for either a rigidly tight or a rapidly expansive monetary policy. Most of us agree that monetary growth should be moderate and flexible, allowing for judgment and some degree of discretion on the part of the Federal Reserve. This a resolution in favor of lower interest rates without a specific, congressionally mandated course of action. As such it deserves support.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BRADLEY. Mr. President, I ask unanimous consent to be able to continue for another minute.

Mr. HATFIELD. I object.

The PRESIDING OFFICER. Objection is heard.

All time has expired.

Mr. HATFIELD. Mr. President, I am not yielding directly to the Senator's request, but I am yielding at the request of the minority leader, and I would do so only under that circumstance.

I ask unanimous consent that a minute be given to the Senator from New Jersey. I do that knowing full well that I put the Senate on notice that I would object to any extension of these time agreements, but I do so in deference to the minority leader's request.

Mr. ROBERT C. BYRD. I thank the distinguished chairman.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. I thank the chairman of the committee and the minority leader.

Mr. President, I wanted to continue by simply saying that interest rates are coming down and must come down if we are going to grow. And if we do not grow, we will have major problems in the international financial system.

I would like to point out for the Senate that even if interest rates do come down and we manage some slow growth, we still could have problems in that system in the next year, that indeed questions about IMF quotas and emergency funds and the size of the emergency exchange stabilization funds will all come before Congress in the next year, and that we have to ask ourselves, beyond the questions of jobs and available credit for our constituents, what is in it for all of us to make sure that that system remains stable?

Now it is true, monetary policy is not followed in a vacuum. It is followed in the context of policies by the Congress and by the administration. It is my hope that we will——

The PRESIDING OFFICER. The Senator from New Jersey has used his minute.

Mr. BOREN. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma (Mr. BOREN). The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG), the Senator from Arizona (Mr. GOLDWATER), the Senator from Pennsylvania (Mr. HEINZ), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Washington (Mr. JACKSON), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that if present and voting, the Senator from Washington (Mr. JACKSON) and the Senator from Rhode Island (Mr. PELL) would each vote "yea."

The PRESIDING OFFICER (Mr. COHEN). Is there any Senator in the Chamber who has not yet voted and is inclined to do so?

The result was announced—yeas 93, nays 0, as follows:

[Rollcall Vote No. 447 Leg.]

NOT VOTING—7

Armstrong	Heinz	Pell
Cranston	Jackson	
Goldwater	Mathias	

So Mr. BOREN's amendment (UP No. 1546) was agreed to.

Mr. HATFIELD. Mr. President, I yield to the Senator from Missouri for a unanimous-consent request.

Mr. DANFORTH. Mr. President, I ask unanimous consent that unprinted amendment No. 1538 appear at the end of title I.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I want to again put the Senate on notice, but I am going to demand regular order. This is where the business of the Senate is today. There are no committee meetings going on anywhere to

compete with this focus of the business. We lose time, while we wait for the arrival of late Senators. I want to accommodate any Senator I can, but I just want to make it very clear that when the time has expired I am going to demand regular order except for the leadership that may be on their way. I recognize that exception.

The Senator from Indiana has an amendment, a 5-minute time agreement, I believe, with no rollcall expected.

Mr. QUAYLE. That is true.

Mr. EXON. Will the Senator yield for 10 seconds?

Mr. HATFIELD. Yes, I yield.

Mr. EXON. Inquiry of the manager of the bill. Maybe we can expedite things a little bit if the Senator would put out a call. It does not seem to this Senator it is necessary to have a rollcall vote if we are trying to save time when we pass something 39 to nothing.

Mr. HATFIELD. The Senator is correct. There was a plea made to the author to refrain from asking for a rollcall but that is the Senator's prerogative, and so therefore we could not control that situation.

Mr. EXON. The Senator will make the same plea again, I presume?

Mr. HATFIELD. I will. I will.

UP NO. 1547

(Purpose: To provide $50,000,000 for the Dislocated Workers Program under the Job Training Partnership Act)

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Indiana (Mr. QUAYLE), for himself, Mr. KENNEDY, Mr. HATCH, Mr. LUGAR, Mr. HEFLIN, Ms. HAWKINS, and Mr. BRADLEY proposes an unprinted amendment numbered 1547.

The amendment is as follows:

At the end of title I, add the following:

EMPLOYMENT AND TRAINING ASSISTANCE

For an additional amount for "Employment and training assistance", $50,000,000, which shall be for carrying out title III of the Job Training Partnership Act (Public Law 97-300).

Mr. QUAYLE. Mr. President, unemployment climbed to 10.8 percent in November, continuing a trend which must be brought to a halt. As Congress examines solutions to deal with this facet of our complex economic problems, I would like to urge my colleagues to support a $50 million appropriation level for the newly enacted dislocated worker program, title III of the Job Training Partnership Act. This level of funding would accelerate the implementation of the dislocated worker program. I am offering this as an amendment to the further continuing appropriations for fiscal year 1983, House Joint Resolution 631.

The Job Training Partnership Act was designed to meet the needs of our Nation's structural unemployment problems. Not only does it provide a training program for the economically disadvantaged—title II—but it also has a program to provide assistance to dislocated workers. The continuing resolution currently funds the basic training program for the economically disadvantaged, but it does not fund the dislocated worker program.

We must accelerate implementation of the dislocated worker program because there is evidence of a growing need to assist experienced workers who are unemployed. Throughout 1982, factories and businesses across the country have been closing and workers have been forced into idleness which will not end even with economic recovery. The Bureau of National Affairs estimates that over 150,000 workers have lost their jobs due to plant closings in the first 9 months of this year alone. Testimony from the Department of Commerce before the Subcommittee on Employment and Productivity estimated a permanent decline of 500,000 jobs in automobile and related employment.

According to Martin Feldstein of the Council of Economic Advisers, only 30 to 40 percent of the October unemployment was cyclical and the rest was structural. In other words, over 6 million unemployed workers cannot expect to find jobs even with maximum noninflationary growth in the economy.

Individuals affected by structural changes in our economy are forced to rely on unemployment insurance benefits or their own resources to help them through this difficult time. Dislocated workers have little chance of returning to their former occupations. Many of them have exhausted their unemployment insurance benefits and, eventually, they will exhaust their personal resources as well. Once-productive workers may become dependents of our social welfare programs at great social and economic costs. However, with a minimum amount of assistance, they may once again join the work force as productive citizens.

Under the dislocated worker program these individuals will receive assistance in job search, prelayoff assistance, relocation assistance, and training in jobs skills for which demand exceeds supply. The $50 million appropriation that I propose for this program will be an investment in the future when millions of more dollars will be saved through decreased public income transfer expenditures and increased national productivity.

RETRAINING DISCLOCATED WORKERS: $50 MILLION IS BETTER THAN $200 MILLION

The sum of $50 million will clearly not provide assistance to a large proportion of the dislocated workers but it would be, in my opinion, a serious mistake to increase the size of the appropriation because it is not sufficient to deal with the whole problem. Retraining of dislocated workers is a complex business in which we have little experience. We must mount well-considered programs that will retrain workers for actual job opportunities. We must not just throw money at the problem with the inevitable result that we will get programs that do not work.

It has been suggested that, for fiscal year 1983, $200 million be appropriated for the dislocated worker program. This is twice as much as was proposed in the original Quayle-Kennedy bill. This level of funding raises questions which go beyond the obvious considerations of fiscal constraint. In their enthusiasm for alleviating the problems and suffering of dislocated workers, the supporters of this higher level of funding are overlooking administrative realities regarding implementation of the new Job Training Partnership Act (JTPA). At present, JTPA simply does not have the administrative capacity to efficiently and effectively distribute such a high level of funds.

The JTPA establishes a new delivery system as well as new programs. Fiscal year 1983 will be a transition year during which the new system will be put in place. We have a very short period of time to accomplish this enormous task. The number of participants in the delivery system has increased and there will be shifts in responsibility and authority. New relationships must be established. Governors, in addition to administering the dislocated worker programs, now have many of the responsibilities that formerly belonged to the Secretary of Labor. The successful establishment of the new service delivery system is essential to the future success of job-training programs.

The $50 million appropriation level which I propose would be sufficient to implement the new dislocated worker program without overburdening the system. In the past, one of the factors which inhibited the successful operation of the CETA program was that it was constantly required to adjust to meet Congress changing demands. As the CETA program was adjusting to meet the most recent Federal mandate, Congress would require further changes in response to a new economic situation. It is imperative to the success of JTPA that we not repeat the mistakes that were made with CETA. During the remainder of this fiscal year, our chief goal should be the successful establishment of the new job-training system.

Even in the State of Michigan, where the need for this program is un-

deniably greatest, the Michigan Department of Labor warns against too rapid a buildup of funding. The following was taken from their position paper on the dislocated worker program:

The Michigan Department of Labor believes strongly that Title III of the Job Training Partnership Act should be funded for fiscal year 1982-83. . . . Although funds are required now, MDOL believes just as strongly that funds should be made available through a phase-in formula.

It has been the Department's observation that a number of past governmental programs have required initial expenditures of funds too rapidly when first authorized. This does not provide for the careful planning that is necessary to implementing an effective response. Rather than being able to devote adequate time to initial organization, these programs find themselves under undue pressure to spend.

MDOL would therefore prefer to see Title II funded in a rational manner.

This opinion is particularly striking in view of the fact that Michigan is ahead of most of the States in its ability to mount such a program.

States need time to plan for the distribution of funds for dislocated worker programs. Because of the advance budgeting required, many States may not have available the matching funds that are a necessary requirement for receipt of Federal funds under this program. Also the dislocated worker program is a new concept. The problems of dislocated workers are enormous and we are still trying to understand the nature of the problem and remedies to it. Recently, a few, small programs have been set up to explore ways of dealing with the problems of dislocated workers. But we have very little prior experience upon which to build. A look at the models that are available shows that careful planning cannot be overemphasized.

One of the best worker retraining programs is the downriver community conference economic readjustment project in southeastern Michigan. This pioneering program is generally regarded as having been highly successful. In testimony before my Subcommittee on Employment and Productivity, program operators from the Downriver project described the planning that is necessary to provide experienced workers with assistance to reenter the labor force. Witnesses described the network they developed of employers and employment and training agencies. Their program also includes Outreach, meetings with management and labor at factories that are closing, orientation, aptitude tests, job-seeking skills workshops, and finally determination about the most appropriate assistance to provide for each individual: Direct job placement, classroom training, or on-the-job training. As one witness said:

The manner in which we do this assures marketability of our workers, because we feel an obligation not to set them up again for failure and not to train them in an area where there is not a job.

A look at the beginning of this program shows the time lag between the initial implementation of the program and the expenditure for funds. In fiscal year 1981, the Labor Department obligated $3.825 million to the downriver project. During fiscal year 1981, less than $1,000 were outlayed. During the first full year of operation, fiscal year 1982, outlays were $2.6 million, less than 70 percent. This was partially explained by the fact that one factory did not close as soon as was expected. But this only highlights the necessity for careful planning.

At this time, the service is too delicate to meet the demands that would be imposed upon it by funding the dislocated worker program at a $200 million level. With that level of funding would come expectations that a specified number of individuals should receive training. I am afraid that the pressure of that demand would push the system beyond what it is reasonable to expect and the results would be disastrous. It would inevitably result in poor decisionmaking and misexpenditure of funds. In an effort to spend the money within the remaining months of fiscal year 1983, dislocated workers would be hurriedly assigned to training in whatever programs are available, without due consideration being given to the appropriateness or desirability of the training.

Mr. KENNEDY. I am pleased to join my good friend and colleague from Indiana in offering this amendment and I commend him for his leadership on this issue.

One of the most important provisions of the recently enacted Quayle-Kennedy bill is title III—a new program to train and retrain workers who have premanently lost their jobs. The Congressional Budget Office recently estimated that as many as 2.2 million Americans have been permanently displaced.

Many of them worked in industries where employment is declining. Autos and steel are the examples we are all familiar with. These men and women have worked in occupations and learned skills that are no longer in demand. Many live in regions of this country that have borne the brunt of the current recession.

Those hardest hit are the older workers—those individuals over 45 who have worked their entire life, often for one company. Suddenly, these men and women find they are no longer needed. Their jobs have been abolished. Their economic security is gone. Their plans for the future are destroyed.

Yet, they have responsibilities to meet and obligations to shoulder—children to educate, mortgages to pay, aging parents to care for. Their plan was to work for another 20 years and retire with the savings they had put away. But these workers have had their plans destroyed and their hopes demolished.

At the same time we are losing jobs in our industrial sector, new occupations and careers are opening up in the service and hightech fields. We have an opportunity, and indeed an obligation to train these workers for these new careers.

The $50 million Senator QUAYLE and I are proposing is a down payment on this important new training initiative. Under the Quayle-Kennedy bill, these programs would not get underway until next October. But Senator QUAYLE and I agree that we cannot wait. The problem is too serious. The need is too great. We must begin now to prepare these deserving men and women for the jobs that will be there when economic recovery occurs.

I urge my colleagues to support this amendment.

Mr. QUAYLE. Mr. President, I am going to follow the lead of the distinguished chairman of the Appropriations Committee. I hope that perhaps we might even be setting a precedent because I know this amendment is not that controversial. I am not going to ask for a rollcall vote. I hope that in the interest of time other Senators on matters that are going to be accepted by the committee might forbear from having a rollcall vote so that we can get out at a reasonable hour.

This amendment, Mr. President, simply adds $50 million to the dislocated worker provision of the Job Training Partnership Act. The dislocated worker provision is not expected to start until October 1 of this year. This amendment simply accelerates that starting time. We must get on with the Nation's job of trying to train and retrain those who have no real chance of going back to their place of employment. Unfortunately, there are far too many in that category.

Mr. BRADLEY. Mr. President, I urge adoption of the amendment offered by the Senator from Massachusetts. This amendment will provide an initial appropriation of $50 million for the newly enacted displaced worker program. This new program is aimed at providing retraining services to unemployed Americans who have permanently lost their jobs—people with skills no longer in demand.

These are the most trying times for this country since the Great Depression. Over 12 million Americans are out of work. But the recession is not the only cause for the high level of unemployment that we are experiencing; the high rate of joblessness is also due to the major structural changes taking place in this country.

Just 50 years ago our labor force shifted from an agricultural base to manufacturing. Now, we are moving

from a manufacturing base to a knowledge-based economy.

This transition will, over time, improve the lives of most Americans. The changes taking place will set the stage for a more competitive America in the 1980's and 1990's. But, Mr. President, there are always casualties associated with economic and technological change. The Congressional Budget Office estimates that several million unemployed people in this country may never be able to return to their old jobs. Sadly, technological change not only makes some of our plants and equipment obsolete—it also wipes out the jobs of many workers.

Mr. President, many of these people have been productive employees for 20 to 30 years. They want to work, but they need new job skills to effectively compete in the labor market. We need to find ways to retrain these displaced workers, for their sake and for the sake of the country.

The displaced worker program is the first step toward providing assistance to these people. This amendment would provide an initial appropriation of $50 million for this program. I urge my colleagues to support this amendment.

Mr. HATCH. Mr. President, of the millions of Americans who have lost their jobs, almost 4 million have been permanently displaced. In my own State of Utah, unemployment has jumped precipitously because major manufacuring plants, mines, smelters, steel mills, and other employers have made large-scale layoffs. Many of those employers, as with others across the country, are unlikely, in the foreseeable future, to reach the same numbers employed as recently as last year and as a result workers must make major adjustments in their lives and working careers.

This body had addressed unemployment problems in the past with such devices as the Trade Adjustment Act. Such programs were, however, palliatives. They provided financial assistance but did little to achieve readjustment and reemployment. The displaced worker provisions of the Job Training Partnership Act help. Title V of this act as passed by Congress in September authorized such sums as necessary to carry out dislocated worker training programs in the States. The amendment proposed by Senator QUAYLE and supported by Senators KENNEDY, HAWKINS, and myself authorizes a specific sum for dislocated worker programs.

It is time we acknowledge the displaced worker problem differs from the unemployment problem. Each requires a different solution. For the latter, I wholeheartedly support the President's program of tax, spending, and regulatory reductions. This act addresses the disease of economic "stagflation" and recession to create new growth-oriented industries and jobs. The economy is also aided through an increase in the supply of highly skilled workers prepared to fill these new positions. The Job Training Partnership Act provides training opportunities for the economically disadvantaged, those with barriers to employment and displaced workers.

Mr. QUAYLE. Mr. President, I ask unanimous consent to add Senator METZENBAUM as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. QUAYLE. Mr. President, I am prepared to yield back my time and to go to a vote. This will not be a recorded vote. I hope that this might be establishing a precedent of the kind that the chairman of the Appropriations Committee desired so that we might be able to expedite matters and adjourn sometime tonight at a reasonable hour.

Mr. HATFIELD. Mr. President, the Senator has stated the situation correctly. This could be a stimulus not only to get the program, but more especially, to get the Labor Department moving on the regulations for implementing this program. This has been cleared on both sides of the aisle, and it is an excellent amendment, and the committee is willing to accept it.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. QUAYLE. Yes.

Mr. HATFIELD. Yes.

Mr. METZENBAUM. Mr. President, I would like to be made a cosponsor of that amendment.

Mr. QUAYLE. The Senator has been.

The PRESIDING OFFICER. The question now occurs on agreeing to the amendment of the Senator from Indiana.

The amendment (UP No. 1547) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I wonder if the manager of the bill might yield for a question. I know that he has been here assiduously through all of this debate. He has stayed and worked and accommodated so many of the Senators. There are now a number of amendments that have been agreed to so far as a limitation of time. I have just heard him indicate that he might have to move toward the regular order. I wonder if it would not be a better procedure, or perhaps he would be willing to send word out to those Senators whose amendments are pending and, if they are not on the floor when the amendment comes up, the manager of the bill will move to lay the amendment on the table.

Mr. HATFIELD. Mr. President, I have not heard a more appropriate suggestion since we started this CR than the one now offered by the Senator from Ohio. It has a certain ring of being arbitrary but, on the other hand, I only remind the Senate that we have been on this CR for several days, running through the night as well as all through the day, and we have tried to accommodate every Senator as much as we can.

Now, we have Mr. QUAYLE who has just completed his amendment, we have Mr. BRADLEY, Mr. GLENN, who has two, Mr. HATCH, Mr. MCCLURE, and those have had unanimous-consent agreements as far as time. We have some we are still working on, but I think everybody knows the list, and I think it would be very appropriate. I shall confer with the leadership on this. I would not be presumptuous enough to unilaterally excercise that action, but I will consult with the leadership on the suggestion of the Senator from Ohio and see if the leadership would agree that if a Senator is not on the floor when his amendment is up, that I will move then to table the amendment. We have pled with the Senators who have amendments to be on the floor and we have to seek them out now. We have to plead with them almost to get to the floor and we lose time on that. So I appreciate the suggestion of the Senator from Ohio.

Mr. METZENBAUM. I thank the Senator.

Mr. HATFIELD. Mr. President, the Senator from New Jersey is next on our docket and he is present on the floor. I am very happy to yield to him.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. HATFIELD. Will the Senator yield? Does the Senator expect a rollcall vote on this?

Mr. BRADLEY. I would expect that this would not result in a rollcall vote.

Mr. HATFIELD. I thank the Senator. If we can refrain from rollcalls, that also assists in our time schedule.

Mr. BRADLEY. Mr. President, the Senate Appropriations Committee struck $50 million of House passed funds designated for the maintenance and repair of veterans medical facilities. This cannot be allowed to stand. My proposed amendment restores the $50 million.

Mr. President, these maintenance and repair projects are generally low-cost and do not usually require lengthy or extensive architectural or engineering design. They can be started quickly and completed in fairly short periods of time.

The funds are urgently needed. Recently, funding for maintenance and

repair (M&R) has been reduced and has not kept pace with rising construction and maintenance costs. The backlog of M&R projects is expected to total over $175 million by the end of this fiscal year. The $50 million restored by this amendment could be integrated promptly into the VA's operations and would provide badly needed job opportunities for Americans. This is particularly true in the cases of the more labor intensive projects such as painting and roofing repair.

The funds would be spent for electrical fire and safety improvements, exterior and interim improvements, energy conservation projects, and air-conditioning projects. The funds would go to improve 172 hospitals 16 domiciliities, and 102 nursing homes.

Mr. President, the ranking minority member of the Veterans' Affairs Committee made these very arguments in a letter to the Appropriations Committee. I ask that Senator CRANSTON's letter be included at the conclusion of my statement.

Mr. President, there are two final reasons why this amendment should be adopted. The first is the commitment we as a nation have made to the soldiers and sailors and airmen who have fought for our country on our behalf. These military men and women put duty to country before thoughts of self. We owe them a deep debt of gratitude, and we should not go back on our commitment to their health and welfare.

The final reason we should adopt this amendment is our commitment to the soldiers, sailors, and airmen of the future. Many of us are eager to avoid the need to coerce young people into the Armed Forces. The way to encourage young people to volunteer to serve in their country's Armed Forces is to make military serivce worthwhile; make the experience challenging and exciting; pay soldiers, sailors, and airmen a decent wage; help those recruits who do not pick up marketable skills while in the military to go to college when they get out; and, finally, promise to care for them if they are disabled in the line of duty to their country. To the extent that we do not offer these encouragements, we make it more difficult to enlist volunteers, and we make the draft more likely.

Mr. President, we have a commitment to military men and women who have served their country well in the past. We have an obligation to those young people considering the benefits of service to their country. These funds are urgently needed by the veterans hospitals of our country and will help provide jobs during this time of high unemployment. I urge my colleagues to support this amendment.

Mr. GARN. I would say to the Senator from New Jersey that I am certainly not in a position at this point, not having started the conference, to guarantee any specific amount. There is money in the House version and not in the Senate. As the Senator knows, in a conference committee there are many other issues between the House and the Senate that require trade-offs.

I would fully expect that there will be some money accepted by the Senate for the maintenance and repairs of VA hospitals. However, I cannot give him assurances of a specific amount. I have talked to the chairman of the House Appropriations Subcommittee on HUD-Independent Agencies and would anticipate that there would be some money accepted for maintenance and repairs of VA hospitals.

Mr. BRADLEY. Would the Senator suggest that if it was an adverse vote, when we vote, that he would be less likely or able to accept a compromise?

Mr. GARN. As I said earlier to the Senator from New Jersey privately, we are bumping up against our budgetary ceiling. I will do absolutely everything I can to make certain we come out of that conference not above our 302(b) allocation. I would much prefer to have more flexibility in trying to work this out and would, frankly, if this amendment were defeated, try to work something out. I do not say that as a threat but as a reality in trying to work out a conference.

Mr. BRADLEY. The Senator's assurances are that there would be some portion of that $50 million in a conference report?

Mr. GARN. That would be my expectation. There was no vote on this item on the House floor, so there is no record on their side either. However, I do know that the chairman of the House HUD-Independent Agencies Subcommittee would like to maintain some of the amount they have included for this item.

Mr. BRADLEY. I appreciate the assurances of the Senator from Utah to obtain at least some funds for this. It is terrible to have some repair actions needed, particularly in veterans hospitals where air-conditioning is needed, where people are sick and it is hot in the summer. I think this is the kind of thing that veterans who served our country so well over the years do deserve. It is not a sizable budget item.

Mr. GARN. Mr. President, I do not have any objection to what the Senator from New Jersey is trying to accomplish. However, as chairman of the subcommittee, I have to make certain I stay within the 302(b) budget allocations and within that overall limit I will attempt to see that there are some funds for the maintenance and repair of VA hospitals.

Mr. BRADLEY. I thank the Senator very much. Therefore, I will not offer the amendment.

Mr. President, I ask unanimous consent that a letter from the ranking minority member on the committee be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON VETERANS' AFFAIRS,
Washington, D.C., December 14, 1982.

Hon. MARK O. HATFIELD,
Chairman,
Hon. WILLIAM PROXMIRE,
Ranking Minority Member, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MARK: I am writing to urge that your Committee retain in the continuing resolution, H.J. Res. 631 as passed by the House, the $50 million provided in that measure for "jobs to improve facilities and care being provided to veterans".

It is intended that these funds, which would be appropriated to the VA's "Medical care" account, would be used for maintenance and repair (M&R) projects in various VA medical facilities. M&R projects tend to be low-cost ones that do not generally require lengthy or extensive architectural and engineering design. They can, therefore, be initiated quickly and completed in relatively short periods of time.

In a December 7, 1982, Congressional Budget Office staff memorandum (a copy of the pertinent excerpt is enclosed), it is estimated that between $50 to $75 million in additional budget authority could be obligated in fiscal year 1983 for such projects if appropriated before the end of calendar year 1982. Because these projects could be rapidly brought on line and completed, CBO estimates that the percentage of funds that could be expended in fiscal year 1983—30 to 50 percent—would be larger than for other VA construction projects.

In recent years, funding for VA M&R has been reduced in response to stringent budgetary pressures and, thus, has not kept pace with rising construction and maintenance costs. In fiscal year 1980, $77.3 million was made available for M&R work. In fiscal year 1981, in connection with efforts to achieve a balanced Federal budget that year, the amount provided for M&R was reduced by more than 13 percent to $67.0 million. In fiscal years 1982 and 1983, the funds for M&R rose only slightly to $69.5 million and $72.0 million, respectively.

As noted in the CBO memorandum of December 7, since these projects must compete with other priorities in the medical care account, a large backlog of M&R work has been denied funding in the last few years. According to informal VA estimates, the backlog of M&R projects is expected to total $175 to $200 million by the end of fiscal year 1983.

It is my understanding that the $50 million funding level provided in H.J. Res. 631 as approved by the House could be integrated promptly into the VA's operations and would provide, particularly in the cases of the more labor intensive projects, such as painting and roofing repair, badly needed job opportunities for many unemployed Americans.

In light of both the importance to the VA health-care system of reducing the backlog of M&R projects and the jobs that doing so would create, I urge you to support retention of this appropriation item during the Committee's consideration of the continuing resolution.

Thank you for your attention to this request and your continuing cooperation.

With warm regards,

Cordially,

ALAN CRANSTON,
Ranking Minority Member.

[Excerpt from Dec. 7, 1982 staff memorandum prepared by the Congressional Budget Office]

SUBJECT: POTENTIAL IMPACT OF INCREASES IN VA CONSTRUCTION SPENDING

MEDICAL CARE, MAINTENANCE AND REPAIR

The relatively low-cost maintenance and repair (M&R) work in VA hospitals is funded through the Medical Care account. Since these projects must compete with antibiotics and doctors' salaries for funding, it is expected that there is a large backlog of such projects that have been denied funds in the last few years. In addition, these projects generally do not require much in the way of architectural and engineering design and can go into production relatively quickly. Since the original 1983 request for M&R projects was $72 million, it is expected that somewhere in the range of $50-75 million in additional budget authority could be obligated in 1983, if appropriated before the end of the calendar year. Although, as in the case of Major and Minor Projects, only a portion of the funds would outlay in fiscal year 1983, the percentage should be larger—30-50 percent—because these projects are of much shorter durations.

The labor force impact of additional M&R money is virtually impossible to estimate without a specific list of projects, because some jobs, such as the installation of equipment, involve few workers while other projects, such as painting or roof repair, are relatively labor intensive.

Mr. BRADLEY. Mr. President, I have discussed this matter with the distinguished chairman of the Veterans' Affairs Committee. We agree on the urgency of the projects that are now pending agreement on funding. As I am sure the chairman has, I have visited several veterans medical facilities to determine the state of repair of these facilities. One facility in particular stands out as in need of air-conditioning and other maintenance and repair. This facility is located in East Orange, N.J. During the summer months, this facility becomes unbearably hot, causing grave discomfort for the patients and jeopardizing their health. Would the distinguished chairman of the Veterans' Affairs Committee agree that the East Orange facility is the very sort that would qualify for the maintenance and repair funds? And would the distinguished chairman agree that consideration of these projects should be a priority item during the early days of the 98th Congress?

Mr. SIMPSON. I agree with the Senator And I can assure all my colleagues that the Veteran's Affairs Committee intends to give the projects careful attention early next year.

Mr. BRADLEY. I thank the chairman.

Mr. BRADLEY. Mr. President, I thank the Senator for his assurances in this matter. I will not offer the amendment.

Mr. GARN. I thank the Senator from New Jersey.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

UP AMENDMENT NO. 1548

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 1548.

The amendment is as follows:

At the appropriate place in the bill add the following: "None of the funds made available by this Act shall be used to furnish, or facilitate the sale or transfer of, sensitive United States defense equipment, materials or technology to any country for which the President does not certify to the Congress that he has reliable assurances that such country will not transfer sensitive United States equipment, materials or technology in violation of agreements entered into under the Arms Export Control Act to any communist country, or to any country which receives arms from a communist country.

Mr. GLENN. Mr. President, this amendment effectively prohibits the transfer of sensitive U.S. defense equipment, materials, or technology to any country for which the President does not certify to Congress that he has "reliable assurances" that the recipient will not transfer the items or technology in violation of its agreements with the United States.

I hope this amendment will not prove controversial, for we should all agree that sensitive U.S. military technology and equipment should not be transferred illegally to third countries, particularly to Communist countries or countries which have arms-supply relationships with Communist countries.

The "reliable assurances" required would include the establishment of a rigorous inspection system to guarantee that no transfer will take place. In addition, a country's record in safeguarding U.S. technology and in honoring its agreements under the Arms Export Control Act must be a key factor in determining whether to transfer sensitive technology to that country.

For instance, I believe that high-risk countries, if they want to acquire sensitive U.S. military items, must be prepared, at a minimum, to grant U.S. personnel random access to the sensitive systems we have transferred to them. Such procedures would provide the Congress greater assurance that the sensitive technology or equipment will not be compromised or transferred to a third party.

In those cases where adequate safeguards can not be negotiated prudence dictates that the United States should turn down transfer requests or substitute nonstandard systems that if compromised would have the least impact on our own security interests.

I believe this amendment will strengthen the administration's hand in negotiating with recipient countries ironclad agreements which fully protect U.S. equipment and technology.

If there are objections to my amendment, I am prepared to present a detailed explanation of some of my concerns. It would require us going into a secret session. I am sure none of us wants that at this particular point.

Mr. President, I hope we would adopt this amendment. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. WEICKER. It is my understanding that the chairman of the Foreign Relations Committee is to be here to discuss this matter with the Senator from Ohio. I will suggest the absence of a quorum and suggest that the time be charged to those in opposition to the amendment.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I ask for the yeas and nays on this amendment at the appropriate time, after the comments have been made and the debate has been concluded. I ask for the yeas and nays now.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, I believe Senator KASTEN has now come to the floor and is prepared for a dialog with the Senator from Ohio on this matter.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. KASTEN. Mr. President, I suggest the absence of a quorum to give Senator TOWER and other people a chance to come to the floor. They intend to participate as well.

Mr. WEICKER. Mr. President, I am glad to accede to the request of the Senator. He understands that that time will be charged to the time of the opponents to the amendment of the Senator from Ohio?

Mr. KASTEN. I ask unanimous consent that the time be charged equally.

Mr. WEICKER. I would object to that.

Mr. KASTEN. Mr. President, what is the time agreement?

Mr. WEICKER. There is a time agreement of 20 minutes, equally divided, 10 minutes to a side.

Mr. ROBERT C. BYRD. There is no time on the bill.

The PRESIDING OFFICER. Who yields to the Senator from Wisconsin?

Mr. KASTEN. Mr. President, I shall just proceed and await Senator TOWER and others, who are on their way.

The PRESIDING OFFICER. The time is under the control of the Senator from Connecticut. Who yields time?

Mr. WEICKER. How much time does the Senator from Wisconsin desire?

Mr. KASTEN. Two minutes.

Mr. WEICKER. I yield 3 minutes to the Senator.

Mr. KASTEN. Mr. President, it is my understanding that there are a number of important concerns that have been brought up about this amendment.

It is my understanding, and the Senator from Ohio may correct me if I am wrong, that the amendment is redundant in that the Arms Export Control Act already contains these prohibitions against illegal transfers to third countries, and it provides appropiate sanctions. In other words, the procedures are already in place to deal with the concerns of the Senator, and we may be setting up a redundant and unnecessary additional level of certification, consulting, whatever.

It is also inappropriate in that it constitutes legislation on an appropriations bill. We have been doing a whole lot of legislating here. It is one more example of the kind of thing that a number of Senators have been concerned about.

What we are also worried about is that the amendment could affect a wide range of countries, not just Pakistan, because it covers not only countries receiving sensitive U.S. equipment, but also any country "which receives arms from a Communist country." This includes such diverse countries as Egypt, Kuwait, Finland, Peru, and Israel.

I understand there are some very special and extensive concerns with regard to Israel.

Pakistan is a country that recently signed a general security agreement in which they pledged to protect U.S. equipment and technology in a manner acceptable to the United States. Senior Pakistani officials have assured us that they take this security agreement most seriously.

Maybe the Senator from Ohio can reply to this: Was that arrangement unacceptable to the Senator? Once more, the question is, it seems to us, that we have a matter acceptable to the United States. Senior Pakistani officials have assured us that they take this security agreement most seriously.

It seems to us and seems to the administration that this question has been addressed and dealt with adequately and there is no need for yet one more piece of legislation.

In summary, Mr. President, I hope that the amendment will be rejected or if there is a motion to table, that the amendment will be tabled. It is redundant. We have agreements with countries that purchase U.S. equipment that that equipment will be protected, and could be interpreted as s slap in the face by some strategically important allies; the amendment will merely generate additional paperwork without adding anything substantive to current law and procedures.

I am not sure it really adds anything substantive to current law or to the procedures that are already in place.

Mr. GLENN. Mr. President, I yield to myself such time as I may need.

Under the Arms Export Control Act, no precertification is required by Congress. That is one of the reasons for proposing the amendment. We have some specific cases which we are not at liberty to discuss on the floor. We would have to have a secret session to go into those. It involves Pakistan.

I realize Pakistan has given their certification, but I say that is not good enough. That is not good enough from what we know. There has been a long history in Pakistan where we have seen their certifications to us or their statements to us not agreed to by other information that we have which is quite reliable. I would say also we provide in this for random access, for American representatives to go in and see what is being done. Had we had a situation like that in the past, where America's representatives could go in, had random access to checking whether all equipment was in a particular country or not, equipment we had sent, or whether it was being used exclusively for the purposes for which we had agreed to that sale, there would have been a very major doubt as to whether some of these private certifications or public certifications that we have received from certain nations were indeed enough. That is what we are trying to correct.

The Senator mentioned a slap in the face to certain countries. I see no reason why this should be a slap in the face to anybody who is really agreeing with the law, cooperating with us and not trying to circumvent agreements under the Arms Export Control Act. That is what we are trying to prevent by this amendment, making it a little more stringent, saying to the President—he is the one who has to make reliable assurances. I find that quite mild.

If the President of the United States is indeed approving arms exports sales and cannot give reliable assurances from his best intelligence sources and all the information he has that the Arms Export Control Act provisions will be met, then we are truly in sad shape and we had better have something like this, if he cannot give us those reliable assurances. That is as mild language as I can think of to ask the President to certify.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. Mr. President, will the Senator yield me 2 minutes?

Mr. GLENN. Is the chairman of the Committee on Foreign Relations in support of my position on this?

Mr. PERCY. Mr. President, I assure the Senator I would not ask for time from him unless I were.

Mr. GLENN. I yield whatever time the distinguished chairman wishes.

Mr. President, how much time do we have left?

The PRESIDING OFFICER. The Senator has 5½ minutes remaining on his side on the amendment.

Mr. PERCY. Two minutes will be fine.

Mr. President, this amendment simply places an additional enforcement provision on one particular aspect of the Arms Export Control Act relating to third country transfers of U.S. weapons.

If a country illegally transfers sensitive U.S. weapons technology to a Communist country or to a country that receives Communist weapons, then these sanctions should be brought to bear.

I think that the Senator from Ohio has introduced a useful amendment and I recommend to the Senate that it be adopted.

Mr. KASTEN. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Who yields time?

Mr. WEICKER. I yield 2 minutes to the distinguished Senator from Wisconsin.

Mr. KASTEN. I want to know, first of all, is the chairman of the Committee on Foreign Relations aware that this is legislation on an appropriations bill?

Mr. PERCY. Yes, Mr. President.

Mr. KASTEN. One of the questions that, from time to time, comes up between the authorizers and the appropriators is legislation on appropriations bill. When the Senator was not in the Chamber, I raised the point that this is legislation on an appropriations bill and is inappropriate. I just want to be sure the Senator understood what legislation on an appropriations bill is.

Mr. PERCY. I do.

Mr. KASTEN. I ask the Senator from Illinois and the Senator from Ohio how, in their opinion, this additional certification, what I believe to be redundant certification, is going to affect Israel.

Mr. PERCY. I yield to the Senator from Ohio.

Mr. GLENN. I think as long as Israel is abiding by U.S. law and the transfer arrangements under the Arms Export Control Act, this will not affect them at all.

Mr. KASTEN. Specifically with regard to the relationship in terms of weapons agreements that Israel and Yugoslavia have, in terms of Yugoslavia being a Communist country, how would the Senator look at this legislation affecting the State of Israel?

Mr. GLENN. As long as Israel does not transfer sensitive technology, I do not see that they would be affected. Illegally transferring—that is all we are talking about here. In the agreement that has been worked out with Israel, there has been an agreement for third-party transfer. That is an agreement they would abide by. This sensitive technology that is supposed to be just for their use only, to have it transferred would be illegal.

The PRESIDING OFFICER. The 2 minutes yielded to the Senator have expired.

Mr. WEICKER. Mr. President, I yield the remaining 1 minute and 15 seconds to the Senator from Wisconsin.

Mr. GLENN. First, I would give the same answer. I am not aware of anywhere that had been. I would think there would be no effect by this amendment on Israel.

Mr. KASTEN. The concern I have is, if you look at it very quickly, it seems to me Egypt will be affected, Kuwait will be affected, Finland will be affected, and Peru will be affected. And the effect is the sections on line 10 and 11 of the amendment that says, "to any Communist country, or any country which receives arms from a Communist country."

So what happens is all of a sudden we have brought in a number of groups asking for this certification procedure and I think that is a mistake.

The PRESIDING OFFICER. The time of the opposition has expired.

Mr. GLENN. Mr. President, I think the points have been made quite adequately. All we are trying to do is make certain that since this is equipment originating in this country it does not get to places where it should not be in the Communist world. That is all we are trying to do. It is very straightforward. All we ask is that the President certify that he has reliable assurances. That requires a Presidential certification back to us which is not included in the Arms Export Control Act. That is a key item.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Four minutes and twenty-six seconds.

Mr. BOSCHWITZ. Mr. President, there has been a long history of disputes over selling Iraq equipment of a potential military use. Because of Iraq's history of support for international terrorism, and its prolonged war with Iran, there has been a great deal of concern in Congress about sales of such items as military transport planes, engines for navy frigates, and executive jets equipped for photo reconaissance and towing military targets.

Thus it was with a great deal of surprise and concern that this week we learned that 60 American-made helicopters had been sold to Iraq. Indeed, about a dozen of them already have been shipped. The sale was made without the knowledge or approval of the policy officials in State Department who should have been informed. Indeed, Commerce Department officials who have been involved in past disputes, say they were unaware of the sale.

And certainly Congress was not informed, despite the assurances in a May 27, 1982 letter in which the State Department assured the Senate Foreign Relations Committee that Congress would have a chance to review significant cases of sales to Iraq. The promise was made after 35 members of the Senate last April joined in protesting what we felt was the unwarranted removal of Iraq from the terrorism list which is compiled each year to help implement the antiterrorism provision of the Export Administration Act.

News of the sale touched off a quick investigation. Commerce Department officials told Senate staff that they did not have to consult with the State Department or Congress because the helicopters, made by Hughes, are classified as civilian helicopters. They weigh less than 10,000 pounds each and thus could be sold without an export license, the officials say.

However 30 of the helicopters are four-seaters, a civilian model of a type used by the U.S. Army for scouting purposes. The 30 smaller two-seater versions are ideal for training military pilots. The helicopters could be very useful to the Iraqis in scouting, spotting for artillery, transporting officers, and training pilots.

However, Hughes Corp., officials in Washington admit that the firm did not obtain the written assurance from the Baghdad regime that the 60 helicopters would be used only for civilian purposes. In its correspondence with the State and Commerce Departments, however, Hughes said it understood it would obtain the certificate.

Thus there is reason to disagree over whether the helicopters were properly cleared for sale. Certainly there is reason to doubt that they will be used for civilian purposes only. Therefore, the delivery of the remaining helicopters—scheduled for shipment within a month—should be suspended until the matter is sorted out

Along with Senator DIXON, the distinguished member of the Senate Banking Committee who also has shown a strong concern about international terrorism, I have drafted an amendment to this effect. The amendment would suspend the delivery of helicopters to both Iraq and Iran until their war ends and the proposed recipient country does not support international terrorism. We also have been in touch with the State Department and we understand that officials have discussed the issue with the manufacturer. We hope something can be worked out and that Commerce, State, and the manufacturer see their way clear to work out a voluntary arrangement. It would be unfortunate if the desire to make short-term sales adds to the growing belief that the Export Administration Act laws and regulations must be tightened up next year to make sure these types of sales do not slip through again.

Because of these discussions and the late hour, we are holding off on our proposed amendment to the continuing resolution. But we want the State Department to make it clear in the strongest possible terms to the Baghdad Government that these helicopters are to be used for civilain purposes only. If they are not, the spare parts should be cut off immediately and future sales of equipment with potential military use will be jeopardized. It is important to maintain our neutrality in the war and make clear our continuing opposition to international terrorism. I ask consent to place into the RECORD an article on the sale.

Mr. DIXON. I am pleased to join the distinguished senior Senator from Minnesota, Senator BOSCHWITZ, in bringing to the attention of our colleagues our concern about Iraqi links to international terrorism, and the bureaucracy's repeated failures to carefully inspect the foreign policy consequences of major sales to Iraq.

Last April, Senators BOSCHWITZ, HEINZ, PRESSLER, and I drafted a letter to President Reagan, joined by 31 of our colleagues, to protest the removal of Iraq from the terrorism list and the issuance of export licenses for L-100's to Iraq. Even though those export licenses were eventually issued, we received a written assurance from the State Department that no further decisions would be made on militarily useful sales to Iraq until the appropriate congressional committees were notified.

Unfortunately, officials from the Commerce Department did not seem concerned about that assurance, as export licenses were later issued for executive jets to Iraq, again without adequate congressional notification.

Then, against the backdrop of executive branch assertions that Iraq was lessening its support for international terrorism, we learned that one of the Arab world's most notorious terrorists,

Abu Nidal, had relocated to Baghdad. Abu Nidal, many of us recall, was the terrorist who claimed responsibility for the atrocious attack on Joe Goldenberg's restaurant in Paris, an attack which took the lives of several Americans and left others with severe injuries. Abu Nidal is also reportedly responsible for several other attacks in the Mideast and Western Europe.

Upon learning this news, several of us in the Senate again wrote to President Reagan, urging that the Commerce Department be instructed not to approve export licenses to Iraq without the most careful and close consultation with the State Department and the interested congressional committees.

Although we have not yet received a response to our letter, the December 15 edition of the Wall Street Journal reported yet another major sale to Iraq, thereby suggesting that our attempts to cooperate with the administration have run into a brick wall. That sale of 60 helicopters to Iraq went through the bureaucracy like water through a sieve.

In discussions with officials from the State Department, we are convinced that these helicopters can serve military purposes either directly or indirectly. In fact, we know that if the State Department had had the opportunity to fully inspect the terms of this deal, then it would not have escaped the careful scrutiny which is necessary for sales of this kind.

It seems that closer consultations between branches of the administration, and between the administration and the Congress, is more necessary now than ever on this issue. This is especially true in light of the fact that the sale of 60 helicopters appears to directly contradict the official U.S. position of neutrality toward the Iran-Iraq war.

The Congress has made every effort to cooperate with the administration on controls. Now it is time for the bureaucracy to take positive steps to close the loopholes which it has opened.

I agree with my distinguished colleague, Senator BOSCHWITZ, that the administration should continue to press for a voluntary agreement to suspend delivery of the remaining helicopters. I also agree that the State Department should convey to Baghdad that the use of the helicopters already delivered will be closely scrutinized by our Government.

Meanwhile, the administration should be on notice that its failure to fully inspect such sales as this one will force appropriate remedial legislation to be offered.

I thank Senator BOSCHWITZ for his leadership on this issue.

Mr. GLENN. Mr. President, in the interest of time, I yield back the remainder of my time.

Mr. THURMOND. Will the Senator yield to me half a minute to take up a privileged matter?

Mr. GLENN. I yield 30 seconds to the Senator from South Carolina.

CONTRACT SERVICES FOR DRUG DEPENDENT FEDERAL OFFENDERS ACT

Mr. THURMOND. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 3963.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendment of the Senate to the bill (H.R. 3963) entitled "An act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated," and agree to the conference asked by the Senate on the disagreeing votes of the two Houses thereon.

Mr. THURMOND. Mr. President, this concerns the crime package. I move that the Senate further insist on its amendment to H.R. 3963.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from South Carolina (Mr. THURMOND).

The motion was agreed to.

Mr. THURMOND. I move to reconsider the vote by which the motion was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. THURMOND. Mr. President, I thank the Senator from Ohio for yielding.

FURTHER CONTINUING APPROPRIATIONS, 1983

The Senate resumed consideration of the bill.

UP AMENDMENT NO. 1548

Mr. GLENN. Mr. President, if all time has been yielded back, I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment of the Senator from Ohio (Mr. GLENN). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Washington (Mr. JACKSON), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PELL) and the Senator from Washington (Mr. JACKSON) would vote "yea."

The PRESIDING OFFICER (Mr. DANFORTH). Does any other Senator wish to vote?

The result was announced—yeas 85, nays 10, as follows:

[Rollcall Vote No. 448 Leg.]

YEAS—85

Abdnor	Exon	Moynihan
Andrews	Ford	Murkowski
Armstrong	Garn	Nickles
Baucus	Glenn	Nunn
Bentsen	Gorton	Packwood
Biden	Grassley	Percy
Boren	Hart	Pressler
Boschwitz	Hatfield	Proxmire
Bradley	Hawkins	Pryor
Brady	Hayakawa	Quayle
Bumpers	Heflin	Randolph
Burdick	Hollings	Riegle
Byrd, Harry F., Jr.	Huddleston	Roth
	Humphrey	Rudman
Byrd, Robert C.	Inouye	Sarbanes
Cannon	Jepsen	Sasser
Chafee	Johnston	Schmitt
Chiles	Kennedy	Simpson
Cochran	Laxalt	Specter
Cohen	Leahy	Stafford
D'Amato	Levin	Stennis
Danforth	Long	Stevens
DeConcini	Mathias	Thurmond
Denton	Matsunaga	Tsongas
Dixon	Mattingly	Wallop

Eagleton	Metzenbaum	Zorinsky
East	Mitchell	

NAYS—10

Baker	Helms	Symms
Dole	Kassebaum	Tower
Durenberger	Kasten	
Hatch	Lugar	

NOT VOTING—5

Cranston	Heinz	Pell
Goldwater	Jackson	

So Mr. GLENN's amendment (UP No. 1548) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amandment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1549

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I send to the desk an unprinted amendment on behalf of myself and the distinguished Senator from West Virginia (Mr. RANDOLPH) and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN), for himself and Mr. RANDOLPH, proposes an unprinted amendment numbered 1549.

The amendment is as follows:

At the appropriate place in the bill add the following: "None of the funds appropriated or otherwise made available by this Act shall be available to provide credits, grants or guarantees for, or to facilitate, the sale or transfer to any country of military equipment which incorporates more sophisticated

or sensitive technology than the technology described in the letter of notification and attachments submitted to Congress pursuant to section 36(b) of the Arms Export Control Act."

Mr. GLENN. Mr. President, I yield myself such time as I may need.

May we have order in the Senate, please.

Mr. President, the key part of this amendment is the part that says "the sale or transfer to any country of military equipment which incorporates more sophisticated or sensitive technology than the technology described in the letter of notification."

Mr. President, section 36(b) of the Arms Export Control Act provides for congressional review of proposed arms sales in excess of $14 million. And any such sale may be disapproved by concurrent resolution.

Now, that is fine, and we vote on those packages and send them out. However, what has come up is that sometimes additional sensitive technology beyond what we voted on here in the Senate and in the House is actually included in some of these weapons packages that are sent out.

I can go into a lot of detail on this, but all I ask is that any time that occurs, where more sophisticated or sensitive technology is going to be delivered than what we voted on in the Congress, then that be resubmitted to us for consideration. There are some arms sales considerations right now where, had I known what the equipment was going to be on the aircraft as delivered, I would not have voted in favor of that particular sale.

So all this says is where we are exceeding what we voted on, under 36(b) it will be resubmitted to us.

I believe this will be accepted by the floor managers on both sides of the aisle, although they are not in position at the moment.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. WEICKER. I say to my distinguished friend from Ohio that I do not believe there is anyone on this side who does object to the amendment of the distinguished Senator from Ohio, and we are prepared to have a voice vote on this matter.

If my friend is ready to go, we can.

Mr. METZENBAUM addressed the Chair.

Mr. PROXMIRE. Will the Senator yield? Does this cost anything?

Mr. GLENN. No; it does not cost anything. In fact, it might even save us money.

Mr. PROXMIRE. Is there any opposition from the administration?

Mr. GLENN. I am not aware of their position.

Mr. PROXMIRE. You know of no opposition?

Mr. GLENN. No opposition.

Mr. WEICKER. Mr. President, I am sorry that I have received information to the contrary. Apparently Senator PERCY does have objection to this amendment. I wonder if we might have two quick amendments, that will take 1 minute each, while we get Senator PERCY, who is on the phone to the State Department.

I should like to resolve this, if I can. There are two amendments, one by Senator MELCHER, one by Senator KENNEDY.

Can we lay this aside and come back to it?

Mr. GLENN. Certainly.

Mr. WEICKER. I ask unanimous consent that the amendment of the distinguished Senator from Ohio be temporarily laid aside and that we move on to the amendment of the distinguished Senator from Montana (Mr. Melcher); upon the conclusion of that, if ready, to return to the amendment of the Senator from Ohio; if not, to move to the amendment of the Senator from Massachusetts.

Mr. METZENBAUM. Is it the understanding that the amendment of the Senator from Montana will be called up under a time limit and that it would not be subject to a second-degree amendment?

Mr. WEICKER. There is no time agreement. It is a technical amendment. I understand it will take 1 minute.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the amendment of the Senator from Montana, when it is called up, be called up with a limitation of 1 minute equally divided, which is the time he suggested, and that it not be subject to amendment.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The Senator from Montana.

UP AMENDMENT NO. 1550

Mr. MELCHER. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an unprinted amendment numbered 1550.

Mr. MELCHER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution, insert the following new section:

"Sec. . Nowithstanding any other provision of this Joint Resolution or any other Act including the Interim Appropriation Act of fiscal year 1983, there is appropriated the sum of $243,000 to be expended for the Fish Hatchery at Ennis, Montana."

Mr. MELCHER. Mr. President and colleagues, this amendment merely straightens out a mistake made in the Interior appropriations bill deleting the Ennis Fish Hatchery, and this amendment seeks to correct that and put it back in. It has been cleared with Senator MCCLURE and Congressman YATES over in the House.

The fish hatchery is vitally needed.

I yield to my colleague from Montana.

Mr. BAUCUS. I thank my colleague for yielding.

Mr. President, I rise in support of the amendment to provide $243,000 to continue operation of the Ennis, Mont., fish hatchery during fiscal year 1983.

Mr. President, we are all aware of the need to cut Federal funding in the Federal fish hatchery program. The House and Senate Appropriations Committee worked long and hard to examine each hatchery and provide funding only for those that were critically needed. In Montana, the committee deleted funding for the Miles City and Ennis hatcheries and this decision is contained in the conference

The Montana congressional delegation and the State of Montana agreed with the deceision to close the Miles City hatchery. A substantial increase in license fees to Montana sportsmen has been proposed to insure continued operation of the Miles City facility by the State of Montana.

The delegation does not agree, however, that the Ennis hatchery should be closed. The decision not to provide funds for Ennis at this late date would result in its immediate closure.

Mr. President, the Ennis hatchery is an essential facility. It is a brood station providing fish to several hatcheries around the West. Closure would affect fishery resources in a number of States. The broodstocks grown at this facility have taken years to develop and they would be lost if the facility is closed. In addition, should this hatchery be closed, it would leave only one fish hatchery continuing to operate in Montana.

Mr. President, closing the Ennis hatchery would have a detrimental impact on sportsmen throughout Montana and the West. I strongly urge adoption of this amendment.

Mr. HATFIELD. Mr. President, this matter has been cleared by the Senate committee. It was dropped out but is certainly within the authorization. It is within the level of our Senate committee program, and I am willing to accept it.

Mr. MELCHER. I certainly do thank the chairman of the committee, my good friend from Oregon.

The amendment (UP No. 1550) was agreed to.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. I wonder if I might ask the Senater from Massachusetts (Mr. KENNEDY) to proceed, as matters are still being resolved by Senator PERCY.

The PRESIDING OFFICER. The Senator from Massachusetts.

UP AMENDMENT NO. 1551

(Purpose: To provide certain Federal public safety officers certain benefits now accorded State and local public safety officers)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 1551.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title I of the joint resolution, insert the following:

SEC. . Notwithstanding any other provision of this joint resolution—

(1) section 1202 of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended—

(A) by striking out "or" at the end of clause (2);

(B) by striking out the period at the end of clause (3) and inserting in lieu thereof "; and"; and

(C) by adding at the end of thereof the following:

"(4) to any person employed in a capacity other than a *civilian* capacity."; and

(2) section 1203 of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended—

(A) by striking out clause (3) and inserting in lieu thereof the following:

"(3) 'fireman'—

"(A) means a person whose duties include performing work directly connected with the control and extinguishment of fires and who, at the time the personal injury referred to in section 1201 of this section is sustained, is engaged in such work in the control or extinguishment of a fire or other emergency operation; and

"(B) includes a person serving as an officially recognized or designated member of a legally organized volunteer fire department;";

(B) by striking out clause (5) and inserting in lieu thereof the following:

"(5) 'law enforcement officer' means a person—

"(A) the duties of whose position include performing work directly connected with—

"(i) the control of crime or juvenile delinquency;

"(ii) the enforcement of the criminal laws; or

"(iii) the protection of Federal officials, public buildings or property, or foreign diplomatic missions; and

"(B) who, at the time the personal injury referred to in section 1201 of this section is sustained, is—

"(i) engaged in the detection of crime;

"(ii) engaged in the apprehension of an alleged criminal offender;

"(iii) engaged in the keeping in physical custody of an alleged or convicted criminal offender; or

"(iv) assaulted or subjected to the conduct of criminal activity in the line of duty, and includes police, correction, probation, parole, and judicial officers;"; and

(C) in clause (6) by inserting "the United States," after "means".

Mr. KENNEDY. Mr. President, this is a very simple and modest amendment.

It would provide a $50,000 lump sum death benifit for Federal law enforcement officers and fire fighters who are killed in the line of duty.

It corrects an inequity created in 1976 when similar legislation was enacted to provide this benefit for State and local law enforcement officers.

Similar legislation was enacted earlier this year by the House. It was passed by voice vote in the Senate in 1980.

I hope the committee can take this to conference.

Mr. WEICKER. The committee is prepared, Mr. President, to take this amendment to conference.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1551) was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WEICKER. Mr. President, what is the pending business?

The PRESIDING OFFICER. The amendment of the Senator from Ohio.

GLENN UP AMENDMENT NO. 1549

Mr. GLENN. Mr. President, I am prepared to yield time to the Senator from Illinois.

Mr. WEICKER. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. Eight minutes, twenty three seconds.

Mr. WEICKER. Mr. President, I yield 8 minutes to the distinguished Senator from Illinois.

Mr. PERCY. Mr. President, I assure the distinguished Senator I will not take 8 minutes.

Mr. President, I ask unanimous consent that I be added as a cosponsor to the Kennedy amendment just accepted.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I support the first amendment of the Senator from Ohio. The present amendment, however, tries to deal with an extremely complicated question of the upgrading by the administration of armed sales that had been previously approved by the Congress.

This amendment also addresses a problem that has recently arisen, but I hope that the Senator from Ohio would join me in an alternative way to address this issue.

Yesterday I was joined by Senator PELL, the ranking minority member of the Foreign Relations Committee, in sending a letter to the administration concerning the upgrading of previously approved arms sales to Pakistan. In that letter we suggested that the administration transmit an addendum to the F-16 sale covering plans to sell the more advanced ALR-69 radar detection devices. We have suggested a procedure for congressional review of that sale.

I would hope that the Senator from Ohio would agree to withdraw his amendment until we can see what the administration's response will be to our letter.

I have just talked with Judge Clark and indicated to him that the letter had been sent to the administration and asked for an expeditious answer to that letter.

He has assured me that it will receive expeditious handling.

Mr. GLENN. Mr. President, I yield myself such time as I may require.

Mr. President, the distinguished chairman of the Foreign Relations Committee will recall I was one of those urging him to send that letter, as a matter of fact, to the National Security Council, to Judge Clark.

It involves a review of some of our current arms systems that are being sold, particularly to Pakistan.

The letter of December 16 went to the Secretary of State, signed by our chairman, Senator PERCY, and by the ranking minority member, Senator PELL. It asks for a very early review on this.

I would hope that the administration would see fit to conduct that very early review because it just seems so basis to me, so fundamental and basic, that if one particular arms package that is sent to us here on the Hill is what we approve, and all the sensitive technology that goes into that package is what we approve, then it is commonsense that we are not approving sensitive technology beyond that package.

I am sure that the administration, if they review this, must come to that same conclusioj. This involves some of the sensitive equipment with regard to Pakistan.

Obviously, if we have to write into law every time that we approve something that the administration will not go beyond what is authorized in that particular legislation, we are going to have the Halls of Congress filled up with truckloads of new amendments and proposals to make certain that that happens.

Those are the limitations on which we vote here in the Congress, in the Senate, and it is just understood that

the administration of whichever party is in office does not go beyond whatever that package was with regard to giving away supersensitive American technology.

I am prepared at this particular time, in light of the fact that the distinguished chairman and ranking minority member sent this letter over and that we are looking for a favorable response from the administration on this, to withdraw the amendment. I hope they do read our debate here today or our discussion here today because I want it to be extremely clear that some of us feel very, very strongly about not upgrading beyond the sensitive technology on which we vote.

If the administration is going to insist in going beyond what we voted here, then we are going to take action against that. I will be fully prrepared in the new Congress to really make an issue out of this and to push for very substantive and binding legislation that ties their hands completely.

With that understanding, and waiting for an answer to the letter that has already been sent over to the Secretary of State on December 16, and with the hope that they will see the wisdom of that letter as it was signed by the distinguished chairman of the Foreign Relations Committee and the raking minority member, I hope we get back a satisfactory answer to that.

I do not want to get in the middle of their negotiating, trying to work out these military arrangements with every nation. But I also can tell them that had I known at the time that I voted in favor of that sale, which I did, that the particular kind of sensitive technology was going to be included later on which was not included in that original package, I would have indeed voted against that and worked myu colleaguse on the floor and in the well here to make certain that that was not approved.

I think they should be aware that they connot just exceed the limits we have put on here when that technology is approved as part of the sale.

I would hope that they would have a favorable response to this and limit that sale. If they choose not to, then I will certainly lead the fight in the new Congress to make certain that we put that kind of limitation in the language to make sure that they cannot help but understand.

If that is understood, I will withdraw the amendment from further consideration at this time, with the understanding that it will be submitted to the new Congress if required.

Mr. PERCY. Mr. President, I appreciate the Senator's willingness to withdraw the amendment. I think the point my distinguished colleague is trying to make, however, is a valid one. You can imagine the uproar that would occur if the equipment was sold to Jordan or Saudi Arabia, for example, and it was approved by Congress and then the technology was vastly upgraded without reference to Congress again.

You would not be able to sit in this Chamber very long without having an uproar over that.

The principle is a very well-founded principle. We are dealing with the principle in the letter to the President.

Mr. President, I ask unanimous consent that the letter from Senator PELL and myself be printed in the RECORD at this point, and I thank my colleague for withdrawing the amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., December 16, 1982.

Hon. GEORGE P. SHULTZ,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: Last year Congress received notification of a proposed sale of forty F-16 aircraft to Pakistan. In that notification (#81-108), Congress was informed that the avionics package for the aircraft would include the ALR-46(V) radar warning receiver. This proposed sale proved very controversial. For some Senators on the Committee, a key consideration weighing in favor of the sale was that the avionics package had been downgraded from the more sophisticated ALR-69 to the ALR-46(V) discussed in the letter of notification.

We now understand, however, that the Administration has decided to reverse its original plan and include the more advanced ALR-69 technology. The principal reason cited by Administration officials for their change is the increased threat to Pakistan posed by the appearance in Afghanistan of Soviet MIG-23 aircraft and SA-6 anti-aircraft missiles, which can be detected by the ALR-69.

While the Administration may find this and other reasons persuasive in justifying the change, we believe that upgrading a significant part of an arms transfer after Congress has considered it constitutes a circumvention of the process established by Section 36(b) of the Arms Export Control Act. Administration officials have stated that such a technological adjustment is not unprecedented. We know of no instance, however, where such a change has been made when the sensitivity of the technology involved was a key factor in the very issue of whether Congress should allow the sale.

New procedures need to be established to provide for adequate Congressional review in cases where approved arms sales are upgraded to a significant degree. In the interim, we request that the Administration transmit under Section 36(b) an amendment to notification number 81-108 which reflects the Administration's decision to sell Pakistan the ALR-69. We believe that there is a Foreign Relations Committee consensus that the value of such an addendum to a controversial case need not exceed the $14 million threshold set by law. If the Administration disagrees with this procedure, we will consider requesting that notification number 81-108 be resubmitted in full.

Adherence to the intent of the Arms Export Control Act is an important reflection of good faith in executive-legislative relations. Failure to atempt to meet legitimate Congressional concerns on this issue could well result in more binding legislative constraints in the future. Therefore, we would appreciate your prompt and favorable response to this request.

Warm regards,

CHARLES H. PERCY,
Chairman.

CLAIBORNE PELL,
Ranking Minority Member.

Mr. GLENN. Mr. President, I yield back the remainder of my time and ask unanimous consent that the amendment be withdrawn.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

Mr. WEICKER. Mr. President, I ask that the distinguished Senator from Utah (Mr. HATCH) be recognized at this time.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. HATCH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Utah (Mr. HATCH), for himself, Mr. MCCLURE and Mr. KENNEDY, proposes an unprinted amendment numbered 1552.

Mr. HATCH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At an appropriate place in the bill, insert the following:

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

NATIONAL ENDOWMENT FOR THE HUMANITIES

SALARIES AND EXPENSES

For necessary expenses to carry out the National Foundation on the Arts and the Humanities Act of 1965, as amended, an additional amount of $2,000,000 shall be available solely for grants awarded at the discretion of the Chairman to support social science and historical studies of international labor issues.

Mr. HATCH. Senator KENNEDY, Senator MCCLURE, and I are proposing an increase totaling $2 million for the National Endowment on the Humanities. We make this request because of a recent new proposal from the regional institutes affiliated with the AFL-CIO that cannot be accommodated within the strict budget ceiling of the National Endowment on the Humanities. This application for research and publication in the area of free trade union activity overseas has great merit and a timeliness that requires our attention now rather than waiting for the normal authorization and appropriations cycle.

I want to personally thank Senator MCCLURE for assisting me with this as well as my great friend, Senator KENNEDY, the ranking minority member of our committee. There is simply no

room for such a new proposal in the National Endowment budget.

With respect to the Humanities Endowment, the AFL-CIO has already received a $100,000 grant for the purpose of enabling the George Meany Labor Center to compile and organize its archives. Such a grant is well within the definition of humanities contained in Public Law 89-209 that established the Humanities Endowment. The term "humanities" includes historical research and publication and social science all of which are included in the AFL-CIO regional institutes proposal.

I would point out that these funds will allow the regional institutes of the AFL-CIO to pursue a major research and publication program to determine the historical and contemporary lessons from the experience of organizing free trade unions. The aim of the research is to analyze the factors under which free trade unions can be organized successfully and can avoid falling under the domination of the Communist Party. This is an area in which the regional institutes affiliated with the AFL-CIO have had much experience, but it has not been properly recorded and analyzed and published. This $2 million could be used only for these purposes. This amendment can make such a program possible in the next few months, and these lessons can be used in 1983 to continue the battle of preserving free trade unions overseas as well as providing for research and publication about the true nature of trade unions in the Soviet Union.

I thank my colleague (Mr. KENNEDY) for assisting me with this and, of course, for supporting me on this matter and for playing a major role in helping me to resolve this problem.

Mr. KENNEDY. Mr. President, I commend the Senator from Utah on this proposal. It is an extremely modest proposal. I know the Senator from Utah plans to have extensive hearings on this concept in the next Congress. This will provide for at least some useful, and I think, important initiatives in support of free trade unionism around the world.

Mr. President, I support the amendment. I hope it will be taken to conference and that the conference will accept it.

Mr. HATCH. I thank my colleague.

Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment.

The amendment (UP No. 1552) was agreed to.

Mr. HATCH. I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. FORD. Mr. President, will the distinguished floor manager yield for a question?

Mr. WEICKER. Of course, I shall be glad to yield.

Mr. FORD. There is an amendment that has been submitted now for several days, has been cleared by every committee chairman it can be cleared by, yet we have not arrived at a time agreement. Does the Senator have any assessment for us?

Mr. WEICKER. Mr. President, I understand the distinguished Senator from Oklahoma has some response. I yield to him.

Mr. FORD. I appreciate that. I thank the Senator from Oklahoma.

UP AMENDMENT NO. 1553

(Purpose: To impose a limitation on the use of funds of the Farmers Home Administration and to impose a limitation on the use of funds of the Small Business Administration.)

Mr. BOREN. Mr. President, I have an amendment at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BOREN), for himself, Mr. HUDDLESTON, Mr. BAUCUS, Mr. EXON, Mr. DECONCINI, Mr. PRYOR, and Mr. KENNEDY, proposes an unprinted amendment numbered 1553.

On page 77, line 5, insert after the period a new sentence as follows: "None of the funds provided by this joint resolution or any other Act may be used to liquidate (against the wishes of the borrower) outstanding farm loans under the Consolidated Farm and Rural Development Act or the Emergency Agricultural Credit Adjustment Act of 1978 made to borrowers who are owners or operators of not larger than family-size farms but who fail to pay principal and interest when due, nor to institute foreclosure proceedings with respect to such loans, in any case in which the Secretary determines that the borrower (1) has followed good farm management practices, (2) due to circumstances beyond the borrower's control, is temporarily unable to continue making payment on principal and interest under the loan when due, and (3) has a reasonable chance of repayment of the loan in subsequent years: *Provided further*, That interest which accrues during the deferral period on any such loan shall bear no interest during or after such period." The provision shall expire not later than Dec. 31, 1983.

On page 13, line 15, insert after the period a new sentence as follows: "None of the funds provided by this paragraph or any other Act may be used to liquidate or accelerate (against the wishes of the borrower) any outstanding business or disaster loan under the Small Business Act made to borrowers who fail to pay principal and interest when due, or to institute foreclosure proceedings with respect to such loans, in any case in which the Administrator determines that the borrower (1) has followed good business management practices, (2) due to circumstances beyond the borrower's control, is temporarily unable to continue making payment on principal and interest under the loan when due, and (3) has reasonable chance of repayment of the loan after the deferral of principal and interest or the foregoing of foreclosure: *Provided further*, That interest which accrues during the deferral period on any such loan shall bear no interest during or after such period.". The provisions hereof shall expire not later than Dec. 31, 1983.

Mr. BOREN. Mr. President, I have sent this amendment to the desk on behalf of myself, Senator HUDDLESTON, Senator BAUCUS, Senator EXON, Senator DECONCINI, Senator PRYOR, and Senator KENNEDY.

This amendment would require the Secretary of Agriculture and the Administrator of the Small Business Administration to permit certain family farmers to defer repayment of Farmers Home Administration farm loans. In order to qualify for a deferral, the borrower must show that he: First, has exercised good management practice; second, due to circumstances beyond his control, is temporarily unable to continue making payments on principal and interest when due; and third, has a reasonable chance of repayment of the loan after the deferral period. It provides the same treatment for SBA small business loans.

This amendment does not offer blanket deferrals, nor does it provide for forgiveness of loans. It is to be done on a case-by-case basis, when the farmer can demonstrate that his conditions are not the result of bad management and when he has a reasonable chance of repayment of the loan after the deferral period expires.

This provision will provide relief to those borrowers who could not maintain their operations without the deferral or the foregoing of foreclosures and could be in a stronger financial position after the deferral. Under our amendment, we have also provided, after the deferral period, for the consolidation, rescheduling, or reamortization of the loan, taking into account the borrower's financial situation. Any new loan resulting from such an action would bear an interest rate no higher than the rate of interest on the original loan.

Over the past year, I have talked with many FmHA borrowers about the options that they have through the Farmers Home Administration. In many cases, the farmers were never informed of the choices that they, by law, have. Consequently, we have included a section in our amendment which requires the Secretary to establish clear procedures to implement the deferral provision and to notify all borrowers of these and all servicing alernatives. We also have specified that a borrower who is denied relief under these provisions has a right to an appeal within the Department of Agriculture.

The current farm credit situation vividly exemplifies the seriousness of the agricultural economy. The percent of FmHA farm borrowers delinquent as of June 30 of this year has increased dramactially, signifying the seriousness of the agricultural economic condition. Five years ago, in 1978, 13 percent of Farmers Home Administration farm borrowers were delinquent, as compared to 28 percent in 1982. The dollar amount delinquent has more than tripled in the past 3 years, rising to $2.9 billion this year.

Obviously, the farm economic situation for 1983 will show no improvement from 1982 without a major revision of agricultural policy. Every effort must be made to ease the credit situation for farmers, reduce interest rates, reduce commodity surpluses, improve farm income, and increase agricultural exports.

At a time when declining land values threaten the foundation of our economy, the administration has continued to allow FmHA to foreclose on good farm managers, farmers who, through no fault of their own, are caught in the middle of low prices and a credit squeeze.

The administration has not used existing authorities to ease the farm credit situation. Under existing law, the administration could forgo foreclosures, but it had refused to use its authority. In 1981, it was reported that the FmHA has set a goal of reducing farm loan delinquencies by 20 percent, even if that meant forcing some farmers out of business.

As we all know, we regard the situation in agriculture as disastrous. The administration has a strategy goad which has been stated of reducing Farmers Home Administration delinquencies by 70,000 borrowers in 1983. The administration's budget attributes $4 billion in savings to this and other similar efforts. It may be assumed that efforts will be made to speed up collections and liquidate borrowers' assets with little regard for the financial condition of individual borrowers.

The administration has said repeatedly that forced liquidations were not increasing. Yet, the facts show otherwise.

In 1980, there were a total of 260 foreclosures by FmHA. There were no more than 300 foreclosures in 1981. However, from October 1, 1981, to August 31, 1982, there were 776 foreclosures—more than twice the amount in 1982—5,501 voluntary liquidations and 1,156 bankruptices discharged.

Mr. President, the Members of the Senate, as well as the House, have already gone on record in support of this amendment this year. Still, the provision has not been signed into law.

Mr. President, I had been very hopeful that it could be before the end of the year.

I urge my colleagues to join us in this effort to ease the strenuous credit situation our farmers are facing by supporting this amendment.

We have a similar situation with regard to the plight of small businesses. The weekly average for small business failures in this country for 1982 was 474.

Mr. President, the second part of this amendment would treat small business owners the same by deferring repayment of existing business or disaster loans made under the Small Business Act.

I do not believe that there is any argument about the dire circumstances suffered by many of our Nation's small businesses. Although we are beginning to see some relief in interest rates, the severe damage caused by many months of extremely high rates is already evident.

The average week in 1981 saw 348 businesses fail. The weekly average in 1982 has been approximately 474. While I realize that not all of these failures fall under the heading "small business," the vast majority of them do. Small business firms comprise 38 percent of the GNP of the United States. As further evidence of the pervasiveness of small business, I would note that there are some 10,000 corporations in the United States with more than 500 employees, but there are 14 million business operations in this country with less than 500 employees.

Earlier this fall, the SBA reported that there were 8,000 loans in litigation and some approximately 24,000 loans under the first stages of liquidation proceedings. Furthermore, this figure was increasing by approximately 500 per month.

Mr. President, these figures are strong evidence that the tragic failure rates for small businesses cannot continue.

My amendment would provide some relief for family farmers and small business owners by deferring repayment of these loans on a case-by-case basis and only after a determination that the borrower has shown good management practices, is unable to make current payments because of circumstances beyond their control, and has a reasonable chance of repayment after the deferral.

It is important during these tragic economic times that we provide some relief for our family farmers and small business owners. My amendment will provide some of this needed relief.

I do not believe that any useful purpose is served by foreclosing on these loans when there is evidence that the farm or small business borrower has acted in good faith and will have a reasonable chance of not only repaying the loan in the future, but also continuing to have a chance to stay in business and remain a productive member of society. I urge my colleagues to support this amendment.

Mr. President, this is obviously a very dangerous situation in agriculture. Farmers had virtually no net income this year. In my own State, there was a $14 per farm average prevailing net farm income for 1981. In 1982, that figure will be in the red. At the same time, the debt hanging over the farm community, and it is similar for small business as well, is staggering. Fifteen years ago, total farm debt was $12 billion in this country. Annual net farm income was $12 billion. There was a 1 to 1, a parity relationship between annual farm income and total farm debt. This year, net farm income, adjusted for inflation, will be only $7 billion; total farm and ranch debt will be $225 billion.

For 3 years, now going into the fourth year of declining incomes, with virtually no cash flow, with a debt of this magnitude, we have set the stage for massive foreclosures if action is not taken in the near future, both for farmers across this country and small business people across this country.

The proposal I have made is not a bailout, not a universal deferral. It simply says if you are dealing with a good manager, a small business person or a small farmer can demonstrate that a good manager can normally make payments but is temporarily prevented from doing so because of market conditions, price conditions, and interest rates which are beyond his control. If those conditions were met, in keeping with sound business practice, the SBA and the Farmers Home Administration could therefore work with those individuals to reschedule those loans, keep those farmers and small business people in business rather than seeing them lose.

It has been said that they are new initially, for example, in the area of agricultural policy. It may be that within 12 months, and I hope we find this to be true, we will begin to turn the situation in agriculture around. But what a tragedy it would be, Mr. President, if, in the intervening period, while we are attempting to turn the situation around, we were to lose hundreds of thousands of farmers across the country and hundreds of thousands of small business people due to foreclosure.

Foreclosure is a great human tragedy. We think back to those gripping pictures we have seen of people being dispossessed of their farms and homes during the Great Depression. Mr. President, tragically, perhaps with less notice, that same kind of scene is being repeated in the United States even today, even as we debate this measure at the present time.

I have to face reality, however, Mr. President, as strongly as I believe this amendment should be adopted. I have

discussed it with the members of the administration, I have discussed it with the Secretary of Agriculture, the Under Secretary, and I have discussed it with those in the Farmers Home Administration. They express opposition to it. They indicated to me that it could endanger this legislation, that there is a strong risk that there would be a recommendation of veto of this legislation or farm legislation if this amendment were adopted.

I have attempted now for many hours to try to get a time agreement to have this amendment considered, to bring it to a vote. I have been unable to do so.

Mr. President, as strongly as I feel about it, I do not think there is any point, when the situation is beyond my control, to prolonging taking the time of the Senate to try to bring this matter to a vote after a prolonged debate, which would probably prevent, during this session at least, an opportunity to get an up or down vote on this amendment. I am sorry this attitude is being taken. I think it is tragic. I think it is insensitive to the needs of the small business people and farmers.

Actually, this provision, as it relates to agriculture, simply restates the regulations which the Farmers Home Administration itself says it is now following on a discretionary basis. I do not understand, if they really are following these same policies right now, how they can turn right around and contend that there is a price tag to this provision. If they are following these regulations to the letter right now, then it should not cost a dime to put this legislation in place. If they are not following these regulations at the present time, then, it demonstrates a need for it.

Mr. President, I do bow to reality. I can only say I shall be carefully monitoring both the Small Business Administration and the Farmers Home Administration to see to it that they do use their discretionary authority for the rescheduling of those debts where there is a sound business reason for doing so and hope that those units can be kept in existence. I do not intend in the next year to give up my efforts to put such a provision in place.

I shall in a moment ask to withdraw the amendment, but before I do, the Senator from Arkansas wished to speak.

Mr. WEICKER. Mr. President, does the Senator make a request to withdraw his amendment?

Mr. PRYOR. If I may have just 30 seconds.

Mr. BOREN. If I could yield to the Senator from Arkansas very briefly, then I shall withdraw it.

Mr. PRYOR. Mr. President, I commend the Senator from Oklahoma on his leadership in this effort. I am proud to be a cosponsor in this amendment. I join him in his effort to accomplish this very fine purpose he is seeking.

I thank the distinguished Senator, my friend from Oklahoma.

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. BOREN. I yield.

Mr. BUMPERS. Mr. President, I ask unanimous consent that I be made a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Second, Mr. President, I want to remind my colleagues of something I said this morning, but I especially feel it is reinforced as far as this amendment is concerned. The farmers of America are in a plight almost as desperate as they were in 1933, and the first thing the President did was declare a moratorium on foreclosures of the farmers of this country.

So I know the administration opposes it, but I think it is meritorious. I think it is absolutely essential. I am happy the Senator offered it and I certainly intend to support it.

Mr. LEVIN. Mr. President, I ask unanimous consent to be added as a cosponsor of the amendment of the Senator from Oklahoma.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, this morning, the Senator from Arkansas raised a very critical point about our farm communities, how they are in desperate condition and they need help.

We should be increasing the amount of deficiency payments that we make to these farms. The biggest business in my State is not automobiles. It is farms. It happens we have more than twice as many farms than there are in Arkansas.

I would like to work with the Senator from Arkansas this afternoon to see if we can find a way of increasing deficiency payments to these farms, because they are going under in record numbers.

While I do not agree with the distribution formula in the amendment the Senator from Arkansas offered this morning, the point that he makes is clearly true; that we must increase these deficiency payments one way or another or else we are going to see more farms go under.

I commend the Senator from Oklahoma on his amendment. I am just sorry it cannot be adopted by the Senate.

Mr. President, I am proud to have the Senator as a consponsor of the measure, and I am proud to have the Senator from Arkansas as a cosponsor.

Mr. President, I ask unanimous consent that the Senator from Tennessee (Mr. SASSER) be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOREN. Mr. President, at this time, with great disappointment, I bow to reality. I think it is a sad day that we are not able to enact this into law to provide a greater protection for the small farmers, family farmers, and small business people in this Nation.

At this time, I do withdraw my amendment from consideration.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. WEICKER. Mr. President, at this time I yield to my good friend from Arkansas, Senator BUMPERS, who I know has special concerns about the disaster loan program, as he eloquently expressed within the committee desiring to bring the matter here to floor action. I think this might be a good moment for him to query this Senator, as chairman of the Small Business Committee, to see if we might set the record straight on the matters of concern to the Senator from Arkansas.

Mr. BUMPERS. I thank the Senator.

Mr. President, when we were marking up the continuing resolution in the Appropriations Committee, I raised a question of a very serious problem for the people of my State. Three weeks ago we had a disaster of floods and tornadoes of unprecedented magnitude. The damage in my State alone was $358 million. That is three times, in economic devastation, three times bigger than any natural disaster our State has ever had. Missouri, Illinois, and, to a lesser extent, Louisiana suffered similar damage.

All of a sudden, one little town was completely under water, and only three businesses in the entire town had flood insurance, which means they were just wiped out. They tell me—I did not realize this—that the interest rate on disaster loans for businesses, if you are absolutely uncredit worthy, is 8 percent. If you are credit worthy, it is close to 14 percent. Obviously, if you are credit worthy, you can possibly beat that down at the bank.

I raised the question of possibly reducing the interest rate on disaster loans to 5 percent for those businesses that are not credit worthy and 8 percent for those businesses that are credit worthy. I recognize this is a very monumental and very dramatic departure from existing law.

The Senator from Connecticut, who also is chairman of the Small Business Committee, very graciously consented to discuss this further, to hold oversight hearings after the first of the year to see whether or not this law is working well and whether we need to change it. In my State, it is wreaking a terrible, terrible hardship on people who have been displaced in record numbers. The damages are one-third of our State budget for the year.

So I just wanted to ask the Senator if he would be willing to do that.

Mr. WEICKER. Mr. President, in response to the distinguished Senator from Arkansas, who raised this matter in the full Appropriations Committee, I indicated at that time, and I indicate here again, that the change of policy which he advocates or which he wants to see modified in some way was modified only a year ago. Up to that point, the rates were nowhere near what they are today.

As a matter of compromise between the House, the Senate, and the administration, with both Chairman SMITH and myself leading toward the lower rates for both credit worthy and noncredit worthy, the administration wanting to see the cost of money across the board, we arrived at the present compromise.

I know exactly whereof the Senator from Arkansas speaks, having had similar disasters in Connecticut this past year due to flood damage and where, indeed, the interest rates were even higher than those presently being paid in Arkansas.

I think this is a matter that, with experience in hand under the administration policy, now demands a review as to exactly what the impact has been.

I assure the Senator from Arkansas that such oversight hearings will be held before the Small Business Committee.

Mr. BUMPERS. I thank the Senator very much.

Mr. WEICKER. Mr. President, I yield to the distinguished chairman of the committee.

STATUS OF AMENDMENTS

Mr. HATFIELD. Mr. President, there seems to be a little confusion on whether or not we achieved a unanimous-consent agreement on some of the amendments that will be offered by the Senator from North Carolina.

Therefore, I now ask unanimous consent that on one amendment that is going to be offered by the Senator from North Carolina (Mr. HELMS) relating to pay cap, that that be limited to 20 minutes, equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Reserving the right to object. With no amendment to the amendment?

Mr. HATFIELD. No amendment to the amendment, no modification, as in the normal procedure we have followed in these unanimous-consent agreements.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I ask unanimous consent for the same agreement on the second amendment that will be offered by the Senator from North Carolina on IDA and I would like to incorporate also in that a third one, the Law of the Sea Conference. That means that there will not be a request made on one that will be offered or expected to be offered relating to IRS regulations on private schools. I except that in the group of four. I only ask the same agreement for IDA and the Law of the Sea Conference.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, I am in no position to respond to either of those requests. I expect other Senators on the floor, who may or may not be interested, to give some advice and guidance.

Mr. President, I understand there would be no objection to the time limitation on the two amendments that the chairman specified.

Mr. HATFIELD. With no amendments.

Mr. ROBERT C. BYRD. With no amendments in order thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, just to indicate where we are again. We have one pending amendment by the Senator from Arkansas, which has to be resolved with a rollcall, Mr. Bumpers amendment on agriculture.

Mr. President, I now propose another unanimous-consent request on the time relating to an agreement with the Senator from Kentucky (Mr. FORD). I ask unanimous consent that there be a 20-minute time limitation, equally divided, to be followed by, I believe, a tabling motion. Is that not correct?

Mr. FORD. I say to the distinguished manager that there may be a tabling motion by those who oppose it; not necessarily, but it is expected.

Mr. HATFIELD. Mr. President, I will leave that out of the unanimous-consent request. I ask unanimous consent that there be a 20-minute time limitation with the same format, no amending or substituting motions or amendments to the amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, we have, then, the Bumpers amendment, the Ford amendment, four amendments by Senator HELMS, and one amendment by Senator DOLE. I believe that brings us up to the bottom line of the current list of amendments.

Mr. DOLE. Will the Senator yield?

Mr. HATFIELD. Yes.

Mr. DOLE. Mr. President, I might just say, when the time comes, there will be two amendments offered en bloc. I have discussed this with Senator KENNEDY. We can dispose of that order of business very quickly. There are no rollcalls required, I do not believe.

Mr. HATFIELD. That is the first Dole amendment.

Mr. DOLE. Yes; we have now agreed to the second one which was to be offered en bloc.

Mr. HATFIELD. I have just had two more amendments handed to me that Senator TSONGAS may raise.

Mr. PRYOR. Will the manager yield?

Mr. HATFIELD. Yes.

Mr. PRYOR. Is there a time limitation on the two Tsongas amendments?

Mr. HATFIELD. No.

Mr. PRYOR. Mr. President, will the manager anticipate, it being 10 minutes to 5, if we took the amendments he just read, considering the time agreements that have been reached, and allowing 15 minutes per vote, where does that take us at this time? Have we calculated that? Do you have an abacus around?

Mr. HATFIELD. It is very difficult because I find now three more amendments being added. I just will not make an assessment. I have been wrong on every assessment I made thus far. I do not want to make a perfect record at this point.

Mr. PRYOR. If I might just say to the distinguished floor leader, in all fairness I had thought about this for some hours now, but if we reach 8 or 9 p.m. or, say, 8 p.m., I think at that time that I may well move to proceed to third reading. I think I may move at 8 p.m. that we move to third reading of the bill if we have not reached some definition of where we are.

Mr. WEICKER. Mr. President, if I may respond to my good friend from Arkansas, he will do a lot better than that. I may move to third reading. So I think I understand and I understand exactly what my good friend is saying. We have made tremendous progress due to the leadership of the good chairman here and everyone willing to compromise.

Mr. PRYOR. The distinguished chairman has been working diligently in the last several hours in an attempt to bring this together. I commend him and I commend my friend from Connecticut. In fact, I sympathize. I will say at 8 o'clock if we have not resolved something or maybe even by 7:30 p.m. i will in all probability move to go to third reading.

Mr. WEICKER. I wonder if the good Senator from Arkansas would use his good offices since the more recent amendments that have flowed in here come from his side of the aisle to speak to his colleagues and get the spirit of good will and cheer going. This bill deserves that.

Mr. PRYOR. I will do all that I can.

Mr. WEICKER. I yield to the Senator from Kansas.

UP AMENDMENT NO. 1554

(Purpose: To amend the Gun Control Act of 1968 to exclude record keeping for .22 caliber rimfire ammunition)

UP AMENDMENT NO. 1555

(Purpose: To clarify the importation of curios and relics as classified by the Secretary of the Trreasury)

Mr. DOLE. Mr. President, I send two amendments to the desk and ask that they be considered en bloc.

The PRESIDING OFFICER. The amendments will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for himself, Mr. SYMMS, Mr. HEFLIN, Mr. SASSER, Mr. ZORINSKY, Mr. ABDNOR, Mr. GRASSLEY, Mr. HATCH, and Mr. MCCLURE, proposes unprinted amendment numbered 1554 and unprinted amendment numbered 1555.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

Insert at the appropriate place at the end of the bill:

(1) 18 U.S.C. 922(b)(5) is amended by adding the words "except .22 caliber rimfire ammunition" after the words "or ammunition".

(2) 18 U.S.C. 923(9) is amended by adding the words "except .22 caliber rimfire ammunition" after the words "and ammunition" the first time they appear.

Insert at the appropriate place at the end of the bill:

18 U.S.C. 925(d) is amended—

(1) by deleting the word "may" the first time it appears and inserting in lieu thereof "shall".

(2) by inserting, following subsection (2), a new subsection as follows:

"(3) is or has been classified by the Secretary as a curio, relic, or item of substantial value to collectors;"

(3) by renumbering subsections (3) and (4) as (4) and (5), respectively.

Mr. DOLE. Mr. President, I rise to offer two amendments to House Joint Resolution 631, the continuing resolution.

Mr. President, I have discussed these amendments in detail with the distinguished Senator from Massachusetts (Mr. KENNEDY) and both these amendments are cosponsored by the distinguished Senator from Idaho (Mr. SYMMS), the Senator from Alabama (Mr. HEFLIN), the Senator from Tennessee (Mr. SASSER), the Senator from Nebraska (Mr. ZORINSKY), the Senator from South Dakota (Mr. ABDNOR), the Senator from Iowa (Mr. GRASSLEY), the Senator from Utah (Mr. HATCH), and the Senator from Idaho (Mr. MCCLURE).

Mr. President, let me state very quickly what these amendments do. Then, Senator KENNEDY wanted me to respond to a question or two.

Mr. President, the provisions of these amendments have been cosponsored by over 60 Members of this body on both sides of the aisle over the past 2 years, as they are included in S. 1030, the Federal Firearms Owners' Protection Act. Thorough hearings have been conducted by the Senate Judiciary Committee on this legislation. The Committee on the Judiciary, by an overwhelming margin of 13 to 1, reported S. 1030 to the Senate nearly 8 months ago. It is currently pending in the Senate. Since we do not wish to take the valuable time of the Senate at this late date to debate and pass S. 1030, we have agreed not to press the leadership for floor time to discuss the greater and more important provisions included in S. 1030.

In addition, a Senate appropriations subcommittee has conducted several days of hearings on these amendments. At both the Senate Judiciary Committee and Appropriations Committee hearings the Department of the Treasury testified that they had no opposition to these amendments, which they state, under current law, have little or no law enforcement value. At the same time, however, Treasury has stated these provisions have cost the Department and, in turn, the taxpayers, untold hours of expense and redtape, with no effect on the criminal element but only on the law-abiding citizen. Yet to date, it is still the law-abiding citizen who pays the piper and not the criminal.

Mr. President, we must get our priorities straight and reverse these expensive, inefficient, and ineffective law enforcement tools.

I have been informed as recently as yesterday, that the Department of the Treasury is in complete agreement with the scope and breadth of these amendments.

Unprinted amendment No. 1554 permits the importation of curios, relics, and other items having substantial value to collectors if the Secretary of the Treasury has first classified them under the provisions of 18 U.S.C. 925(b).

The 1968 Gun Control Act broadly bans gun imports, with a few limited exceptions. The only two of relevance here are an exception for curios and relics and for arms suitable for sporting purposes. Since suitability for sport is defined by regulation in terms of modern standards—adjustable sights, special safeties, et cetera—few curios and relics can pass this latter test under the current law. The amendment would replace the current law test and substitute a more realistic and meaningful test: Does the item in question have substantial value to collectors? Therefore, the amendment would allow the importation of items such as the 1920 commercial Lugar in 7.65 caliber.

The arguments for this amendment may be summarized as follows:

First. This provision is aimed at allowing collectors to import fine works of art and other valuable weapons.

Second. This provision would allow the importation of certain military surplus firarms that are classified as curios and relics by regulations of the Secretary of the Treasury.

Third. In order for an individual or firm to import a curio or relic they must first be put on a list by petitioning the Secretary of the Treasury. The Secretary must find the firearm's primary value is that of being a collectors item.

Fourth. The only reason a person would purchase these firearms is because of is peculiar collectors status. And in fact, it must be a special firearm and classified as such in order to import.

Fifth. Treasury Department has stated that it has no objection to this amendment.

Mr. President, The second amendment would remove .22 calliber rimfire ammunition from coverage of the Gun Control Act of 1968. Currently, every box of this widely used target round must be recorded by the dealer in his books when a sale is made. Literally billions of rounds are sold annually. This amounts to a mountain of redtape which is virtually no use to enforcement authorities. Indeed, according to Treasury Department officials, not a single prosecution has been brought for violation of this requirement in the 14 years it has been on the Federal law books. No high powered ammunition such as the .223 caliber round for the M-16 military rifle or the .243 calliber round for hunting rifles is included within the scope of this amendment. Only those rounds are covered which are commonly used for plinking and similar recreational purposes. In prior years the Senate has taken similar action. I urge that it do so again.

Mr. President, I summarize the reasons for the amendment:

First. It places a tremendous burden on the dealers to keep and store these records.

Second. There has never been a case solved by use of ammunition record-keeping information in 14 years.

Third. Number of rounds of ammunition sold per year, 3 to 10 billion.

Fourth. Dealers have to keep records on each box sold. we are talking about millions of records per year.

Fifth. Overall, no good has ever come of this provisions.

Sixth. This provisions has been in the Volkmer/McClure firearms bills for years. Never once has anyone objected to it in committee hearings, committee reports, or other fact-sheets.

Seventh. If this provision were not in the law, more stores in rural areas would stock .22 calliber ammunition as a convenience for it customers.

Eighth. This ammunition is sold in boxes and the cartridges do not have

any serial numbers—so they are virtually useless as a law enforcement tracing device.

Ninth. Treasury has testified that this provision in the 1968 Gun Control Act has no law enforcement value.

I hope there is no objection to this amendment. I am prepared to yield to the Senator from Massachusetts for any questions he may have.

Mr. KENNEDY. Mr. President, I have no objection to these amendments, and I hope the Senate will adopt them.

However, I hope that next year we will be able to consider these types of amendments as part of a more comprehensive approach to gun control—to provide some reasonable deregulation of rifles, long guns, and shotguns and still maintain the protection for the American people against handguns, the so-called Saturday night specials and snubbies and also with regard to the KTW bullets.

Mr. President, in indicating my support for the amendments offered by the Senator from Kansas (Mr. DOLE), I want to note that they are along the lines of the compromise amendment I offered last May during the Judiciary Committee's consideration of S. 1030, the McClure/Volkmer bill.

My amendment, and the thrust of my efforts during the committee's consideration of that bill, was to join in the effort to ease unnecessary controls and regulations on the sale and transfer of sporting weapons—rifles and long guns—but to keep and strengthen controls on handguns, which are the preferred instruments of criminals.

I am still committed to trying to work with my colleagues to reach a reasonable compromise on this issue—and I am supporting these amendments in that spirit.

I hope we can carry this spirit of cooperation forward next year. I hope we can achieve some reasonable reforms of the 1968 Gun Control Act, which will serve the legitimate interests of the sportsmen and women of our country, yet not make it easier for the criminals and psychopaths to obtain handguns which have no purpose but to kill and maime human beings.

I voted against, and I will continue to oppose, the McClure/Volkmer bill, because it drastically weakens the already weak controls our Nation has on the sale and transfer of handguns, which are the weapons involved in the majority of the violence and crime in our society.

But I share the basic goal of the sponsor of these amendments to relieve unnecessary regulatory burdens on the legitimate purchase of firearms and ammunition by law-abiding citizens.

So, while I would have preferred that we would be dealing with something that would have provided a greater decontrol, if you want to use that word, or deregulation, if you want to use that word, on the sale of long guns, yet maintain some degree of protection for the American people with regards to proliferation of handguns.

Again, I hope in the next year I will be able to work with the Senator from Kansas and others who have been, I think, very constructive and positive on this issue, to achieve these reforms. That certainly would be my hope for next year.

As the Senator from Kansas has described this legislation, it deals with guns that are curios, relics, antiques, and it also eliminates some of the regulatory burdens on the sale of certain types of ammunition.

I wish to ask my colleagues so this record will be very clear: It is my understanding that the Senator's amendment does not relate at all to KTW bullets, so-called cop-killer bullets or with other destructive ammunition; is that correct?

Mr. DOLE. It does not.

Mr. KENNEDY. And I know that the Senator from Kansas has been very interested in trying to develop a responsible position on those particular items, and I gather that he is going to be willing to try and help those of us who are also concerned, as I know he is, to have a positive and responsible position. Hopefully, it will be recommended by the Judiciary Committee in the next Congress.

Mr. DOLE. Let me say to the distinguished Senator from Massachusetts, as he knows we have been trying to figure the best way to develop a sound amendment. I certainly have no intention of withdrawing from that effort. In fact I think it should be pursued. But these are two rather minor situations where we had agreement. Of course, the Senate Appropriations Committee also has oversight over BATF. That is how it came to be involved.

As the Senator said, one was in a bill he introduced and the other, as far as I know, is not objectionable.

I look forward to working with the Senator from Massachusetts later next year.

Mr. KENNEDY. I thank the Senator and I hope that we could move ahead and adopt the amendments.

Mr. PROXMIRE. Mr. President, will the Senator from Kansas yield for a question?

Mr. DOLE. I am happy to yield.

Mr. PROXMIRE. What committee has jurisdiction in the field that these amendments cover?

Mr. DOLE. The Judiciary Committee has jurisdiction over the Gun Control Act, although they were also before the Senate Appropriations Subcommittee because of oversight jurisdiction over the BATF. Hearings were also held on these amendments in the Appropriations Committee.

Mr. PROXMIRE. So there is no revenue effect.

Mr. DOLE. There is no revenue effect.

Mr. PROXMIRE. Is there an emergency?

Mr. DOLE. Mr. President, there may not be an emergency, but there could well be a revenue effect. We pick up revenues if we can pass these two amendments as far as recordkeeping is concerned and as far as work of the Treasury is concerned. At least we are advised by Treasury and they have no objection.

Mr. PROXMIRE. I wonder if there is an emergency reason, why these should go on this bill at this time during this session.

Mr. DOLE. There is no emergency, but I stood here and watched several other nonemergencies. I do not know there is any emergency to pass what the committee did.

The answer would be a truthful no. But I think we could indicate a willingness of the Senate to address these two very minor items where the impact would be a savings for the taxpayer, and a savings for the very small business person. I know of no objection to the amendments.

Mr. PROXMIRE. Is there any opposition from the administration at all?

Mr. DOLE. No. Senator, I can report that they support the amendments.

Mr. PROXMIRE. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendments en bloc.

The amendments (UP Nos. 1554 and 1555) were agreed to en bloc.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, under the order of time agreements and the order of alternating, I yield to the Senator from North Carolina for the purpose of offering an amendment.

Mr. HELMS. I thank the able Senator.

UP AMENDMENT NO. 1556

Mr. HELMS. Mr. President, I send to the desk two unprinted amendments and I ask that they be stated and considered en bloc.

The PRESIDING OFFICER. The amendment will be stated.

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 1556, amendments en bloc.

At the appropriate place in the pending business, insert the following new section:

SEC. . (a) No part of any funds appropriated for the fiscal year ending September 30, 1983, or for any fiscal year therefter may be used to pay the salary of any Member at a rate which exceeds the rate of pay actual-

ly payable to such Member on September 30, 1982, under all applicable provisions of law.

(b) For the purpose of this section, the term "Member" means an individual who is a Senator, Member of the House of Representatives, Delegate to the House of Representatives, Resident Commissioner from Puerto Rico, President pro tempore of the Senate, Majority Leader of the Senate, Minority Leader of the Senate, Majority Leader of the House of Representatives, Minority Leader of the House of Representatives, or Speaker of the House of Representatives.

At the end of the pending Helms amendment add the following:

"The provisions of this section shall be null and void after the beginning of the first fiscal year following the first fiscal year hereafter ensuing in which the Federal budget shall have been balanced and the national debt reduced below one trillion dollars.".

The PRESIDING OFFICER. Is there objection to the consideration of the amendments en bloc? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I wonder if the Senator would yield for just 30 seconds.

Mr. HELMS. Certainly.

Mr. HATFIELD. Mr. President, earlier I proposed a technical amendment, 1543, for Senator STEVENS relating to bonus reenlistment pay. The amendment was improperly drafted as to where it fell in the resolution. The amendment should have occurred on page 58, lines 14-16, rather than on page 44, lines 4-7. I ask unanimous consent that unprinted amendment No. 1543 occur on page 58, lines 14-16, and that section 128 on page 44, lines 4-7, be restored as reported from the committee.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from North Carolina.

Mr. HATFIELD. I thank the Senator.

Mr. HELMS. I thank the Chair. Mr. President, I guarantee that I am going to consume no time because this issue has been debated over and over with various results throughout the 10 years that I have been a Member of the Senate.

Now, the first amendment, Mr. President, would place a permanent cap on the salaries of Members of Congress. It would end once and for all what is perceived all across America, rightly or wrongly, this business of automatic backdoor pay increases. Simply said, it would require an affirmative vote by Congress if and when congressional salaries are increased. I think that is a fair proposition.

I know it is not pleasant to talk about raising salaries, our own salaries, but it certainly is not pleasant to the people back home to perceive that salaries are somehow pumped up through a backdoor, midnight process.

The Senate Appropriation Committee's version of the continuing resolution reenstates the pay cap for Members of Congress, but our colleagues over in the House of Representatives did vote a pay raise for themselves this year.

Mr. President, I do not want to be critical of anybody either in this body or in the House of Representatives, but it could not escape my attention that in 1 week's time the House of Representatives in one action voted to increase over a 5-year period of time taxes on the American people totaling about $27 billion, and I am talking about the gas tax. They did that in one action. Then they came right back and voted to raise their own salaries.

Now, maybe there is some consistency in that, but it escapes me an I think it escapes most of the American people.

I know that there has been a kind of subrosa agreement between some leaders in the Senate and some leaders in the House that the House can raise their pay but the Senate will not raise its pay.

I have a friend down in North Carolina, his name is Chub Seawell, and he very often says when he sees a proposition that does not have a great deal of merit, "That's a silly as a 10-cent watch."

I just do not understand that kind of agreement, and I do not think the American people will.

But the point is this Mr. President. The vast majority of the American taxpayers, the men and women who get up every morning and go to work to earn enough to try to maintain their families and pay their taxes, make nowhere near what Members of the Congress make. I know all about the arguments about how much it costs to live in Washinton, and I am probably the poorest man in this Senate in terms of money. But the point is, Mr. President, that we are asking these taxpayers to foot the bill for a congressional pay increase, and they are threatened with an increase in the gasoline tax. That is one of the reasons I have been interested in making certain that full consideration was given the so-called gas tax measure, because if ever there was a regressive tax, in my judgment, that is it.

But in any case, I think it is time to put an end to the perception across this land that we sit up here and engage in an automatic backdoor pay increase scheme for ourselves. I think the very least we can do is to say that forevermore we are going to vote on the proposition and we are going to vote so that the people can know how each Senator and how each Member of the House of Representatives voted. If it passes, fine. I will not be voting for a pay increase unless and until the Federal budget is balanced and we can at least get the Federal debt down below $1 trillion. That is the sum and substance, Mr. President, of the two amendments.

Mr. HATFIELD. Mr. President, because our people are in caucus, and there have been people who indicated an interest to speak on this, I ask unanimous consent that we temporarily lay this amendment aside so the Senator from North Carolina may take up his next amendment.

Mr. HELMS. Before the Senator does that, may I ask for the yeas and nays?

Mr. HATFIELD. Yes.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. I thank the Chair and I thank the distinguished Senator.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oregon? Without objection, it is so ordered.

UP AMENDMENT NO. 1557

Mr. HELMS. Now, Mr. President, I send another unprinted amendment to the desk which will save the American people $100 million.

The PRESIDING OFFICER. The amendment will be stated.

Mr. HELMS. It is not much money, Mr. President.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 1557:

At the end of the bill, insert the following:

SEC. . None of the funds made available by this Act shall be used to pay costs, fees, or other expenses incurred for implementation of the United Nations Convention on the Law of the Sea, which was signed on December 10, 1982, in Montego Bay, Jamaica.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

Mr. President, on July 9 of this year, President Reagan announced that the United States would not become a signatory to the long disputed United Nations Convention on the Law of the Sea.

Now, this Law of the Sea Treaty was drafted so that Third World countries would be empowered to force transfer of material resources from developed states, such as the United States, through multinational institutions and procedures beyond the control of any individual developed sovereign state. And it calls for a mandatory transfer of billions of dollars, Mr. President, in technology and financial resources from developed nations to undeveloped nations and for the most part, I might add, mostly unfree societies.

Now, the U.S. Government, and the President of the United States, wisely concluded that this treaty is unworkable and that it is not in the best interest of the United States and the American people. But what do you think happened, Mr. President? The

United States is now being told that the American taxpayers are going to have to pick up the tab for implementing a treaty that we have already rejected. Pure nonsense.

Mr. President, I hope it is obvious that there is no logic in forcing the American taxpayers to pay for diplomatic disaster that the United States has already rejected.

That is the purpose of this amendment. It would prohibit the United States from funding the implementation of the U.N. Convention on the Law of the Sea.

I ask for the support of the Senate in this effort.

Mr. HATFIELD. I understand that finishes the opening statement on that one.

Mr. HELMS. Yes, sir.

Mr. PERCY. Mr. President, I think the Senator from North Carolina is engaged in a bit of overkill with respect to the Law of the Sea Treaty. The United States has made its position clear on this treaty; we will not sign it in its present form. The President has gone even further than that in announcing that we will not participate any further in the activities of the so-called Preparatory Commission which is supposed to establish rules and regulations for seabed mining.

I do believe that the United States is fully justified in objecting to the expenditure of funds from the regular U.N. budget to pay for the expenses of the Preparatory Commission. This issue was debated in the U.N. General Assembly this fall. We succeeded in scaling back the proposed funding for the Preparatory Commission from $20 million to $4 million. I think the administration should pursue its objections that this is not a normal activity of the United Nations as contemplated in the U.N. Charter.

Furthermore, I want to emphasize to my colleagues that there is no money for assessed contributions to the United Nations in this bill. Our contributions to the United Nations for calendar year 1982 have already been given. Our contributions for 1983 will not be made until the fiscal 1984 budget. In other words, this amendment would not have any practical effect.

For this reason, and the fact that we are obligated to make our assessed contribution by treaty, I hope that the Senate would not include it in this bill.

Mr. HATFIELD. Mr. President, I ask unanimous consent that this Helms amendment be temporarily laid aside in order that the Senator from North Carolina may take up his next amendment.

Mr. HELMS. If the Senator will let me get the yeas and nays on this amendment. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. I thank the Chair.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from Oregon that the amendment be laid aside? Hearing none, it is so ordered.

The Senator from North Carolina.

UP AMENDMENT NO. 1558

Mr. HELMS. I send to the desk another unprinted amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 1558:

Page 7, line 8 strike out "$800,000,000" and insert in lieu thereof, "$700,000,000".

Mr. HELMS. This amendment will save the taxpayers $100 million, Mr. President.

This amendment would reduce from $800 to $700 million the fiscal year 1983 appropriation to the International Development Association and make the Senate figure conform with the House figure and the figure approved for fiscal year 1982.

In other words, in the fiscal year ending September 30, 1982, The United State gave the IDA $700 million the figure which this amendment proposes.

Mr. President, the money in this bill is a part of the U.S. commitment to the IDA called the IDA-VI. Congress approved the authorization for IDA for 4 years. In addition to the $500 million approvied in fiscal year 1981, the totals were to have been $850 million in fiscal year 1982 and $945 million in fiscal year 1983. The Congress appropriated $700 million in fiscal 1982 and now the Congress will appropriate for this fiscal year either $700 million as provided in the House bill or $800 million as provided in the committee recommendation, or some sort of compromise.

In either case, Mr. President, if Congress were to try to catch up with previous appropriations and try to make up the difference between the initially authorized funds and the funds appropriated in the years prior to 1984, the 1984 appropriation would be at least—hold on to your hat, Mr. President—$1,240,000,000, a minimum of a 55-percent increase over this year.

I think this is substantially more than the American taxpayers ought to be asked to bear in this time of economic stress.

This is a sum that Congress must not, and will not, approve, in my judgment. Such an increase is intolerable, and we simply must, in my judgment, Mr. President, spread the IDA-VI Replenishment out at least over a period of 5 years and come up with the reminder which would amount to something like $540 million in fiscal year 1985.

So, Mr. President, regardless of the size of the present year IDA-VI appropriation we are not going to come up with the total remainder of the U.S. pledge in the next fiscal year so we might as well stick to a steady course and adopt the same figure we did last year and the same figure that is in the House version of the continuing resolution.

In sum, Mr. President, the pending amendment would cut $100 million from the bill. It will not seriously harm this program.

I might mention, Mr. President, that there are many Senators who think that the entire IDA submission ought to be rejected. I have problems with the International Development Association, and I am sympathetic to the suggestion by my colleagues. But in view of the times, I choose to offer this very modest amendment. The reduction in funds for this program will make the Senate bill identical with the House bill in this regard and I think it should be approved.

One of the reasons that the International Development Association is not one of the most popular programs these days is that its record, to put it charitably, is not good.

Let me quickly list the five criticisms that I most often hear. Keep in mind that each can serve as a topic for a long discussion, but we need to conserve time and I will not do that.

First, International Development Association loans are made only to governments. The argument for this is that in the poorest nations only the government is capable of economic activities. I think the defect of this reasoning is self-evident.

This contention is contrary to every free enterprise principle that I know about, and contrary to all evidence on the development of economic systems. The private sector is always the most efficient producer and it is absurd to encourage the poorest nations to squander resources on government-controlled enterprises. Where proverty is a problem, it is foolhardy and tragic to hobble the greatest reducer of poverty—private individuals acting and risking to make a profit to provide goods and services.

Second, International Development Association loans have not been used vigorously to leverage changes in economic policies in recipient nations in favor of a free market, private sector activity.

The World Bank is a Western institution, yet it and its ancillary agencies like the International Development Association are destructive of efforts to emulate our system of government and the way we organize our society. These organizations fail to promote

principles of free markets and to promote these proven values vigorously. To view the advancement of freedom and democracy as "political interference" in the business of recipient nations, is to use specious arguments.

Third, IDA has made the vast majority of its loans to countries which have consistently followed economic policies destructive to economic growth. Almost 60 percent of IDA loans have gone to India, Pakistan, Bangladesh, and Indonesia. India, which is hardly a model of economic success, has received 40 percent of all IDA loans. IDA and the World Bank have been incapable of leading these countries even to minimal economic growth, much less prosperity.

Let us ask why. India taxes income above—speaking in terms of U.S. dollars—$1,876 at a rate of 33 percent. Bangladesh taxes Income above $1,471 at 35 percent. Pakistan taxes income above $2,000 at 35 percent. Indonesia taxes income above $13,923 at 13 percent. Indonesia is a little better than the rest, but the tax rate there is almost double the U.S. rate for 1981 and far too high to encourage initiative and growth.

Fourth, IDA loans are made to these countries for 50 years. Do you know what the interest rate is, Mr. President? This is American taxpayers' money that we loan and the interest rate is zero.

How would you like to have a 50-year loan, Mr. President, at zero interest rate? I believe I could do business with any bank profitably to myself if I could get a loan like that.

Mirror this against what the young married couple in America is up against, for example. Look at what they have to pay for a mortgage on their home. So many young people cannot even afford to think about buying a home.

IDA loans should be changed to reflect the real world. Young American families who now face 15- to 16-percent interest rates on 30-year mortgages can hardly be asked to fund zero interest loans abroad. IDA loans should bear an interest rate that at least matches inflation to protect the assets of those providing capital. Further, the loan periods should be reduced to no more than 30 years so that financing will not continue when the assets—the projects built with the funds—are long worn out or obsolete.

Fifth, many loans are made to nations that restrict the flow of private capital. India has nationalized so many industries. The Peoples' Republic of China, which happens to be a new and potentially very large recipient of IDA funds, has rejected offers of private Western capital in amounts reported near $30 billion.

There cannot be an adequate case made, Mr. President, for channeling capital through international organizations when private capital is freely available.

As an example, India and the IMF are now working on an agreement for a loan of almost $6 billion for petroleum development. This at a time when there is a glut of oil and exploration capital.

Mr. HATFIELD. Mr. President, I yield a minute to the Senator from Wisconsin.

Mr. KASTEN. Mr. President, I regret to say that I stand in opposition to the Senator from North Carolina, because the five points he just so eloquently went through are five of the reasons why I, as the subcommittee chairman, had reduced the request for IDA from $945 million to $700 million in subcommittee. Then in the full committee, working with the able and distinguished ranking minority member of our Foreign Relations Subcommittee and a number of other people, we worked out an overall package to arrive at certain security assistance and aid numbers for Central America and the Caribbean.

The Senate acted affirmatively on the Appropriations Committee levels on foreign aid last night. This included the sum of $800 million for IDA. It would be contradictory at this point to put in a new section for IDA at a different level than that which we voted on in that one motion last night.

I want to emphasize that the $800 million appropriated is already $145 million below the administration's request. The overall appropriations for multilateral assistance is $222,877,000 below the administration's request. So we have reduced that figure. I think the Appropriations Committee made a major effort to find cuts in this section, and that further cuts could harm our bargaining and negotiating position on a number of other items.

While I agree in substance with what Senator HELMS has said, I would hope very much that this amendment would not be agreed to.

I also would like to point out that it is not the assumption of the Appropriations Committee that funding for IDA next year will be at that very high level. It is unlikely that our economy is going to recover quickly enough, or that the sense of the Congress is going to be such that we will be able to fulfill our IDA-VI replenishment over that small period of time.

It now looks as though we will simply stretch our IDA-VI replenishment into the next year. So that huge amount of money the Senator is talking about, I hope very much will not be the level that we are called upon to appropriate. I know the Senator from North Carolina will be working with the people at the Treasury Department and at the State Department to reduce the amount of the IDA-VI replenishment to be funded next year.

I hope this amendment will not be agreed to, but I want the Senator to know that he and I are on the same wavelength. This is a concern of a substantial number, if not the majority, of the Congress today and it is important that the administration and the officials of the World Bank understand that.

Mr. HELMS. Mr. President, let me thank my friend from Wisconsin. I want him to know that I am not unmindful of the great effort he has devoted to this. I admire him for it, and I thank him for it. We are, indeed, on the same wavelength, though we may have some temporary minor difference about the arithmetic of this particular legislation. I do want the Senator to know that I admire and respect him.

I thank the Senator.

Mr. HATFIELD. Mr. President, I wonder if the Senator from North Carolina will indulge us again and permit us to lay aside this amendment temporarily in order to take up another amendment and keep this process going.

Mr. HELMS. Surely, Mr. President. First, let me ask for the yeas and nays on this amendment.

I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second. The yeas and nays were ordered.

Mr. PERCY. Mr. President, while we hear about middle income countries such as Mexico and Brazil facing economic difficulties and we are taking steps to help them, we must not forget that many of the poorest countries in the world also are facing extremely difficult times as prices for their commodity exports such as cotton, cocoa, coffee, and copper are at their lowest levels in three decades. We should note that to a large extent their economic difficulties result from fluctuating oil prices, high interest rates, and economic recession in the industrial countries over which the poor countries have no control.

We have already stretched our payments for IDA-VI from 3 to 4 years. In Toronto last September, all other industrial countries agreed to increase their contributions to IDA-VI by roughly one-third to keep up IDA's lending capacity. Many of these countires have bigger deficits, higher unemployment, and higher inflation than the United States. If we cut $100 million now, it is almost certain we will need 5 years to meet our IDA-VI commitments.

I think it is important to know that while the White House has scrutinized every budget item, it has consistently urged that we meet our IDA-VI commitment within 4 years. It has made this decision both because it believes the program is important and because

it is convinced the United States must honor its international commitments.

Last night, the Senate decided to increase security assistance by over one-half billion dollars. We would be sending the Third World a most peculiar message if we increase our security support while reducing our help in strengthening their economies. If we have learned nothing in the last three decades we should have learned that a country in which its citizens have little economic or political stake, is a country which can not be defended.

Finally, multilateral lending institutions are one of the most efficient ways to provide foreign assistance.

Other countries contribute $3 for every $1 we put in.

The World Bank works closely with the IMF to advocate that the developing countries to adopt market-oriented economic policies.

The World Bank and the IMF are often able to improve the economic policies of the developing countries through advice and pressure which the United States could not do acting unilaterally.

Mr. HATFIELD. Mr. President, I ask unanimous consent to temporarily set aside the Helms amendment that is now under discussion in order that we may proceed to another matter.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

UP AMENDMENT NO. 1559

(Purpose: To provide that Federal supplemental unemployment compensation shall be available to certain railroad workers, and to make the necessary appropriation to pay such compensation)

Mr. HATFIELD. Mr. President, I yield to the Senator from Kentucky for the purpose of his offering an amendment.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, on behalf of myself, Mr. ROBERT C. BYRD, Mr. DIXON, Mr. HEINZ, Mr. ROTH, Mr. LEVIN, Mr. SARBANES, Mr. HUDDLESTON, and Mr. MELCHER, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kentucky (Mr. FORD), for himself, Mr. ROBERT C. BYRD, Mr. DIXON, Mr. HEINZ, Mr. ROTH, Mr. LEVIN, Mr. SARBANES, Mr. HUDDLESTON, and Mr. MELCHER, proposes an unprinted amendment numbered 1559.

At the end of the bill add the following new section:

SUPPLEMENTAL COMPENSATION FOR RAILROAD WORKERS

SEC. . (a) Any employee as defined in section 1(d) of the Railroad Unemployment Insurance Act (45 U.S.C. 351 (d)) shall be entitled to supplemental unemployment benefits, to be paid under such Act in accordance with the provisions of this section for any day of unemployment during such individual's period of eligibility (as defined in subsection (f)) if such employee—

(1) has less than ten years of service as defined in section 1(f) of the Railroad Retirement Act (45 U.S.C. 231(f)), did not voluntarily retire, and did not voluntarily leave work without good cause;

(2) has exhausted all rights to unemployment benefits under the Railroad Unemployment Insurance Act other than supplemental benefits payable by reason of this section;

(3) has no rights to unemployment benefits with respect to a day under such Act (other than supplemental benefits payable by reason of this section) or to any unemployment compensation with respect to a week under any State unemployment compensation law or under any other Federal law (and is not paid or entitled to be paid any additional unemployment compensation under any such State or Federal law); and

(4) is not receiving unemployment compensation with respect to such day under the unemployment compensation law of Canada,

except that no payment of supplemental unemployment benefits shall be made to any individual by reason of this section for any day of unemployment occurring more than two years after the end of the benefit year as defined in section 1(m) of the Railroad Unemployment Insurance Act (45 U.S.C. 351(m)) for which he exhausted his rights to unemployment benefits under such Act.

(b) For purposes of this section, an individual shall be deemed to have exhausted his rights to unemployment benefits under the Railroad Unemployment Insurance Act when—

(1) no payments of unemployment benefits (other then supplemental benefits payable by reason of this section) can be made under such Act because such individual has received all such unemployment benefits available to him based on employment during his base year as defined in section 1(n) of the Railroad Unemployment Insurance Act (45 U.S.C. 351(n)); or

(2) his rights to such unemployment benefits have been terminated by reason of the expiration of the benefit year (as defined in such Act) with respect to which such rights existed.

(c) For purposes of this section—

(1) the amount of the supplemental unemployment benefits which shall be payable to any individual for any day of unemployment shall be equal to the amount payable to him for any day of unemployment during his benefit year under the Railroad Unemployment Insurance Act; and

(2) the terms and conditions of the Railroad Unemployment Insurance Act which apply to claims for unemployment benefits and payment thereof shall apply to claims for supplemental unemployment benefits and payment thereof, except where inconsistent with the provisions of this section.

(d)(1) The maximum number of days for which an individual shall be entitled to supplemental unemployment benefits by reason of this section shall be—

(A) 30 days, if the thirtieth day of such benefits falls in a week during which there is neither a '40-day benefit period' in effect nor a '50-day benefit period' in effect;

(B) 40 days, if such thirtieth day falls in a week during which a '40-day benefit period' or a '50-day benefit period' is in effect, but the fortieth day of such benefits falls in a week during which a '50-day benefit period' is not in effect; and

(C) 50 days, if such thirtieth day falls in a week during which a '40-day benefit period' or a '50-day benefit period' is in effect, and such fortieth day falls in a week during which a '50-day benefit period' is in effect.

(2)(A) FOR PURPOSES OF THIS SECTION, a '40-day benefit period' shall begin with the twentieth day after there is a 40-day benefit period 'on' indicator (as defined in subparagraph (B)) and shall end with the twentieth day after there is a 40-day benefit period 'off' indicator (as defined in subparagraph (C)).

(B) There is a 40-day benefit period 'on' indicator for a week if, for the period consisting of such week and the immediately preceding twelve weeks, the rate of insured unemployment (as defined in section 203(e) of the Federal-State Extended Unemployment Compensation Act of 1970, and seasonally adjusted) for all States equaled or exceeded 3.5 percent (determined by reference to the average monthly covered employment (as determined for purposes of section 203 of the Federal-State Extended Unemployment Compensation Act of 1970) for the first four of the most recent six calendar quarters ending before the close of such period), but was less than 4.5 percent.

(C) There is a 40-day benefit period "off" indicator for a week if, for the period consisting of such week and the immediately preceding twelve weeks, the rate of insured unemployment (as so defined and seasonally adjusted) for all States was less than 3.5 percent (as so determined).

(3)(A) For purposes of this section, a "50-day benefit period" shall begin with the twentieth day after there is a 50-day benefit period "on" indicator (as defined in subparagraph (B)) and shall end with the twentieth day after there is a 50-day benefit period "off" indicator (as defined in subparagraph (C)).

(B) There is a 50-day benefit period "on" indicator for a week if, for the period consisting of such week and the immediately preceding twelve weeks, the rate of insured unemployment (as defined in section 203(e) of the Federal-State Extended Unemployment Compensation Act of 1970, and seasonally adjusted) for all States equaled or exceeded 4.5 percent (determined by reference to the average monthly covered employment (as determined for purposes of section 203 of the Federal-State Extended Unemployment Compensation Act of 1970) for the first four of the most recent six calendar quarters ending before the close of such period).

(C) There is a 50-day benefit period "off" indicator for a week if, for the period consisting of such week and the immediately preceding twelve weeks, the rate of insured unemployment (as so defined and seasonally adjusted) for all States was less than 4.5 percent (as so determined).

(e) No supplemental unemployment benefits shall be payable by reason of this section for any day before December 1,1982, or after March 31, 1983.

(f) For purposes of this section the term 'period of eligibility' means, with respect to any individual, the period beginning on December 1, 1982, and ending on March 31, 1983; except that an individual shall not have a period of eligibility unless his benefit year ends on or after June 1, 1982.

(a)(1) There are authorized to be appropriated in advance from the general fund in the Treasury to the railroad unemployment insurance account in the Unemployment Trust Fund, without fiscal year limitation, such sums as may be necessary to pay sup-

plemental unemployment benefits payable by reason of this section. Such amounts shall not be required to be repaid.

(2) There are authorized to be appropriated in advance from the general fund in the Treasury to the railroad unemployment insurance administration fund in the Unemployment Trust Fund, without fiscal year limitation, such sums as may be necessary to meet the costs of administering the program of supplemental unemployment benefits established by this section. Such amounts shall not be required to be repaid."

APPROPRIATION OF FUNDS

(h) In addition to any amounts otherwise appropriated in this joint resolution or any Act, there are appropriated for the Railroad Retirement Board, $85,000,000 for transfer into the railroad unemployment insurance account in the Unemployment Trust Fund in accordance with subsection (g)(1), and $750,000 for transfer into the railroad unemployment insurance administration account in the Unemployment Trust Fund in accordance with subsection (g)(2).

Mr. FORD. Mr. President, I ask unanimous consent that the distinguished Senator from Ohio (Mr. METZENBAUM) and the distinguished Senator from Nebraska (Mr. ZORINSKY) be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, it is a little bit disconcerting to make this eloquent speech when there are only a few here and they are mostly Democrats. I want that understood.

Mr. President, the amendment I am offering today seeks to correct an unintended consequence of the 1981 Budget Reconciliation Act that has resulted in the termination of extended unemployment benefits for railroad workers with less than 10 years' experience. This is a simple amendment which will make these unemployed rail workers eligible to participate in a Federal supplemental benefits program similar to the program that was authorized in the recently passed Tax Equity and Fiscal Responsibility Act of 1982 and extended, by the way, just yesterday.

A little background is in order to explain exactly the situation these unemployed railroad workers are facing. Railroad workers receive unemployment benefits in a program separate from the Federal-State unemployment insurance system. Under the Railroad Unemployment Insurance Act, railroad workers with less than 10 years experience are entitled to 26 weeks of basic unemployment benefits and an additional 13 weeks of extended benefits if conditions of high unemployment exist. High unemployment is defined by reference to the national trigger in the Federal-State unemployment insurance system. In the 1981 Reconciliation Act, Congress repealed the national trigger with the intent of changing unemployment law for workers in the general economy. Unfortunately, this had the unintended effect of repealing extended benefits for railroad workers.

As a result, railroad workers with less than 10 years' experience are not limited to 26 weeks of benefits in a benefit year. Congress unintentionally deprived rail workers of 13 weeks of extended benefits. These workers are not underprotected relative to workers in the general economy.

The amendment we are offering will remedy this by making unemployed rail workers with less than 10 years experience eligible to receive Federal supplemental compensation benefits. They would be entitled to benefits of either 10, 8, or 6 weeks depending on the insured unemployment rate in the national economy. Under current economic conditions, they would be entitled to an additional 10 weeks of benefits. Like the Federal supplemental compensation program, these benefits would not be payable after March 31, 1983.

Congress has recognized the hardship facing unemployed workers in the general economy who find it impossible to find work in an economy with 11 percent unemployment. First, in the recently passed tax equity bill, Congress authorized up to 10 weeks of additional benefits. Then in the gas tax bill, by a 93-to-4 vote, we authorized up to 6 more weeks. Clearly, these unemployed rail workers also deserve protection. Not only have they been excluded from the supplemental benefits program, but they have also been mistakenly deprived of extended benefits.

I have heard from many unemployed railroad workers who have already exhausted their unemployment benefits or will very soon. I am sure other Senators have also. These families cannot understand what Congress has done to them.

We have a chance to correct this inequity. I am informed it has the support of the chairman and ranking minority of the Senate Labor Committee. They recognize the problem. I urge my collleagues to accept this amendment.

Mr. President, I yield a couple of minutes to my distinguished friend from Illinois (Mr. DIXON).

Mr. DIXON. Mr. President, I thank my distinguished friend from Kentucky for yielding. He has covered the subject matter so exhaustively that I have little to add except that I support the Senator's statement. As the Senator has said, this amendment will rectify a great inequity which occurred unintentionally last year.

Under the 1982 omnibus budget reconciliation bill, Congress repealed the national trigger with the intention of limiting payments of extended unemployment benefits to the general work force, However, under the National Railway Unemployment Insurance Act, railroad workers who are unemployed qualified for extended benefits when the national economy reaches the percentage specified in the Federal-State unemployment insurance system. With the repeal of the national trigger, therefore, railworkers with less than 10 years' seniority have no way to qualify for any more than 26 weeks of unemployment benefits.

Our amendment addresses this inconsistency by providing eligibility for Federal supplemental compensation, on the basis of the national insured unemployment rate.

It would provide 10 weeks of FSC if the national IUR is at 4.5 percent or above; 8 weeks of FSC if the national IUR is 3.5 percent or above; and 6 weeks of FSC if the national IUR is below 3.5 percent.

The insured unemployment rate for the Nation as of November 1982 is 5.5 percent.

Approximately 60,000 railworkers are currently ineligible for any benefits beyond the 26 weeks of basic unemployment compensation.

I have personally received several letters from people in my State of Illinois who are unemployed railworkers and have exhausted the 26 weeks of benefits to which they are entitled, and have nowhere else to turn. They see others receiving 49 weeks of benefits, and cannot understand why they are not entitled to the same protection. Mr. President, neither can I.

I urge my colleagues to consider righting a wrong that was done inadvertently last year, and adopt this amendment.

I thank the Senator and my colleagues for their attention.

Mr. FORD. I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PROXMIRE. Mr. President, would the amendment of the Senator from Kentucky put the railroad workers who were laid off on the same basis as all other workers?

Mr. FORD. It would not be on the same basis, Mr. President. They would be entitled to only 36 weeks.

Mr. PROXMIRE. They would be entitled to more or less?

Mr. FORD. Less.

Mr. PROXMIRE. But there would be less discrimination against them than there is now?

Mr. FORD. That is correct.

Mr. PROXMIRE. Mr. President, why did not the Finance Committee act on it? Did the Finance Committee have jurisdiction?

Mr. FORD. The Labor Committee has jurisdiction, as I understand it.

Mr. PROXMIRE. The Senator pointed out that both the chairman and the ranking minority member favored this. Why did they not act on it?

Mr. FORD. The national trigger which was repealed in the 1981 reconciliation measure, unintentionally repeated these benefits. I am just trying to correct a mistake that was made when the national trigger was repealed.

Mr. PROXMIRE. So it is an emergency in the sense that if we fail to act now, they will have to wait a month or more before they can get action from Congress.

Mr. FORD. That is correct.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 4 minutes and 30 seconds.

Mr. FORD. I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, without counting it against the Senator's time, I wonder if I could inquire of the Senator from Arkansas if we could go to a vote on his amendment by temporarily laying aside that of the Senator from Kentucky?

I think Senator DOLE wishes to speak on the amendment of the Senator from Kentucky. We have sent for Senator DOLE. But one of the best ways to get Senators here would be to have a rollcall. I wonder if the Senator from Arkansas would agree to have a rollcall at this time.

Mr. BUMPERS. Mr. President, I would be happy to. I ask for the yeas and nays on my amendment.

Mr. PROXMIRE. Mr. President, it is my understanding that the Senator from Michigan (Senator LEVIN) has a minute he would like to take to discuss Senator BUMPER'S amendment. He told me that. He said that he reserved that.

Mr. HATFIELD. Where is the Senator?

Mr. PROXMIRE. I will get him right away if he wants to act on that.

Mr. HATFIELD. Mr. President, I ask unanimous consent that we may temporarily lay aside the amendment of the Senator from Kentucky in order that we may proceed with other amendments.

The PRESIDING OFFICER. Is there objection?

Mr. FORD. Mr. President, reserving the right to object, and I will not object, the next item of business after the pending business will than come back to my amendment. The Senator set three amendments aside and I will be the fourth one.

Mr. HATFIELD. Mr. President, I amend my unanimous-consent request that we temporarily lay aside the amendment of the Senator from Kentucky so that the first amendment to be brought up for action will be the amendment of the Senator from Kentucky.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? Hearing none, it is so ordered.

UP AMENDMENT NO. 1560

Mr. HATFIELD. Mr. President, I send to the desk two technical amendments and ask for their immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment numbered 1560.

The amendment is as follows:

On page 25, line 10, strike subsection (h) and insert new subsection (h) in lieu thereof:

"(h) Notwithstanding any other provision of this joint resolution such sums as may be necessary for programs, projects, or activities provided for in the Department of the Interior and Related Agencies Appropriations Act, 1983 (H.R. 7356), to the extent and in the manner provided for in the conference report and joint explanatory statement of the Committee of Conference (House Report Number 97-978), filed in the House of Representatives on December 17, 1982, as if such Act had been enacted into law."

Mr. HATFIELD. This amendment has been cleared on both sides of the aisle. It is strictly a technical one on the matter of new subsections to conform with the CR and the conference report that has been acted upon on the Interior appropriation bill. I ask for its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon (Mr. HATFIELD).

The amendment (UP No. 1560) was agreed to.

UP AMENDMENT NO. 1561

Mr. HATFIELD. Mr. President, I have a second amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment numbered 1561.

Beginning on page 30, line 24, strike section 118.

Mr. HATFIELD. Mr. President, this is another technical amendment to make the CR conform to the conference report of the Interior appropriations bill. I move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon (Mr. HATFIELD).

The amendment (UP No. 1561) was agreed to.

Mr. METZENBAUM. Mr. President, will the manager of the bill yield?

Mr. HATFIELD. Yes.

Mr. METZENBAUM. Mr. President, I would just make the observation to the manager of the bill that it is 20 minutes to 6. We have three or four measures that are being set aside for Members to be on the floor. It seems to me that the rest of us are entitled to consideration that they be here. If they are not here, we ought to proceed forward with the rollcall. I have not wanted to object, but I will say from this point forward if they are not here, I will.

Mr. HATFIELD. Mr. President, let me say to the Senator from Ohio that this has happened on occasions in the past and we have accommodated Members on that side of the aisle. We are trying to accommodate Members regardless of the side of the aisle from which they come.

Mr. METZENBAUM. Mr. President, I am not at all suggesting to be critical of the manager of the bill, who is trying to bring this matter to a conclusion. I am only suggesting that if there are Members who have speeches to make it seems to me we are all entitled to the courtesy of having them here so we might proceed and dispose of some of these.

Mr. HATFIELD. I thank the Senator from Ohio.

Mr. President, I yield to the Senator from Massachusetts.

Mr. TSONGAS. Mr. President, I have two amendments that I introduced today. It had not been my intent to introduce them, but it is obvious that what is happening in this body is that those of us who are trying to be reasonable are being crowded out. There is a premium being put on the extreme. The less you care about this institution, the better off you are. When someone engages in that kind of conduct, they are applauded.

It seems to me the time has come rapidly, or is coming rapidly, for a revolt by the middle of this body. I am not served by being moderate; neither is my constituency. We have worked on a lot of things all year long and they are not going to get passed.

But when I see some of the things being introduced here, the obvious question is: Why do I not do it, too?

I hope, at some point, that the leadership will recognize the need for a change of the rules. I want to put you on notice that, just as one Member, I have had enough and I am going to engage in the same tactics. I am going to bring in all of the amendments I have cared for lo these many years, and give you a chance to think about them. I may do it next year; I may do it tonight.

But, at some point, like any other society, if the extremes run wild, the moderates have no choice but to pick one side or the other. And this is one moderate who is becoming very immoderate.

I hope that, at some point, affection and respect for the institution will prevail.

I just wanted to say that I do not intend to bring up these two amendments, but push me, push me, push me long enough and you will have a chance to contemplate all the things I

have worked on for 4 years around here.

Mr. HATFIELD. Mr. President, I only regret one thing about this statement that the Senator from Massachusetts has made, and that is that every Member of the Senate was not present.

I think he has, in a very succinct, poignant manner, raised the real heart of the whole matter.

Let me say to the Senator that there is no one, believe me, who would welcome that kind of self-restraint or rule change. I support whatever is necessary to elevate the institution of the Senate to a higher level than it has been looked upon in this whole continuing resolution.

I applaud the Senator from Massachusetts and welcome his comments. I want to say to the Senator one further thing. I really appreciate his willingness not to raise those two amendments that he has every right to raise, particularly in this context. Because, at this particular moment, I am happy to report that we have every amendment now within some kind of a framework, except two. I think those two may fall into place and we are almost ready to take action on all of those amendments except those two; that is, Mr. BUMPERS' amendment, three of Mr. HELMS' amendments, Mr. FORD's amendment, and we have yet to act upon Mr. MCCLURE's amendment, which I think will be very quickly handled, and one last one of Mr. HELMS.

So I wish to tell him that the end is in sight.

Mr. TSONGAS. Mr. President, will the Senator yield?

Mr. HATFIELD. Yes.

Mr. TSONGAS. Mr. President, if I may respond to the Senator, the end is in sight for this particular go-around. The rules have not been changed, which means we are going to go through this scenario again. The wife of one of the Senators referred to this as not a lameduck session, but a lamebrain session, and I subscribe to that view.

I wish to say, as far as I am concerned, that, absent some restructuring, that I intend, in the next 2 years that I will be here, to use the same tactics to further my own interests and hopefully force, if the moderates in this body go along, force change. Because it is obvious that the approach here is to accommodate, and to appease never works with fanatics. It is time to move in the other direction.

Mr EAGLETON addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. Mr President, I, too, like the Senator from Oregon (Mr. HATFIELD), wish that all 100 Members of the Senate were on the floor when the Senator from Massachusetts (Mr. TSONGAS) made his remarks.

I daresay, if every Senator would rise to speak, at least 80, maybe 90, Members of the Senate would have agreed with the observations of the Senator from Massachusetts.

I think this "trial by ordeal" that we have gone through for the past 3 or 4 days ought to be proof enough that our Senate rules are inadequate for the 20th century. They may have been adequate for the 18th or 19th, but they are certainly inadequate for the 1980's and the future.

If this incredible experience that has been inflicted on ourselves as individuals, and on the country collectively, is to have any lasting benefical meaning, then these rules which permit a handful to literally tie this Senate up in knots have to be changed. I can think of no other procedural priority for the new Congress than to accomplish the much-needed modernization of our now grossly out-of-date rules.

BUMPERS UP AMENDMENT NO. 1539

Mr. HATFIELD. Mr. President, I yield in order that the Senator from Michigan may seek the floor for the 1 minute that I previously allowed.

Mr. LEVIN. Mr. President, as the Senator from Arkansas has pointed out, the farms in this country are in desperate trouble. They are going under in rapid rates. The question is how can we help them.

The method which the Senator from Arkansas would select, in one instance here, is to raise the cap from $50,000 to $100,000 on the deficiency payments that go to any one farm.

It would be far better to have 90 percent of the farms that now average $10,000 in deficiency payments to go to $11,000 than it would be to let the few farms that already get $50,000 in deficiency payments to go to $100,000. But this is for 1 year only. If it passes, I hope that the Senator from Arkansas would join a number of us in this body that have requested the Agriculture Committee to hold hearings on the question of these deficiency payments.

About a year ago, Senator SIMPSON and I introduced an amendment which would reduce the deficiency payments from $50,000 maximum to $25,000 maximum and then spread out the money we have available to the smaller farms. At that time, as chairman of the Agriculture Subcommittee, Senator COCHRAN agreed that hearings would be held on this issue. They were not held for one reason or another.

I am wondering if the Senator from Arkansas would agree to join that request to that subcommittee to look into the question of the targeting of these deficiency payments.

Mr. BUMPERS. The answer to the question is, without reservation or any equivocation, I would be happy to do that.

Mr. President, I ask unanimous consent that we return to the Bumpers amendment for the purpose of getting into a short colloquy with the Senator from Kansas.

Mr. HATFIELD. Mr. President, I ask unanimous consent that we now return to the Bumpers amendment in order to dispose of it. We will then return to the Ford amendment. Senator BUMPERS' amendment would be pending.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, I am not interested in putting the Senate to a vote on this. The Senator from Kansas and the Senator from North Carolina this morning, and I think the Senator from Mississippi, share my view on this thing, and with those agriculture leaders in the Senate and their commitment that we will get this on the PIK bill if we can get it up this time, if we cannot whenever we can get it up, with that understanding, if I could get that confirmation, I would be happy to pull my amendment down.

Mr. COCHRAN. Mr. President, will the Senator yield?

Mr. BUMPERS. I am happy to yield.

Mr. COCHRAN. Mr. President, as pointed out earlier today, there is a problem of trying to attach this amendment to this bill. The Agriculture Appropriations section is not in this continuing resolution. This amendment does apply to appropriations under the jurisdiction of that subcommittee.

The second problem is we are in the midst of a discussion right now about how to provide for inhand payment to farmers in excess of these dollar limitations. That exemption from the limitation is in both the House-passed bill now, and we are trying to make it a part of the Senate bill.

I would suggest that it would be more appropriate to discuss this amendment in connection with the PIK program legislation than on this bill. I cannot give the Senator, though, assurance that his amendment will be included in the PIK legislation because there are 99 other Senators here, and they will have something to say about that.

Mr. BUMPERS. Mr. President, I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, let me say I agree with the distinguished Senator from Mississippi, but I say to the Senator from Arkansas we are going to try to get in the PIK bill when it leaves the Senate. Whether it ends up and becomes law will depend on the attitude of the House and other things. It may not end up with $100,000. It may be somewhat less.

The Senator from Kansas has been in this battle a long, long time. I understand the problem outlined this morning by the Senator from Arkansas, and I am certainly willing to help.

Mr. COCHRAN. Mr. President, if the Senator will yield once more, I wish to assure him again that I will support the amendment. I am for the content of that amendment and I congratulate him for bringing it to the attention of the Senate.

Mr. BUMPERS. Mr. President, the Agriculture Committee chairman is not here. He said as much this morning also.

With that kind of interest in this and support for it, then I ask unanimous consent—I do not think we have gotten the yeas and nays—but I ask unanimous consent that I be permitted to withdraw my amendment.

The PRESIDING OFFICER. The Senator has the right to withdraw the amendment.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. HATFIELD. I thank the Senator from Arkansas for his cooperation on this. This has been one of the very tedious ones, but he certainly has assisted a great deal.

Mr. President, I believe we now return to the Ford amendment, do we not?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. I ask that we do that.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. HATFIELD. Excuse me.

The Senator is seeking recognition. I yield to the Senator.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HATFIELD. I am happy to.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that I might speak for 2 minutes immediately preceding the final passage of the resolution.

Mr. HATFIELD. I am happy to. I do not think the Senator has to ask for unanimous consent. I am happy to make sure that the Senator does have the time necessary.

Mr. HARRY F. BYRD, JR. I thank the Senator.

UP AMENDMENT NO. 1559

Mr. HATFIELD. Mr. President, I yield 2 minutes to the Senator from Kansas to comment on the Ford amendment now that we are back on the Ford amendment.

Mr. DOLE. Mr. President, as I understand, the Senator from Kentucky has completed his debate; is that correct?

Mr. FORD. No; I still have 4½ minutes remaining.

Mr. DOLE. Mr. President, let me say, first of all, I am not unsympathetic to what the Senator from Kentucky wishes to do, but I think we have to be very realistic on what we are doing.

If we want to do all of everything suggested by Members of Congress, someone is going to have to pay. In this case, as in most cases, it is the Federal Government and the American taxpayers.

What we are doing, if we accept this amendment, is making unemployed railroad workers with less than 10 years seniority eligible for Federal supplemental unemployment compensation benefits.

This amendment would make unemployed railroad workers with less than 10 years of seniority eligible for the Federal supplemental unemployment compensation (FSC) program. The benefits and the administrative costs would be financed out of general revenues at a cost of $85 million, according to the railroad retirement board. There will be an additional cost for administrative expenses of at least $750,000.

In my opinion, there is no case for making railroad workers eligible for FSC benefits financed by the General Treasury. It has not happened in the past and I do not see any reason for it happening now. It might be a good thing to do if we had $85 million that we do not need in a million other places.

As my colleagues on the Labor Committee know, since that is the Senate committee with jurisdiction over railroad workers and their programs, railroad unemployment insurance (RRUI) has always been treated separately from the rest of the unemployment insurance program by the Congress and the executive branch.

The Federal railroad unemployment insurance system became effective January 1, 1939, under legislation worked out jointly between the railroads and the railroad unions, with the assistance of the chairman of the railroad retirement board. Since all States had covered railroad workers, the act provided for the transfer to an unemployment insurance account in the Federal unemployment trust fund of contributions made by the railroads.

This railroad workers unemployment system is administered by the railroad retirement board which is composed of representatives from railroad labor, railroad management, and the public.

It has always been entirely within the railroad industry and now to come to the Federal Government and say we have to have $85 million would be a sharp departure. As sympathetic as everyone may be, this should be addressed by the Senate in this context.

If the Senator wishes to restore longer benefits for workers a more appropriate way, I am sure the Senator himself will admit, is to amend the railroad unemployment insurance law and provide a trigger for extended benefits for that program.

The Senator's amendment is not only on massive legislation on an appropriations bill but unprecedented action by Congress. Again, we all understand the need but I am not certain we are in a position to rewrite the law that has been on the books since 1939.

Railroad employers pay contributions on a different wage base than that used by other employers and also contribute at different rates than the average of all nonrailroad employers. There is no experience rating in the railroad UI system.

Financing for the RRUI benefits is always provided entirely from within the railroad industry. Basically, railroad labor and management reach agreement on what the RRUI program should be, and subsequent Federal legislation reflects the agreement. The duration of the benefits depends on the individual's seniority.

It is important to emphasize that railroad unemployment insurance is completely separate from the Federal/State unemployment insurance program:

RRUI has separate legislation, financing, rules for qualification, benefit duration, benefit amount, administration, and operation.

Railroad unions have long supported this individual nature for the program. Railroad unions opposed the administration's proposal to put railroad workers under the Federal/State UI system and to abolish the separate RRUI system as part of the 1982 railroad retirement reforms.

Administering FSC for RRUI claimants would be difficult. The State employment security agencies that pay FSC to other claimants are not presently involved in any way in paying RRUI benefits. Because the systems are organized and operate entirely separately, evenhanded administration of the special requrements for FSC claimants would be very difficult and expensive to attain.

Even though the gentleman from Kentucky has proposed that the railroad retirement board in Chicago administer the benefits under the FSC program in the same manner as they pay present RRUI benefits, there is still a large administrative burden and cost to the Federal taxpayer.

As I understand the railroad unemployment insurance system, the only unemployed railroad workers who are not currently eligible for benefits beyond 26 weeks are those with less than 10 years seniority. Unemployed railroad workers may receive up to 1 full year of benefits if they have more than 15 years of seniority.

Workers with 10 years or less service lost eligibility to benefits beyond 26 weeks because of the repeal of the national trigger for the extended benefits (EB) program. The railroad retirement board in Chicago interpreted that repeal to apply also to the "on " indicator for RRUI benefits beyond 26 weeks.

If the Senator wishes to restore eligibility to railroad workers for a longer benefit duration, a more appropriate way, as the Senator himself would admit, would be to amend the railroad unemployment insurance law to provide a trigger for extended benefits for that program. Such legislation is, of course, in the jurisdiction of the Labor Committee. There may be some reluctance to go that route as the railroad unemployment trust fund is currently insolvent, already owing the Federal Treasury more than $300 millon. But the Federal Treasury is itself insolvent.

Finally, I would remind my colleagues that the new Federal supplemental unemployment compensation benefits are limited to those under the Federal/State UI system, just as all previous temporary Federal unemployment benefits have been, for example, the FSB programs of 1974–78. No Federal supplemental benefits have ever been paid to workers under the railroad unemployment insurance system. This is not the time to change that precedent.

I urge my collegues to defeat this amendment.

I yield briefly to the distinguished Senator from New Mexico.

The PRESIDING OFFICER. Will the Senate please be in order? Those people who are not conducting business appropriate to what the Senate is discussing please conduct their business elsewhere.

The Senator from New Mexico is recognized and is entitled to be heard.

Mr. DOMENICI. Mr. President, I shall be brief. I concur with the distinguished Senator from Kansas.

Mr. HATFIELD. Mr. President, how much time does the Senator wish to have yielded to him?

Mr. DOMENICI. Two minutes.

Mr. HATFIELD. I yield 2 minutes to the Senator from New Mexico.

We are under a time agreement, are we not?

The PRESIDING OFFICER. Four and a half minutes remain to the Senator from Oregon.

Mr. HATFIELD. I yield 2 minutes to the Senator from New Mexico.

The PRESIDING OFFICER. The Senator from New Mexico has 2 minutes.

Mr. DOMENICI. I apologize to my distinguished chairman of the Appropriations Committee. I was unaware of that. I just returned to the Chamber. I will take 2 minutes.

I concur with the statements that the distinguished Senator from Kansas has made, but I also think that the Senate should know that for the better part of the last 2 years the railroad unions of the United States have on each and every occasion fought to keep their respective approach to benefits separate and apart. Now what has happened instead of going and amending the trigger in the railroad unemployment compensation provisions of this country, which is the way to do it so we could be consistent and have railroad workers and the railroad industry share in the unemployment compensation and its extension and costs now having failing to do that arguing that they should remain separate and fund themselves today in an appropriations bill. We are going to change the law and make them subject to the supplemental unemployment compensation laws of the general nature of the United States.

I do not think we should do it. It is legislation on appropriations, $85 million is just the beginning of the cost. We will now have set the precedent. You leave them alone when it is good for them. You merge them with the rest of the people when they need you, and they do not have to come up with their share of the cost. The rest of the people do. I hope we do not do it.

Mr. FORD. Mr. President, I yield myself 1 minute.

You know, one day is one day and another day is the next. The other day the distinguished Senator from New Mexico said we have an emergency. He moved to give us a budget waiver. He gave hundreds of millions of dollars to unemployed workers in the generel economy. But now when we propose assistance for the unemployed railroad worker, to give him some help, they say, no, and they do not say they do not need help. They say it is a separate fund.

It should also be pointed out that the $85 million figure, is a gross figure for benefit costs. We must make adjustments for savings in food stamps being paid to unemployed workers, and for taxes that are imposed on unemployment benefits. Based on this will reduce the cost about 50 percent. So we are really talking about $42 million instead of $85 million.

All I ask is that we be fair to the unemployed railroad worker.

I reserve the remainder of my time.

Mr. President, I ask unanimous consent that the distinguished Senator from Delaware (Mr. BIDEN) be added as a cosponsor, the distinguished Senator from Maine (Mr. MITCHELL) be added as a cosponsor, the distinguished Senator from Minnesota (Mr. DURENBERGER) be added as a cosponsor, the distinguished Senator from Missouri (Mr. EAGLETON) be added as a cosponsor, the distinguished Senator from Nebraska (Mr. EXON) be added as a cosponsor, the distinguished Senator from Michigan (Mr. RIEGLE) be added as a cosponsor, and the distinguished Senator from Ohio (Mr. METZENBAUM) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOLE. Is all time needed to be yielded back for a point of order to be made?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. Mr. President, I yield back whatever time I have. If the Senator from Kentucky needs any more time, I will yield to him.

Mr. FORD. I know what the Senator is getting ready to do. I think he is going to make a point of order. He has not done so on other amendments and I hope he does not here.

Mr. President, if that is what the Senator from Kansas wishes to do, I am glad to give him the opportunity to do it. Therefore, I yield back the remainder of my time.

Mr. DOLE. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Does the Senator from Oregon yield back his time?

Mr. HATFIELD. I yield back my time.

The PRESIDING OFFICER. The Senator does yield back his time.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas to lay on the table the amendment of the Senator from Kentucky. On this motion, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

I further announce that, if present and voting, the Senator from Pennsylvania (Mr. HEINZ), would vote "nay".

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Colorado (Mr. HART), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Rhode Island (Mr. PELL), are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON), would vote "nay."

The PRESIDING OFFICER (Mr. SIMPSON). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 47, nays 46, as follows:

[Rollcall Vote No. 449 Leg.]

YEAS—47

Abdnor	Boschwitz	Chafee
Andrews	Brady	Cochran
Armstrong	Byrd,	Cohen
Baker	Harry F., Jr.	Danforth

Denton	Humphrey	Pressler
Dole	Jepsen	Quayle
Domenici	Kassebaum	Rudman
East	Kasten	Schmitt
Garn	Laxalt	Simpson
Gorton	Long	Stafford
Grassley	Lugar	Stevens
Hatch	Mattingly	Symms
Hatfield	McClure	Thurmond
Hawkins	Murkowski	Tower
Hayakawa	Nickles	Wallop
Helms	Packwood	Warner

NAYS—46

Baucus	Exon	Nunn
Bentsen	Ford	Percy
Biden	Glenn	Proxmire
Boren	Heflin	Pryor
Bradley	Hollings	Randolph
Bumpers	Huddleston	Riegle
Burdick	Inouye	Roth
Byrd, Robert C.	Johnston	Sarbanes
Cannon	Leahy	Sasser
Chiles	Levin	Specter
D'Amato	Mathias	Stennis
DeConcini	Matsunaga	Tsongas
Dixon	Melcher	Weicker
Dodd	Metzenbaum	Zorinsky
Durenberger	Mitchell	
Eagleton	Moynihan	

NOT VOTING—7

Cranston	Heinz	Pell
Goldwater	Jackson	
Hart	Kennedy	

So the motion to lay on the table Mr. FORD's amendment (UP No. 1559) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. FORD. Mr. President, I move to lay that motion on the table and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. GLENN), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "nay".

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 47, nays 45, as follows:

[Rollcall Vote No. 450 Leg.]

YEAS—47

Abdnor	Garn	Murkowski
Andrews	Gorton	Nickles
Armstrong	Grassley	Packwood
Baker	Hatch	Pressler
Boschwitz	Hatfield	Quayle
Brady	Hawkins	Rudman
Byrd, Harry F., Jr.	Hayakawa	Schmitt
Chafee	Helms	Simpson
Cochran	Humphrey	Stafford
Cohen	Jepsen	Stevens
Danforth	Kassebaum	Symms
Denton	Kasten	Thurmond
Dole	Laxalt	Tower
Domenici	Lugar	Wallop
East	Mattingly	Warner
	McClure	Weicker

NAYS—45

Baucus	Exon	Mitchell
Bentsen	Ford	Moynihan
Biden	Hart	Nunn
Boren	Heflin	Percy
Bradley	Hollings	Proxmire
Bumpers	Huddleston	Pryor
Burdick	Inouye	Randolph
Byrd, Robert C.	Johnston	Riegle
Cannon	Leahy	Roth
Chiles	Levin	Sarbanes
D'Amato	Long	Sasser
DeConcini	Mathias	Specter
Dixon	Matsunaga	Stennis
Durenberger	Melcher	Tsongas
Eagleton	Metzenbaum	Zorinsky

NOT VOTING—8

Cranston	Goldwater	Kennedy
Dodd	Heinz	Pell
Glenn	Jackson	

So the motion to lay on the table the motion to reconsider was agreed to.

SURFACE TRANSPORTATION ACT OF 1982

NOTICE OF INTENTION TO ENTER MOTION TO RECONSIDER VOTE BY WHICH CLOTURE MOTION WAS REJECTED

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, under the provisions of rule XIII, I enter a motion to reconsider the vote by which cloture was defeated on H.R. 6211, the Surface Transportation Act of 1982.

Mr. HUMPHREY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. What is the pending business?

The PRESIDING OFFICER. The pending business is the continuing resolution.

Mr. BAKER. Mr. President, might I explain, I am not now making the motion. Under the provisions of rule XIII, the motion that I intend to make is now entered and will be noted on the calendar of motions. But this does not displace the continuing resolution. It has no effect on the pending measure or on anything else that is now before the Senate. It is not a motion. It is a notice, really, of my intention, which I am now doing. I am entering a motion which will be disposed of at a later time.

FURTHER CONTINUING APPROPRIATIONS, 1983

Mr. HATFIELD. Mr. President, I yield to the Senator from Idaho for the purpose of an amendment. After this is completed, we are down to the last four amendments. We have the yeas and nays ordered on three of them and we have a good understanding on the fourth one.

UP AMENDMENT NO. 1562

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 1562.

At the appropriate place in Title I insert the following new section:

"Sec. . Notwithstanding any other provision of this joint resolution, there is appropriated to the Department of the Interior $3,000,000 for National Park Service construction."

The PRESIDING OFFICER. May we please have order in the Chamber? Those who wish to converse, please go to the cloakroom.

Mr. BAKER. Mr. President, will the Senator yield to me for a moment?

Mr. McCLURE. I am happy to yield to the majority leader.

Mr. BAKER. Is there a time limitation on the Senator's amendment?

The PRESIDING OFFICER. There is none.

Mr. BAKER. Mr. President, could I have the attention of the Senate for a moment?

The PRESIDING OFFICER. We will have order, please.

EXPRESSION OF HOPE FOR A CIVILIZED AND DECENT SCHEDULE

Mr. BAKER. Mr. President, the minority leader pointed out to me, and correctly, that with the happy news brought to us by the chairman of the Appropriations Committee there appear to be only four more amendments before we can reach final passage of the continuing resolution, some may have the impression that that is all there is for today. I am sorry to say that is not the case.

Mr. President, as Members know, the highway bill, the gasoline tax bill, automatically recurs as the pending business on the disposition of this measure. At that time, Mr. President, it is my hope that we can proceed promptly and rapidly with this matter and maintain a civilized and decent schedule for the rest of this day.

But, just so no one is under any misapprehension, they should know that, with the completion of the continuing resolution, there will be another action sought on the highway bill and Senators should be aware of that.

Mr. SARBANES. Will the majority leader yield for a question?

Mr. BAKER. Yes, I yield for a question.

Mr. SARBANES. Given the days we have been through recently, I am not altogether sure that we any longer know what a "civilized and decent schedule" is. I wonder, since the majority leader used that reference, if he could perhaps elaborate for us a little bit on what now constitutes a "civilized and decent schedule."

Mr. BAKER. Yes, Mr. President, a "civilized" schedule means 8 o'clock, and "civilized and decent" means 10 o'clock. [Laughter.]

If we can do that, we will try very hard. But there are certain things that I must do in order to try to get this matter before the Senate. I am not now promising that we will do it. I am not promising a rose garden. I told the President the other day that I promised him a rose garden and nothing else. In this case, I am not promising anything. I am going to try hard to do that.

Mr. DECONCINI. Will the leader yield?

Mr. BAKER. Yes.

Mr. DECONCINI. It is my understanding that you are not making any promises. In not making any promises, does that mean we might stay here for an extended period of time?

Mr. BAKER. There is an old saying in Tennessee, "Let's not borrow trouble." I really do not anticipate that, I do not want that, and I do not plan on it.

Mr. DECONCINI. I think it could be arranged so we do not stay all night.

Mr. BAKER. Yes; it could be arranged so we so not stay all night. And it is my devout wish we do not stay all night and I do not expect to stay all night.

Mr. HART. Will the leader yield?

Mr. BAKER. I yield to the Senator from Colorado.

Mr. HART. Mr. President, as one who supported the majority leader in his efforts to move this bill along—that is to say the highway gas tax—and understanding the difficulties of his position and the pressures he is under, I wonder if he might explain to this Senator what is so almighty important for the future of this Republic about getting this bill passed?

Mr. BAKER. Mr. President, I am not sure that any Senator could speak for the entire Senate. I can only speak for myself in saying that this is an important piece of legislation. In my view and judgment, we should address it. In my opinion, we should conclude a disposition of this measure, one way or the other, before we complete this session. I think, as soon as we do the continuing resolution, we should proceed with that.

The reason we are doing some things tonight, I say to my friend from Colorado, is that the provisions of the rules simply require that I must do some things before this day is out.

Mr. President, I am not here to say that every Senator will vote for this measure. I am prepared to say that we should dispose of it and not see it go because it was interrupted in the process.

Mr. HART. Mr. President, if the majority leader will yield 1 minute further, there is a point, and the point is being reached very quickly by this Senator, that that bill is not that important to this Senator, and I just wish to say to the leader, as far as I am concerned, when we get to that point I do not think that bill should be passed.

Mr. BAKER. I thank the Senator for his opinion.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. BAKER. Mr. President, I yield now to the Senator from Maryland.

Mr. SARBANES. Mr. President, I wish to say that it is my recollection, and if I am mistaken I wish to be corrected, that the majority leader and the minority leader early in the fall were in agreement that there should not be a special session of Congreses, as I recall, a lameduck session, that we are here essentially because the President said that we should have a lameduck session.

I think it has become very clear and increasingly so all the time that the majority leader and the minority leader were indeed correct in their assessment at that time, and we could have, in effect, taken care of the essential matters then.

Is my recollection correct?

Mr. BAKER. Mr. President, there have been few times in my memory when I have agreed with the Senator from Maryland more enthusiastically.

Mr. BUMPERS. Mr. President, will the majority leader yield for an additional question?

Mr. BAKER. Mr. President, let me first yield to the junior Senator from Arkansas.

Mr. PRYOR. Mr. President, earlier in the afternoon, about 5 p.m., and I think the majority leader possibly was out of the Chamber, I did inform my colleagues that at 7:30 this evening if we had not resolved or disposed of the continuing resolution I would move for third reading of the continuing resolution.

I am wondering if I might propound this question to the manager of the bill: Is it his feeling now that we will be at final passage by 7:30 p.m. this evening?

Mr. HATFIELD. Mr. President, will the Senator repeat his question?

Mr. PRYOR. Will we be by 7:30 this evening at the position of moving to final passage?

Mr. HATFIELD. I would hope that if we can get back to the resolution.

Mr. PRYOR. If we would sit down, in other words.

Mr. HATFIELD. Yes. Then we would probably have four back-to-back rollcall votes within about 10 minutes.

Mr. PERCY. Could they be 10-minute votes?

Mr. HATFIELD. I hope the leadership can ask for 10-minute votes.

Mr. PRYOR. Could we set a time certain for a vote?

Mr. BAKER. Oh, we sure can.

Mr. President, I even heard that while I was engaged in conversation with another Senator.

Could I ask my friend, the minority leader, if the excellent suggestion of the Senator from Arkansas may be presented.

Mr. PRYOR. I should have made that 6 days ago.

Mr. BAKER. Mr. President, it was suggested that we try now to establish a time certain for final passage. We have only four more amendments that I know of. We have time limitation on three of the four. I see that the distinguished author of all four of those amendments is here as are other Senators.

Mr. McCLURE. I have one pending.

Mr. BAKER. In addition to the one pending.

Mr. McCLURE. I thank the majority leader.

Mr. BAKER. I am prepared to make a unanimous-consent request that no other amendments be in order except the four amendments and the amendment now pending and that final passage of the bill occur not later than 7:30 p.m.

Mr. METZENBAUM. Mr. President, reserving the right to object, and I shall object. There is no such time limitation to dispose of the fourth amendment.

Mr. HATFIELD. We have arranged about 5 minutes on the fourth amendment.

Mr. METZENBAUM. I understand that. It does not necessarily mean it will be disposed of on the fourth one. If it is disposed of I have no problem with respect to the time limit, and there be no further amendment, should the Senator from North Carolina be more successful than I anticipate he will be, but then I would not want to foreclose a time-limit agreement.

Mr. BAKER. Mr. President, the Senator from Arkansas understands part of our dilemma now.

Let me say we will try to finish by 7:30 p.m. I think we will have a better chance if we do not spend a lot more time on this effort.

Mr. HATFIELD. Mr. President, I yield to the Senator from Idaho.

UP AMENDMENT NO. 1562

Mr. McCLURE. Mr. President, the amendment which I have sent to the desk provides an additional $3 billion

for the National Park Service for construction. This is a portion of the Blue Ridge Parkway which has been under construction for 20 or 22 years. Two bridges that remain for the completion of the project have been holding up completion because they were not designed. The design was not complete and had not been acceptably completed.

Those designs are now complete and we are ready to go forward with that construction.

This amount of money, however, will not provide for both of the bridges. It will provide money enough for one of the bridges and we would look forward to the next appropriation cycle for the opportunity to complete that construction which has been underway for so long.

This has been examined on both sides of the aisle. I believe it has been approved on both sides of the aisle.

Mr. JOHNSTON. Mr. President, acting for Senator BYRD, the ranking minority member of the Interior Appropriations Subcommittee, I wish to endorse the amendment, endorse the conference report, compliment the chairman for his skill, hard work, perseverance, and patience, and also compliment the staff and ask for quick action.

Mr. McCLURE. Mr. President, I ask unanimous consent that the Senator from North Carolina (Mr. HELMS) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I ask unanimous consent that the Senator from Louisiana (Mr. JOHNSTON) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Idaho.

The amendment (UP No. 1562) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REMAINING AMENDMENTS

Mr. HATFIELD. Now, Mr. President, I believe we have four amendments remaining which we have temporarily laid aside; three amendments which we have temporarily laid aside by the Senator from North Carolina, one relating to the pay cap, one relating to the Law of the Sea, and one relating to IDA.

On the fourth one, on which there has not been a time agreement, it is my understanding that the Senator will raise it and after a brief statement will make a motion to table.

So we should be able to then finish up at the end of these four.

UP AMENDMENT NO. 1556—PAY CAP

The Senator from North Carolina has already spoken to three on which we have had a time agreement. I yield to the Senator this time for the purpose of completing action on his pay cap amendment. If he wishes any additional time, I am ready to yield back my time.

Mr. HELMS. I yield back my time.

Mr. HATFIELD. I yield back my time.

POINT OF ORDER

Mr. BAKER. Mr. President, I make the point of order that the amendment should fail because it constitutes legislation on an appropriations bill.

The PRESIDING OFFICER. The point of order is sustained. The amendment is held to be legislation on an appropriations measure.

Mr. BAKER. I thank the Chair.

The PRESIDING OFFICER. The question now recurs——

Mr. HELMS. Just a minute, Mr. President. Just a second.

Mr. HATFIELD. Mr. President, may I yield to the Senator from North Carolina?

Mr. HELMS. Mr. President. I apologize. I was conferring with another Senator.

Would the Chair tell me what transpired during the last minute?

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. HELMS. I yield.

Mr. ROBERT C. BYRD. I sought recognition.

The PRESIDING OFFICER. The Senator has recognition.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from West Virginia has the floor.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, does the Senator from North Carolina seek recognition?

Mr. HELMS. I do, and I thank the majority leader.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I do not like the perception of holding anybody's feet to the fire on the pay cap, but I can think of nothing that has riled the tempers of the American people more than their perception about a whole lot of skulduggery going on around here with backdoor increases.

Now, what I have is an amendment at the desk, which has been ruled legislation on an appropriation bill, that simply says that Congress must vote on the question of raising its own pay. The House has done that. But I am saying that the Congress ought to exercise its constitutional responsibility in that regard. I appeal the ruling of the Chair.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Is the appeal debatable, Mr. President?

The PRESIDING OFFICER. Under these circumstances, the appeal is not debatable, absent unanimous consent.

Mr. BAKER. Mr. President, I ask unanimous consent that I may proceed for 1 minute.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. BAKER. Mr. President, I respect the Senator from North Carolina and what he does, as I respect him in everything he does. And I know he understands why I felt that I must make a procedural motion that a point of order would lie against his amendment, because it is legislation on an appropriation bill. He has the perfect right to appeal that ruling of the Chair. I intend in just a moment to make a motion to table the appeal.

The Senate, Mr. President, will be voting on a procedural issue of whether or not to support the Chair in the appeal. The effect of a tabling motion, if it succeeds, would be to support the Chair. I believe the ruling of the Chair was correct.

Mr. HELMS. Will the Senator yield?

Mr. BAKER. Yes, I yield.

Mr. HELMS. There is confusion because of a mixup in our checking with the Parliamentarian. Incidentally, gentlemen and ladies, the Parliamentarian is a great human being and I do not see how he handles the workload he does, but the original signal I received was the amendment, as submitted, was in order, and that is the reason I feel obliged to appeal the ruling of the Chair. I thank the majority leader.

Mr. BAKER. I thank the Senator.

Mr. President, I move to table the appeal, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk called the roll.

Mr. MELCHER (after having voted in the negative). Mr. President, on this vote I have a live pair with the Senator from Connecticut (Mr. DODD). If he

were present and voting, he would vote "yea." I have voted "nay." Therefore, I withdraw my vote.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. GLENN), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator Rhode Island (Mr. PELL) are necessarily absent.

I further announce that if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea."

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PELL) would vote "Nay".

The PRESIDING OFFICER (Mr. GORTON). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 62, nays 29, as follows:

[Rollcall Vote No. 451 Leg.]

YEAS—62

Andrews	Hart	Packwood
Baker	Hatfield	Percy
Bentsen	Hayakawa	Proxmire
Boschwitz	Huddleston	Pryor
Brady	Inouye	Quayle
Bumpers	Jepsen	Riegle
Byrd, Robert C.	Johnston	Roth
Chafee	Kassebaum	Rudman

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Melcher, against.

NOT VOTING—8

Cranston	Goldwater	Kennedy
Dodd	Heinz	Pell
Glenn	Jackson	

So the motion to lay on the table the appeal of the ruling of the Chair was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion was agreed to, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, may I request Senators to please remain on the floor. We can move these votes along rather quickly if we do not have to wait for Senators to arrive for a rollcall vote. I urge Senators to remain close to the floor in order to finish up this joint resolution.

Mr. President, we temporarily laid aside a second amendment offered by the Senator from North Carolina relating to the law of the sea. It was the second amendment he presented, I believe.

No; it was the IDA amendment.

The PRESIDING OFFICER. The amendment before the Senate is unprinted amendment No. 1557.

VOTE ON UP AMENDMENT NO. 1557

Mr. HATFIELD. Mr. President, I am ready to yield back the time.

Mr. HELMS. I yield back my time.

The PRESIDING OFFICER. All time has been yielded back.

Mr. HATFIELD. Mr. President, I move to lay the amendment on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from North Carolina. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. DECONCINI. Mr. President, on this vote I have a pair with the distinguished Senator from Connecticut (Mr. DODD). If he were present and voting, he would vote "aye." If I were at liberty to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), and the Senator from Pennsylvania (Mr. HEINZ), are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. GLENN), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Rhode Island (Mr. PELL) are necessary absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) and the Senator from Rhode Island (Mr. PELL) would each vote yea.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 46, nays 44, as follows:

[Rollcall Vote No. 452 Leg.]

YEAS—46

Andrews	Hart	Percy
Baker	Hatfield	Proxmire
Baucus	Hollings	Pryor
Biden	Huddleston	Riegle
Boschwitz	Inouye	Rudman
Bradley	Kassebaum	Sarbanes
Bumpers	Leahy	Sasser
Burdick	Levin	Simpson

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

DeConcini, against.

NOT VOTING—9

Cannon	Glenn	Jackson
Cranston	Goldwater	Kennedy
Dodd	Heinz	Pell

So the motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. QUAYLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, the Senator from North Carolina now has the third amendment upon which there has been a time agreement relating to IDA.

Mr. HELMS. Mr. President, in order to save time, I will propound a unanimous-consent request. If there is a need for it, I could explain it and take a little more of the Senate's time.

Mr. HATFIELD. Mr. President, if the Senator would yield just for a moment, I urge the Senate to grant this unanimous-consent agreement because it expedites us to the resolution of the issue. I support the Senator's request at this point for this unanimous-consent agreement.

UP AMENDMENT NO. 1558

Mr. HELMS. Mr. President, I ask unanimous consent that I be permitted to modify the amendment, and I send the modification to the desk.

Mr. BRADLEY. Mr. President, reserving the right to object. Which amendment is this?

Mr. HATFIELD. It is the IDA amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (UP No. 1558, as modified) follows:

At the end of the pending business add the following:

"SEC. . Notwithstanding any other provision of this joint resolution, not more than $700,000,000 shall be appropriated for the International Development Association."

Mr. HATFIELD. Mr. President, I yield back the remainder of my time.

Mr. HELMS. I yield back the remainder of my time.

Mr. HATFIELD. Mr. President, I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon (Mr. HATFIELD) to table the amendment of the Senator from North Carolina (Mr. HELMS). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BOREN (when his name was called). Mr. President, on this vote I have a pair with the distinguished Senator from Connecticut (Mr. DODD). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withhold my vote.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. GLENN), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) and the Senator from Rhode Island (Mr. PELL) would each vote "yea."

The PRESIDING OFFICER (Mr. MATTINGLY). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 44, nays 46, as follows:

[Rollcall Vote No. 453 Leg.]

YEAS—44

Baker	Hart	Moynihan
Bentsen	Hatfield	Packwood
Biden	Hayakawa	Percy
Boschwitz	Hollings	Riegle
Bradley	Huddleston	Rudman
Brady	Inouye	Sarbanes
Bumpers	Kassebaum	Sasser

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Boren, against.

NOT VOTING—9

Cannon	Glenn	Jackson
Cranston	Goldwater	Kennedy
Dodd	Heinz	Pell

So the motion to lay on the table UP Amendment No. 1558, as modified, was rejected.

Mr. HATFIELD. Mr. President, we have one more amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. HATFIELD. Mr. President, what is the question now before the Senate?

The PRESIDING OFFICER. The question is on the adoption of the amendment.

Mr. HELMS. I suggest we voice vote it.

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. HELMS. I ask unanimous consent that the yeas and nays be vitiated.

Mr. BRADLEY. Mr. President, will the Senator use his microphone so that we may hear what he is saying?

Mr. HELMS. If the Senate does not wish to have another recorded vote, I ask unanimous consent that the order for the yeas and nays be vitiated.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The question is on agreeing to the amendment of the Senator from North Carolina.

The amendment (UP No. 1558) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, we have one last amendment. That is the amendment that the Senator from North Carolina is prepared to offer. There is no time limitation on this amendment.

The Senator from North Carolina and I have discussed the possible handling of it. The Senator wishes to make a brief presentation to explain his amendment. Then I will proceed to offer a motion to table the amendment.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

UP AMENDMENT NO. 1563

(Purpose: To protect private and religious schools from bureaucratic harassment)

Mr. HELMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 1563.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 89, line 4, of the joint resolution strike the words "expressly so provided herein." and insert in lieu thereof the following: "expressly and explicitly so provided herein.".

"SEC. . None of the funds available under this Resolution may be used to carry out any revenue ruling of the Internal Revenue Service which rules that a taxpayer is not entitled to a charitable deduction for general purpose contributions which are used for educational purposes by a religious organization which is an exempt organization as described in section 170(c)(2) of the Internal Revenue Code of 1954.

"SEC. . None of the funds available under this Resolution may be used to carry out proposed revenue procedure 4830-01-M of the Internal Revenue Service entitled "Proposed Revenue Procedure on Private Tax-Exempt Schools" (44 F.R. 9451 through 9455, February 13, 1979, F.R. Document 79-4801), and proposed revenue procedure 4830-01 of the Internal Revenue Service entitled "Proposed Revenue Procedure on Private Tax-Exempt Schools" (43 F.R. 37296 through 37298, August 22, 1978, F.R. Document 78-23515), or parts thereof.

"SEC. . None of the funds made available pursuant to the provisions of this resolution shall be used to formulate or carry out any rule, policy, procedure, guideline, regulation, standard, court order, or measure causing the loss of tax-exempt status to private, religious, or church-operated schools under section 501(c)(3) of the Internal Revenue Code of 1954 unless in effect prior to August 22, 1978."

The PRESIDING OFFICER. The Senate will please be in order so the Senator from North Carolina may be heard.

Mr. HELMS. I thank the Chair.

Mr. SYMMS. Mr. President, will the Senator yield for a parliamentary inquiry to the Chair?

Mr. HELMS. Certainly.

Mr. SYMMS. Mr. President, have the yeas and nays been ordered on final passage of the continuing resolution?

The PRESIDING OFFICER. They have not.

Mr. SYMMS. I request the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SYMMS. I thank the Chair.

I thank the Senator from North Carolina.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I think Senators may want to consider this amendment, because I doubt any State in the Union is not affected, and certainly a lot of schools across the country are affected.

Mr. President, unlike funding measures since 1979, the continuing resolution now under consideration for fiscal year 1983 does not contain the so-called Ashbrook and Dornan amendments. These amendments stopped funding of IRS activities, guidelines, and regulations which would have required quotas and affirmative action programs for many of the Nation's private and religious schools. I today offer these amendments so that Congress can keep in place the funding restrictions which have been in effect since 1979.

Mr. President, the question is relevant as to which came first, the wholesale breakdown of moral values in our society or the collapse of these values in our schools? Millions of Americans pray every day for a rebirth of the spiritual values that made us a Nation in the first place. If the Spirit of God were to rouse 200 million Americans to action, there is no describing the greatness in store for this country, or the blessings forthcoming to nations now held captive—if and when, once again, our Nation is rededicated to the cause of freedom under God's law.

Mr. President, religious schools and church-operated schools across this land seek to foster in their young students the spiritual and moral values which made the United States a leader of nations. Sadly, Mr. President, our Nation's private, religious, and church-operated schools have come under constant attack form the Federal bureaucracy.

The Internal Revenue Service first launched its fullscale attack on our Nation's private schools and religious schools in 1978. In its proposed revenue procedure of August 22, 1978, the IRS placed thousands of innocent private and religious schools across the Nation under a presumption of guilt of racial discrimination. These schools were required to prove their innocence by implementing social engineering techniques such as racial quotas and affirmative action programs.

After a nationwide protest erupted, the IRS responded in February 1979, with a proposal that was still more vague and arbitrary. It was hardly reassuring to the American public when the IRS announced that it alone would determine the guilt or innocence of schools based on all the facts and circumstances. The standards set forth were wholly subjective and capricious leaving private schools and religious schools to the whim of IRS bureaucrats.

Mr. President, the verdict was in before the investigations began. The IRS moved to establish Federal controls over private, religious schools, and churches. Who can say that the motives of those who conspired to implement this unconstitutional scheme were none other than to cynically violate the civil rights of religious minorities, parents, churches, and schools.

With justification, the IRS bears its full share of the blame for the present crisis which it helped to create. Yet, the full story of this sorded matter is a darker and more complicated chapter bureaucratic and judicial abuse of power than even the sharpest critics of the IRS have revealed. What unfolds is a story of collusive litigation, a sweetheart suit in which the IRS was the defendant. Instead of defending, the agency worked to support the interests of the plaintiffs who were suing the agency.

A review of the history of the well-known Green and Wright cases is instructive. The plaintiffs asked for court orders which would have required the IRS to implement quotas and affirmative action guidelines for tax-exempt schools that were established or expanded during periods of desegregation of nearby public schools. The IRS defended its position only during the early phases of this litigation, and by 1978, the agency was actively promoting the cause of its supposed adversaries, the Green and Wright plaintiffs.

This became sweetheart litigation at its worst. Those participating at one time included IRS officials, attorneys from the Tax Division of the Justice Department, the U.S. Commission on Civil Rights, the old Department of Health, Education, and Welfare, the Lawyers Committee for Civil Rights, and other attorneys who use the Federal judiciary as a tool for radical activism. To this must be added the names of judges from the U.S. district court and the U.S. Court of Appeals for the District of Columbia who have also participated in the sweetheart litigation.

Mr. President, I now want to go through briefly what is a long and complicated history of the Green and Wright litigation.

CHRONOLOGY OF GREEN AND WRIGHT CASES

What follows is the sequence of the most significant developments in the Green and Wright litigation:

In 1971—The U.S. Supreme Court upheld the U.S. district court ruling in Green against Connally that tax exemptions for private segregated schools in Mississippi violate Federal public policy. IRS had already made the provisions of this order apply to the entire Nation in Revenue Ruling 71-447.

July 23, 1976—The original Green plaintiffs reopened the case asking for a drastic new order prohibiting tax exemptions to schools that were established or expanded during periods of desegration in nearby public school districts.

July 30, 1976—The Wright plaintiffs from six States outside Mississippi filed an almost identical suit. The cases were later consolidated and caused the crisis which exists today.

May 10, 1977—The IRS strongly defended against the arguments of the Green and Wright plaintiffs. The IRS noted that there were many valid reasons that a school could be established or expanded other than an intent to discriminate.

June 28, 1978—The IRS reversed its position and began to advocate the same position as the Green and Wright plaintiffs, that is, that the IRS should adopt new regulations. The litigation became a sweetheart suit at this time. The IRS reached an agreement with the plaintiffs in unethical secret meetings in which the only third party intervenor in either case was neither notified of nor allowed to participate in the lengthy out-of-court settlement.

August 22, 1978—The IRS published proposed revenue procedure on tax-exempt schools in the Federal Register in an attempt to settle the sweetheart suit; 150,000 letters of protest were received by the IRS. The IRS held hastily called hearings, but totally disregarded arguments pointing out its total absence of statutory authority, constitutional problems, and unfair presumptions of guilt which require harsh quotas and affirmative action requirements in order for a school to prove its innocence.

February 13, 1979—The IRS published its revised proposed revenue procedure for tax-exempt schools in the Federal Register. It was generally considered to be worse than the original proposal because it was more subjective and vague, and it indicated a total disregard for the legal arguments that were presented against it.

September 29, 1979—The Treasury Appropriations Act containing the Ashbrook and Dornan amendments became law. The amendments prohibited funds for implementation of any

parts of the proposed revenue procedures.

October 25, 1979—The IRS filed a memorandum aimed at getting the Wright case dismissed so that it could lose in Green. The IRS suggested that the court might either declare the Ashbrook and Dornan amendments to be unconstitutional or interpret them narrowly, to permit the implementation of new, more stringent rules. The IRS argued that the difficult issues should be more properly addressed in the Green litigation where the question of standing had been decided. Note: This was the key to the IRS scheme to get the court to order the agency to violate the amendments. The IRS wanted to have the Wright case dismissed because it has a troublesome intervenor, and it would excite too much public opposition if an order were immediately handed down which applied to the entire Nation. The Wright case was consolidated with the Green case at this time, and the IRS was especially desirous of having the Wright case dismissed in order to lose the Green case. The IRS plan was apparently to get prededent established in Mississippi in the Green case which would provoke less national opposition. After precedent could be established in Mississippi, the standards set for that State would be applied to the entire Nation as the IRS did following the 1971 Green against Connally decision.

November 26, 1979—Judge George Hart followed the IRS suggestion and dismissed the Wright case. The Wright plaintiffs appealed, but the IRS was not free to proceed to the Green case.

November 27, 1979—The IRS filed its legal memorandum in the Green case that clearly showed its desire to lose. This is the smoking gun of the sweetheart suit. The IRS defense argued that defendants strongly believe that additional guidelines in this area was needed. Furthermore, the IRS claimed that compliance with the restrictions may raise serious constitutional questions. Again the IRS argued that the amendments may be overcome by a court either declaring the riders unconstitutional, or interpreting the riders narrowly, to permit the implementatin of new, more stringent rules. These incredible arguments were made so that the IRS would lose its case. The evidence is clear that the IRS actively promoted the interests of the Green plaintiffs at the expense of Government interests.

May 5, 1980—Judge George Hart ruled against IRS in the Green case. Yet, the IRS made no effort to appeal because it had wanted to lose.

June 12, 1980—Judge Hart clarified his order of May 5.

July 9, 1980—Judge Hart denied a motion to intervene by First Presbyterian Church of Jackson, Miss. This was extremely unfair because neither the IRS nor the Green plaintiffs had anything to lose in the lawsuit, and the church could lose its tax exemption because of their sweetheart suit.

July 10, 1980—Assistant IRS Commissioner S. Allen Winbourne filed an affidavit in U.S. district court describing IRS enforcement of the Green order. All the activities that he described were prohibited by the Ashbrook and Dornan amendments, and they involved substantial illegal expenditure of funds.

May 14, 1981—After lengthy and inexcusable refusals to allow church schools to intervene in the Green case, Judge Hart finally allowed Clarksdale Baptist Church to intervene—another church remains unfairly excluded. Judge Hart is only allowing "discovery," however.

June 18, 1981—The U.S. Court of Appeals for the District of Columbia ruled 2 to 1 that the Wright plaintiffs have standing to sue the IRS. This reversed Judge Hart's decision of November 1979, and it means that a court order for the entire Nation is now distinctly possible.

Mr. President, I would mention for the record that Judge George Hart's abuse of First Presbyterian Church Day School of Jackson, Miss., has continued. Over a year ago Judge Hart again denied the church school the right to intervene in the Green case. It is widely believed that Judge Hart has grown even more petulent toward the school because the U.S. court of appeals sanctioned his misconduct by upholding his previous denial of the school's motion to intervene.

Mr. President, the Presbyterian Church Day School has been told to comply with the May 5, 1980 order in Green against Miller because it was covered. Yet, the school was told that it could not intervene because it was not covered. Is the school covered, or is it not? The court cannot have it both ways.

The civil rights of parents, churches and schools were clearly violated in the sweetheart suit by the IRS, Justice Department, the Green attorneys and the Federal judges who sanctioned the staged litigation. It is beyond dispute that the Green case was collusive, not adversarial, litigation. Judge Hart himself acknowledged this in the almost identical case of Wright against Miller. Hart wrote on October 25, 1979 that the IRS and Wright plaintiffs seemed closely allied.

It is equally true that the IRS and the Green plaintiffs were closely allied. When the House Ways and Means Subcommittee on Oversight held hearings in February 1979, there was no difference on any major points in the testimony of the IRS Commissioner and the Lawyers Committee for Civil Rights who were suing the agency on behalf of the Green plaintiffs.

The ranking minority member of the House Ways and Means Subcommittee on Oversight with jurisdiction over the IRS gave five incontrovertible reasons why the Green case was a collusive sham. Congressman PHILIP CRANE noted:

It is beyond dispute that the litigation was collusive, not adversarial. The evidence is clear from court records and public statements by IRS officials.

First. The IRS publicly advocated the same position as the *Green* and *Wright* plaintiffs; namely, that the IRS should adopt the new regulations.

Second. The IRS agreed to implement the proposed revenue procedure in secret meetings with the *Green* and *Wright* plaintiffs. The only third party intervenor was unethically excluded, indeed, he was not even notified of these closed meetings to which the IRS admitted to having spent "many hundreds of hours." No disciplinary action has yet been taken against those attorneys who participated in this abuse of the intervenor's rights.

Third. The IRS lobbied against the Ashbrook and Dornan amendments.

Fourth. Instead of defending the amendments, the IRS suggested legal interpretations that would lead the Federal court to ignore the amendments, and cause the IRS to lose its case. The IRS lost.

Fifth. The IRS made no effort to appeal its loss in the *Green* case because it desired the results obtained by losing.

When like-minded plaintiffs and defendants use the Federal judiciary to obtain mutually desired results, it should attract the attention of Congress. Whenever such sham litigation is used to usurp the legislative authority of Congress, strong action is required.

After the IRS first published its proposed revenue procedure for tax-exempt schools on August 22, 1978, voices were raised appealing to Congress halt this grab for power. Congress responded in 1979 with the passage of the Ashbrook and Dornan amendments which prohibited funds for implementation of the proposed regulations. This should have ended the problem.

In utter contempt of Congress, the IRS made sweetheart arguments in the D.C. District Court so that it could lose in the Green case and be ordered to violate both the Ashbrook and Dornan amendments.

A Federal court of appeals said that the Ashbrook amendment was not intended to restrict IRS authority to carry out court orders. *Wright* v. *Regan*, 656 F. 2d 820 (1981). In this the appeals court was in error. Nonetheless, in order to make it clear that the Ashbrook amendment blocked IRS from carrying out such orders, an express prohibition to that effect was added in 1981 and again is included in my amendment today.

Article I, section 9, clause 7 of the Constitution vests the appropriation power of the Federal Government in the Congress, and in the Congress

alone. The Constitution thus clearly denies to the courts the power to order the expenditure of Federal funds where Congress has forbidden that expenditure. Congress, by these amendments, is serving notice on the courts that it is exercising its constitutionally conferred appropriation power in order to deny the Internal Revenue Service the authority to impose unnecessarily burdensome requirements upon tax-exempt schools.

These amendments provoke no constitutional crisis between the branches of Government. To the contrary, the Constitution has already settled the matter most explicitly: Congress is to have exclusive power over the purse. If the courts will but respect the Constitution, the crisis evaporates. As James Madison stated in the 58th Federalist:

> The power over the purse may, in fact, be regarded as the most complete and effectual weapon with which any constitution can arm the immediate representatives of the people, for obtaining a redress of every grievance, and for carrying into effect every just and salutary measure.

The people have won a redress for their grievances, but now attorneys in a sweetheart suit and Federal judges are showing contempt for Congress. Congress must not tolerate such defiance. These Federal courts have not acted as courts of law but as instruments for social engineering schemes. The misconduct surrounding the Green and Wright cases has now reached intolerable limits.

Mr. President, in passing these amendments, Congress will again be asserting its authority as the only branch of Government that has the power to legislate and appropriate funds. Passage of these amendments reaffirms the principle that Congress, not the Federal courts, has exclusive power of the purse.

Mr. President, let me briefly explain on a technical basis what the three parts of my amendment do.

The first section protects the existing deductibility of general purpose contributions by parents who send their children to religious schools. Revenue Ruling 79-99 sought to disallow the deductibility of contributions by parents to religious schools to the extent tuition allegedly did not cover fair market value of the schooling. Such fair market value of private schooling is extremely difficult to determine, and it is made even more difficult by the fact that many religious schools are run by administrators and teachers who do not expect fair market value salaries. This section will prevent the IRS from attempting to compute a fair market value of tuition and disallowing that amount of contributions by parents.

The second section prohibits funds for the proposed revenue procedures of August 22, 1978, the revised proposed revenue procedure of February 3, 1979, or parts thereof. The proposed procedures were affirmative action regulations and quotas that placed tax-exempt schools under a presumption of guilt and required them to prove their innocence. These regulations were so harsh and unfair that churches and schools could lose their tax exemption even if they had never turned away a single minority student. There has been no formal revocation of these procedures by the IRS to date.

The third section makes comprehensive the restriction in the second section. The third section prohibits the use of funds to implement any rule, policy, procedures, and so forth, that would cause a tax-exempt school to lose its exemption unless same were in effect prior to the date of the above procedures, August. 22, 1978.

Mr. President, this section is a straightforward limitation on the power of the Internal Revenue Service to adopt quotas and affirmative action guidelines for tax exempt schools that require the schools to prove their innocence. I think it is a fair amendment. I do not think it ought to be tabled. I agree with Senator HATFIELD that a move to table it is allowed under the rules. But I hope it will not be tabled so we can pass this by a voice vote.

Mr. GRASSLEY. Will the Senator yield?

Mr. HELMS. I yield.

Mr. GRASSLEY. I thank the Senator for yielding. I rise in support of this amendment. This language has been in every appropriation bill, it is my understanding, since 1979.

Mr. HELMS. That is correct.

Mr. GRASSLEY. It was not included in the House because of the procedural problems of getting a recorded vote. It is very important that this language be continued. I feel that on the Senate side, the Committee on Finance, as we considered pushing tax credit legislation in hearings, considered this antidiscrimination language in the context of current law which contains this language. I can see no reason not to include this sensible prohibition. I urge all my colleagues to continue in the appropriation bills the language that has been on the books, the language of fairness, since 1979.

Mr. HELMS. I thank the Senator.

Mr. DECONCINI. Will the Senator yield for a question?

Mr. HELMS. Certainly.

Mr. DECONCINI. It is my understanding that under the amendment of the Senator from North Carolina that if a donor goes to a church and makes a contribution, normally that would be deductible from his income tax. And then if the church uses part, all, or some of that money collected at offering time in support of its schools, that then the donor might question or has been questioned whether or not he or she can deduct that from their income tax as a church gift. Is that correct?

Mr. HELMS. That is correct.

Mr. DECONCINI. I thank the Senator very much.

With the other two sections of the amendment, I did not realize how significant this really is because there are many, many religious schools which are fine institutions and that keep tutions very low in order that middle income and poor people can send their children to those schools. They must look someplace to subsidize the cost of teachers, and that is done from the main offering given in support of that faith. I thank the Senator, and I intend to support his amendment.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Members should understand the full implication of this amendment. I do not think it is a question of whether you support religious schools, because I do not believe that is the issue which is before the Senate in this amendment.

We have to recognize that this whole issue arises by reason of the fact that the Civil Rights Act of 1964 provided, in title VI, a Federal policy against support for private schools that practice racial discrimination.

Title VI of the Civil Rights Act made it clear that our tax laws could not be wed to support discriminatory policies. The issue came up in a case in 1971 called Coit against Green. The issue arose when parents of some black schoolchildren in Mississippi brought a class action suit claiming that the granting of tax exemptions to Mississippi schools that excluded blacks on the basis of race violated the Internal Revenue Code or, alternatively, violated the U.S. Constitution. This case was decided in their favor.

In 1970, the IRS in adopting revenue policies announced that it could no longer legally justify giving tax-exempt status to private schools which practiced racial discrimination, nor could gifts to such schools be treated as charitable deductions for income tax purposes.

So much for the law, and the law is clear.

Let us talk not only about the law, but let us talk about what this amendment does, because this amendment goes far further than the issue I have just raised. And it touches some on serious constitutional concerns.

The real question on this amendment relates not to religious schools nor even any other issue with respect to schools, but, rather, relates only to the responsibilities of the U.S. Senate to Congress as far as denying the Internal Revenue Service the responsi-

bilities that we have placed upon them. It goes to the point of saying that the IRS may not make rulings in connection with certain schools.

It also relates directly to the question of tax deductibiltiy as pertains to taxpayers. The relevant language:

None of the funds may be used to carry out any revenue ruling which rules that a taxpayer is not entitled to a charitable deduction for general purpose contributions which are used for educational purposes by a religious organization which is exempt under section • • •

And then it describes the section of the Internal Revenue Code.

Think of that. That applies not only to the religious schools, but it is a broad based prohibition about using any Internal Revenue funds that have to do with the enforcement of laws pertaining to taxpayers taking charitable deductions through certain kinds of educational institutions.

If we say that, how broad can we go? Are there no limits? Should we also perhaps be suggesting that the IRS may not make decisions in cases involving the matter of organized crime, with respect to abusive tax shelters, with respect to the qualifications of other tax-exempt charities, with respect to pension funds, or any one of a host of other areas?

When all is said and done, we have a tripartite type of government. We have the legislative, the executive and the judicial.

The executive has acted. They have met their responsibilities through the IRS. The administrative decision has been made. What they do is subject to appeals at the IRS and then in the courts. The courts have acted as well in connection with this particular matter.

But now what we are saying is that we are going to undo all of that. How? By going to the Finance Committee and saying to the Finance Committee we ought to change the law?

Oh, no, we are not saying anything at all about going down the route that is normal legislative procedure. It is quite obvious that this is legislating on an appropriations bill. But the Senator from Ohio did not deem it advisable at this point to raise the question with respect to that matter because I think that the Senate ought to consider, in all reality, what we are doing.

The second part of the amendment provides that "None of the funds available may be used to carry out proposed revenue procedures"—and then it details what those procedures are.

Is that really the way we want to change the law of this country? Do we want to change it by just saying the funds may not be used by the IRS to carry out their responsibilities that we gave them?

They did not make up these responsibilities. Nobody claims they are doing anything illegal. Quite the contrary, the Supreme Court has already said that what they are doing is legal. But we are saying we are not going to use the funds for any such purposes, and they are prohibited from doing so.

Then when you get to the third paragraph of this proposal, it provides that "None of the funds made available pursuant to the provisions of this resolution shall be used to formulate or carry out any rule, any policy, any procedure, any guideline, any regulation, any standard, and"—listen to this—"court order." Even the court orders cannot be carried out under this prohibition, regardless of how legal they are. They are prohibited from using funds so that the courts may carry out their orders. "Or measure which would cause the loss of tax exempt status in private religious or church-operated schools unless in effect prior to August 22, 1978."

I am frank to say I do not understand the significance of that particular date, but I am clear in understanding that the IRS could make no ruling whatsoever. Any court decision unless made prior to August 22, 1978, would not be valid. We would be denying the IRS and the courts their jurisdictional rights.

Mr. President, I respect, on the floor of the Senate, the right of each of us to have his or her own views on any one of a number of subjects. But when all is said and done, we come here to abide by the Constitution. Included in abiding by the Constitution is the oath that we take to uphold the Constitution.

If we were to pass this particular proposal of the Senator from North Carolina—and there may be merit to it, though I disagree that there is merit. Nevertheless, it belongs before the Committee on Finance.

Certainly, you do not accomplish it by doing that which would appear to this Senator to be unconstitutional, by saying we are going to deny funds to the courts to enforce their orders, or deny funds to the IRS to enforce its orders or to make new regulations or promulgate new rules or policies or procedures or guidelines.

I say, Mr. President, it is not a question of your view on the issue about which my friend from North Carolina speaks. The issue before this body has to do with whether or not we are going to recognize this tripartite kind of government, whether we are going to recognize that we live under a constitutional form of government, which has executive, legislative, and judicial branches, or whether we are just going to abrogate that entirely.

I hope this body will see fit to support the motion of the Senator from Oregon to table this amendment.

Mr. DOLE. Mr. President, this amendment has a laudable goal, preventing the unwarranted harassment of private schools by overzealous IRS officials. Fortunately, I believe the amendment is unnecessary at the present time.

The present IRS Commissioner and the present administration have clearly indicated their opposition to the Carter administration's ill-considered procedures for enforcing the IRS policy against granting tax exemptions for discriminatory schools.

Of course, as we all know, the administration has questioned whether additional legislation is needed to authorize the IRS policy adopted in 1970 that denied tax exemption for racially discriminatory schools. That question is now pending before the Supreme Court.

The Court should decide that issue by July of 1983. In the meantime, IRS activity in the area is subject to the control of a court order entered by the D.C. Circuit Court of Appeals. Currently, no policy or procedural changes can be expected until the Supreme Court rules.

Unfortunately, while this amendment is unnecessary—because of the current freeze on changing IRS policy one way or another—the amendment could have unforeseen adverse consequences.

The amendment prohibits the IRS from following binding court orders. That could cause a constitutional confrontation between Congress and the courts that would put the IRS and Treasury in an impossible bind.

The amendment also could have the effect of mooting out the Bob Jones University case, pending before the Supreme Court. The only thing keeping that case live and justiciable is a court of appeals order entered early this year. If the IRS is barred from following that court order, the controversy in that case might be eliminated, and the Supreme Court might lose jurisdiction. That would send the issue back to Congress for resolution.

While Congress can certainly deal with that issue, the Senator from Kansas would prefer to hear the Supreme Court's definitive interpretation of current law before considering any new legislation.

Finally, as chairman of the Finance Committee, I must express my disapproval of the use of appropriations riders to modify IRS policies and procedures. Certainly in the present context, where this amendment is unnecessary, the Finance Committee should be given an opportunity to review this matter, after hearing from the Supreme Court, before the Senate takes further action.

SUMMARY OF POINTS ON THE HELMS AMENDMENT DEALING WITH PRIVATE SCHOOLS

Amendment is unnecessary, since the current administration is not pursuing the policies that led in the past to abuses of private schools' rights;

Amendment could have unforeseen, dangerous effects, since it may require

IRS officials to violate court orders issued after enactment of the resolution;

Amendment could have the effect of forcing IRS to violate the 1982 injunction that kept the Bob Jones case before the Supreme Court. This would force Congress to deal with this difficult area without the benefit of a definitive Supreme Court ruling on the tough constitutional and statutory issues involved;

Tax policy should not be determined through appropriations measures.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

Mr. MOYNIHAN. Mr. President, I move to lay the amendment on the table.

The PRESIDING OFFICER. Will the Senator withhold? Is there a sufficient second for the yeas and nays?

There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. Mr. President, I move to lay the amendment on the table and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

VOTE ON UP AMENDMENT NO. 1563

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from North Carolina. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. GLENN), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) and the Senator from Rhode Island (Mr. PELL) would each vote yea.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 61, nays 29, as follows:

[Rollcall Vote No. 454 Leg.]

YEAS—61

Baker	Eagleton	Nunn
Baucus	Exon	Packwood
Bentsen	Ford	Percy
Biden	Gorton	Pressler
Boren	Hart	Proxmire
Boschwitz	Hatfield	Pryor
Bradley	Hawkins	Quayle
Brady	Hollings	Riegle
Bumpers	Inouye	Roth
Burdick	Kassebaum	Rudman
Byrd, Robert C.	Kasten	Sarbanes
Chafee	Leahy	Sasser
Chiles	Levin	Specter
Cochran	Lugar	Stafford
Cohen	Mathias	Stennis
D'Amato	Matsunaga	Stevens
Danforth	Mattingly	Tsongas
Dixon	Melcher	Weicker
Dole	Metzenbaum	Zorinsky
Domenici	Mitchell	
Durenberger	Moynihan	

NAYS—29

Abdnor	Hatch	Murkowski
Andrews	Hayakawa	Nickles
Armstrong	Heflin	Randolph
Byrd, Harry F., Jr.	Helms	Schmitt
	Humphrey	Simpson
DeConcini	Jepsen	Symms
Denton	Johnston	Thurmond
East	Laxalt	Tower
Garn	Long	Wallop
Grassley	McClure	Warner

NOT VOTING—10

Cannon	Goldwater	Kennedy
Cranston	Heinz	Pell
Dodd	Huddleston	
Glenn	Jackson	

So the motion to lay on the table UP Amendment No. 1563 was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. METZENBAUM. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1564

(Purpose: Making technical correction)

Mr. HATFIELD. Mr. President, just before we go to final passage or third reading, I have four technical amendments merely changing page numbers, inserting new figures that have been acted upon, and this has been cleared from both sides of the aisle, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes unprinted amendment numbered 1564.

Mr. HATFIELD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 18, line 14, strike "$275,350,000" and insert "$375,350,000"

On page 23, line 17, strike "further"

On page 23, line 21, strike "and" and insert "or"

On page 26, line 6, before "97-972" insert "House Report Number"

Mr. HATFIELD. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon.

The amendment (UP No. 1564) was agreed to.

UNANIMOUS-CONSENT AGREEMENT

Mr. HATFIELD. Mr. President, I am going to propound a unanimous-consent request that will relate to the structure of this CR which has been cleared by both sides of the aisle.

Mr. President, I ask unanimous consent that the amendments of the Senate to title II of this joint resolution be deemed as one amendment in the nature of a substitute for the House-passed provisions of that title.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, this motion makes the Senate-passed version of the jobs stimulus portion of the joint resolution (title II) a single numbered amendment, rather than several individual changes. It permits consideration of this portion of the joint resolution as a package, even though alterations of individual portions of that package remain conferenceable. It makes no substantive change to the decisions of the Senate during consideration of the joint resolution.

Mr. President, it will place in conference items which are identical in both the House and Senate versions of the joint resolution, but let me assure the Members that I will do all I can to make sure that the conference committee makes no changes to these items except as absolutely necessary to assure enactment of a jobs stimulus program.

Mr. HATFIELD. Mr. President, I yield 1 minute to the Senator from Virginia who wishes to make a statement.

Mr. HARRY F. BYRD, JR. Mr. President, I shall vote against this continuing resolution; the spending it provides is too great.

But there are other reasons, too. Now for further detail.

Through the years that I have been privileged to serve in this great body, I have tried to choose my words carefully, to speak in a restrained way and not to overstate my arguments, however strongly I may have felt about the issue.

I shall not break that custom today.

But even with all due restraint, I must tell my colleagues that in my view, we stand today, in the Chamber of the Senate, amid the wreckage of congressional budgetary and appropriations policy.

Let us consider where we are.

We have before us a monumental appropriations bill covering all activities of the Federal Government except those included in the three appropriations bills on which final action has been taken. It encompasses 10 appro-

priation bills, and 10 subcommittees. The majority leader told the Senate earlier last evening that the Appropriations Committee considered this legislation for only 4 hours.

No Member of the Senate can fully grasp the contents of this legislation.

It was reported only a matter of hours ago. To a distressing degree, each Senator will be taking a leap in the dark when he casts his vote on this gigantic measure.

We call this legislation a continuing resolution. I think what it is continuing is total fiscal irresponsibility.

Let us be frank about it: There is absolutely no discipline in fiscal matters in the Congress.

In 1981 much was made of the achievement of some $35 billion in so-called budget cuts. Certainly that $35 billion was better than what had routinely taken place through the 1970's. But these alleged reductions were actually cuts in the rate of growth in spending.

As it turned out, when the figures finally came in for fiscal 1982, even the decline in the rate of growth was relatively slight. From a rate of 14 percent in 1981, the spending growth rate in 1982 was 11 percent.

What is really alarming is the road that lies ahead.

The Congressional Budget Office—and the Assistant Secretary of the Treasury—estimate the deficit for fiscal year 1983—the year we are now in, and the year covered by this huge continuing resolution, will be at least $150 billion.

Worse yet, the direction of the deficit in years beyond this one appears to be upward.

If these deficits are allowed to occur—and I see no credible effort afoot to reduce them substantially—any claim that this body, or the House of Representatives, might make to have achieved fiscal discipline or responsibility will rightly be ridiculed by the people.

Already we are in a situation where the reckless spending of the past has piled up a national debt of well over a trillion dollars, resulting in an interest cost of $130 billion. And there is no light at the end of this financial tunnel.

As discouraging as the budgetary numbers are, I find it almost equally distressing that the very process by which we are supposed to achieve fiscal discipline is itself a shambles.

We passed a budget resolution last spring projecting a deficit of $104 billion, a figure now 50 percent higher. The Budget Act requires that by October 1 all 13 appropriations bills be enacted.

What happened? The Congress by October 1 had passed exactly two of the 13 appropriations.

Today, after a recess, an election and 18 days of lameduck session, we stand essentially where we were in early October.

Two essential elements of the budget process, the appropriations timetable and the enactment of a binding second resolution, have been evaded.

The result is the monstrosity which we are now called upon to debate and vote up or down, despite the fact that no Senator can have a full grasp of its provisions and its ramifications.

Continuing resolutions are becoming the rule rather than the exception. Evasion of the terms of the Budget Act has proven habit forming. The use of the continuing resolution makes it easier for Congress to shirk its responsibility to control runaway spending. It camouflages the issues.

I am a realist. I understand that this continuing resolution, or perhaps another resolution if this one is vetoed, will become law. The bad habits of the past few years will be continued, and fiscal responsibility once again will be ignored.

But I say this to my colleagues: This cannot go on. At one point or the other, the issue must be faced.

The spending practices of recent years, and the continued evasion of the strictures of the Budget Act, will lead to calamity.

Back-to-back deficits in the range of $150 billion represent a threat to the very foundations of the American economy.

We must get spending under control. But we are not.

Under the budget resolution approved last May by both the Democratic-controlled House of Representatives and the Republican-controlled Senate, spending programs were put in motion which will increase the national debt by $468 billion between April 1982 and September 1985, a period of 3 years and 5 months.

Thus, the national debt will increase during that short period of time from $1 trillion 65 billion to $1 trillion 533 billion.

This is a 44-percent increase in 41 months.

Unbelievable, is it not? Obviously, I voted against that budget proposal.

I am an optimist by nature and I am encouraged that more and more citizens, and Members of Congress, recognize the need to restrain spending and balance the budget. But there are certain hard facts both the people and the Congress need to ponder carefully.

The basic problem is that Government spending is totally out of control. Let us look at some facts, figures, and troubling questions.

First. Despite assertions by national TV commentators and various special interest groups, Government spending has not been reduced. In fact, even the rate of increase in spending remains virtually undiminished. The cost of Government for fiscal year 1981 rose by 14 percent; the increase for 1982 was 11 percent, a reduction to be sure, but not a significant one.

Second. The interest on the debt is $130 billion, more than one-half the cost of our entire national defense program. With the 44 percent increase in the debt over the next 3 years and 5 months, obviously the interest burden on the taxpayers will be far heavier.

Third. Is there likely to be any substantial or lasting reduction in interest rates if the Government must borrow 50 percent of all available funds in order to finance its deficit spending, as it is now doing?

Fourth. The present high interest rates are devastating. Unless interest rates are reduced, how can we expect substantial recovery in housing or automobiles—two major elements in our economy?

Fifth. A vital element in economic recovery is confidence in the future, on the part of businessmen, wage earners, and consumers. Will expenditures raising the debt by $468 billion in 3 years and 5 months stimulate confidence? Or will confidence be undermined?

Basically I am an optimist, but I am deeply concerned about the problems created by uncontrolled Government spending.

The struggle to control spending could be made much easier if the Congress would put teeth into the Budget Act. Many Senators, myself included, have submitted amendments to the act designed to make its provisions stronger and more binding, but there has been no action.

I think action in this area is essential.

Only a few days remain in my Senate career. I will not be a part of the process of reforming our budget procedures, or of the struggle in years ahead to get control of runaway Federal spending.

If I had but one message to leave to those who will remain here after I have taken my leave, and to those who will shortly begin their careers in the Congress, it would be this:

Do not be lulled into a sense of complacency about the financial condition of the Government of the United States. It is dangerous, indeed, and the consequences of inaction, or wrong action, could be calamitous for the country we all love so dearly.

Mr. HATFIELD. Mr. President, I yield 2 minutes to the Senator from New Mexico.

CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1983

Mr. DOMENICI. House Joint Resolution 631, as passed by the Senate provides $415.4 billion in new budget authority and $283.1 billion in outlays for fiscal year 1983.

Mr. President, this bill together with outlays from prior-year authority, en-

acted bills, possible later requirements, and adjustments to hold the Appropriations Committee harmless against entitlement changes, puts spending to date below the Appropriations Committee's 302(b) allocation by $7.3 billion in budget authority, but exceeds the allocation by $5.8 billion in outlays.

If the unallocated reductions in the Appropriations Committee's crosswalk are not counted, budget authority is below the allocation by $9.5 billion, but outlays are still over the allocation by $3.3 billion.

There are three areas where the committee is significantly over the 302(b) allocations: The Labor/HHS/Education Subcommittee is over its allocation by $0.8 billion in budget authority and $1.9 billion in outlays, the Treasury/Postal Service Subcommittee is over its allocation by $0.5 billion in budget authority and $1.0 billion in outlays, and title II of the bill funds a new jobs initiative costing $1.3 billion in budget authority and $0.6 billion in outlays that were not included in the Appropriation Committee's 302(b) allocations.

The House also included a jobs initiative in its version of the continuing resolution, providing $5.4 billion in budget authority and $2.9 billion in outlays.

Mr. President, I ask unanimous consent that three tables showing the relationship of the Senate-passed bill to the Appropriations Committee's 302(b) allocation and other details be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

APPROPRIATIONS COMMITTEE STATUS: FISCAL YEAR 1983 [1]

TABLE 1.—PRELIMINARY ESTIMATE: SENATE-PASSED CONTINUING RESOLUTION, HOUSE JOINT RESOLUTION 631

[In billions of dollars]

[1] Language.

Mr. DOMENICI. Mr. President, I have checked with the staff and I think the Senate might be interested in knowing this:

After all the hours of debate the net effect of our deliberations is that we have reduced the $415.5 billion budget added $22 million to budget authority total in the reported bill by $77 million, and in the outlays column, we have increased the $282.8 billion in the reported bill by $313 million.

I compliment the Senate and in particular the chairman and ranking minority member of the Appropriations Committee for their excellent work.

I close by saying I was told by someone that the engrossing clerk was so shocked back there when they got an amendment from the Senate during this debate that really had money in it that they did not even know how to handle it. They had to send someone out to get a member of the Appropriations staff to find out what to do with it.

Mr. President, I thank the chairman for yielding.

(Note: The following statements were made or submitted during the consideration of House Joint Resolution 631 and are printed at this point by request and for purposes of continuity:)

CONGRESSIONAL PAY RAISE

Mr. PRESSLER. Mr. President, during the past few weeks, the Senate has faced many tough issues. Americans have demonstrated their good sense by reacting angrily to a possible congressional pay raise at the same time the Senate is discussing the effects of high unemployment, high heating fuel prices, and increased taxes. People in South Dakota who have contacted my office say this is a poor time for a congressional pay raise and I agree with them.

I wish to commend the Appropriations Committee and its chairman for striking a possible pay raise out of the continuing appropriations resolution.

My stand on the pay issue is well known. I have fought every one since I came to Congress in 1975. I totally disagree with automatic raises under the Executive Salary Cost-of-Living Adjustment Act. As my colleagues know, I took a case to the Supreme Court in 1977 in which I argued that automatic congressional pay raises without a recorded vote are unconstitutional. Unfortunately, the Court did not support my position on this issue. Nevertheless, millions of Americans who oppose backdoor congressional pay raises cannot be wrong. Again, I support the wise action of the Senate Appropriations Committee in deleting the pay raise from this resolution.

FUNDING FOR PEER REVIEW ORGANIZATIONS

Mr. DURENBERGER. Mr. President, let me begin by thanking the distinguished chairman of the Labor/HHS Subcommittee, Senator SCHMITT, for his continued support of the peer review program formally known as the professional standards review organizations. Though there have been a number of attempts to repeal the program, the Appropriations Committee has continued to support the efforts of PSRO's, our new program of peer review will need this support even more.

The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) contained a provision which effectively repealed the PSRO program and replaced it

with a new system which will capitalize on the positive results of effective PSRO's and eliminate many of the problems experienced in the past. Public Law 97-248 permits deregulation of the old PSRO program by establishing a contracting procedure which makes the Government a purchaser of review services. The review services purchased would focus on, first, the necessity and reasonableness of care, second, quality of care, and third, the appropriateness of the setting in which the case is provided.

The need for such review is particularly important in light of the cost contraints placed on hospitals by TEFRA. The report prepared by the Appropriations Committee notes that the continued growth in hospital costs and admissions requires a continued investment in monitoring the appropriateness of expensive hospital care. In order to perform this function the new peer review organizations must have adequate funding.

The legislation before us contains funds for the management of the program and directs the Secretary of HHS to maintain the current admissions review rates for both focused and retrospective reviews without imposing any substantial reduction in average expenditure per review. The Senator from Minnesota expects the Secretary to comply with this direction. I would also hope that the Secretary would inform us fully in May as to the real fiscal requirements of these new organizations. As I noted earlier, adequate funding is absolutely critical to their success.

● Mr. D'AMATO. Mr. President, there is a very serious problem that I would like to raise. After all the careful consideration this committee and the Congress give to the appropriation process, and even after the President signs the legislation into law, we have seen instances where HUD delays the distribution of appropriated moneys. These delays place great strains on the municipal recipients.

One example is in the area of modernization funds. The New York City Housing Authority experiences delays of more than a year before HUD distributes modernization moneys. I am told that most other housing authorities throughout the country have had similar experiences.

These delays fail to carry out the legislation, and delay essential modernization contracts to the point where costs far exceed those anticipated when the modernization was originally decided upon. My office and those of other Senators, including, no doubt, yours, have made efforts to speed up the distribution process. However, most of the modernization funds for fiscal year 1982 have still not been distributed, and the result is terribly damaging to the effort to restore and keep up existing housing stock. Tenants of public housing authorities continue to suffer as local authorities are unable to make necessary repairs.

I urge that in conjunction with this appropriation bill, an effort be made to formalize the concern of the committee, so as to assure that appropriated moneys are distributed promptly and in no event, more than 180 days after the President signs the bill into law.

Six months should give both HUD and the public housing authorities ample time to determine the appropriateness of modernization projects, and to distribute the moneys.

I stress that the money should be distributed and not merely allocated to the HUD regional or area offices. The modernization money should actually be distributed to the public housing authorities within the 180-day period.

Moreover, in most cases, particularly those with substantial modernization contracts, there is a need for the housing authorities to expend startup costs such as advance architectural and engineering moneys early in the process. Accordingly, I urge that HUD consider the economies to be realized by making such moneys available early in the process. Perhaps 5 percent of the requested modernization funds could be made available to the housing authorities within 60 days of their applications to HUD.

Mr. GARN. I appreciate and share your concern. It is evident that housing authorities throughout the country are experiencing significant delays in receiving their modernization funds for fiscal year 1982.

Because of the time constraints facing us, we will not be able to legislate a time limit on HUD, but as chairman of this committee, I will personally contact the Secretary and advise and express the will of the Congress that these funds be distributed in a timely manner within a 6-month period.

I also think your idea about startup money is sound, and I will also convey that position to the Secretary.●

LABOR-HHS-EDUCATION COMPONENTS OF THE CONTINUING RESOLUTION

● Mr. SCHMITT. Mr. President. we have made several fundamental changes in the House version of the continuing resolution, including the jobs proposals in title II.

For the continuing resolution, the House referenced only its House-passed Labor-HHS-Education bill and deemed that it be regarded as enacted. That action, if sustained, would put all of the House priorities into law, and few of the Senate's. The House also referenced its committee report in the statutory language, a step which could have the effect of giving that document and its numerous directives the color of law.

Our recommendation to the Senate is to delete the House language and reference the Senate reported version of H.R. 7205 as if enacted. This makes it clear that we prefer the Senate priorities which seem to have won a good measure of support in this body and with our constituency groups.

This step will put us in a position to "conference" H.R. 7205 with the House within the context of the continuing resolution. We do not anticipate an insurmountable conference and we then can put the agreed-upon provisions in the continuing resolution.

For title II, the House provided $1,634,400,000 for a number of Labor-HHS programs. The biggest was $1 billion for emergency productive jobs, which seems to be a new name for an effort to restart the CETA public service jobs program abolished by Congress last year. In place of these proposals, the committee recommends $279.4 million, consisting of $250 million for vocational training programs authorized under the transition provisions of the Job Training Partnership Act, and $19.4 million for community service employment for older Americans. This brings the total for activities under the Job Training Partnership Act to $4,014,312,000. Of course, all of the House jobs items will be in conference, and we will keep an open mind about whether to agree to any additional funds for such programs as employment services, displaced workers, and Job Corps.

Another fact to keep in mind is that the programs in the regular Labor-HHS-Education bill result in putting thousands of people to work in non-Federal employment, or into training. At the Senate reported level, Head Start alone accounts for some 73,000 jobs in the non-Federal sector. Other examples: Community health centers, 26,300; medicare contractors, 24,300; nutrition for the elderly, 38,000; and so on. Thus the Federal Government plays a major role in stimulating jobs that can lead people into long-term careers.

Mr. President, I believe we have developed a balanced Labor-HHS package that emphasizes important Senate priorities in the regular bill along with prudent increases for lower cost but more effective job and training programs. I am glad to recommend it to the Senate.●

● Mr. QUAYLE. Mr. President, the report on the continuing resolution states that the additional $250 million for employment training is on top of a base of $2.2 billion for vocational training programs under the transition provisions of the Job Training Partnership Act. Am I correct in my understanding that the $2.2 billion referred to includes only the current level for CETA titles II B C, IV A, and

VII, that is, the appropriation and carryforward for these programs?

Am I also correct that the total current level for job training programs is $3.7 billion, the CETA appropriation plus the carryforward?

Mr. SCHMITT. The Senator is correct.●

ADVANCED CAREERTRAINING PROGRAM OF THE JOB CORPS

● Mr. HATCH. As the distinguished subcommittee chairman knows, the Job Corps has been operating a program called advanced career training (ACT) for those graduates of Job Corps programs who have exhibited special talent and motivation. This program allows these young people to receive an additional 1 year of support to attend an advanced vocational school or junior college.

Mr. SCHMITT. The Senator is correct.

Mr. HATCH. I have numerous reports documenting the success of this unique Job Corps program, and I am concerned that it not be lost in the shuffle at the end of the 97th Congress. Would the Senator indicate the Appropriations Committee's intention with regard to this program?

Mr. SCHMITT. I appreciate the Senator from Utah's interest and I can understand his concern for the Job Corps. The Senate version of the continuing resolution provides for maintaining Job Corps funding at the current rate, which is $585.6 million. This amount leaves room to continue related Job Corps programs such as advanced career training.

Mr. HATCH. I thank the Senator for his assurance that there will be funds for ACT, and I will appreciate consideration of the Job Corps during conference.

PUBLIC HOUSING MODERNIZATION, JOBS, AND HUD'S RATE OF PROCESSING FUNDS FOR THE COMPREHENSIVE IMPROVEMENTS ASSISTANCE PROGRAM (CIAP)

● Mr. HEINZ. Mr. President, I rise today in support of the additional funding being provided for the modernization of public housing in America by the Senate Appropriations Committee and the distinguished chairman of the Subcommittee on HUD-Independent Agencies, Mr. GARN. I had planned to offer a floor amendment to accomplish this restoration of funds so I am extremely pleased that the committee has already taken this step.

I believe that this is an excellent use of our Nation's resources in these difficult economic times because the funds will serve several purposes: First, we must provide decent, safe, and warm shelter for our citizens who live in public housing; second, the type of modernization work envisioned by many of us who sought to add funds to the comprehensive improvements assistance program (CIAP) should give priority to weatherization of public housing units, which will keep utility bills down and save energy; and finally, the type of work we envisioned will be labor intensive. The additional funds should create jobs for thousands of unemployed, skilled, and semiskilled workers in our Nation's urban centers.

I am concerned, however, that these additional CIAP funds get out to the public housing authorities quickly, so that residents can stay warm, energy is saved, and unemployed workers can go to work immediately, this winter. I would like to ask my distinguished colleague, the chairman of the HUD Subcommittee, whether he feels that HUD can obligate these funds quickly and whether HUD's area offices can process the CIAP applications more expeditiously than they have done in the past. I ask the chairman what he thinks we can do to expedite the process without writing new legislation. My amendment would have instructed HUD to insure that these additional CIAP funds would be put to work immediately.

Mr. GARN. I share my colleague's concern that the public housing funds provided by the Congress in fiscal year 1981, fiscal year 1982, and fiscal year 1983 be expeditiously committed and work actually commence on these most needed improvements. The needs have been well documented, the funds have been appropriated, and the allocation criteria have been developed. There is really no reason that these funds should not result in immediate modernization of the housing stock and immediate jobs. I have discussed with my colleagues the problems that would be faced if we attempted to mandate standards or procedures, in addition to those currently in existence, for the allocation and obligation of funds.

I do, however, wholeheartedly believe that we should do all in our power to encourage HUD to target funds to those projects that are ready to go and that would immediately result productive employment for a large number of individuals. In this respect, I would also like to encourage public housing authorities to apply for funding for those types of activities that would generate local jobs, especially jobs that might be performed by tenants of the authority.

You can be sure that I will be closely questioning the Department about their efforts in this area of expediting public housing modernization when next they come before my Subcommittee.

Mr. HEINZ. I thank the distinguished senior Senator from Utah. Mr. President, I would, at this point, like to elaborate upon the multiple benefits that quick obligation of these additional funds could create.

By HUD's own estimates, there is a need for over $10 billion for the modernization of the Federal public housing stock. These funds are allocated to the great majority of the 2,800 public housing authorities located in cities and towns throughout the Nation, and help to insure that public housing is brought up to decent, safe, and sanitary living conditions. By spending the needed funds for the modernization of public housing, HUD also insures that the investment of the Federal Government in over 70 billion dollars' worth of public housing is maintained.

Modernization funds are administered under the comprehensive improvements assistance program (CIAP) which emphasizes the careful planning for the use of these funds to bring about comprehensive improvements at individual public housing developments, rather than piecemeal efforts.

Expansion of the public housing modernization program provides an exceptionally good way of creating additional jobs at a time when national unemployment rates are high, especially in the construction industry. Most public housing authorities (PHA's) have already made plans for modernization which have not yet been funded due to lack of funds. These plans are ready to go, and can be begun quickly if additional funds are made available by HUD expeditiously. In addition to being a quick way to create new jobs, the modernization efforts are not make-work projects. They represent improvements that would need to be accomplished at some time in the near future in any case, and the benefits of such improvements accrue not only to tenants and PHA's but to the Federal Government itself.

Modernization is highly labor intensive, as compared to major capital improvements projects such as building highways, bridges, tunnels, and water and sewer projects. As much as 70 percent of a typical modernization job can go for labor costs. The total number of jobs that would be provided by $1 billion in outlays would be 37,575, assuming that all of these are full-time jobs at union wages. In fact, many of these jobs would be part time, and would require semiskilled nonunion wages, so the number of jobs created would be considerably larger, and these do not count indirect employment created by the production and delivery of materials to the sites. Many PHA's are able to hire skilled tenants, or to persuade contractors to hire tenants with appropriate skills for the modernization work. This brings further benefits to the tenants and to the PHA's themselves, since the increased tenant income produces additional rents for the authorities.

The distribution of units in need of modernization corresponds roughly to those parts of the country where unemployment is highest, another ad-

vantage in using modernization as a jobs stimulus measure.

Funds administered under the CIAP program can be issued under one of four separate categories: First, comprehensive modernization; second, special purpose modernization; third, emergency modernization; and fourth, home ownership modernization. The special-purpose and emergency categories would represent the quickest ways of getting these funds into action. Projects with a specific energy conservation focus can be funded under the special-purpose category, provided that the PHA has completed an energy audit.

These types of projects can include weatherization, replacement of windows and doors, weatherstripping, insulating heating pipes and equipment, adding storm windows and storm doors, and other items with a quick payback in terms of reduced energy costs. Another major item for which funds could be targeted is moderate rehabilitation for units which are vacant but in reasonably sound condition, in order to return those units to occupancy. These types of projects require both skilled and semiskilled workers, and have a short startup time, thereby increasing their employment impact.

In my home State of Pennsylvania, the public housing authorities of Philadelphia, Pittsburgh, and Harrisburg have indicated that they have great and well-documented needs for modernization funding and that they could certainly put additional funds to productive use. Philadelphia has documented immediate modernization needs totaling more than $98 million. A separate study conducted for HUD in 1980 by Perkins & Will and the Ehrenkrantz Group found that the Nation's PHA's need more than $8 billion for modernization. HUD has since, as I indicated earlier, adjusted that figure upward to over $10 billion for necessary modernization work including substantial energy retrofitting. All three Pennsylvania PHA's also report that weatherization and hiring of skilled and semiskilled tenants are both high priorities.

In closing, Mr. President, I remind the Secretary of HUD that as a member of the Senate Housing Subcommittee, I will be especially interested in monitoring the rate at which CIAP funds are obligated and the speed with which HUD's area offices put these funds to work. I will keep available our amendment to expedite the process. We all want decent shelter for tenants of public housing, energy conservation, and jobs for unemployed workers.●

● Mr. ABDNOR. Mr. President, the chairman of the subcommittee is aware also of my concerns with respect to the serious problems faced by the Douglas School District in Box Elder, S. Dak. The superintendent of this district, which is impacted heavily with children whose parents live and/or work on the Ellsworth Air Force Base, has indicated that due to the Department's refusal to consider as "comparable districts" two South Dakota impact districts which resemble in many important respects the characteristics of the Douglas School District, the rate of payment Douglas receives under section 3(d)2(B) of Public Law 81-874 is not sufficient to sustain his district.

Much to my frustration, the Department of Education has failed even to confirm the possibility that this district, which is taxing at the maximum rate allowed and will reach shortly its legal debt limit, may be forced to close its doors during the current fiscal year.

Mr. SCHMITT. I am certainly aware of the Senator's concerns with respect to the financial difficulties facing the Douglas School District. The Department should certainly be making every effort to address this problem and take every action possible to mitigate the dilemma in which the Douglas School District finds itself.

Mr. ABDNOR. I wish to thank the subcommittee chairman for his persistent efforts to assist me in addressing this matter. I recognize that he, too, has encountered a number of obstacles with respect to the state of disarray this program is in.

I will continue to pursue further this matter with Department officials.●

THEATER NUCLEAR FORCE MODERNIZATION

● Mr. WARNER. I would like to engage the distinguished chairman of the Defense Subcommittee in a colloquy concerning the implications of this legislation for the NATO efforts to modernize its theater nuclear deterrent.

It is my understanding that the stated intent of both the Senate and House Appropriations Committees in making their respective reduction of the ground-launched cruise missile and Pershing II programs was that such reduction not impinge upon our ability to meet the agreed-upon initial operational capability (IOC) dates for these missiles. I would ask the Senator, am I correct in that understanding?

Mr. STEVENS. The Senator is correct.

Mr. WARNER. The reasons for these reductions then are programmatic and budgetary in nature rather than an indication of a lessening of American commitment to NATO and to the enhancement of our theater nuclear deterrent starting as planned in 1983?

Mr. STEVENS. That's right. Speaking only for the Senate Appropriations Committee, the cuts we made in the GLCM program were driven by both the overall budgetary constraints under which the committee was forced to operate and our belief that, in light of provisions in terms of the contract under which these missiles are being produced, economies could be effected in this program without having an adverse impact upon the planned deployments of GLCM's needed to meet the IOC.

As for the House Appropriations Committee, in light of the difficulties being experienced with the Pershing II missile test program, they recommended the deletion of the funds sought for procurement. The committee's stated position is that such reduction will not result in a slip in the IOC for this system in Germany. Similarly, I understand that the somewhat sharper cut made in the ground-launched cruise missile program by the House Appropriations Committee was not intended to prejudice fulfillment of the introduction of these weapons as agreed upon by NATO.

Mr. WARNER. I thank the Senator for those assurances. I think the overwhelming majority of the Congress would be extremely reluctant to see this highly important program undercut at this most sensitive juncture. The implications of such an action for theater and strategic nuclear arms negotiations U.S. leadership of the alliance, and most importantly of course, the maintenance of a credible deterrent to Soviet aggression, would be profound and adverse.

Mr. STEVENS. I fully concur with the Senator's assessment.

Mr. WARNER. While it would be my hope that the Senate position would prevail on both the ground-launched cruise missile and Pershing II issues in conference, recognizing that certain compromises may have to be made, I want to be sure that the distinguished chairman of the subcommittee is apprised of two aspects of the House action that could—notwithstanding the stated intent—adversely affect the initial operational capability of both the ground-launched cruise missile program and the Pershing II missile. The House made a reduction of $10.772 million in procurement associated with ground-launched cruise missile communications systems. I have been informed that unless money is available for that purpose in fiscal year 1983, the ground-launched cruise missile initial operational capability of December 1983 could not be met.

I am also informed that in the absence of $34 million in procurement associated with the Pershing II missile system in fiscal year 1983, a delay of 12 months will be experienced in the Pershing II's IOC. These funds are required for procurement of initial spares, refurbishing of training missiles used in development tests and engineering services in support of de-

ployment of the fiscal year 1982 hardware.

I wanted to call these potential problems to the attention of my friend from Alaska and I am confident that when he meets with his counterparts from the House Appropriations Committee in the upcoming conference that—at a minimum—the funds required to make good both committees' professed intent not to undermine the long-range theater nuclear force modernization programs, will be appropriated.

Mr. STEVENS. I am happy to assure the distinguished Senator from Virginia of the intent of this Senator to work for a position in conference that fully supports the desire of both members of the Senate Appropriations Committee and the House Appropriations Committee to prevent the result of our actions from being one that impinges upon the U.S. ability to deploy the first Pershing II's and GLCM's in accordance with the NATO agreement of December 1979.

Mr. WARNER. I thank the Senator.●

IMPACT AID

● Mr. ABDNOR. Mr. President, the distinquished chairman of the Subcommittee on Labor-HHS and Education, Mr. Schmitt, has worked diligently with me in an effort to insure a more equitable distribution of impact aid moneys. Although the language the full committee agreed to will go a long way toward insuring an adequate level of funding for the heavily impacted districts across the Nation, which have been especially hard hit by reductions in funds for this program, a number of inequities still persist.

As the Senator is aware, it has been necessary to again base fiscal year 1983 payments on a percentage of districts' fiscal year 1981 payments. In view of the fact that enrollments have fluctuated over the last 2 years, this situation has created numerous inequities. Districts which have experienced an increase in the enrollment of federally connected children are not being compensated on dime for those newly enrolled children.

Superintendents from impacted schools in my State were told recently by the Director of the Division of Impact Aid that the Department of Education is considering presently a proposal to change the current method for computing districts' local contribution rates. This proposed change, I am told, would affect districts in some 20 States which utilize "comparable" districts as a means for establishing their local contribution rates.

Further, I understand that since the Department has not been successful in its efforts to defend its current method for establishing rates in recent litigation, it plans to pursue a change in the rate formula during the current fiscal year.

Since such a change in policy would not be subject to the scrutiny either of the public or Congress, does the Senator agree that the Department would be acting contrary to the wishes of this committee should it take any action which, by altering the method for establishing payments for the current fiscal year, would reduce below the percentage of the fiscal year 1981 payments as specified by Congress through this resolution, districts'fiscal year 1983 payment?

Mr. SCHMITT. I certainly agree that the Department would indeed be acting contrary to the intent of the committee by implementing a change that would reduce fiscal year 1983 payments below that to which a district would be entitled under the rate formula utilized in fiscal year 1981 and given the specifications of this resolution.

Mr. ABDNOR. Mr. President, funds for impact aid (Public Law 81-874) have been reduced substantially since fiscal year 1980. Despite the fact that Congress, through the Omnibus Reconciliation Act of 1981, agreed also to phase out some elements of this program, many school districts whose funds have been targeted for elimination have fought fervently to retain a piece of the smaller pie.

While it may seem fair to reduce payments to all districts by a proportional amount, such a policy overlooks the fact that school districts which bear the greatest Federal burden are least able to replace lost funds since they have fewer sources of tax revenue within their districts.

It troubles me greatly to note that many have lost sight of the purpose of this program, which is to insure that school districts responsible for educating federally connected children are able to provide a level of education comparable to that provided by districts which do not share this Federal burden. In the opinion of this Senator, it is unfortunate that we must again base districts' payments on a percentage of their fiscal year 1981 payments. In so doing, districts responsible for educating more federally connected children than they were in fiscal year 1981, are not receiving any compensation for these additional children.

Our colleagues from the State of Montana have attempted to correct an additional inequity, an inequity I understand the Department of Education has refused to address. Since the State unknowingly submitted incorrect data to the Department in fiscal year 1981, payments to districts in Montana continue to be based on a percentage of fiscal year 1981 payments which were less than that to which the districts were legally entitled to.

The authorizing committees will have the opportunity to scrutinize this program next year. Can the distinguished chairman of the Education Subcommittee assure us that his subcommittee will examine these inequities through the reauthorization process?

Mr. STAFFORD. I can assure the Senator from South Dakota that my subcommittee will conduct a careful review of this program at the earliest possible opportunity.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION FUNDING

Mr. WALLOP. Mr. President, the House, in House Joint Resolution 631, has included language—section 101(e)(5)—that would prevent the Occupational Safety and Health Administration from granting final approval and accreditation to the 21 States that operate their own Occupational Safety and Health Administration (OSHA) programs. The Senate Appropriations Committee has recommended deletion of this laguage, and the Senate is in the process of accepting that recommendation. The House has made a serious mistake. I strongly support the language approved by the Senate Appropriations Committee, and urge that this position prevail in the conference committee.

Congress has already demonstrated its support for OSHA's efforts to encourage the States to play a larger role in occupational safety and health. The Supplemental Appropriations Act, Public Law 97-257, enacted last September, contained language allowing OSHA to grant final approval to State plans in accordance with section 18(e) of the Occupational Safety and Health Act of 1970. This provision was also contained in House Joint Resolution 599, which provided funding through December 17, 1982. H.R. 7205, the labor, health and human services, education and related agencies appropriations bill for fiscal year 1983, as passed by the House on December 1, contained the State plan language and the Senate Appropriations Committee reported out H.R. 7205 with identical language.

Without this provision, OSHA cannot grant final approval to State OSHA plans because of a 1978 decision from the U.S. Court of Appeals for the District of Columbia. That decision has resulted in a requirement that States meet unrealistically high compliance staffing levels, or benchmarks, for which neither funding nor trained personnel is available. The decision provided, however, that if Congress is unwilling to appropriate sufficient funds for States to reach their benchmarks, it reflects a congressional decision that the goal was excessive. This is precisely what has occurred in recent years, and the appropriations language which I support would allow OSHA to grant States final approval under current budgetary realities.

Since the Supplemental Appropriations Act was enacted last September, OSHA has developed revised benchmarks for State staffing levels which are equivalent to Federal staffing levels. These new benchmarks are a much more realistic requirement for the 21 State OSHA programs. Assistant Secretary for Occupational Safety and Health, Thorne G. Auchter, has pledged to the States that if their enforcement levels exceed the Federal requirements, OSHA will, to the extent of available resources, fund the extra positions at 50 percent, just as it funds the rest of the State program.

My State of Wyoming has an OSHA plan that received initial Federal approval in 1974. It has done a fine job of protecting workers from on-the-job hazards. But this plan cannot receive OSHA's approval to operate on its own with minimal Federal interference because of the 1978 court decision I have mentioned. Approval of the House-passed language in House Joint Resolution 631 would continue to impede the States in the efforts to remove Federal control of this program. I should add that Wyoming now exceeds the minimum staffing level benchmarks in current law, but could not meet the levels which would be required if the House language prevails.

OSHA has historically been a much-malinged Federal regulatory agency. Recently, much of the criticism of this agency has lessened thanks to policies which reduce confrontation and encourage cooperation among employees, employers, and Government to reduce or eliminate workplace hazards. I believe that one major reason for this improvement is that the administration is allowing State OSHA plans to play a larger role. We should encourage this process, not impede it.

Once again, I would hope that the Senate conferees are successful in prevailing on this issue.●

PUBLIC HOUSING MODERNIZATION

● Mr. CHAFEE. Mr. President, I rise to support the Appropriations Committee's action in approving an estimated $2.6 billion for public housing modernization.

I was prepared to offer an amendment to increase funding for public housing modernization. I am delighted that the Appropriations Committee has made this unnecessary by raising the level in committee.

I would rather this money come entirely from new budget authority, rather than relying in part on recaptures, and I hope this can still be accomplished in conference. Nonetheless, this level of assistance is still a most important restoration of funds for maintaining our housing assistance infrastructure. At a time when we are virtually terminating Federal assistance for low-income housing construction, it is especially important that we preserve the investment we have already made in low-income housing.

Attention has been paid of late to the need for restoring our infrastructure, as well it should. Most of this attention has been focused on roads, sewers, bridges, and the like. But I content that public housing should also be considered in this same context.

Mr. President, in Rhode Island we have some of the oldest public housing in the Nation, dating back to the early 1940's. Many of these units have never been updated. In Providence alone, we have over 1,000 public housing units that are vacant and uninhabitable. Now, there may be many reasons for this situation, but the lack of adequate funds for maintenance and repair has certainly contributed to this unfortunate waste.

Mr. President, these funds for modernization will help hold back the continued erosion of our assisted housing stock at a time when tenant waiting lists are expanding and new construction all but vanishing.

It should also be pointed out that this investment will also make a contribution to our job creation effort. It is estimated that the $800 million addition made in committee above the administration's program level will produce as many as 40,000 additional jobs.

Mr. President, it had been my intention to offer an amendment to direct these funds into the most labor-intensive modernization projects, with special emphasis on those that require less highly skilled labor than has been the focus of much of our job-creation efforts. This would not only create more jobs, but would also assist the hard-core unemployed. However, I do not, at this time, wish to additionally restrict the use of these funds by the already hard pressed public housing authorities; nor do I want to risk the delay that interpretation of new legislative requirements might impose on the release of these funds. Therefore, I will not now offer my amendment. It is my hope, however, that to the maximum extent feasible, these funds will be used in projects that are job intensive, require less highly skilled workers, and which can be commenced within a reasonably short period.

Mr. President, again I am delighted to see this funding restoration, as I believe it is both a productive use of our limited Federal housing assistance resources and a valuable investment in job creation.

Mr. GARN. I appreciate my colleague's sentiments on the issue of public housing modernization and its relationship to upgrading our housing stock and providing meaningful employment for thousands of individuals now unemployed. I am pleased that my friend from Rhode Island did not offer any legislative language at this time. We are all concerned about the need for HUD to obligate funds in an expeditious manner, and I do not believe that establishing a new set of legislative requirements would serve this purpose. Once again, I thank my colleague for his continued interest and support for the public housing modernization program.●

LEGAL SERVICES CORPORATION BOARD COMPOSITION

● Mr. WEICKER. Mr. President, the continuing resolution incorporates a number of limitations on the use of appropriated funds by the Corporation. One of these provisions has to do with the composition of the governing body of the grantee or contractor and requires that a majority be appointed by State, county, or municipal bar associations "the membership of which represents a majority of the attorneys practicing law in the locality in which the recipient is to provide legal assistance."

We are aware that the Legal Services Corporation currently provides funds for a number of recipients with multi-State responsibilities. As chairman of the Subcommittee on State, Justice, Commerce, the Judiciary, and Related Agencies, I feel it is necessary to clarify the effect of this limitation on these multi-State organizations. Requiring those programs to have the attorney members of their governing bodies appointed by bar associations of several States would be unduly cumbersome. Accordingly, such recipients may comply with this subsection by having the State, county, or local bar association in which a recipient maintains an office perform the attorney appointment function.

Mr. COHEN. As the Senator from Connecticut is aware, New England fishermen have had problems over the past year with a severe jellyfish bloom. Similar problems were encountered in late 1975 and early 1976.

The masses of jellyfish have fouled and destroyed gear, leading to expensive catch and equipment losses for many gillnetters. Clearly it is important to determine whether there is a pattern to these outbreaks, and my understanding is that the National Marine Fisheries Service has the ability to do this.

Is it the Senator from Connecticut's understanding that $50,000 of the funds targeted for fisheries development research and services are to be used at the Northeast Fisheries Center in Woods Hole, Mass., for such a study?

Mr. WEICKER. That is the intention of the committee.●

CLARIFICATION OF RUNAWAY YOUTH APPROPRIATIONS

● Mr. SPECTER. Mr. President, I rise at this time to clarify the intent of the Appropriations Committee's amendment to the continuing resolution,

House Joint Resolution 631, which provides $25 million for the Runaway and Homeless Youth Act, operated under the supervision of the Department of Health and Human Services.

The amendment is intended to increase the sums appropriated in the prior continuing resolution, Public Law 97-276, by $7 million, bringing the total amount for the Runaway and Homeless Youth Act to $25 million for fiscal year 1983, which ends September 30, 1983.

While the complexity of the continuing resolution presently being considered may lend itself to strained interpretations of the amendment I proposed yesterday, the intent of the committee cannot be confused. The members of the Committee on Appropriations were cognizant of what they voted for and that was an increase of $7 million above the current level of $18 million to a total of $25 million to be made available by the administration for the runaway and homeless youth program for fiscal year 1983, ending September 30, 1983.

Does the chairman of the subcommittee agree with this?

Mr. SCHMITT. I do.

Mr. SPECTER. I thank the chairman for permitting me this time to emphasize the meaning of the amendment passed December 15, 1982, on the Runaway and Homeless Youth Act.●

SUBSIDIZED HOUSING—CRUCIAL TO MILLIONS

Mr. CRANSTON. Mr. President, I have received an urgent plea from a former colleague, Ed Brook, who is honorary chairperson of the National Low Income Housing Coalition. Senator Brooke raises a very important issue in his letter to me—one that has received relatively little publicity but one that is crucial to the millions of low-income people who live in substandard or overly expensive housing. His letter requests that I urge my colleagues to support an appropriation of at least $9.7 billion in budget authority for low-income housing programs. This is the level set by Senate Concurrent Resolution 92, the First Concurrent Budget Resolution for Fiscal Year 1983.

Ed Brooke has an excellent point. Low-income housing programs have been cut drastically since 1980. I see no reason why low-income people should suffer needlessly, given the current budget assumptions.

In 1977, $28 billion was spent on HUD's housing assistance programs. That figure was increased to $31.5 billion in 1978 but fell to $24.4 billion in 1979. In 1980, during the last year of a Democratic administration—and a Democratic Senate—$26.7 billion was spent on HUD-assisted housing. The Reagan administration spent $25 billion on housing in 1981.

The figures for 1982 are not solid yet but $13.3 billion in new budget authority was appropriated for housing programs. HUD already had about $3 billion in carryover authority from 1981 that was combined with the 1982 appropriations and was able to obligate around $16.5 billion in 1982. Redtape, a slow market, and the administration's hostility to the assisted housing programs, among other reasons, will keep those obligated funds from actually being used. Due to these problems, HUD plans to recapture about $4.6 billion in housing funds and carry over an additional $2.3 billion so that in fiscal year 1983 about $6.9 billion will be made available from previously appropriated funds. This could mean that HUD may only spend about $10 to $12 billion on housing assistance during 1982—a figure which is woefully inadequate.

In the continuing resolution, the Senate is suggesting that less than $6 billion in new budget authority be appropriated for federally assisted housing in fiscal year 1983. This is less than half of the money we appropriated last year. If HUD does bring forward the $6.9 billion from previous appropriations to 1983 then, given the Senate appropriation level of around $6 billion, HUD would have about 25 percent less money to obligate in 1983 than it did in 1982. If the Senate has its way, those in need of housing assistance will get over $20 billion less this year than they got in 1980. This is a travesty.

It is a travesty especially because the Senate is choosing not to appropriate the full amount of money that is available to assisted housing programs under the budget resolution. I cannot remember when we have appropriated less funds for housing than the budget resolution dictates. Given the pressing unmet needs of low-income people we should allocate every dime that we can responsibly appropriate for housing assistance.

The Federal Government's 45-year commitment to assist low-income people so that they may live in decent, safe, and sanitary housing was initiated by President Roosevelt in 1937. In his inaugural address that year, Roosevelt declared that housing assistance was essential because one-third of the Nation was "ill-housed, ill-clad, and ill-nourished." At that time many Americans were either homeless or lived in substandard housing.

We have accomplished much through our Federal housing programs since 1937. It used to be that 45 percent of all occupied units in the United States were either dilapidated or lacked basic plumbing facilities. That figure has now fallen to well below 10 percent. However, those that now live in substandard housing earn very low incomes. Without significant Federal assistance it is difficult to house these people adequately.

Low-income housing advocates agree that substandard housing is no longer housing's single most pressing issue. Currently, housing affordability is one of the foremost problems. Affordable housing has become a scarce commodity. Not only have mortgage and rent payments increased tremendously over the years, but utilities, taxes, insurance, and maintenance costs have also skyrocketed.

The cost of housing has increased far more rapidly than household incomes. During the decade between 1970 and 1980 median income for owners rose 104 percent—from $9,700 to $19,800—while median home values tripled. More devastating for lower income people is the fact that median renter income rose only 66 percent for that period while median rent increased by 123 percent.

Low-income households have borne a major brunt of the increased cost of housing because their choice of housing opportunities has narrowed. For example, while the number of renter households with incomes below $3,000 per year dropped from 5.8 million to 2.9 million, the number of units available at rents they could afford dropped by 75 percent from about 5 million to less than 1.5 million.

Low-income households—especially large families—also face the problem of housing availability. Availability is a problem either because the supply is inadequate or because of discrimination based on race, income source, family composition, or other factors.

There are about 30 million households who are eligible for low-income housing assistance, but we only subsidize 3.4 million through HUD programs. On Tuesday, the House Housing Subcommittee heard testimony from various groups concerned with the 2 to 3 million homeless persons in America. Testimony shows that the homeless are not only vagrants and dropouts, but are also middle-class people who have suddenly lost everything they have worked for—their jobs, homes, and self-respect—due to Reaganomics.

Funding $9.7 billion in assisted housing could help some of these and tens of thousands of other Americans who need help.

We can help these people if we urge the conferees to the continuing resolution to accept the House assisted housing numbers. If we do any less we are locking thousands of low-income people out of housing during what could become a long, cold winter.

I ask unanimous consent that the letter sent to me by Ed Brooke be included in the RECORD after my remarks. My colleagues should note that the letter is cosigned by members of the Low-Income Housing Coalition. Senator GARN submitted a letter concerning the housing authorization bill

that took up about 17 pages in last Monday's CONGRESSIONAL RECORD because of the 2,700 signatures to that letter. The letter that I am inserting in the CONGRESSIONAL RECORD is also cosigned by those same 2,700 groups. Although I do not want to reproduce those signatures because of space limitations, I urge my colleagues who are interested in knowing the complete list of cosigners of Ed Brooke's letter to peruse pages S 14503 to S 14520 of the CONGRESSIONAL RECORD.

There being no objection, the letter and cosigners were ordered to be printed in the RECORD, as follows:

NATIONAL LOW INCOME HOUSING COALITION,
Washington, D.C., December 15, 1982.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, D.C.

DEAR ALAN: This is an urgent plea to you to support an appropriation of at least $9.7 billion in budget authority for continued low income housing programs in the Continuing Resolution so that the present *de facto* moratorium on low income housing assistance can be ended promptly.

Low income housing was not included in the HUD-Independent Agencies Appropriation Act in order to provide additional time for Congressional action on a housing authorization bill. It is now essential to appropriate 1983 funds for already authorized programs.

This is a time of housing crisis, especially for low income people. New production is at its lowest level in two generations. Rents in the private market are beyond the reach of millions of low income households. An ever-growing number of people are homeless—unable to find any accommodations whatsoever. Almost 20% of all construction workers are unemployed.

Within the last year, the hundreds of public officials and national, state, and local organizations listed below have endorsed expanded federal housing assistance for low income people. We urge you to maintain this nation's commitment to meeting our low income housing needs.

Please give your full support to appropriating the full amount for low income housing programs available under the First Concurrent Budget Resolution.

Sincerely,

EDWARD W. BROOKE,
Honorary Chairperson.

IRS TAXPAYER ASSISTANCE PROGRAMS

Mr. LEAHY. Mr. President, I would like to discuss a provision that was included in the Treasury, Postal Service, and General Government portion of the continuing resolution during yesterday's full committee markup and ask the chairman of the Treasury Appropriations Subcommittee, Senator ABDNOR, to clarify the intent of the language.

Senator ABDNOR, it is my understanding that the committee restored $33.8 million to the taxpayer service and returns processing account, primarily to restore all taxpayer assistance programs, activities, and personnel levels to 1982 levels. Was that the principal intent of the committee recommendation?

Mr. ABDNOR. Yes.

Mr. LEAHY. I note that the language in section 120 of title I of the continuing resolution focuses primarily on retaining fiscal year 1982 staffing in the taxpayer services program during fiscal year 1983, especially in the toll free telephone tax assistance and taxpayer walkin assistance programs. I want to make sure that, although the focus of the language in the bill is on "positions", that the clear intent of the committee was to preserve the toll free telephone and walkin assistance programs at the same level of service that was available to taxpayers in the last tax filing season. Was that the intent of the committee in recommending the language in section 120?

Mr. ABDNOR. Yes, our intention was to preserve toll free telephone service to answer taxpayers' tax law questions and walkin assistance at IRS field offices, as well as the main offices, at the same level of service that was available in the last tax filing season.

Mr. LEAHY. So the intent of the language was not only to preserve staffing levels in the taxpayer assistance program, but to restore the funding required to do that as well as to maintain the level of taxpayer services, especially toll free telephone tax law assistance and walkin assistance at all the locations at which these services were available during the last tax filing season.

Mr. ABDNOR. Yes, that was the committee's intent.

Mr. LEAHY. Thank you for that clarification.

FEMA AMENDMENT

Mr. KENNEDY. Mr. President, let me commend Senator PRYOR for offering this amendment. As he indicated in his statement, this amendment would restore a provision included in the continuing resolution in the House, but dropped by the Senate appropriations committee.

This program would funnel $50 million to private charitable organizations in our Nation to support them in their efforts to feed and house the very needy, The homeless and the unemployed. These funds would be allocated through the United Way of America to local nonprofit charitable agencies to supplement their effort to meet the local needs for shelter and nutrition.

Let us not be mistaken about the need for this program. Only last month, the U.S. Conference of Mayors urged President Reagan to provide 10 times this amount to help feed and shelter the poor this winter. They have recognized, as we should today, that the yeoman efforts of the private charitable and religious organizations simply cannot meet the tremendous growing needs of the poor—that State and local resources are not sufficient to shoulder the remaining need—that, without Federal aid in support of their efforts, people in our largest cities nationwide will starve and freeze this winter.

Anywhere from 500,000 to 2 million individuals are homeless in America today. Some are the traditional "street people"—individuals with addictions of some sort, psychological difficulties or other personal problems. Many more are victims of the current depression—the "new poor" and the "new unemployed." These are individuals and families that had good jobs; some owned their own homes and businesses; many moved to the south and west in hopes of better jobs and business opportunities. In too many cases, the hopes proved to be misplaced and too many times families found themselves out on the streets.

The statistics and the stories reflect the desperate need of these unfortunate Americans and of the organizations trying to help them.

In San Francisco, 2,000 people eat daily at the St. Anthony dining room—1,000 more than 3 years ago. Local charities reported at 28 percent rise in demand for help in the past year.

Here in Washington, the number of people fed by the Luther Place Church has doubled in a month. In Atlanta, eight individuals showed up in October when two churches opened a soup line. A month later, attendance was 125 a day.

According to Brother Steve Gilko of a Milwaukee meals program: 5 years ago, 95 percent of the people the program served were "clinically addicted." Today 70 percent are homeless and jobless people—out on the streets because of economic and political forces.

The facilities to provide for the poor are simply overtaxed. In New York City, public and private shelters can house only 4,000 to 5,000 individuals—while 36,000 individuals are homeless. In my own State of Massachusetts, Boston emergency shelters possess 600 beds for 8,000 people. Cities all across the Nation show similar numbers: In Washington, D.C., there are 10,000 homeless; in Baltimore, there are 9,000; and in Seattle there are 5,000. Even cities in the Sun Belt, like Phoenix, Houston, and Atlanta, have seen the problem mushroom.

In our haste to create jobs and to turn our economy around, let us process the compassion and humanity to help these victimized by this cruel depression. Let us not ignore the plight of James Thom and his family, who lost their business and home in Minnesota and are now stranded homeless and destitute in Denver. Or of Dan Hancock who lost his job in Newark and drifted to Texas and then to California and then to North Dakota and then to Oregon. Looking for a job that never came. And let us remember the fate of 7-month-old Holly Reed, who froze to death on the streets of Denver sleeping with her parents.

Mr. President, a jobs program must not only address the need for new jobs; it must address the needs of those that have lost their jobs. This amendment does just that. I intend to vote for it and urge my colleagues to join me.

● Mr. MATTINGLY. Mr. President, I am submitting for the RECORD a letter from Senate Parliamentarian Robert B. Dove, dated December 17, 1982. I wanted this response to an inquiry which I made of the Parliamentarian to be of record, especially in the context of the Senate proceedings and the forthcoming House-Senate conference on House Journal Resolution 631, and in reference to an item earlier placed in the RECORD by Senator DECONCINI relating to Senate rule XV, paragraph 5, and rule XVI.

U.S. SENATE,
OFFICE OF THE SECRETARY,
Washington, D.C., December 17, 1982.

Hon. MACK MATTINGLY,
U.S. Senate, Washington, D.C.

DEAR SENATOR MATTINGLY: You have raised the question as to whether or not a point of order against the committee amendment dealing with the copyright royalty tribunal would still be valid in spite of the fact that the amendment itself has been agreed to. As Senate Procedure says on page 799:

"It is too late to make a point of order against an amendment to a general appropriation bill after it has been agreed to by the Senate."

Therefore no point of order will lie at this point on the amendment.

Sincerely,

ROBERT B. DOVE,
Parliamentarian.●

INTERNAL REVENUE SERVICE TAXPAYER ASSISTANCE PROGRAMS

● Mr. COHEN. Mr. President, I rise in support of the provisions of the continuing resolution, which prohibit the reduction of positions for the Internal Revenue Service taxpayer assistance programs below fiscal 1982 levels, and specifically require the IRS to provide toll-free telephone and walk-in assistance this fiscal year.

Most taxpayers need help to accurately complete their tax returns. For those who cannot afford commercial assistance, particularly elderly and low-income taxpayers, the IRS has been the traditional source of free advice. In the past, the IRS offered a generous taxpayer service program. A toll-free telephone network, which provided quick-question assistance and walk-in facilities, accessible to most taxpayers who wanted more personalized or detailed help, opened the IRS to the public. In fiscal 1981, 36 million taxpayers called the IRS, and 8.7 million visited offices to request help with their returns.

In fiscal years 1982 and 1983, however, actual and proposed reductions in the IRS taxpayer service program—which cut funding by 10.2 percent, staff years by 41 percent, and, most significantly, the number of taxpayers assisted by 60 percent—threaten to undermine the IRS commitment to taxpayer assistance and contradict its long-established policy. The IRS has projected a decrease in the number of taxpayers assisted from 44.8 million in fiscal 1981 to only 17.9 million in fiscal 1983, despite an increase in the number of tax returns filed.

While the actual reductions in taxpayer service last year resulted in the closing of 214 walk-in offices around the country, the impact of the administration's proposed reductions for this year's program, if implemented, promise to be even more severe. The taxpayer service program, according to the fiscal 1983 IRS budget submission, would be refocused to "concentrate on answering questions and resolving taxpayer problems once the return has been filed." Under this new policy, the toll-free telephone program, considered the most efficient and cost-effective source of assistance, would supply only after-the-fact answers to account and notice questions, even though more than half of the calls the IRS received last filing period were questions about tax laws and return preparation.

What I find most disturbing about this proposal to reduce taxpayer service is that the IRS has not fully evaluated the potential impact of such a shift in taxpayer assistance policy. Will a cutback in IRS assistance disproportionately affect certain taxpayer groups? Will reduced assistance hurt compliance with our tax laws? What impact will strengthening IRS enforcement capabilities at the same time that taxpayer assistance is being reduced have on the public's perception of the IRS? What are the alternatives?

Even more disturbing, however, are the answers. The Governmental Affairs Oversight of Government Management Subcommittee conducted a hearing this past March to examine the impact of the administration's proposed budget for taxpayer service and addressed these specific questions in its July report. The subcommittee found that reductions in taxpayer service below fiscal 1982 levels would: adversely affect elderly and low-income taxpayers.

Based on evidence and testimony presented, the subcommittee determined that the actual and proposed reductions in IRS taxpayer assistance programs would hurt those least able to fend for themselves: The low-income and elderly. IRS reports reviewed by the subcommittee indicated that 90 percent of the taxpayers who sought IRS direct-preparation and review assistance—the programs which were cut last year—were low-income and elderly.

New data compiled by the General Accounting Office confirm that low-income and elderly taxpayers also make up a high percentage of those taxpayers who call the IRS for tax law assistance—the program slated to be cut this year. Based on a nationwide survey of taxpayers who filed 1982 returns, the GAO found that individuals age 65 and older used telephone assistance in greater proportion than did most other groups and would therefore be disproportionately affected by the cut. While not all elderly and low-income taxpayers have complicated returns, they often are entitled to certain tax breaks, which, without IRS assistance, they might not utilize.

HURT VOLUNTARY COMPLIANCE

By abdicating its responsibility to help taxpayers prepare their returns, the IRS would increase the likelihood of noncompliance. The American tax system is founded on the principle of voluntary compliance. The effectiveness of our tax system depends on the taxpayer's ability to understand the law and willingness to pay what he or she owes. Without free tax assistance, the subcommittee found that more taxpayers will be less able to file accurate returns, which subsequently will result in a huge revenue loss.

The GAO also determined from its survey that reductions in taxpayers service would hurt compliance with our tax laws. When asked what action they would take if the IRS no longer answered tax questions, 14 percent of the taxpayers sampled said they would give some consideration to not filling out part of the tax form on which they had questions, but would fill out the rest of the form and send it in, 6 percent of the responses said that they would consider not sending the tax form.

The IRS itself anticipated these consequences: A November 1976 IRS study concluded that "many taxpayers would not or could not comply with the law without its assistance", a followup IRS study in December 1977 found that the examination rates for service-prepared returns were lower than third-party and taxpayer-prepared returns; and October 1981 memorandum from IRS Commissioner Roscoe Egger to Treasury stated that "potential revenue losses would be great, with widespread deterioration of voluntary compliance possible," if tax law assistance by telephone were eliminated. Commissioner Egger estimated in the memorandum that a 1 percent reduction in compliance costs the Government $4 billion annually.

PROMOTE AN ADVERSARIAL RELATIONSHIP

The subcommittee found that the administration's proposal to reduce taxpayer service at the same time that enforcement activities are to be strengthened would promote an adversarial relationship with the taxpaying public. The IRS is already burdened with a negative public image, perhaps the inevitable consequence of being the Nation's tax collector, but I believe that reducing taxpayer assistance will only make it worse.

Strengthening enforcement at the expense of assistance is a poor policy, as well as public relations, decision. Taxpayers will be punished for making inadvertent mistakes which probably would not have been made, given the assistance. I am concerned that the administration's proposal runs the risk of undermining the integrity of our tax system.

PROVIDE INADEQUATE ALTERNATIVES

If the administration's goal is ultimately to pass the responsibility of providing taxpayer assistance from the IRS to the private sector, then it is incumbent on the IRS to enforce its tax preparer penalties to ferret out "fly-by-night" operations. According to a GAO report soon to be released, however, the tax preparer penalties, which were strengthened in the 1976 Tax Reform Act, are not being enforced in a systematic and effective manner.

Aside from the fact that many taxpayers may not be able to afford commercial assistance, there is even some question whether commercial preparers could, or would want to, assume the IRS's taxpayer assistance responsibilities. Former IRS Commissioners Donald Alexander and Jerome Kurtz, now tax practitioners in the private sector, testified at the March hearing that commercial assistance will not be

able to compensate for the reductions in telephone assistance. In addition, a tax consultant, claiming to have made a "very good living off the complexities of the tax laws," wrote to me:

If the IRS feels that people like myself . . . can or want to substitute for the IRS programs, I can assure you that this is not the case. Although I and others like me would certainly answer an occasional question by telephone, there is not, nor can there be, a private sector equivalent to the IRS telephone program.

As a substitute for personal telephone assistance, the IRS plans to expand the use of the Tele-Tax Information Service, which provides prerecorded tax information to taxpayers who have Touch-Tone telephones. In Maine, however, less than 30 percent of the telephones are Touch-Tone. For those who can use the new automated system, the subcommittee found that the information provided is no more understandable than the IRS publications. If a taxpayer cannot understand written instructions, he or she is certainly not going to understand them over the telephone.

The subcommittee concluded from its review that the proposed reductions in the IRS taxpayer assistance programs would be costly to taxpayers who depend on the IRS for free assistance, and to the Government, which depends on these taxpayers to voluntarily pay their taxes. The subcommittee recommended in its report that the IRS taxpayer service program be maintained at fiscal 1982 levels. A balanced taxpayer assistance program would maximize the number of taxpayers to be assisted and address the special needs of low-income, elderly, and physically handicapped taxpayers.

The Appropriations Committees agreed with our recommendation and voted to restore $50 million and 1,675 positions for taxpayer service in fiscal 1983. The legislative reports issued by the Treasury Appropriations Subcommittees emphasized the need to maintain the toll-free telephone program and an adequate level of walk-in assistance. The Senate report, 97-547, stated that tax law assistance by telephone is "one of the most effective IRS services in helping taxpayers attempt to comply with our complex tax laws." Similarly, the House report, 97-854, recognized the adverse impact of reducing taxpayers assistance and stated that it is "a vital element in maintaining voluntary compliance."

To date, however, the IRS has taken no steps to implement its taxpayer service program, despite the funds provided by the House and Senate Appropriations Committees. Consequently, the IRS has not only lost the opportunity to improve upon last year's program, but, by its own admission, has lost the staff to provide as good a program. Any further delay will only reduce the start-up time required to implement an effective program.

To its credit, the IRS has developed a new, simple tax form, the 1040EZ, which can be used by single taxpayers with no dependents and incomes of less than $50,000 a year. Simplifying the tax form, however, does not simplify the tax law which is at the root of the problem. As it is unlikely that the U.S. Tax Code, which now exceeds 2,000 pages, will be drastically simplified in the near future, taxpayers are going to continue to need assistance in completing their tax forms. The $50 million investment in taxpayer service is small compared to the $330 billion that the phone lines and walk-in offices help to collect.

Mr. President, I want to praise the work of Senators ABDNOR and DECONCINI and Representatives ROYBAL and MILLER, the chairmen and ranking minority members of the Senate and House and Treasury Appropriations Subcommittees, for recognizing the need for IRS taxpayer assistance and providing the funds and staff to preserve this program.

● Mr. WEICKER. Mr. ANDREWS, it is my understanding the House of Representatives has provided $100 million for the rehabilitation and replacement of 210 bridges which overpass the northeast corridor improvement project, under title II, the job stimulus program.

Mr. ANDREWS. Yes, Mr. WEICKER, you are correct that the House has provided $100 million for bridges which overpass the Northeast corridor improvement project.

Mr. WEICKER. These 209 bridges, of which 64 are in my State of Connecticut, are distinguished by the fact that neither Amtrak nor the States accept the responsibility for their upkeep and maintenance, because the ownership of these bridges cannot be determined from the legislation or deeds which provided for Amtrak's acquiring the right-of-way of the Northeast corridor. The result has been, therefore, that rehabilitation needs are addressed as emergencies occur, with repair costs being subject to lengthy battles among the States, Amtrak, and local communities. Consequently, these bridges have fallen into a severe state of disrepair. Would you agree that these bridges constitute a potentially serious hazard to the affected communities and to rail passengers who utilize Northeast corridor passenger service?

Mr. ANDREWS. Yes, I would agree with the Senator from Connecticut, Mr. WEICKER, that the condition of these bridges in the context of the unresolved jurisdictional question do pose potentially serious hazards to affected local communities and to rail passengers who utilize Northeast rail service on the Northeast corridor.

Mr. WEICKER. Given the unique status of these so-called orphan bridges, the millions of dollars that have been spent on rehabilitating the Northeast corridor, the limited budgets of the States and Amtrak, and the need to address this critical safety problem, would you consider supporting funding under the jobs stimulus program in conference?

Mr. ANDREWS. While I cannot speak for the conferees on this matter, I assure the Senator from Connecticut that I am concerned about this critical issue and will consider support of it when brought to the attention of the conferees.

Mr. WEICKER. I thank the Senator from North Dakota for his assistance and consideration of this very critical bridge problem.

Mr. ANDREWS. I also thank the Senator from Connecticut for bringing this matter to my attention and appreciate his strong concern for these "Orphan Bridges".●

INCREASED FUNDING FOR DRUG ENFORCEMENT

Mr. THURMOND. Mr. President, I strongly support the Department of Justice's amendments to the fiscal year 1983 budget. In particular, I support the new program proposed by the President which will sharpen our attack on organized narcotics trafficking.

Mr. President, I have discussed this amendment with the distinguished ranking minority member of the Judiciary Committee, Senator BIDEN, who has championed the fight against drug trafficking for quite some time and is an expert in this area, and he has indicated to me that he will also support this new effort.

The organized crime drug enforcement program, as it is called in the amendment, includes the creation of a major new enforcement initiative. Furthermore, it includes a Presidential Commission and a project which enlists the 50 State Governors in a united campaign against drug trafficking and organized crime.

In essence, the organized crime drug enforcement program creates 12 new regional task forces, in addition to the one that already exists in south Florida.

The primary purpose of these task forces will be to disrupt the intricate distribution and sales networks set up by organized criminal enterprises engaged in drug trafficking throughout the Nation.

The Regional Task Forces will operate out of core cities and they will concentrate on the involvement of organized crime in the illicit drug market. They will not focus on street dealers nor addicts but on those who direct, supervise, and finance the illicit drug trade.

Everyone in this Chamber knows the seriousness of the drug trafficking problem. Drug trafficking has become the most serious crime problem facing this Nation. Drug abuse is the root

cause of an enormous amount of violent crime and other serious crime. In addition, the proceeds from drug sales enable organized crime to engage in a wide variety of other serious crimes, including the bribery of public officials, the infiltration of legitimate business and a number of other schemes which weaken key sectors of the economy.

Recent estimates indicate that the profits from the sale of drugs exceed the profits of all major U.S. companies. Illegal drugs have generated an estimated $79 billion in retail sales in 1980, up 50 percent from 1977.

In my home State of South Carolina, State and local arrests for drug abuse violations have increased by more than 30 percent.

Indicators for the Southeastern part of the United States show the problem has reached epidemic proportions. Heroin-related injuries have increased by 76 percent. Cocaine-related deaths have increased by 80 percent. Smuggling of multikilo loads of cocaine from South America via private aircraft now rivals marihuana smuggling as the Drug Enforcement Administration Atlanta division's single most significant trafficking problem. Almost daily, the Government is discovering numerous landing sites in South Carolina, North Carolina, Georgia, and Tennessee that are being used for major drug smuggling.

These facts are not unique to my part of the country. They are symptomatic of what is taking place in many other parts of this Nation.

Mr. President, it is time we stand up and be counted and declare a real war on organized drug trafficking. In this regard, on two previous occasions the Senate has approved the Violent Crime and Drug Enforcement Improvements Act of 1982, S. 2572, which the President has vigorously endorsed. This landmark measure would make important reforms in Federal bail, sentencing and forfeiture laws and I take this opportunity once again to urge House action on this urgently needed anticrime legislation before the 97th Congress adjourns.

Mr. President, the Senate must unite behind the President in this appropriations proposal and provide the President with all the resources and staff he has requested. In this way, I am convinced we will be taking a major step toward solving this intolerable situation.

The President requires $130 million in fiscal year 1983 for the operation and support of the 12 task forces, including funds for state-of-the-art technological support; $70.3 million is requested for salaries and related expenses, for 1,630 agents, prosecutors, and support personnel; $3.2 million is needed to support air surveillance and intelligence efforts related to the task forces; $18.8 million is required for automation to support the investigations by DEA and the Federal Bureau of Investigation (FBI); $12 million is required to secure communications between FBI agents. I need not indicate how important voice communication privacy is if we are going to make this effort work; $23 million is necessary for the construction and renovation of Federal, State, and local jails and prisons, to provide for up to 1,000 additional beds; and $2.7 million is essential to establish and support the President's Organized Crime Commission, the State Governors' project, and the issuance of the annual report by the Attorney General.

The resources have been requested in a single Justice Department program to allow the Attorney General maximum flexibility in responding to the changing patterns of organized criminal activity by enterprises which traffic in drugs. A single appropriation will be used to fund key elements of the Federal Government's criminal enforcement apparatus, including investigative agencies, Federal prosecutors, and detention and correctional facilities. This comprehensive approach allows the Federal team to respond quickly to all aspects of enforcement needs, whether it involves Customs Service interdiction activities, intensive FBI and DEA investigations, criminal prosecutions, or the holding of sentenced and unsentenced prisoners.

Mr. President, I urge prompt attention to this matter in recognition of the deteriorating effect of drug trafficking on this Nation through violent and property crimes. Furthermore, the real potential of shattering any attempt at relocation of the major smuggling and distribution activities as a result of the success of the south Florida task force makes rapid passage of this amendment even more imperative.

I conclude by calling to your attention that drug-related crimes take human lives and cause immeasurable human suffering. As we draw near to another holiday season and give thanks for the many blessings this Nation does enjoy, let us not forget that for the sake of our children and our people we must renew our fight against the drug menace. Let us join with the President in making our streets and houses safe again and return America to the days of respect for law and the rights of the innocent.●

SENATOR CRANSTON'S AMENDMENT FOR THE DISABLED

● Mr. HEINZ. Mr. President, I rise in support of the Cranston amendment, I urge support of this resolution, Congressional Support of Programs for Handicapped Persons, not only because of my personal commitment to these programs, but also because of my own knowledge of how children and adults with disabilities have benefited. Less than 10 years ago a severely disabled child was often denied the right to attend school. Today, excluding these children is against the law.

People with disabilities—and there are over 30 million such persons in our country—have made major gains in the last decade. These gains have ranged from securing the right to an education to better vocational rehabilitation services; from being able to live in a community setting rather than an institution; from being barred from public buildings, to being able to participate in public life. Most of these major gains have one fundamental common denominator—the central and crucial role of Federal programs and services.

Central to the gains persons with disabilities have made in the last decade is the notion that the person with a disability is always a potentially contributing member of our society; that too often our system has fostered dependency and with dependency came the status of second-class citizenship, and often the denial of basic human rights.

The movement to secure equal treatment for persons with a disability did not originate with the Congress; the movement to increase independence and to enable disabled persons to contribute to society did not originate in the Oval Office. This dual movement to secure equal citizenship and social productivity originated with persons with disabilities themselves and their families and friends.

The example of their struggle prompted Members on both sides of the aisle, Republican and Democrat, to promote key legislation during the 1970's, legislation that literally made a major difference to millions of persons with disabilities.

We have a long way to go to help fulfill the aspirations of one of America's largest minority groups, yet in the last 2 years we have witnessed an attempt to reduce these appropriations and indeed to undercut these programs in significant ways. Some of this has already been accomplished. Across the land people with disabilities are viewing these actions as an assault on important gains won over the years. The administration's attempts to deregulate and strip away important provisions of special education and the section 504 regulations can be seen as fundamentally inconsistent with the promotion of independence and self-help.

The time has come for the Congress to reaffirm once again its historical commitment in this area. Most of my colleagues have continually supported cost-effective and progressive legislation on behalf of disabled persons. To retreat now from our historic achievements would cost the taxpayers of this

country increased dollars for increased dependency. Worse still, a retreat from our commitment will mean a return to second-class citizenship which we cannot afford, neither fiscally nor morally.

● Mr. HOLLINGS. Mr. President, the distinguished ranking minority member of the Committee on the Judiciary, Mr. BIDEN, has written to me of his interest in securing accurate information on the success of the 12 task forces that we are funding in this bill to fight organized criminal drug trafficking. He has similarily written to the chairman of our State, Justice, Commerce Subcommittee, Mr. WEICKER, and we have conferred and find much merit in obtaining the information Senator BIDEN seeks. Because of the expedited schedule for processing this bill, we were not able to confer with Senator BIDEN before reporting the bill, or I would have asked that the report he seeks be part of the explanatory statment accompanying the bill. I will ask the managers from the House to make provision for this report in the Statement of the Manegers accompanying the conference report on House Joint Resolution 631. Does not our distinguished chairman agree that we ought to have this information?

Mr. WEICKER. I certainly do and I believe that our colleagues from the House will also appreciate the merit of Senator BIDEN's request.

Mr. HOLLINGS. I am glad to have those assurances from our chairman and Mr. President, I ask that Senator BIDEN's letter to Senator WEICKER be printed in the RECORD at this point.

The letter follows:

U.S. SENATE,
COMMITTEE ON THE JUDICARY,
Washington, D.C., December 15, 1982.

Hon. LOWELL P. WEICKER, Jr.,
Chairman, Subcommittee on State, Justice, Commerce, Judiciary and Related Agencies, Washington, D.C.

DEAR LOWELL: As the ranking member of the Senate Judiciary Committee I have been reviewing with great interest the newly announced Organized Crime and Drug Task Force Program. Like many of my colleagues I believe it is important that these additional funds be made available in hopes of improving the fight against drug trafficking and organized crime.

I also believe that accurate information on the level of success of this Task Force Program be made available on an annual basis. There is much that can be learned from the creation of this Task Force Program and it is imperative that specific data and information be collected, analyzed and included in an annual report to the President and Congress.

For these reasons I request that the language noted below be included in the conference report on the Continuing Resolution under the appropriate section concerning the Organized Crime and Drug Task Force Program.

"The Committee believes an annual report should be delivered to the President, the Appropriations Committee and Judiciary Committee of the Senate and the House of Representatives starting no later than March 31, 1984, which indicates by comparison to similar statistics, information or other appropriate measures from previous years, whether this program has made contributions toward:

"(1) reducing the supply of available hereoin, cocaine marihuana, hashish and dangerous drugs in each of the task force regions and the United States in total using such measures as estimated importation or production, estimated number of abusers, treatment admission statistics, overdose death figures, price and purity of drug sales at the consumer or 'street' level;

"(2) increased seizure and forfeiture of assets of drug traffickers, including a breakdown of the types of assets seized and/or forfeited;

"(3) arrests and convictions of drug traffickers by violator type;

"(4) volume of drugs seized or confiscated by type;

"(5) estimates on the number of organized drug trafficking organizations that are dismantled and/or the extent to which their organizational structure has been damaged by this program; and

"(6) other indicators deemed appropriate by the Attorney General to analyze the level of success of these task forces.

"This report should also include an explanation of the guidelines established and examples of task force jurisdictions that exemplified successful law enforcement and prosecution efforts based on information exchange, allocation of resources, coordination between agencies (federal, state and local) and other indicators that may serve as a model for improved task force programs."

I appreciate your support and assistance in this effort.

Sincerely,

JOSEPH R. BIDEN, Jr.,
Ranking Minority Member.●

EDGEMONT

● Mr. ABDNOR. Mr. President, the committee report on S. 3079, the Energy and Water Development Appropriation bill, 1983, directs the Secretary of Energy to provide up to $1,000,000 to complete the necessary remedial action work at offsite locations in the vicinity of the TVA mill site at Edgemont, S. Dak.

It is my understanding that the committee expects the Department of Energy to complete this project during the 1983 construction season.

Mr. HATFIELD. The Senator is correct. Provided the necessary authorizing language is enacted, it is the intent of this committee that the Edgemont remedial action project be completed during the next construction season with funds appropriated for the remedial action program in fiscal year 1983.

HYBRID GEOTHERMAL-WOOD ELECTRIC POWER PROJECT

Mr. CRANSTON. Mr. President, would the distinguished floor manager of the conference report yield for an inquiry?

Mr. HATFIELD. I would be happy to yield to the senior Senator from California.

Mr. CRANSTON. I thank the Senator. In reviewing the Senate report on the 1983 Energy and Water Development Appropriation bill, I noted that the Appropriations Committee agreed to provide additional funding for the geothermal-wood electric power project near Susanville, Calif.

Mr. HATFIELD. The Senator is correct. The committee's recommendation included $2,500,000 to complete final preconstruction work on the so-called "hybrid" project. The Department of Energy, the Forest Service, the State of California, and a private company have been jointly developing this project to produce electricity from moderate temperature geothermal fluids and waste wood. The committee felt that successful demonstration of this hybrid process will dramatically increase the temperature range over which geothermal energy can be used to produce electricity.

Mr. CRANSTON. As the Senator from Oregon knows, this project is at a critical stage of development. Three years of feasibility study have been completed and private financing has been arranged for construction of the facility. However, $2,500,000 in "interim" financing must still be located before construction can commence. The Appropriations Committee properly recognized that the Department of Energy's geothermal research budget is the only realistic source of such interim financing.

I understand that the 1983 Energy and Water Appropriation bill is not likely to be enacted for several months, if at all. In light of that fact, I wonder if the Senator can tell me what steps will be taken to insure that the $2,500,000 becomes promptly available for the hybrid project.

Mr. HATFIELD. Under the provisions of this resolution, DOE's geothermal research and development program will be funded during the lifetime of the resolution at the current level. This level of funding is sufficient to permit $2,500,000 to be made available for the hybrid project. Furthermore, I intend to work closely with Secretary Hodel, Representative BEVILL, and others to provide adequate direction to the Department so that important projects, such as the one we are discussing, are not unduly delayed due to the absence of the regular appropriation bill.

Mr. CRANSTON. I thank the floor manager for his assurances.

Mr. HATFIELD. I am happy to be of assistance. Like the Senator from California, I recognize the enormous potential of the geothermal-wood hybrid process. I look forward to seeing its rapid and successful demonstration.

Mr. ABDNOR. Mr. President, I would like to engage the distinguished chairman of the Appropriations Committee in a colloquy concerning funding for the WEB water system in my State.

As the chairman knows, I persuaded the committee to add to the fiscal year 1983 Appropriations for Energy and Water $3 million for this important project.

Our colleagues in the House provided no funding for WEB, but I have spoken personally with both the chairman and ranking minority member of the House Energy and Water Subcommittee and had been very hopeful that they would consent in conference to the provision of these funds.

Unfortunately, we will not get the opportunity to go to conference on the regular fiscal year 1983 bill, since the House has not taken it up and we will be passing the continuing resolution instead. The continuing resolution will fund all programs at the current level. The House resolution would extend current funding through March 15, and the Senate measure would extend funding through September of next year.

It is my understanding that the House committee may process a fiscal year 1983 energy and water appropriations bill next year, so that projects like WEB do not miss the construction season. Is that correct?

Mr. HATFIELD. My colleague from South Dakota is correct.

Mr. ABDNOR. I thank the chairman for his comments, and may I inquire further, does he believe the $3 million provided for WEB in our bill can be maintained?

Mr. HATFIELD. I cannot speak for the other body, but as for the Senate committee, my colleague from South Dakota has been very persuasive and I believe we have a good chance to retain funding for WEB.

I might also point out that the committee's explanatory statement accompanying the continuing resolution directs the Bureau of Reclamation to heed the instructions contained in the House and Senate reports on the fiscal year 1983 energy and water appropriations. The Senate report directs that $3 million be provided for WEB, and we expect that the Bureau will do so.

Mr. ABDNOR. I thank the chairman very much for his assurances. This project is very important to my State; our construction season is very short, and it would be a shame to see the project delayed due to the inaction of Congress. I am pleased to have the chairman's assurances that the project will not be delayed.●

RADIO MARTI

● Mr. SYMMS. Mr. President, I ask to have printed in the RECORD the following speech relating to United States-Cuban policy and Radio Marti.

The speech follows:

SOVIET INTERVENTION IN CENTRAL AMERICA AND THE CARIBBEAN—FOREIGN AFFAIRS RESEARCH INSTITUTE SECOND ANNUAL WORLD BALANCE OF POWER CONFERENCE

(By Ambassador J. William Middendorf II)

Two decades after the Cuban missile crisis, Soviet political and military intervention in the vital Caribbean/Central American area—which includes some two dozen developing nations in Central America, the Caribbean, and northern rim of South America—continues to seriously concern U.S. and other western policy makers. The recent resurgence of Soviet activity, directed mainly through Cuba, spells a threat to the security of the Western Hemisphere as great as any since the 1962 missile crisis. From my perspective on the Western Hemisphere as Ambassador of the United States to the Organization of American States, I would like to take this opportunity to briefly outline the dimensions of this threat, discuss the U.S. government response to it, and offer my thoughts about cooperative measures to combat this challenge.

THE CUBAN CONNECTION

Perhaps the most conclusive evidence of the Soviets' increased interest in the Caribbean Basin is their dramatic expansion of the military forces of Cuba, far beyond previous high levels. Although Castro's per capita military effort is already several times greater than any other Latin American state, last year the Soviet Union's shipments of military equipment to Cuba tripled—reaching the highest level since the 1962 missile crisis. Today, this small communist nation boasts 225,000 men under arms, 200 MIG fighters, 650 tanks, and 90 helicopters. Clearly, this mammoth scale of armament cannot be justified in terms of self-defense. The 63,000 tons of war supplies imported from the Soviet Union in 1981 and the arrival this year of a second squadron of MIG-23/FLOGGERS have added substantially to an air, land, and sea arsenal that was already the area's most powerful. To assure that Cuba's weak economy can support that vast arsenal, total Soviet aid has soared to $9 million a day or $3 billion annually, one fourth of the island's total GNP. In December, 1979, at a time when Soviet oil deliveries to Eastern Europe were being cut back and prices raised, Castro announced that the Soviet Union had guaranteed Cuba's oil needs through 1985 at a price roughly one-third that of the world market. The Soviet Union also pays up to four and five times the world price for Cuban sugar.

As we all know, the investment in Cuba is being exploited to great advantage by the Soviet Union. Cuba has long provided the cannon fodder for Soviet ambitions in Africa. Closer to the United States, we have other significant object lessons. It should be no secret that equipment is being transshipped to Nicaragua and the rebels in El Salvador through Cuban ports. Let us take a closer look at this Cuban-Soviet support of subversion.

NICARAGUA

Developments in Nicaragua since the Sandinista take-over are on the public record. Effectively banning political activity, Nicaraguan leaders now only promise some fashion of elections in 1985 despite statements to the OAS in 1979 that elections would be held promptly. In fact, we have watched with deepening concern as Nicaragua has moved away from pledges of political pluralism toward a repressive, one-party state. Business leaders have been jailed, press and church leaders have been restricted and the large Miskito Indian minority uprooted. An early supporter, The Socialist International, is having second thoughts. The aim of the Nicaraguan leaders seems to be control through political indoctrination and forceful intimidation by creating by far the largest military force ever seen in Central America, a 50,000 man regular army and a 200,000 person militia.

At the same time as Nicaragua greatly expands its army and builds up an inventory of heavy weapons, it also serves as a platform for Cuban/Soviet covert military action. By now there are between four and five thousand Cuban civilian advisors and close to 2,000 Cuban military and security advisors in Nicaragua. These advisors are believed to be serving in key posts throughout the government in which they exert considerable influence. There are also advisors in Nicaragua from East Germany, Bulgaria, North Korea and the Soviet Union to assist in building the Sandinista armed forces. Twenty to 30 Soviet tanks have arrived and more are on the way; approximately 70 Nicaraguans are being trained in Bulgaria as pilots and mechanics. Ground facilities, as we have laid out in great detail for the U.S. press, are being prepared for modern jet fighters. Nicaragua continues to be heavily involved in logistics and other forms of support for the insurgency in El Salvador. All these signs are clear. Encouraged by Cuba and the Soviet Union, Nicaragua is playing a major role as interventionist throughout Central America.

EL SALVADOR

Two years ago, in contrast, the government of El Salvador began an unprecedented land reform. It has repeatedly urged the guerillas to renounce violence, to join the democratic process. Moreover, on March 28 the people of El Salvador provided an incredible demonstration of democratic determination. At least 1.3 million voters, over 80 percent of those eligible, braved the death threats from leftist guerrillas and stood in lines for hours—sometimes with gunfire nearby—to express their will. Then Secretary of State Haig commented on March 29: "The Salvadoran people's stunning personal commitment to the power of democratic vision is an unanswerable repudiation of the advocates of force and violence." The elections in El Salvador represent only the first step in creating representative, constitutionally bound government in that nation. Now comes the work of drafting a constitution leading to presidential elections in 1983. We will look to the new government to move forward with respect to land reform, the creation of democratic institutions, the restoration of the rule of law, and the elimination of human rights abuses by the left and right. Despite the successful elections, El Salvador is not out of danger. The arms supply from Nicaragua still continues.

OTHER COUNTRIES

In addition to Nicaragua and El Salvador, Fidel Castro has also stepped up Cuba's support to guerrillas in Guatemala, Costa Rica, Honduras and Colombia. Recent Cuban subversive efforts in Jamaica and the Dominican Republic, however, have generally been counter-productive. In another prospective Soviet satellite, Grenada, the Cubans are constructing a naval facility and air base capable of handling advanced jet aircraft. Cuba also has installed in Grenada a powerful radio transmitter to increase its capability to beam propaganda throughout Latin America. The Cubans already broadcast 250 hours weekly and are supplemented by 200

hours of Soviet programming. The United States, by comparison, has less than 100 hours of broadcasting each week in the region.

DIRECT INVOLVEMENT

2Besides using Cuba as a surrogate, the Soviets have increasingly tried to become more directly involved in Caribbean and Central American affairs. Almost 10,000 Soviet advisors, military and civilian, are stationed in Cuba. Others, as I previously stated, are in Nicaragua training the local military to use the Soviet arms which have been so generously supplied. A Soviet combat brigade of about 3,000 men is garrisoned a few miles from Havana. The Soviet presence has spread to the surrounding waters of the Caribbean, where two Cuban submarines provided by the Soviets now operate.

STRATEGIC IMPORTANCE OF THE REGION

Why the dramatic upsurge of Soviet interest in the Caribbean region? Primarily because the Soviets recognize that Latin America—especially the Caribbean Basin—is the strategic underbelly of the United States and the Achilles Heel of NATO. In peacetime, 44 percent of all foreign tonnage and 45 percent of all crude oil shipped to the United States passes through the Caribbean. In war, half of NATO's supplies and most of the U.S. reinforcements and petroleum for our forces in Europe would embark from Gulf ports and sail through the Florida straits. The region also is the strategic linchpin between our vital interests in the Atlantic and the Pacific. In shifting forces and supplies between those two oceans, the Panama Canal saves a 7,400 nautical mile trip around Cape Horn. The Soviets recognize, then, that there are strong linkages between a secure Caribbean Basin and our success in implementing our global security policy. If the Soviet presence in the Caribbean Basin continues to expand, every traditional U.S. vital interest—national survival, territorial integrity, economic well-being, and world stability—will be jeopardized to an extent unprecedented in our nation's history.

Further, in a period when the Soviets are increasingly emboldened to show their muscle in Afghanistan and Poland and with their long-term desire of hegemony over Europe and the natural resources upon which it depends in the Middle East and Africa, it serves their interests to increasingly preoccupy us in our own hemisphere, using Cuban and Nicaraguan proxies at very little cost to themselves.

Adding to this Soviet security threat to the Caribbean Basin is the potential for major outflows of refugees if communist regimes succeed in subverting the free countries in the region. The example of Cuba comes immediately to mind. Almost one tenth of the population of Cuba, including 124,000 in the Mariel exodus, have sought refuge in the U.S. since Fidel Castro came to power in 1959. Mariel and its tragic consequences would be dwarfed by comparison if the Central American/Caribbean region succumbs to communism.

THE U.S. RESPONSE

Given such potentially serious consequences to the security of the United States and to the livelihood and freedom of all in the Western Hemisphere, the Reagan administration has given high priority to the region. Our goals are to encourage the social, democratic, and economic development necessary for lasting peace and progress. On February 24, at the Organization of American States, President Reagan announced a new plan—the Caribbean Basin Initiative—to further those goals. Let me summarize briefly the lines of action that President Reagan announced.

SECURITY ASSISTANCE

First, we must make sure that our friends have the means to defend themselves. El Salvador is the most threatened country. We have provided the Salvadoran armed forces with transport vehicles and helicopters to improve mobility, communications for command and control, and coastal patrol craft to halt resupply of the guerrillas. For technical advice on the use and maintenance of that equipment, small teams of U.S. trainers have been working in El Salvador. Their numbers have totalled no more than 55, compared to the approximately 5,000 Soviet military troops and advisors in Cuba. To help improve the combat effectiveness of the Salvadoran army, we have been training Salvadoran officers and soldiers in the United States. A quick reaction battalion organized and trained at Fort Bragg has already been involved in combat operations against the guerrillas in the mountains of northern El Salvador; another battalion is about to complete its training in El Salvador with the assistance of U.S. trainers. In addition, the number of officers in the Salvadoran army doubled with the recent graduation of 477 Salvadoran officer candidates from our infantry school at Fort Benning. It is important to note that the training of all those soldiers stressed the humane treatment of civilians and prisoners and emphasized that maintaining the support of the people is as important as success in battle in counter-insurgency.

However, because our aim is truly peace, we are currently engaged in a dialogue with the Nicaraguan government which began with Ambassador Quainton's delivery of our eight-point plan last April 7. Since then, our two governments have exchanged positions on our mutual concerns and proposals on ways to alleviate them. Our latest proposal was delivered on July 2. Comandante Daniel Ortega of the Nicaraguan junta, speaking on the July 19 third anniversary of the Sandinista takeover, showed the Nicaraguan attitude by once again strongly criticizing the U.S.—as well as the democratically elected governments of El Salvador, Honduras, and Costa Rica.

THE ECONOMIC CRISIS

Second, we are determined to join with others to help provide the Caribbean Basin countries the opportunity to achieve long-term prosperity. Despite occasional fits and starts, most of the Central American Countries and many of the Caribbean islands compiled an enviable record of economic and social change after World War II. Rising export earnings helped cushion even the 1973 oil shock. But in 1978 a serious and generalized deterioration began. Prices for principal export commodities—coffee, sugar, cocoa—started to decline sharply, dropping by two-thirds. Prices for imported oil have increased in the decade by eight times and interest rates on borrowing to meet balance of payments shortfalls have skyrocketed. With slowed economic growth in the industrial world, tourism stagnated. Flight of capital and credit crunches resulted. Some countries are bankrupt. Others are threatened with bankruptcy. The result is a grave, general economic crisis bringing with it misery and despair for many millions of people. As occurs in nature when a once proud animal falls, vultures begin to circle above the hapless victim. The Cuban drive to unify the left and commit it to violence intensifies this economic crisis and creates potential political vulnerability throughout the area. In El Salvador and Guatemala, Cuban-assisted insurgents are destroying power plants, trucks and school buses, bridges and crops and attempting to disrupt trade.

CARIBBEAN BASIN INITIATIVE

To combat this crisis, we are working with Congress on a program consisting of integrated, mutually reinforcing measures in the fields of trade, investment, and financial assistance. The centerpiece of the program is the offer of one-way free trade. Presently the countries in that region already are afforded liberal entry into the U.S. market. Eighty-seven percent of their goods now come into the U.S. duty free. Nevertheless, some of the duties which remain in place are in sectors of special interest to the Basin countries, These duties also limit export expansion of many nontraditional products. The President has requested from Congress the authority to eliminate duties on all imports from the Basin except textiles and apparel. Sugar imports will receive duty-free treatment but only up to a certain limit to protect the U.S. domestic sugar price support program mandated by Congress. A safeguard mechanism will be available to any U.S. industry seriously injured by increased Basin imports. The President has also sought Congressional authorization to grant U.S. investors in the Caribbean significant tax relief to encourage investment.

Additionally, the President has requested an FY 1982 supplemental economic assistance appropriation of $350 million to provide emergency assistance for several key countries whose situation is critical. That will bring proposed FY 1982 economic assistance to $823.9 million or $403 million above FY 1981. The administration's request is for $664.4 million in FY 1983 economic assistance.

PRIVATE SECTOR SUPPORT

The support of the private sector—in the U.S., in third countries, in the Caribbean Basin—will be critical to the success of this effort. Without active private sector backing it will not pass the Congress. Without active private sector participation it will not succeed, once passed. This will be a test case of how government and business can cooperate to spur growth in this vital region.

Private sector transfers in the Caribbean Basin are of major importance. Strikingly, the flow of private financial resources dwarfs official bilateral and multilateral assistance to the region. For example, between 1977 and 1980, for the Hemisphere as a whole, only ten percent of all financial resource transfer was in the form of official assistance. The other 90 percent came from private resources. The countries of the Caribbean Basin suffer desperately from a shortage of private capital needed to spur development. Interventionist government policies, such as uncompensated expropriation or nationalization, impediments to private foreign investment, wasteful import substitution strategies, and excessive government regulation have contributed to this situation.

On the other hand, several economies of the Pacific Basin—notably Taiwan, South Korea, and Singapore—have been financial success stories, even though they possess few natural resources, because of their strong support for the private sector. The have attracted substantial capital for high

technology industries, permitting them to compete in the international export market. The lack of private investment in the Caribbean Basin, by contrast, has left countries in the region dependent on traditional exports of raw materials. The whims of the commodities markets have been especially cruel to them recently, as I mentioned earlier, with drastically declining prices for coffee and sugar and a rising price for oil.

Consequently, many leaders in the Western Hemisphere have come to recognize that outmoded statist models of development are not responsive to the needs of dynamic, developing societies. I was particularly gratified that at last year's meeting of the OAS Inter-American Economic and Social Council a resolution was unanimously adopted formally recognizing the role of the private sector in development and recommending a greater OAS effort to support such a role. And to point to a concrete example, Jamaica under Prime Minister Seaga has begun to rebuild its economy after eight years of socialist mismanagement.

SUPPORT FOR DEMOCRACY

Third, we do not intend to falter in the pursuit of democratic values—for they assure the legitimacy of governments we hope to help. 17 of the 24 countries in the Caribbean Basin now have democratically elected governments. In May we saw Colombians go the the polls in a massive turnout and vote the opposition party into power. Earlier in that month, 74 percent of the voters in a country that was once a model of authoritarianism—the Dominican Republic—took part in an impressive demonstration of civic maturity. Prior to that, Saint Lucia, Costa Rica (in the midst of a brutal economic crisis), El Salvador, and Honduras all held elections with overwhelming 80% turnouts. Moreover, democracy in this troubled region has recently been given valuable impetus with the formation by Costa Rica, El Salvador and Honduras of the Central American Democratic Community—an effort by these democracies to work toward common goals in the region. This endeavor has the strong support of other democracies—Venezuela, Colombia, and, of course, the United States. I find it significant that the increasingly repressive government in Nicaragua has attempted to propagandize against the work of true democracies. Their criticisms of the Central American Democratic Community, however, are falling on deaf ears.

COLLECTIVE MEASURES

Fourth, we are consistently communicating to Cuba that the costs of escalating its intervention in the region will be very high. That is the task of public and private communication. Our underlying message is clear: we will not accept, we do not believe the countries of the region will accept, that the future of the Caribbean Basin is to be manipulated by Moscow through Havana. It must be determined by the countries themselves. Emphasis should be on collective action. In December the Organization of American States voted 22 to 3 with 4 abstentions to support free elections as a means to a political solution in El Salvador and to repudiate the sort of intervention being practiced there by Cuba and Nicaragua. The OAS also voted 19 to 0 to send observers to witness the elections. At the same time, we have suggested that the arms race that now threatens Central America as a result of Nicaraguan imports of heavy weapons and military advisors there should be addressed collectively, perhaps by limiting imports of heavy weapons and military advisors in *all* Central American countries. The government of Honduras has made similar proposals and advanced other useful ideas to its neighbors.

GLOBAL CAMPAIGN FOR DEMOCRACY

Cooperation on a *global* scale can help to ameliorate the long-term problems of the Caribbean Basin. An excellent starting point would be the active participation by all free nations in the growing global campaign for democracy. As President Reagan pointed out in his June 8 speech before the British Parliament, this campaign is intended to foster the vital infrastructure of democracy—the system of a free press, unions, political parties and universities. In the United States, the chairmen and other leaders of the National Republican and Democratic Party organizations are initiating a study with the bipartisan American Political Foundation to determine how the United States can best contribute to the campaign. Also, the Council of Europe is considering a proposal to invite parliamentarians from democratic countries to a meeting next year in Strasbourg to consider ways to help democratic political movements throughout the world, including, presumably, those in the Caribbean Basin.

This November in Washington an international meeting of political leaders will confer on the most effective ways to organize freely contested elections and the ways in which the international community can assist democratic development. Next spring, the Chief Justice of the United States will host a conference of world authorities on constitutionalism and self-government. Authorities from a number of developing and developed countries—judges, philosophers and politicians with practical experience—have agreed to explore how to turn principle into practice and further the rule of law.

These are first steps but important ones which merit the support of all of us in the free world. Clearly, democratic forces, including those of the Caribban Basin, need practical assistance as they compete with the extremes of the left and right and, in the Western Hemisphere, with the subversion of the Soviet Union and Cuba. Too often the door has been open to Soviet intervention. I would suggest that we must support the emergence of stable, democratic forces in the region and do so in an intelligent, but effective cooperative fashion.

ECONOMIC COOPERATION

It is likewise imperative that the economic well-being of the Caribbean Basin be assured through cooperative efforts if democracy is to have a firm foundation. The small, fragile countries of the Caribbean Basin are overwhelmingly dependent on the outside world. Without help they really have no chance of generating the domestic growth or making the internal corrections that will pull them out of the slump. President Reagan did not act alone in proposing the Caribbean Basin Initiative but joined with the leaders of Mexico, Venezuela, Canada and then Colombia. The contributions of those countries have been significant. In spite of serious economic difficulties at home, Mexico and Venezuela are maintaining their oil facility, which provided the region with petroleum at a discount worth $700 million last year. Canada is doubling its aid program. Colombia, itself a developing country, is making available trade credits and preferences and central bank deposits.

The announcement by the 10 EEC leaders at the conclusion of their March 29-30 meeting that they had agreed that aid to Central America by individual countries and by the EEC as a whole should be coordinated and increased, was indeed encouraging. An increase in the level of financial assistance by the EEC and other developed countries to the Caribbean Basin would represent an important shot in the arm and a signal to Moscow that the West is responding to the challenge of underdevelopment.

INVESTMENT IN YOUTH

A third challenge for cooperative action on behalf of the Caribbean basin I wish to propose is an investment by the nations represented at this conference in the youth of the region. Each year Cuba offers hundreds of scholarships to foreign students. From the Eastern Caribbean alone, close to 300 students are currently in Cuba studying technical and academic subjects. The study of Marxism-Leninism is compulsory in many courses, and military affairs is compulsory in some. The Soviet Union and its Bloc allies have also developed a growing scholarship program of political indoctrination involving several thousand young people from the Caribbean. Basin. Last year, it sponsored scholarships for at least twice as many Latin American students as the U.S. I, unfortunately, must admit the scattered U.S. scholarship programs available to the region have stood conceptually still for many years and have been harmed by increasing inflation. We are studying ways to reverse this situation, especially through increased involvement of the private sector, but we cannot go it alone. An effort by other free countries is needed to help bridge the gap. A cooperative effort to provide scholarships to young Caribbeans and Central Americans of the middle and lower classes who do not possess the necessary economic means would be living proof that in a free society there are opportunities for all.

An investment in a scholarship program would bring long-term dividends in a myriad of ways. Better mutual understanding of our respective national characters and more open intercultural communication would occur naturally while Caribbean Basin students were attending our schools. The skills and education that they receive would prepare them for the challenge of directing the social and economic progress of the region.

SUMMARY AND CONCLUSION

In conclusion, I would like to repeat these basic points:

1. The Soviet threat in the Caribbean is as great as any time since the 1962 Cuban missile crisis.

2. An increased Soviet investment in Cuba is being used to support subversion in Central America and the Caribbean.

3. Because the Caribbean Basin is strategically vital to the U.S., the entire Western Hemisphere, and the NATO Alliance, the Reagan administration has formulated a comprehensive response, including increased security assistance to the region, the Caribbean Basin Initiative economic plan, renewed support for democracy in the area, and a collective approach to the Soviet challenge.

4. Global participation in the campaign for democracy will help bolster the new democracies of the region.

5. Likewise, economic assistance to the Caribbean region by other nations of the Hemisphere and free world is necessary if the economic crisis there is to be alleviated.

6. An investment in the youth of the region through an enlarged and revitalized

scholarship program is needed to counter the Soviets' expanding scholarship efforts.

In cooperation with other nations of the free world, through measures such as those I have outlined above, we intend to defeat the Soviet/Cuban policy of support for terrorism and violence in the Caribbean Basin. Our objective is a region at peace with itself, able to devote its energy and attention to economic progress and development of democratic institutions. But these are not really our goals, they are the goals the nations of the Caribbean Basin have set for themselves. All of us at this gathering have a vital stake in helping them to achieve these aspirations.●

COMMUNITY BLOCK GRANT PROGRAM

● Mr. KEJNEDY. Mr. President, I am pleased to join in supporting the amendment offered by my good friend from Connecticut.

Unemployment stands at unprecedent levels; 12 million Americans are now without work. This Christmas will be a bleak one for these men and women and their families.

The amendment we are considering has been before the Senate on three separate occasions, and each time it has been rejected.

Each time we have offered this proposal we are told that the President's program is working, that economic recovery is just around the corner. And each time these promises have failed to be realized.

Senator DODD's proposal would add $1 billion to the continuing resolution for projects under the community development block grant program to create 100,000 jobs for those men and women who have been out of work the longest. Many of these workers have exhausted all of their unemployment assistance. Many have been forced to turn to welfare to survive. As Senator LEVIN pointed out earlier today, many have resorted to selling their blood.

These men and women have worked all their lives. They are not looking for handouts. They want an opportunity to contribute.

The program Senator DODD is proposing would put these able-bodied individuals to work on projects critical to their communities.

This is not leaf-raking. This is not make-work. This is not CETA. This is not public service employment.

These are jobs that need to be done. These are projects that will leave a permanent tangible product in communities across this country.

We are talking about weatherizing the homes of the elderly and the poor. We are talking about repairing and upgrading our mass transit system. We are talking about repairing our streets and sidewalks.

All of this work is waiting to be done. All of these projects have now been deferred because State and local governments have run out of money.

It is just commonsense to spend this money to put the unemployed to work doing this essential work.

We have failed to act before. We must not delay further. I ask my colleagues to support this responsible and necessary measure.

Thank you.

ETHICS COMMISSION

●Mr. KENNEDY. Mr. President, this is a simple amendment, costing no additional funds, to permit the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research to continue in existence for 3 more months, utilizing existing funds.

Mr. President, since 1974, this Commission, in its various forms, has studied some of the most important ethical issues in biomedical research and produced landmark reports. Its work has saved the Congress countless hours of debate and deliberation on complex scientific and ethical problems. Its published reports include psychosurgery, defining death, protecting human subjects, compensating for research injuries, and making health care decisions.

The Commission yet has several important reports nearing completion on the issues surrounding decisions to forego life sustaining treatment, problems involved in securing access to health care, and the complexities of implementing human research regulations. Considerable resources have been devoted to preparing these reports already. It would be a waste if we were to permit this investment not to be brought to completion—particularly since the Commission can finish its work within 3 months at no additional costs.

I urge adoption of the amendment.●

● Mr. ANDREWS. I want to call the Senate's attention to the medicare mental health demonstration project which the Department of Health and Human Services recently began and with which the distinguished chairman of the Labor/HHS Subcommittee is familiar. This study could be of great use to the Congress in its efforts to identify potential cost savings in the medicare program. It seems to me that the Department's evaluation design should include collection of the data necessary to reveal the impact of additional medicare outpatient mental health coverage on medicare costs for medical, surgical, and other mental health services.

Mr. SCHMITT. I am pleased that the Senator from North Dakota has brought this matter to the Senate's attention, and I am familiar with the report language of the House encouraging HHS to amend the evaluation design to include collection and analysis of this data and to make available a revised evaluation design within 3 months.

Mr. ANDREWS. I am pleased that the chairman supports this effort to identify potential cost savings in the medicare program.

Mr. SCHMITT. I am glad to join the Senator in this effort. We all share a strong interest in uncovering all potential cost savings in the medicare program, particularly those that can be effected without reductions in the delivery of needed care.

● Mr. EXON. Mr. President, I would like to engage the chairman of the Appropriations Committee in a colloquy.

The formulas for distribution of aid to federally impacted schools, as contained in both the House and Senate version of the continuing resolution, hold several unknowns. For example, the formulas superimpose a new distribution on top of a tier system which is already part of the law. Additionally, the bill contains a cap on funds for certain highly impacted districts, which may reduce funds for these districts in 1983. The point is that no computer runs based on these formulas have been conducted by the Department of Education to see how school districts might be affected.

The General Counsel's Office of the Department of Education brought this matter to my attention, and expressed serious concern.

Ordinarily, there would be an opportunity to take a second look at this when the continuing resolution is extended later this fiscal year. However, if the Senate version of the continuing resolution prevails, which provides for funding through September 30, we could find ourselves locked into a distribution formula which is not satisfactory nor what we intended.

Rather than trying to correct this situation by an amendment in this already overburdened continuing resolution, I would ask the distinguished chairman if he could agree to another opportunity, after the computer runs have been made, to review our current actions and formulas, perhaps either on a 1983 supplemental appropriation bill or on some other vehicle.

There is no particular rush to review these formulas since the Congress has wisely distributed much of the 1983 impact aid appropriation under authority of my amendment earlier this year. All that is needed now is the commitment to an opportunity to review our actions after the Department of Education has reported its figures and voiced its concerns.

Mr. HATFIELD. I am pleased to assure the Senator from Nebraska that the Appropriations Committee will provide such an opportunity. In extending the continuing resolution until September 30, we do not want to preclude consideration of those kinds of matters which the Senator has raised.●

● Mr. RIEGLE. Mr. President, I submit for the RECORD a letter addressed to the conferees relating to and urging acceptance of the House

appropriation levels for HUD-assisted housing programs.

The letter follows:

WASHINGTON, D.C.
December 17, 1982.

DEAR CONFEREE: As members of the Senate Banking, Housing, and Urban Affairs Committee we urge you, as a member of the Conference Committee considering the Continuing Resolution, H.J. Res. 631, to accept the House appropriation levels for the Department of Housing and Urban Development's assisted housing programs. These programs have been cut drastically over the past two years to the detriment of low and moderate income people who so desperately need decent, safe and sanitary housing.

We are urging you to accept the House numbers because they fulfill the commitment we made in the First Concurrent Budget Resolution of 1983, S. Con. Res. 92. That resolution would allow $9.7 billion in additional funds for HUD programs, which is the level sought by the House. Unfortunately, the Senate only included $5.7 billion in new budget authority for these programs. If the full $9.7 billion is appropriated we will be able to assist tens of thousands of low income people who need adequate shelter and still be within the limitations of the budget resolution.

Since low and moderate income people have already borne a disproportionate share of the reductions required by the budget, we see no reason why appropriations for these progams should fall below the levels considered in the Congressional budget. We therefore urge you to accept the House levels.

We wish you the very best in this holiday season.

Sincerely,

ALAN CRANSTON.
PAUL SARBANES.
DON RIEGLE.
CHRISTOPHER J. DODD.●

● Mr. LEVIN. Among the funds in the continuing resolution is Office of Real Property of $12,404,000, which shall be derived from the proceeds from the disposal of surplus real property. That is an increase from last year's $6,650,000 which GSA specifically requested to manage the President's accelerated program to sell surplus property. The widsom of that program, or lack thereof, is not my concern today. Rather its cost is what gives me pause.

I have recently learned that in addition to the $12.4 million which we will appropriate, GSA also plans to spend $47 million more out of a permanent, indefinite, special fund to contract the services of private real estate agents to sell surplus property, an increase of $46 million in 1 year. Like the $12.4 million, this money will also come from the proceeds of Federal property sales, but unlike the $12.4 million Congress will not have to approve its use.

Section 204(b) of the Federal Properties Act of 1949 give GSA the authority to contract private appraisers, auctioneers, and brokers to sell Federal property without first obtaining congressional consent. The law only limits the use of the fund, "Expenses, Disposal of Surplus and Related Personal Property," to 12 percent of the proceeds from Federal property sales. If the President's program to sell Federal property continues at an accelerated rate, during the next 3 years we could spend more than $100 million. Congress would have no control over these outlays.

The $47 million figure stands in sharp contrast to the $12.4 million which we will appropriate for GSA in-house sales. Officials at GSA have said that private real estate agents and GSA itself will each handle about half the sales. Why should it cost almost four times more for private brokers to sell the property than GSA? The plan to pay so much seems inconsistent with the need to yield the maximum amount of revenue to the Treasury. As a matter of fact, a high official at GSA told a member of my subcommittee staff that it would be cheaper to do the sales in-house but that GSA does not have sufficient manpower or expertise to realize the administration's revenue targets.

Knowing of OMB's insistence that Government services be cost-effective, I asked GSA if it had done a cost-benefit analysis before it decided to employ outside contractors on such a large scale. Ray Kline, the Deputy Administrator, explained to us that GSA did not do a cost-benefit analysis because GSA believed that the sales program is so large that private sector help is needed, presumably regardless of the cost.

I reject that logic, particularly today when we have all been asked to tighten our belts. I ask you to join me in requesting that GSA do a cost-benefit analysis to justify its new policy. If private sector help is cheaper, so be it. But let us find out.

The decision to use private brokers to sell surplus property has not been subject to review by either the Appropriations or Governmental Affairs Committees. Such a substantial increase in this fund, while strictly legal, is unusual and demands congressional scrutiny to make certain that the consequences of this ambitious program have been thoughtfully considered.

Mr. ABDNOR. Thank you, Senator LEVIN. I support your request that GSA prepare a cost-benefit analysis so that we will know that the Government is not wasting money as it seeks to sell Federal property. I agree with you that Congress should oversee this program. I understand that the criteria that will govern which properties will be turned over to the private sector to sell are not yet in place. Nor have the guidelines regulating their sale being issued, even though we are now already more than 2 months into the fiscal year. On the other hand I support this disposal effort to sell surplus properties, and would hope that the study would not delay the program.

Mr. DECONCINI. Thank you for bringing this to our attention. I would be happy to join you, Senator LEVIN, in a letter asking GSA to do a cost-benefit analysis. I think that report ought to be due before GSA makes its formal appearance before the Appropriations Committee next year.●

PERSHING II AND GROUND LAUNCHED CRUISE MISSILES

Mr. PERCY. Mr. President, I would like to bring to the attention of the managers of the continuing resolution the fact that the House bill has made significant reductions in both the Pershing II and ground launched cruise missile programs. Both of these programs are vital to the implementation of the 1979 decision by the NATO ministers to deploy cruise missiles in Europe and they are vital to our arms control negotiators in Geneva. I ask unanimous consent to insert in the RECORD a letter from Paul Nitze, our chief negotiator in the INF talks in Geneva, which emphasizes the importance of these two programs. I also ask unanimous consent that a resolution of the North Atlantic Assembly, which reaffirms the 1979 NATO decision, be placed in the RECORD. I urge the chairman of the Appropriations Committee and the chairman of the Defense Appropriations Subcommittee to hold firm to the Senate position on both the Pershing II and ground launched cruise missile program.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY,
Washington, D.C., December 7, 1982.

Hon. CHARLES H. PERCY,
Chairman, Senate Foreign Relations Committee, U.S. Senate.

DEAR MR. CHAIRMAN: I have just returned from our INF negotiations in Geneva and want to convey to you my concern over the House action deleting funds for Pershing II production.

In the absence of an acceptable arms control agreement, deployment of the Pershing II and the BGM-109G ground-launched cruise missiles is essential to balance the massive Soviet deployment of Soviet SS-20 missiles. In the INF negotiations the U.S. has put forward a proposal under which the U.S. would forgo its deployments provided the Soviets forgo theirs. There is no prospect that the Soviets will negotiate seriously on the basis of the U.S. proposal if they conclude that support of the Congress for our deployments may be withdrawn or weakened. Curtailment or delay in funding of the programs would thus have an adverse effect upon any prospects for a favorable outcome on the INF issue.

Accordingly, I hope you and the Senate can continue your support of necessary Pershing II and GLCM funding.

Best regards,

PAUL H. NITZE.

RESOLUTION 134

The Assembly, Recalling its 1981 Resolution on Nuclear Weapons in Europe, which stressed the far-reaching significance of NATO's 1979 decision to achieve a modernisation of its theatre nuclear forces while seeking negotiated East-West limits on such forces;

Re-emphasising the importance of sustaining a public consensus behind this dual-track decision;

Expressing concern about ongoing Soviet deployments of the SS-20 and other Soviet improvements in theatre nuclear forces;

Welcoming the Intermediate Nuclear Force (INF) negotiations and Strategic Arms Reductions Talks (START) in Geneva;

Convinced that NATO's firm determination to modernise is essential to progress in such negotiations;

Aware that public opposition to scheduled theatre nuclear force deployments may increase in the absence of progress in the INF negotiations;

Supporting strongly a "zero-zero" outcome of these negotiations, as proposed by President Reagan, as the best possible outcome; but

Concerned that this or another acceptable outcome of the INF talks may not be forthcoming prior to the first NATO deployments scheduled for late 1983;

Noting the need for NATO to promote public understanding of and support for its nuclear strategy of deterrence through flexible response and, in this respect;

Welcoming the review of short-range nuclear systems by NATO's High Level-Group aimed at rationalising and, if possible reducing, NATO's reliance on short-range nuclear weapons;

Urges member governments of the North Atlantic Alliance:

1. to maintain firm adherence to both elements of the 1979 decision with equal emphasis;

2. to continue efforts to explain clearly and persuasively the role of nuclear weapons in Alliance strategy, and, more specifically, to promote public understanding of current negotiations by calling attention to the "zero-zero" proposal adopted by the Alliance as sound and reasonable, while emphasising NATO's willingness to consider other mutually acceptable outcomes; explaining more clearly the complexities involved in such negotiations and the realistic prospects for early agreement; and

3. to encourage appropriate High Level Group Studies and implement the conclusions thereof, directed towards reducing the Alliance's reliance on short-range nuclear weapons in order both to strengthen the credibility of Alliance military policy, and to fortify public confidence in the rational basis of NATO's deterrent posture.

Mr. HARRY F. BYRD, JR. Mr. President, earlier today the Senate took a position of moderation and deliberate responsibility in exercising its constitutional role in matters of foreign policy. I refer to the tabling of two amendments, submitted in good faith by well-intentioned Senators, which nevertheless would have tied the hands of the Reagan administration in trying to prevent a complete takeover of Central America by Communist puppets of the Soviet Union.

There was one Senator, Mr. President, who stepped into the breach—the distinguished Senator from North Carolina (Mr. HELMS) who throughout his 10 years in the Senate has been willing to spend the time and effort necessary to raise questions about legislation flowing through the Senate.

I was struck by the fact, Mr. President, that here was JESSE HELMS today, doing what he has done constantly throughout his career as a Senator, guarding the bridge against proposals that in his judgment could adversely affect the strength and stability of the United States.

Senator HELMS warned us that approvel of the amendments would be "playing with fire." And although he was limited to 2 minutes to make his case, he made it effectively and successfully. The amendments were tabled.

The two amendments before the Senate today had already been considered by the House of Representatives. A number of Members of the House acknowledged later that one of them had been brought before the House in a rushed fashion, and approved without a full understanding of the implications of the amendment in terms of sending a signal that a fundamental and dangerous change in our foreign policy was in progress—a change that would adversely affect the President's ability to direct U.S. foreign policy.

In dealing with the volatile situation in Latin America, there is great hazard in taking away the President's flexibility. Senator HELMS chairman of the Foreign Relations Western Hemisphere Subcommittee, made clear that Central America is in great peril, that communism is on the move there. His warning that the Senate was "playing with fire" was no exaggeration.

Senator HELMS put out the fire with his effective effort against the undoubtedly well-intentioned proposals. As he has done on so many previous occasions during the past 10 years, he has served his country well. I commend the able Senator from North Carolina, and I congratulate the State of North Carolina for its wisdom in sending him to the Senate.

CONGRESSIONAL PAY RAISE

Mr. THURMOND. Mr. President, I rise in opposition to any increase in pay for Members of Congress. While I am well aware that there are some who feel that a pay increase is both needed and deserved, I think that it is inappropriate at this time. With the economy in a deep recession, with an unemployment rate in excess of 10 percent, and with a huge Federal budget deficit, a pay increase of any amount would be sending the wrong message to the people, who are enduring severe financial hardships.

It is up to the Congress to help lead our country out of these economic hard times. Our commitment to this task can best be shown by voting against a pay raise. Until Congress takes the steps necessary to balance the budget and put the economy back on track, consideration of a pay raise is premature and most unwise. Moreover, within the last several days, the Senate voted to repeal the rule which would have imposed a strict limitation on outside earned income, such as honoraria from speaking engagements. Although I have previously favored a limit on outside income, I voted for repeal of the Senate rule because I felt such a step was preferable to approval of a pay raise for Members of Congress. The right of Senators to earn outside income from private sources in addition to their Senate salary is an entirely different matter from asking the taxpayers to shoulder a congressional pay raise.

ARMY SCRAPER CONTRACTS

Mr. PERCY. Mr. President, I hope the gentleman from Montana (Mr. BAUCUS) will withdraw his amendment. Some of the statements he has made are not based entirely on the facts of the case.

The Army put out the bids for the commercial construction equipment program earlier this year and has made a number of postponements specifically for some of the companies that may be now calling for another delay in letting these scraper contracts.

The Army commercial construction equipment program is an ongoing effort by the Department of the Army to take advantage of experience gained in the commercial marketplace—to buy products that have proven their worth in the commercial world. This program has been in existence for more than 10 years with several successful buys to its credit. The scraper procurement has been well thought out by the Army during the last several years. The requirements and the specifications were carefully developed and improved upon. I have been assured that the final specifications were not written around a single manufacturer, nor are they restrictive to one manufacturer. But the specifications were developed in a manner that allows bids by three or more proven commercial scraper manufacturers.

The Army cannot afford to delay this program any further. Most of the present scraper fleet is either overaged, or fast approaching that point. Some of the older models cannot now be supported in the field due to a lack of replacement engines and other key parts.

These are the facts of the Army's interest in getting scrapers. There should not be additional delays beyond what we have experienced so far. The Army should be allowed to purchase the equipment it needs now.

I hope the Senator will withdraw this amendment.

WHAT THE SENATE CONTINUING RESOLUTION DOES ON FOREIGN AID

Mr. EAGLETON. Mr. President, during our marathon, 37-hour session, we voted, at the insistence of Senator HARRY BYRD, on the Appropriations Committee's amendment dealing with foreign aid. The entire debate on this important matter consumed about 2 minutes and is found at page 31321 of

the CONGRESSIONAL RECORD. Quite frankly, Mr. President, I very much doubt whether any Member of the Senate knew precisely what he or she was voting on.

Therefore, so that the Senate may, belatedly, understand both what was at issue in the vote and what we were voting on, I wil. make this summary.

The House continuing resolution appropriated $10.987 billion for foreign aid. This figure is basically the final fiscal year 1982 foreign aid appropriations, plus two add-ons: $250 million in economic and military assistance for Israel, and $225 million in military assistance for Egypt.

The Senate Appropriations Committee changed the House continuing resolution as per the following table:

SENATE ACTION ON FOREIGN ASSISTANCE AS COMPARED TO HOUSE ALLOWANCE IN CONTINUING RESOLUTION

Senate increases: With the exception of IDA, the major Senate increases are in security assistance programs which provide military aid and balance of payments assistance to countries of political or strategic importance to the United States.

[In millions of dollars]

Major increases:	*Above House*
International Development Association (IDA)	+100
Economic Support Fund	+310
Military Assistance Program	+190
Foreign Military Sales (increased credits to Israel)	+125

These major increases are offset in part by numerous proportional reductions in smaller programs. Examples of these are:

[In millions of dollars]

Major increases:	*Below House*
World Bank	−20
African Development Fund	−18
AID Development Assistance	−18
Refugee Assistance	−24
African Sahel Development Program	−17

In toto, the Senate is $555 million above the House, but $458 million below fiscal year 1982.

Thus, Mr. President, what we were voting on was whether to accept or reject the Senate Appropriations Committee's changes in the House continuing resolution. The Senate, by a vote of 57 to 41, accepted the Senate Appropriations Committee's changes.

Mr. GARN. Mr. President, on December 15, 1982, the full Appropriations Committee met to mark up House Joint Resolution 631, the continuing resolution for fiscal year 1983. During consideration of this joint resolution, the committee accepted my recommendations concerning the HUD-independent agencies sections of the joint resolution. I submit a statement which explains these recommendations.

The statement follows:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

HOUSING PROGRAMS

Annual contributions

The Committee recommends $5,732,355,689 in new budget authority and $715,331,146 in additional contract authority for the Department's assisted housing program within this account. These authorities, when combined with estimated budget authority carryovers of $1,590,358,901, deobligations of $4,600,000,000 and permanent authority of $24,665,665 would result in a fiscal year 1983 program level of $12,697,421,887.

Given the program structure proposed by the Committee, the recommended funding would result in the reservation of 118,860 housing units in fiscal year 1983. Under the Committee's recommendations, 16,000 units would be reserved for housing for the elderly or handicapped (section 202), as opposed to the 10,000 requested by the administration and the House and the approximately 16,900 made available in fiscal year 1982; reservation of 3,000 units of Indian housing as opposed to the 1,000 provided by the House (the administration did not request any Indian housing in fiscal year 1983), compared to approximately 2,400 units in fiscal year 1982; 24,860 units of section 8 existing, as opposed to the 47,270 units proposed by the House (the administration did not request any in fiscal year 1983); and 75,000 unit reservations in 1983 associated with conversions and property disposition. As far as Indian housing is concerned, the Committee expects these funds to cover the full costs of construction, including the provision of water and sewer facilities.

The Committee also recommends $1,000,000,000 in new budget authority and $50,000,000 in new contract authority for public housing modernization. Although the Committee rejected the concept of funding the entire modernization program for fiscal year 1983 from recaptures, such recaptures would be used to augment the basic $1,000,000,000 in new authority. Based on the Department's December estimates, approximately 70,000 units of public housing within an associated $9,000,000,000 in budget authority are in the pipeline and currently not under construction. Many of these projects are unlikely to go to construction and, therefore, the funds should be recaptured and applied to other housing needs. Consequently, the Committee included bill language requiring the Department to apply the first $1,000,000,000 in public housing recaptures to modernization and 30 percent of the recaptured thereafter for additional modernization. As a result of this policy, it is estimated that $2,600,000,000 will be available for public housing modernization.

In connection with the funds provided for public housing modernization, the Committee has been made aware of a serious problem confronting a number of public housing authorities. This problem has arisen because selected public housing authorities have found that, although substantial development money for new public housing has been allocated in the past, too often the most urgent needs are in the modernization program. Complicating the problem is the fact that the Department has notified various public housing authorities that funds provided for a new project may not be transferred to another new project if the former is unable to go to construction and may not be converted to modernization work. This prohibition results in the recapture of public housing development funds. The St. Louis public housing authority, for example, will lose $8,500,000 of moneys made available for new public housing, which cannot be used for that purpose, but which could be used to restore one of its largest public housing projects. The Committee strongly urges the Department to make available from within the funds provided, sufficient moneys to those public housing authorities that can make use of such funds within 12 months.

In addition, the Committee also included a provision requiring the use of $89,321,727 of budget authority in fiscal year 1983 for the modernization of 5,073 vacant uninhabitable public housing units. A similar provision appeared in two previous appropriation acts (Public Laws 97-216 and 97-272).

The Senate language also requires that the Department apply 70 percent of the funds recaptured from public housing (after the first $1,000,000,000) be used for the reservation of section 8 existing units. The Department estimates that this proviso could result in the availability of $1,400,000,000 in budget authority and, consequently, the reservation of 24,860 section 8 existing units. The House action provides $2,662,495,910 in budget authority and an associated 47,270 units (the administration did not request any section 8 existing units for fiscal year 1983).

The following table compares the House and Senate recommendations on assisted housing.

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING—COMPARISON OF PROPOSED PROGRAMS—HOUSE VERSUS SENATE

	House		Senate	
	Units	Budget Authority	Units	Budget Authority

Rent supplement

(Rescission)

The Committee recommends a rescission of $2,830,360,000 in budget authority and $105,160,000 in contract authority as proposed by the administration.

The Committee agrees with the basic thrust of the administration's proposal to accelerate the conversion of units from the rent supplement program to section 8. In Public Law 97-216, the Congress authorized the conversion of 60,000 units in fiscal year 1982. The Committee recommends the same rate of conversion in fiscal year 1983.

The Federal Government has entered into long-term contractual commitments and obligations for assistance under the rent supplement program to owners and tenants of projects which are secured by mortgages insured by FHA or financed under a State or local program. Project owners, lenders and bond holders have acted directly in reliance on those commitments.

The Committee has reviewed the Department's actions this past fiscal year in regard to meeting rent supplement shortfalls and is concerned that HUD is not now able to assure the continued availability of adequate funding resources to these projects. Due to a severe shortage of available rent supplement resources this past fiscal year, the Department, with the Committee's concurrence, had to tap its funding authority under the U.S. Housing Act of 1937 to meet rent supplement contract shortfalls as they arose. This year, demands on those resources may be far greater and their availability for this purpose thus less assured.

Accordingly, the Committee directs the Department, before the expiration of this continuing resolution, to develop a comprehensive funding plan for meeting these obligations. The plan shall include data and projections which demonstrate the degree to which the additional funds to be recaptured are needed for these obligations and shall include the method of the plan's implementation. The Committee expects the Department to work closely in this interim period with those affected in order to assure an adequate, permanent resolution of this problem.

In the interim, the Committee directs that the Department reserve such additional amounts as necessary, from the $208,160,160 provided for section 8 existing amendments to augment the funds available for rent supplement amendments.

The Committee recognizes that a long-range solution may lie at least in part in conversion of State-aided, bond-financed projects from rent supplements to equivalent assistance under the permanent authority of the section 236 rental assistance program. Therefore, the Committee believes that the Department should look closely in conducting its analysis and developing its plan, at both the rent supplement and the rental assistance programs.

Housing for the Elderly or Handicapped Fund

(Limitation on Loan)

The Committee recommends $724,800,000 as the loan limitation for the elderly and handicapped program This would provide for a total of 16,000 units in fiscal year 1983, as opposed to the requested level of 10,000 units and $453,000,000 of loan limitation proposed by the administration and contained in Public Law 97-272.

The Committee has recently learned that the Department intends to begin reserving section 8 authority for section 202 units at an interest rate of 11.75 percent. The Committee further understands that this interest rate is the curent Treasury borrowing rate charged to the section 202 fund and it does not reflect the rate at which the Department may have to borrow when construction, on projects reserved in 1983, is completed in late fiscal year 1985 or early fiscal year 1986. If interest rates continue to decline, it appears unreasonable to the Committee to reserve units in fiscal year 1983 at an inflated interest rate. Reservations thus made would be at a higher interest rate resulting in fewer units reserved than would have been under current procedures where the reservation interest rate is based upon a reasonable projection of interest rates to be in effect at the time of closing (about 2 years after reservation). The Committe feels that the proposed increase in the reservation interest rate is an attempt to reduce the number of units to receive assistance under the program. Therefore, the Department is directed to continue using the current procedure and interest rate for reserving section 202 units in fiscal year 1983 and subsequent years.

The Committee has included bill language to assure that the Department will provide loans at 9.25 percent for those section 202 pipeline units that go to closing during fiscal year 1983.

Federal Housing Administration fund

The Committee has included bill language increasing the FHA limitation on guaranteed loans from $39,800,000,000 to $45,900,000,000. In its fiscal year 1983 budget request, the administration proposed a $35,000,000,000 limitation on FHA commitments for mortgage insurance. The HUD-Independent Agencies appropriation bill for fiscal year 1983 (Public Law 97-272) contained a limitation of $39,800,000,000. However, the Committee has recently been informed by HUD that on the basis of the Department's latest projections that the FHA commitment level will exceed the current limitations. The Committee believes that without this increase in the limitation, the FHA program could be shut down in mid-July during the peak of the housing season.

The Committee has also included bill language which will allow HUD to exceed the FHA mortgage limit of multifamily mortgages by 140 percent in areas across the country where housing costs are the highest. Current law establishes three categories for FHA mortgage limits. The first category is in areas where the basic FHA limits apply. The second is in those areas in which HUD may exceed the FHA limit by 75 percent. The third is in those high-cost areas where the mortgage limit may be exceeded by 90 percent. The Committee believes that increasing the FHA mortgage limits will help stimulate housing construction in these highest cost areas.

Government National Mortgage Association

Special Assistance Function Fund

The Committee has not recommended providing any additional funds for the Government National Mortgage Association's (GNMA) special assistance function program. The House has provided $500,000,000 for the program.

The Omnibus Budget Reconciliation Act of 1981, Public Law 97-35, set the GNMA limit at $1,973,000,000. The fiscal year 1982 HUD-Independent Agencies Appropriations Act, Public Law 97-101, provided the entire amounts authorized.

Of the $500,000,000 added by the House, $350,000,000 is for targeted tandem projects and thus, will provide no assisted housing for low-income individuals, and $150,000,000 is for 20 percent section 8 projects (on these 20 percent projects, GNMA pays a subsidy on all of the units—this means that middle income tenants are being subsidized.

The Committee has not recommended the appropriation of this additional $500,000,000 for several reasons. First, the funds are not authorized. Second, to fund all of the lottery losers, other than 100 percent section 8 units, would require another $1,270,000,000 ($678,000,000 for targeted tandem and $592,000,000 for partially assisted, 20 percent projects). Each unit assisted through GNMA will cost $40,000. Finally, for each $100,000,000 appropriated in fiscal year 1983, the outlays in fiscal year 1985 will be $97,500,000.

GENERAL PROVISIONS

Veterans Administration

The Committee recommends deletion of House bill language (sec. 109) which would direct the Veterans Administration to terminate the development of a centralized hospital-wide information system (Computerized Medical Information Support System—COMISS) and implement a decentralized minicomputer system (called MUMPS).

Each of these systems has a different focus. The centralized system (COMISS) is more suited for aggregating data and providing information for management decisions such as resource allocation among regions and hospitals. The decentralized system (MUMPS) is an essential tool needed for the day-to-day operations individual Veterans Administration medical centers.

National Aeronautics and Space Administration

Research and Development

The Committee agrees with the House and has included language (sec. 126) establishing a cap on expenditures for the tracking and data relay satellite system (TDRSS). This provision to prohibit, without prior approval, NASA from entering into a contract of this type differing from the arrangement described to the Committee earlier this month. The language also prohibits the Administrator of NASA from exceeding both the total case of TDRSS and the cost of restructuring the existing contract to specific amounts without the approval of the Committees on Appropriations.

TITLE II

VA—Hospital Rehabilitation

The Committee does not agree with the House in providing an additional $50,000,000 for the VA's nonrecurring maintenance and repair program in fiscal year 1983.

In acting on the regular HUD-Independent Agencies appropriations bill for fiscal year 1983, Public Law 97-272, the House on September 15, approved reducing the VA-minor construction account by $50,000,000. The Senate agreed with this reduction, due to the fact that there was an unobligated balance at the end of fiscal year 1982 of over $156,000,000. The VA has indicated to the Committee that the agency does not currently have a system for prioritizing construction needs. Therefore, the Committee does not believe that the additional $50,000,000 added by the House will help stimulate jobs.

HUD—Public Housing Modernization

The Committee does not agree with the House in providing an additional $200,000,000 for public housing modernization. The Committee has provided $2,600,000,000 in title I of the resolution for public housing modernization. HUD has informed the Committee that they could effectively review and process 1,800,000,000 dollars' worth of modernization requests, and that amounts above that level could be reserved by the Department for use by PHA's during the maximum allowable 5-year period. Thus, the Committee does not believe that the additional $200,000,000 proposed by the House will help create additional jobs.

HUD—Community Development Block Grant

The Committee does not agree with the House in providing an additional $1,000,000,000 for the Community Development Block Grants.

On December 7, the President transmitted a deferral of $221,000,000 for the Community Development Block Grant program. The Department has calculated that $426,000,000 in unobligated balances will be carried over in fiscal year 1983.

The Committee does not believe that the House's proposal would create additional jobs immediately because there is no guarantee communities would use the funds for this activity since they are permitted to select activities based on their needs; employment may not be granted immediately since construction projects require a planning stage; and the proposal to emphasize small construction projects would generate temporary—not permanent—employment.

AGAINST ANY AMENDMENT TO FURTHER REDUCE BMD

Mr. HEFLIN. Mr. President, a majority of the Members of both Houses have sent the message to the White House on the MX basing mode. Now, it would be a grievous error to jeopardize the option of a ballistic missile defense (BMD) if the Soviet threat grows in the future.

It is incomprehensible to me that we would consider for one second any further reductions to this program. It is a valuable research and development program, not uniquely coupled to MX defense. With the MX program delay it is more essential than ever that we maintain future options to avoid leaving our land-based ICBM forces naked to a Soviet nuclear strike.

The President has made it clear he did not intend to add a deployed BMD programm to the cost of MX deployment. In his November 22 statement, President Reagan said:

As far as an active defense is concerned, we do not wish to embark on any course of action that could endanger the current ABM treaty so long as it is observed by the Soviet Union. Likewise, we do not wish to build even the minimal ABM system allowed us by the treaty, even though the Soviets have done so.

We plan to continue research on ballistic missile defense technology—the kind of smart, highly accurate, hopefully non-nuclear weapons that utilize the micro-electronic and other advanced technologies in which we excel. The objective of this program is stability for our ICBM forces in the 90's, a hedge against Soviet breakout of the ABM treaty, and the technical competence to evaluate Soviet ABM developments. We currently have no plan to deploy and Ballistic Missile Defense system. * * * The ongoing ballistic missile defense reasearch and development will cost about $2.5 billion.

Ironically, I am somewhat surprised that those proposing a nuclear freeze have not realized the non-nuclear potential of BMD. Through the investment of resources for R&D over the last decade, BMD has developed mature technologies which one day could permit our Nation to defend itself against a nuclear threat through such potential means as the use of amazingly accurate non-nuclear interceptors in the exo-atmosphere.

Without speculating on future ABM Treaty modifications, I would simply note that one day—perhaps sooner than we might anticipate—we may come to agree that defense of each nation could be more stabilizing, in the view of both sides, while offensive weapons are reduced. Even in 1972, when the ABM Treaty was negotiated, it was assumed major reductions in offensive ballistic missile forces would be shortly forthcoming. At that time, I questioned the strategy of beginning with defensive reductions.

I wondered then, and suggest now, what could be more stabilizing than the ability to defend one's homeland against nuclear attack—deliberate or, certainly, accidental? Thus, today we see the Soviets well ahead in ballistic missile capabilities and our land-based ICBM's growing increasingly vulnerable. I suspect that Dr. Henry Kissinger might have second thoughts today about the decision in the early 1970's considering developments since.

We have an ABM Treaty which no one proposes be discontinued. But suppose, with its own ABM advancements, the Soviets opted to withdraw from the treaty in future years.

We simply must keep BMD viable, within treaty constraints.

Particularly paradoxical at this point is the fact that if a survey were made of typical Americans, I suspect most assume we have a defensive capability now. Someone made the point the other day that if you asked your constituents how many Soviet warheads we would knock down in a first strike of 1,000 they would probably guess in the hundreds. The real answer, of course, would be none. We have no defense, even of our offensive missiles.

The ABM Treaty permits limited deployment by both sides, and the Soviets have a system deployed around Moscow. However, Congress decided in 1976 to phase out our deployed site at Grand Forks, S. Dak. Meanwhile, the Soviets have continued with a system-level program, at expenditures three times greater than ones, which we assume could be rapidly deployed in the future.

The United States has pursued only a modest R&D program since the early 1970's, progressively developing means to defend any ground-based ICBM. Now the BMD technology has progressed to the point that an effective system can be engineered.

Although it is frequently discussed in connection with possible future MX defense, BMD is not exclusively related to a specific MX basing mode, and by no means exclusively to MX. It is a flexible program, which can defend any hard targets, including Minuteman missiles and communication and control systems. The generic components can be packaged to defend either fixed or deceptively based ICBM's. As such, it is independent of the timing or outcome of MX decisions.

BMD adds stability to the strategic balance. By protecting our retaliatory forces, BMD minimizes the advantage to an adversary in attacking first; that is, it deters a first strike by imposing an unacceptably high price to destroy our ability to retaliate. The proper mix of strategic nuclear forces, which includes BMD, is the least sensitive to miscalculation and error by an adversary military planner because it precludes the need for a launch under attack assessment policy. BMD is required to begin the long-term process of achieving a damage-limiting balance of strategic forces.

With BMD of offensive forces, less offensive capability is required to provide the same level of deterrent. Defense of offensive forces is nonthreatening, whereas offensive deployments threaten, and BMD decreases the importance of numerical imbalance in offensive force levels.

A viable BMD program will prevent Soviet technological superiority, deter Soviet abrogation of the ABM Treaty, and allow the United States to rapidly respond to any Soviet unilateral BMD deployment.

A viable BMD R&D program is not treaty-restricted or provocative. Conversely, recognizing the leadtime advantages of the large-scale Soviet ABM defense program, to drastically alter the ability to make up lost time in our BMD program would send the wrong signal to the Soviets about our strategic intentions, thus further de-

grading our bargaining position in arms reduction negotiations.

Earlier this year, President Reagan requested BMD funding at above $1 billion to provide an aggressive R&D option to meet the threat envisioned in the late 1980's. This program has been cut back from the administration request of $870 million to a level of $520 million in the House bill. This was the amount authorized by the two Houses.

A further reduction could impact not only our arms negotiations, but could affect the current ABM Treaty review and, moreover, further impact the strategic equation.

The BMD program must be kept sound to permit injection of rapidly emerging technology into defense system concepts. This is necessary not only to allow the United States to evaluate Soviet ABM developments, but to provide the short development leadtime necessary should the Soviets abrogate the ABM Treaty sometime in the future.

Additional cuts to this program would be unacceptably unwise. Let us continue BMD as it is—stabilizing and unthreatening—and I am confident that after our military planners have gone back to the drawing boards on MX, BMD's future value will become undisputably clear.

EMPLOYMENT SERVICE AND UNEMPLOYMENT INSURANCE FUNDS

Mr. DIXON. I appreciate the opportunity to discuss an issue which I believe is important to the distinguished chairman of the Labor-HHS Subcommittee on Appropriations. The issue is current inadequate staff levels for the Employment Service and Unemployment Insurance offices. Is it the understanding of the Senator form New Mexico that current staff for the Employment Service is below 1981 levels?

Mr. SCHMITT. Yes, that is correct.

Mr. DIXON. I understand from a Department of Labor document, which I have here, that the viability level for the Employment Service is 2 staff per 10,000 in the civilian labor force, that maximum productivity for this agency is achieved with 5 to 6 staff per 10,000, and that the current level is 1.9 per 10,000, which is clearly inadequate.

The House recommended additional funds in the amount of 475 million to increase the Employment Service staff by 3,300 to a level of 28,100. Although the Senate Appropriations Committee did not include this in the committee bill, it is my understanding that the committee would keep an open mind in conference to this additional money. Would you agree to that?

Mr. SCHMITT. Yes, I would.

Mr. DIXON. The House included $264 million for temporary staff for the Unemployment Insurance offices. I, as well as the professional employment security administrators would accept half that amount if the funds were used for permanent staff for these offices. People who are well trained can process these claims more efficiently and get checks out in a timely fashion. Currently, however, less than half the claims filed, and there were 5.6 million claims filed the week of November 13, are handled by permanent staff.

Mr. SCHMITT. I would point out to the Senator from Illinois that the Senate Committee Labor-HHS bill includes an increase over the House regular bill of $75.4 million for unemployment insurance temporary staff. I would agree that some compromise could certainly be reached in conference between the House and Senate amounts. The problem with addressing the issue of permanent staff in conference is that neither House nor Senate bills provide for permanent staff.

Mr. DIXON. Would the Senator consider attempting to include language for permanent staff in the conference report?

Mr. SCHMITT. It would be my hope that the conferees would make a commitment to a supplemental if that becomes necessary to process mandatory workload in a timely manner. If such a supplemental is considered, and it appears likely, in order to meet the workload, additional permanent staff should be addressed. I would advocate a statement in the conference report to consider a supplemental and additional permanent staff so that claims can be processed in an efficient and professional manner.

Mr. DIXON. I thank the Senator from New Mexico. There is considerable support for this issue among our colleagues in the Senate. My office has had contact with about 40 Senators from both sides of the aisle, and all seemed sympathetic to the matter. Many have agreed to go on record in a letter to conferees to consider the additional funds for both programs.

Mr. THURMOND. Let me state that I share the views of the distinguished Senator from Illinois on this issue. With the current problems that we are facing in regard to unemployment, it is imperative that there are adequate staff levels to process the numerous claims that the State employment security agencies are asked to handle. It is my desire to see a compromise worked out between the House of Representatives and the Senate that will lead to a satisfactory solution to this problem.

JOBS PROVISIONS

Mr. PERCY. Mr. President, I intend to vote for the Domenici amedment to strike the approximately $1.2 billion co-called jobs stimulus package adopted by the Appropriations Committee in its markup. No one is more aware of this country's intolerably high unemployment rate than I, with my own State of Illinois suffering at 13.2 percent. However, Mr. President, I believe there is a right way and a right time to provide an employment stimulus and I do not believe that this Continuing Resolution offers an appropriate opportunity.

I support the gas-tax/highway/mass-transit bill as both a jobs bill and a means of providing for the maintanance and repair of our transporation infrastructure. I am prepared to vote for it now: I was prepared to vote for it several days ago. I am prepared to do everything I can to break the impasse at which we are hanging on this piece of legislation.

Our primay responsibility in this lameduck session is the passage of legislation that will keep the Government operating beyond tonight's deadline for the expiration of the last continuing appropriation. To load up the bill with items sure to provoke a veto serves no one, including the jobless in Illinois and in the rest of the country. I am heartened by the comments on the part of the majority leader that we may yet be able to work something out to pass that gas-tax/jobs bill and he may certainly count on my support of any effort to move the legislation. In the meantime, Mr. President, recognizing the obligation we have to pass a bill that will keep the Government operating, I am voting for the Domenici amendment to remove from the continuing resolution this funding item that seems certain to result in veto of the entire appropriations package.

● Mr. LEVIN. Mr. President, I oppose this continuing resolution as a matter of principle, and must vote against it. This continuing resolution is an abdication of Congress responsibility under the regular budget process.

We are approving in the space of a few hours more than $400 billion in spending for fiscal 1983—over half the budget for the entire year—in this one resolution which combines the spending normally included in 10 appropriations bills. There has been very little, if any real opportunity for prudent analysis and debate on most of the programs lumped together in this resolution.

The people of this Nation do not elect us to abdicate our responsibilities in this way. They elect us to fully consider and debate the annual appropriations bills for each of the Government's major departments and agencies, and to adequately address the major policy, program, and budget issues embodied in each of those bills.

This omnibus continuing resolution is a perfect example of how not to safeguard our tax dollars.

This measure is not a continuing resolution in any meaningful sense because it is not a temporary, "stop-gap" funding measure of limited duration. It is the whole ball game. It will

extend for the rest of fiscal 1983—a full 9 months.

When the Pryor amendment was defeated, a major act of abdication of congressional responsibility occurred. We and the country will be worse off because of it.●

(Conclusion of statements made or submitted during consideration of H.J. Res. 631.)

REQUEST FOR THIRD READING

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Third reading.

Mr. HUMPHREY. Mr. President, I am informed that the junior Senator from North Carolina wishes to speak.

Mr. HATFIELD. Mr. President, who has the floor? I believe the Presiding Officer recognized me.

The PRESIDING OFFICER. The Presiding Officer recognized the Senator from Oregon who asked the clerk to proceed to third reading.

Mr. HATFIELD. Mr. President, I ask for third reading.

Mr. HUMPHREY addressed the Chair.

Mr. HATFIELD. Does the Senator wish to have me yield for a moment? I am happy to yield.

The PRESIDING OFFICER. The Senator has the floor.

Third reading.

Mr. HUMPHREY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. Am I not entitled to ask for the floor at this juncture?

The PRESIDING OFFICER. The Senator asked for third reading. The Senator is correct.

Mr. HATFIELD. I will withhold the request for a third reading and yield the floor to the Senator from New Hampshire without losing my right to the floor. I wish to yield for whatever purposes the Senator from New Hampshire wishes.

The PRESIDING OFFICER. Is the Senator yielding the floor?

Mr. HATFIELD. No.

Mr. President, I ask unanimous consent that I may yield to the Senator from New Hampshire without losing my right to the floor as the manager of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. HUMPHREY. Mr. President, reserving the right to object, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. Is it in order for a Senator to be recognized after third reading has been requested?

The PRESIDING OFFICER. Yes, it is in order.

Mr. HUMPHREY. I do not wish to impede the floor manager if he wishes to make that request, but if I might explain, I am informed that the junior Senator from North Carolina would be here momentarily and wishes an opportunity to speak on this bill.

Mr. HATFIELD. Mr. President, I am not trying to play a game at all. I am trying to move this bill to final passage.

Mr. HUMPHREY. I understand.

Mr. HATFIELD. I am very happy to accommodate the Senator in any way.

Mr. BOSCHWITZ. Mr. President, will the Senator yield?

Mr. HATFIELD. I yield.

MOTION TO RECONSIDER CLOTURE VOTE ON SUBSTITUTE AMENDMENT TO H.R. 6211, SURFACE TRANSPORTATION ASSISTANCE ACT

Mr. BOSCHWITZ. Mr. President, I enter a motion to reconsider the vote by which cloture was defeated on the substitute amendment No. 4998, the House Resolution 6211, the Surface Transportation Assistance Act of 1982.

Mr. HUMPHREY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. Mr. President, what is the pending business?

The PRESIDING OFFICER. The continuing resolution is the pending business.

Mr. HUMPHREY. If I understood the request, is it in order to move to vote to reconsider without a prefacing motion? Must we not have a motion to return to the business to which the motion attaches?

My point for the information of the Chair is I believe it is out of order to make such a motion until the——

The PRESIDING OFFICER. Entering a motion to reconsider may be entered at any time.

That is all the Senator has done.

The Senator from Oregon.

Mr. HATFIELD. Mr. President, I renew my request for third reading of the bill.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, perhaps some problems can be avoided if the parties can talk about this. It is not my purpose to impeded the passage of the continuing resolution.

Several days ago when we were on the gasoline tax bill indeed I urged the leadership to proceed to the continuing resolution and said I would not impede it, and I have not done so and am not seeking to do so now.

I wonder if we might have a brief quorum call so we can converse on this matter.

Mr. HATFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. EAST. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAST. Mr. President, I with great reservation and reluctance would like to impose a bit upon the time of my fellow colleagues on where I think we are drifting, and I like to think that in the period of time that I have been in the Senate I have tried not to indulge beyond a reasonable point to preoccupy the time of this very distinguished body for which I have the greatest admiration and for which it is an honor to be a part of. I find that sometimes what happens here in the Senate—and I suppose it inures in the nature of the beast in terms of the things we are required to do here in Washington—is that all of a sudden you get so bogged down in the details of things you cannot figure out what road you were on or what journey it was you were taking. I frequently find on the Senate floor I cannot quite figure out how we got here.

Now, I feel that what is happening—and I want to be on public record against, and I may get beat, or we may get beat and we may get beat, badly, but I think what we are up against here, as I understand it, is a momentum, a movement to try to revise this gas tax and come hell, or high water, or both, either one or more, pass it. I think it is a mistake, and I would like to take a few minutes to tell my colleagues why I think it is so, and then I will rest my case, Mr. President.

We were told that the purpose of the lameduck session was to come here, deal with appropriations bills, pass a continuing resolution, and go home for Christmas. Somewhere along the line something happened, and we got on a gas tax.

I should like to make it clear that those who are charged with filibustering here have not been the ones delaying. The delay has come, as the distinguished junior Senator from Massachusetts noted earlier today, from people offering amendments to the continuing resolution.

Now, we had laid the gas tax to rest, I thought; it failed a cloture vote, and now we are going to resurrect that and go through that all over again. So the first question I raise in all seriousness and fairness, who has been dilatory?

It has not been those of us opposed to the gas tax, because we were under the impression we were coming to the lameduck to deal with appropriations bills and the continuing resolution and the next thing we know we are asked to look at the gas tax. We have looked and looked and looked at it, and cloture was not imposed. Then we went onto the continuing resolution, and we have been subject to a deluge of amendments, all across the political spectrum, both sides, political parties. It has gone on ad nauseam, and here it

is late on Saturday night and Christmas is a week from today.

Now, we have lost our way, Mr. President, from the purpose for which we came here, to get this continuing resolution out. I am very much opposed to an effort to try to resurrect the gas tax. First of all, again, trying to put things in perspective, I think in the election of 1980 and the election of 1982, what Congress was being asked to do was to gain control of Federal spending and to try not to impose new taxes but at least maintain what we have, maybe do some cutting, and here we are coming back to try to impose a new tax. I think the gas tax is a bad idea. I only spoke for 13 minutes on it before. But before we get involved in a motion to resurrect it, I would like to indicate as briefly as I can why I think it is a mistake other than the point I have just made, which I think is a very fair point, an eminently fair point.

We should not have ever been off on it to begin with. It was ill-conceived that we try to deal with something as important as this in the lameduck session.

I do not know of any economist worth his salt, Democrat, Republican, Liberal or Conservative, who thinks it is a good idea to increase taxes in time of recession. I do not think it is a particularly good idea to try to impose a tax that is regressive and hurts the working people of this country very hard.

What we did in this Chamber in terms of new tax policy is interesting, trying to put it in perspective to try to get away from too much detail. We cut marginal tax rates and now what we are in danger of doing is moving in with a whole range of regressive taxes, excise taxes, that hit the average working person.

I as one freshman Republican think that is a bad move to take. I think it is a bad move for my party. I think it is going to be perceived that we are the party and others who join in this great effort now, we are the party who wants to reduce the marginal tax rates on people and then try to find ways to get those taxes through regressive taxes that hit the working people—cigarette taxes, gasoline taxes, airline use taxes, excise taxes on purchases that hit the average citizen very hard.

But I do not make a partisan point. I ask across the table here, why in time of recession, why in time of recession would you want to increase the tax burden on the average working American? When you strip it down to the core, that is what you are going to do. This is called, in the euphemisms of Washington, a user fee or revenue enhancer. We are told it is not a tax. Well, a rose is a rose, and a tax is a tax. If this were strictly a user fee, you would not have 20 percent of it going for mass transit.

Now, I have great respect for mass transit, but by definition users of mass transit do not use the roads and highways and bridges; they use mass transit. You are violating a very fundamental premise there. It is like social security where you start to dip into the general revenue funds. You are taxing the users of the roads, and yet you are going to take 20 percent of that and turn it into mass transit.

I come from a donor State. We have historically paid in a dollar and received 74 cents back. I would like to propose something of this kind, that you tax the subway riders of New York and send it down to eastern North Carolina where I live so we can repair some of those rural roads. You would think it was absurd. Well, of course it is. And above all, you would not call it a user fee, because the subway riders in New York, or wherever it is you are going to have mass transit, do not use the roads in eastern North Carolina.

It is not a user fee. I have no objection to user fees. I think they are good things, but in fact you are not doing it here. You are taking 20 percent of it and funding it right into nonusers.

That is a fundamental premise of tax policy that troubles me and I do not think we ought to do it.

Also, I think there is a fatal flaw in bringing this up at this late hour; we are told this is a jobs bill by some. No, it is not. No, it is not, At best, it is a jobs transfer bill. That is what is it. It is a jobs transfer bill at best because for every job you create in construction of highways and bridges and roads, you may very well cost a job in tourism, in farming, in trucking, and all of those things that benefits from road travel.

You tax something beyond a point and you discourage its use. Is that not sound tax policy? You are going to discourages driving. How can you help it? You are increasing a gallon of gas going to 5 cents a gallon. That hurts. People do not drive as much. I tell you what it will do in North Carolina. I do not know how your State is. It is going to hurt with farming. It is going to hurt with the trucking business, which is big in my State, and it is going to hurt the daylights out of tourism because we like people to drive into the mountains of the West and on the beaches in the East. It is going to discourage it. And it is going to discourage those people who come by automobile, of course.

I noticed in the paper this morning airline stocks went up dramatically yesterday because they thought the gas tax was dead. Well, the airline stocks will probably plummet on Monday if we push this thing through. It is going to cost more to fly, so you cost jobs there.

It is going to take away jobs of people who work out in front, who pick up your baggage at the airline terminal.

It is going to cost the jobs of those who receive your luggage when you get inside, and stewardesses and pilots, and all the people who service aircraft. This is not a jobs bill. This is at best a jobs transfer bill. So let us get rid of that euphemism, too.

Mr. RIEGLE. Can we have order, Mr. President, so that the Senator can be heard?

The PRESIDING OFFICER. The Senate will be in order.

Mr. EAST. I appreciate the thought of the Senator from Michigan.

No, I think we are making a big mistake. There are many other things that trouble me in this bill, probably trouble all of you, but I hope to simply touch on some of the highlights here that indicate, one, we are on the wrong rung. We ought not even to be dealing with it in this lameduck session. Second, there are some very fundamental premises of tax policy that cut across party lines, that cut across liberal and conservative lines, that would want to make you look long and hard before you impose this tax upon the working people of this country.

Again, I fear if you take the 97th Congress and you look at what it has done taxwise—and we have all been involved in it, both parties, both sides, some more to blame than others, and that I understand—if you look at our overall tax policy, I think we run the risk of having evolved a tax policy that hurts the working people of this country, and I believe that is a bad step. I do not think we ought to resurrect this and try to impose it in the waning hours of the lameduck session, which I repeat again and again and again, perhaps ad nauseum, was not created for the purpose of dealing with this anyway.

I have gotten a little concerned about the pressure here that some way or other to be opposed to this, to be resistant to it, is obstructionist. Well, I regret it. I am sorry and I apologize. But I thought this was the appropriate time to get into this discussion, to indicate to you one freshman Senator's feeling that I think we have lost our way. We are about to take up something we ought not to be taking up. And then having taken it up, yes, we are probably going to pass it, and it is a mistake. It is a mistake.

You only have to go back to North Carolina and say "EAST got beat." Well, EAST got beat before. I ran for political office, ran four times and lost three times. It is more fun to lose and even the U.S. Senate cannot change that. I will probably lose on this one, but I will have the satisfaction and comfort of knowing that I can sit here this evening before this body and say, "It is a mistake." When I go home for my Christmas vacation, silence will

not be interpreted as consent, that wisdom prevailed, wiser heads prevailed, ignorant freshmen did not know what they were doing, so on and so forth.

Maybe I have not learned enough about the new tax policies of the U.S. Government, the U.S. Congress, and the U.S. Senate. I do not know. But from what I understand about taxes, what I udnerstand about recessions, what I understand about the working people of this country. We are told there is a great desire for this gas tax. I doubt it.

They had a fellow on TV the other night for a question.

Mr. RUDMAN. Will the Senator yield for a question?

Mr. EAST. No. I want to finish, and then I will yield for a question.

They had a fellow from North Carolina on television the other night and they asked him what he thought of the gasoline tax. He said, "Well, they tax our beer. They have increased the tax on our cigarettes. Now they are going to tax our gasoline. All that is left is our women."

The fellow makes a point in his own clever way. More and more excise taxes upon working folks.

This fellow is probably the kind of fellow who is going to take his small boat on a trailer down to Morehead City and put it into the water. Gas, gas, gas. Gas is important to him; 5 cents a gallon, That is big.

I cannot believe if you went out and polled the people in this country they would come in here and tell you a 5-cent a gallon gas tax is a wonderful idea and they would like it for a Christmas present.

CBS newsmakers pulled their little practical jokes on me about a toy tax. Listen, after you have been here for a while, I thought they were straight with it. The old story of taxing your memory. They can tax that one, too. They have not thought of it. No one quickly loses one's sense of humor here with the rush of these excise taxes. This is another one.

Well, they were going to tax unemployment, proposing that possibility, and now maybe toys. I do not know. After you have been in the atmosphere very long, nothing would surprise you.

I think the gasoline tax is one of the most indefensible ones. It is not a luxury in any way, shape, or form. You might say some of these other things are luxuries, but not gasoline, not in American society, not in the mobile society we have. The automobile of the average American is his great ticket to independence and he runs it on gasoline. He is hard hit today and you are going to impose a 5-cent gasoline tax as a Christmas present to the working Americans.

Do your people want that?

I have had no indication from the good people of North Carolina that they are enthused about it. They are not. They think it is a bad idea, and I do, too. I think many people up here do, too. There is a certain momentum about the U.S. Senate or Congress. We seem to get on something we should not have been on to begin with. Then as this momentum grows and feeds on itself everybody says, "Well, it is a good idea. We have to show leadership. We have to show discipline. We have to show we can govern."

Well, I do not mind governing, but let us govern wisely, and this is not wise. This is poor tax policy. Regressive tax, a time for recession.

I do not know what your good people sent you up here to do, but my good people did not send me up here to do this, and I want to protest it. I want to protest it as vigorously as I can, because I hope if this thing comes to a vote to resurrect it we will not.

I have seen a lot of issues we have taken up around here, so-called social issues and others, and when it has not been possible to invoke cloture we say, "Enough is enough, we have to move on to other important business of this country."

Why is that not true on the gasoline tax?

We discussed it, we debated it, we tried to impose cloture and it did not work. We have a whole agenda of things to do. We ought to move on with them. We have the continuing resolution and then this great spate of amendments, which has tied us up for 4 days on end.

Now, as we reach the end of this line—it would be a good time to get out gracefullly with the continuing resolution—we are told it is imperative that we resurrect what I think is a very bad measure.

Someone said, "What do you think Government, Congress, ought to be doing to try to help this economy? Don't you think we ought to tax a little bit more?" I would say, "No, no." I would say, "The principal thing we need to do to get this economy going and to broaden and deepen the tax base so that you will have more revenue in the highway fund and everything else to revitalize it. Do not tax it. Revitalize it."

What could we do to help revitalize it?

The main thing we could do is to try to gain control of Federal spending, the rate of growth.

I am not trying to repudiate the last 40 years. I am not trying to repudiate the last 10 years. I am just saying get control of the growth of spending. Everybody knows we need to do that. In the entitlement programs, for example. We do not address that. We might have done that more constructively in the last few days rather than trying to figure out new excise taxes to put on the working people of this country.

You are going to continue to have a weak economy, a deepening economy, unemployment, and this need for jobs until we are able to get Federal spending under control, the rate of growth of it. That is all I am talking about, the rate of growth.

That would contribute more of a contribution than we could make to get the deficits down, to get interest rates down, which everyone in this Chamber, I think, realizes is the principal obstacle to economic revitalization in this country.

Mr. TSONGAS. Will the Senator yield?

Mr. EAST. No.

Mr. TSONGAS. The Senator used my name previously, and I would like to respond.

Mr. EAST. I understand that.

A parliamentary inquiry. The fact that I used a name does not obligate me under the rules of the Senate to yield, does it?

Mr. TSONGAS. It was a courtesy I was invoking. I understand the reluctance of the Senator.

Mr. EAST. I have the deepest respect for the Senator. If I could just finish making this point; then I shall yield for a question, if I may just finish this line of reasoning, because I have great respect for the Senator and would like to hear what he has to say.

The greatest contribution that we could make would be to control the rate of growth of Federal spending. The other great contribution—and I think it is unfortunate that the Federal Reserve Board has been very slow in responding—is to bring interest rates down. Between the two of them that is what would get this economy back on a firm and sound basis. We would not have to be in here talking about a weak economy, and the need for jobs bills and new taxes—new taxes of all things, regressive taxes, at a time of recession, people hardest hit, and so it goes.

Control of the growth of Federal spending would be the greatest contribution the Congress could make, coupled with the Federal Reserve having reasonable interest rates and keeping that spiral going downward.

Those are the two single, major needs we have to restore the strength of this economy, where we would not have to be in here talking about "jobs bills" and new taxes to pay for them.

At this point, Mr. President, I shall be happy to yield for a question from the distinguished Senator from Massachusetts.

Mr. TSONGAS. Mr. President, I thank the Senator for his courtesy. I was on the floor and the Senator made reference to the fact that I had spoken earlier about delays in the proceedings and that I had pinned the blame on

those who offered amendments. The Senator was not on the floor, I believe, when I made those remarks, so I would like to clarify what I said.

I said that what was happening—and I had two amendments pending which I did not call up—was that the Senate was taken over by extremists and that, in fact, what was happening is that an environment is being established where those of us who are moderates in our tactics find ourselves isolated; that the way things are going, one has no choice if one wants to serve his constituency but ultimately to engage in the same tactics; that the middle, in essence, is being abandoned and people would precipitate to both ends of the spectrum.

My criticism was partly to those who engage in amendments, some of which were inappropriate, but also those who engage in tactics.

I have no problem philosophically with a filibuster where someone feels deep moral outrage. That is the right of every Member. The question in my mind is what constitutes moral outrage? For someone to feel moral outrage at a highways bill suggests a very low threshold where this outrage plugs in.

My question would be if you voted for the tobacco tax and you are from North Carolina, why would the gasoline tax trigger that outrage?

Mr. EAST. As I understand the question of the Senator, though I would like him to clarify it for me, he is wondering why my sense of so-called outrage is greater on this issue than it has been on others?

Mr. TSONGAS. I was on the floor when the Senator voted for the tax increase package that included an increase in tobacco tax, knowing how that affected your State. Why would that trigger no more moral outrage than this one does?

Mr. EAST. As a matter of fact, I did not vote for it, Senator. I only voted for it that evening so it could go to the House where my colleagues, I might note, in the House also voted for it so it might go to conference, where we felt it would have a greater chance for the elimination of the tax. It was purely a tactical, strategical judgment.

In any case, I suppose I might answer it this way—in other words, I think the Senator's example is inappropriate for that side.

I suppose another way I might answer it is that we could continue to move in that direction of more and more excise taxes, increasing the tax burden upon the working people of this country.

Mr. TSONGAS. Could the Senator explain why he switched his vote if that was his strategy, and only did so after Senator HELMS switched his, who only did so after Senator DODD switched his, which caused the bill to be defeated? Was that part of the strategy as well?

Mr. EAST. No; Mr. President, because I had the feeling that we would do better on that particular measure, on that particular judgment to send it to the House; that it would make no further sense from the standpoint of protecting the tobacco interests of my State to allow it to linger further in the U.S. Senate. It may have even gone higher, and I thought it was prudent to move it on, to be cooperative and move it on. That is exactly what my distinguished North Carolina colleagues in the House did, Democratic and Republican.

You will recall they moved that whole thing out to conference, because they did not want that hot potato on the floor.

If the Senator would like me to give him an example, we always avail ourselves of the great reluctance we have from tobacco producers in this country to allow matters to linger on the floor of the U.S. Congress. Sometimes we feel it prudent to move things along to get it out. The judgment was that evening, Senator, to move that one out of here to get it over to the House. Our colleagues in the House concurred to get it to conference. We hoped the conference would get that tax reduced. We were unsuccessful.

I do remind the junior Senator from Massachusetts when the bill came back to the respective Chambers for passage, I was 1 of 11 Republicans, along with Senator HELMS, who voted against it. So untimately, on passage of the measure, I was negative.

Mr. TSONGAS. I shall not pursue this, except that, in deference to the Senator, I will not repeat the conversations I overheard that night because I was in the well when those switches took place. There is no point going into it.

I understand the arguments you make, but please do not make them to someone who heard the conversations take place.

Mr. RUDMAN. Will the Senator from North Carolina yield for a question?

Mr. EAST. I shall be happy to yield for that purpose to the distinguished Senator from New Hampshire.

Mr. RUDMAN. I think it would be a major understatement to say that the Senator from North Carolina thinks this gas tax is not a very good idea.

Mr. EAST. The Senator is correct.

Mr. RUDMAN. I have concluded that from his remarks. The Senator from North Carolina, if I am correct, was one of the most ardent supporters of our President when he was a candicate; is that correct?

Mr. EAST. Yes; I point out that my support of the President goes back to 1968, when I was a delegate to the national convention from North Carolina, and we were the only State outside of California that gave a majority of our delegate votes to Ronald Reagan for President in 1968.

I was a delegate to the national convention in 1976, and I supported him at that time in a losing effort. I yield to no one in my admiration, devotion, and loyalty to a very great President, Ronald Reagan.

Mr. RUDMAN. Am I further correct in stating that the Senator thought it would be a good idea if Ronald Reagan became the leader of this country? Is that a fair statement?

Mr. EAST. It reminds me and the Senator may recall that I disagreed with the President on the Voting Rights Act.

Mr. RUDMAN. I am not talking about disagreement. I say generally, do you think he ought to lead our country?

Mr. EAST. I am answering the Senator's question, if he will allow me to elaborate. I opposed President Reagan and the Justice Department on the Voting Rights Act. A reporter said, "How can you disagree with the President, a man you have been a great admirer and supporter of?" That is what you are asking me. My answer was that every now and then, even a great President makes mistakes. We all frequently disagree with a particular leader. From supporting him in this, I respectfully dissent.

I support Ronald Reagan on 95 percent of the things he stands for. I disagreed with him on that matter, and I happen to disagree with him on this one. Since when is that necessarily a bad thing? We all do that from time to time.

Mr. RUDMAN. Let me say to the Senator I think I speak pretty good English. I did not ask the question whether you had a right to disagree. Of course you do. I voted against the President a couple of times tonight. I simply asked the question: Do you think, did you believe that you wanted Ronald Reagan to lead this Nation? Not to agree or disagree. Do you think he should be our leader? That is a simple question.

Mr. EAST. For President. When you say leader, yes, I like him to lead, but I am not a blind follower. I suspect the Senator from New Hampshire is not, either.

Mr. RUDMAN. We both can agree we wanted Ronald Reagan to be our Nation's leader.

Mr. EAST. I would prefer the word "President." I do follow his leadership and I support him on a host of things, and I yield to nobody on that. If you are suggesting in some way or another because EAST is enagaging in harassing, he is not supporting the President or the adiministration—I opposed them on their change in Taiwan policy.

Mr. RUDMAN. You are suggesting some things that have not even crossed my mind.

Mr. EAST. I have frequently, on occasion, dissented from the administration on certain tactical directions they might take and on particular issues; this happens to be included on the list, Senator. What is wrong with that?

Mr. RUDMAN. Not a thing. I would like to ask, if I may—I say to the Senator from Idaho, I have not even gotten to my question.

Mr. EAST. I would be happy to hear it.

Mr. RUDMAN. We agree——

Mr. STEVENS. Mr. President, a point of order. Senators should address the Chair, not each other. It reduces the acrimony in this Chamber.

Mr. RUDMAN. I apologize, Mr. President.

I respectfully ask the Senator from North Carolina that he yield for one more question. I think we both agree we are both supporters of the President. I think he should be our Nation's leader: You say President. I am sure you say the President must propose to Congress and we must dispose or oppose, disagree. My question is simply this and it is my basic question: Do you believe the President of the United States is entitled to have his proposals voted for up or down in the U.S. Senate? That is my question.

Mr. EAST. Senator, I think that misconceives what the problem is. It misconceives what the problem is. We have separation of power. I am a member of the legislative branch. I have been here for 2 years, as you have, and issues are frequently brought up. We agree; we disagree.

But I find as a Senator that on occasion, because of separation of powers, I have to be at odds with a very great President on particular matters.

I have been here time after time in this Chamber when issues that are controversial and devisive are brought up. I have heard our very distinguished majority leader get up and say, "This is as much time as we can devote to that. This body must move on and do its work," and they pull it down and that ends it where they have not been able to impose cloture.

You know that, too, Senator, and that has happened. And often those were issues that the President of the United States would have supported.

But we are a separate branch, we must move on and conduct our business. And I am a part of this branch. So I think when you pose the question the way you do, with all due respect to you—and I have the greatest admiration for you—you misconceive the concept of the separation of powers.

We have an individual responsibility here to pursue some measures in this Chamber under the rules of this Chamber. That is all I am doing.

Mr. SYMMS. Would the Senator yield for a comment without losing his right to the floor?

Mr. EAST. I yield to the Senator from Idaho.

Mr. SYMMS. Mr. President, I would just like to say to my good and able friend from North Carolina that I, as one Senator, have the most respect for him for taking his position and I in no way would impugn his motives. I must say, I feel that some of my colleagues are coming too close to impugning the motives of another Senator on this floor. I do not like to see us do that.

I happen to be in favor of us committing more of our dollars as a country to fixing the roads and bridges of America. I have not been one who has called this a jobs bill. I have spent more hours chairing hearings, listening to testimony, to make it overwhelmingly evident to me that we are failing in fixing the roads and bridges in America all across the country—in West Virginia, in North Carolina, in Idaho, New Hampshire, Massachusetts, wherever.

I do think that our colleague has every right to oppose this tax on the basis of a philosophical principle that is very near and dear to his heart and does not have to answer any questions as to why he voted for one tax bill and why he will not vote for another tax bill. I think we should all give our due respects to our colleague.

But I would say to my good friend from North Carolina that those people in North Carolina are going to benefit from better roads. The same people that want the freedom that you talk about to drive around in their automobiles. The working people, the affluent, the Catholics, the Jews, Republicans, and Democrats all drive on the same road system—it is one system that is nonpartisan, nondiscriminatory, and that benefits everyone in the United States.

Now, I think if we want to debate the issue, this bill will spend 60 percent of the money for repairs and about 40 percent for new construction. We have instituted a new program to repair the Interstate System in this country. The committee, under the leadership of Senator STAFFORD, Senator RANDOLPH, Senator BENTSEN, myself, and many others on the committee have worked very diligently to bring this highway bill away from a new construction program and put it on course as a repair program.

Now, I thank the Senator for yielding to me, but I would just say to my colleagues, if it is the wisdom of the Senate to move forward with this legislation, the bill that we have presented has equitable formulas for all of the States. We think our bill tries to treat and address the problem of worn out bridges and a worn out Interstate System, where over 20 percent of it now has reached the design life and we have yet to complete the last 5 percent. We have reduced the number of miles of new Interstates to about $20 billion. It will cost us $20 billion less to complete the Interstate System now than it would a year ago. The reason for that is we demapped some of it, so that will allay some of the fears of your constitutents.

We have had many days of hearings in many parts of the country and I am convinced, as one who is a conservative, that there is a definited need for the improvement of the roads in this country and an increased commitment to it.

After all, a 4-cent-a-gallon gasoline tax in 1959 is, in constant dollar terms, worth less than a 1-cent-a-gallon gasoline tax in 1982. Those of us from this side of the aisle have for years talked about the fact that we should index the Tax Code in this country.

I have heard the chairman of the Finance Committee say repeatedly that without indexation of the income tax the working man and woman's pay increase is negated because of "bracket creep."

Since 1959, inflation has depleted the value of the gasoline tax package to the point where we do not have sufficient revenues to complete or maintain our national highway system. The cost of repairing a road today is, on average, 300 percent more than it was in 1959.

We have enjoyed the benefit of a national highway system. In order to continue to enjoy that benefit, we are going to have to "step up" and pay on that system.

Mr. President, it is widely recognized that much of our national prosperity and economic well-being is based on our interlocking pattern of lanes, roads, highways, and interstates. Yet, Mr. President, as important as this system is to our country's future, as well as this system has served our national and individual needs, we are allowing it to literally fall to pieces. We have failed as a society in maintaining our commitment to our national highway and bridge system. In doing so, we not only jeopardize the capital investment we have in the system itself, but also the economic framework of our country, which is based on viable and efficient surface transportation.

Our Nation's deteriorating highways is a problem which must be addressed, it cannot be avoided. The problem is not confined to one class or type of road or to roads in a particular section of the country. The problem is universal.

I will not here go into a detailed description of our total needs. At this point they have been well documented both through extensive subcommittee hearings and other sources. It is sufficient to say that the needs of our highway system are staggering.

As large as these needs are, the costs to preserve these vital links in our highway systems will only increase. A 2- or 3-year deferral of highway resurfacing or rehabilitation work often results in the necessity for total reconstruction at triple the original cost plus the effects of inflation. An editorial in the March 13, 1982, Sioux Falls, S. Dak., Argus Leader shows a clear understanding of this fact:

There's a lesson in the corollary between the Nation's predicament with deteriorating highways and what South Dakota is encountering in improving a scaled-down core railway system. Deferred maintenance on the bankrupt Milwaukee Roads' system resulted in its decline and necessitated costly repairs after South Dakota purchased the track.

Neither South Dakota nor the Nation should delay addressing the highway and bridge problem while there's still time to fix it.

National administrators, both Republican and Democratic, customarily cut highway funding budgets to make their deficits smaller. The challenge now is to apply increased fuel tax revenues effectively for capital improvements and maintenance that will save much greater expense later.

Not only are we faced with much higher future costs of postponed highway repair and reconstruction, we are also faced with the present costs of driving over these unrepaired roads. The Jacksonville Journal reported in a March 15, 1982, editorial that in Florida:

Dilapidated roads cost the average driver $200 more a year in wasted gas and extra repairs and are the second leading cause of accidents in Florida. In 1979, the 70,425 accidents they caused cost taxpayers $255 million.

The Federal Highway Administration has estimated that by 1995, unrepaired roads will cost the average family $510 in 1980 dollars and an added 78 hours of driving time each year.

In addition to the costs to the private motorist, we cannot ignore the billions of dollars that will be lost as a result of the effects of an unsafe, inefficient highway system on commerical traffic. The added costs of increased fuel consumption, unnecessary wear on and breakage of freight hauling equipment, and loss of time, while considered separately on an individual truck may be small, considered as they must be on thousands of trucks traveling millions of miles each year, the cost of poor roads is staggering.

Mr. President, the Nation can ill afford to allow its highway infrastructure to crumble. We have in place one of the most successful and equitable mechanisms ever devised for funding our highway programs, despite soaring inflation and highway construction costs, the motor fuel tax has not increased since 1959. Our highway revenues have been silently lowered by time and inflation. The 4-cent motor tax of 1959 is worth less than 1 cent today. We must act now to insure the integrity of our surface transportation system. This may be done by increasing the motor fuel tax to realistic levels.

Increases in highway user fees to aid our ailing highway and road network should not be confused with increases in general taxes associated with Federal spending or deficit-reducing measures. The two are not the same, and calling an increase in the national fuel tax a user fee increase rather than a tax hike is a matter not just of semantics but of accuracy.

Our Nation's Interstates, highways, and roads have been paid for by those who use them. This has been accomplished by a means of a system of levies and excises based primarily on the use of motor fuel, motor oil, and tire rubber, with the money raised placed in a dedicated trust fund. There is little disagreement that this method of funding our highway needs is successful, equitable, and is a user fee concept different from general taxation.

I would like to point out, and I have previously mentioned how the debate on legislation can become clouded, that this is not a jobs bill. The purpose of this legislation is to fix our crumbling highways. The purpose of this bill is to provide for the building and repair of the road network which allows for the expansion, growth, and development of our society.

It is true, however, that additional jobs will be created by this legislation and this is a welcome and beneficial secondary effect. These will be no make-work, unproductive, public sector jobs, but rather will be jobs originating in the private sector among the private contractors and construction companies already in place. These jobs will benefit those in an industry of extremely high unemployment while leaving in place an improved national infrastructure for the benefit of society as a whole.

Some decry this type of expenditure, saying it will result in a net loss of jobs. However, Mr. Feldstein, who they quote to support their argument, has also pointed out that the impact of rechanneling $5.5 billion in a diverse multitrillion-dollar economy will not have such an impact.

Nor should we expect a major change in the driving habits of the general public as a result of a 5-cent increase in the price of a gallon of gas. This is a change of less than 4 percent in the price of motor fuel, and past experience has shown the demand to be quite elastic in the face of such a minor increase.

Some have critized this legislation as not adequately addressing the need to repair what we have previously built while continuing to channel funds into new projects. Such criticism ignores what we have done in the past and what this bill would do.

We have taken major strides in bringing our highway programs under control while providing for maintenance of the existing systems. We were recently successful in redefining an unmanageable and impracticable Interstate requirements, decreased the cost to complete this system from $54 billion to $38 billion. We also were successful in adding a reconstruction program to the Interstate repair category. This bill will see a doubling of the money to this new expanded 4-R program, which is a substantial and needed increase toward maintaining the system we have in place.

In addition, we have provided for additional State flexibility by allowing a State to transfer Interstate moneys to Interstate 4-R to meet repair needs.

This bill, in keeping with the committee's commitment toward timely repair of our existing system, requires for the first time that a full 60 percent of all noninterstate moneys go for repair of existing roads and bridges. Such directing of funds will be coupled with an increased ability at the State level to channel funds where the highway needs are greatest. This flexibility and conbining of Federal programs is a further indication of the desire on our part to meet our highway maintenance needs.

We have in our bill recognized that with an increase in Federal moneys going to the States, the States may initially be unable to match the Federal funds. We have provided for this by allowing the States to receive the increased funds while they prepare to provide for their matching share. The manner in which we have done this is I believe fair and equitable and will maintain the integrity of the system.

An addition to the bill which makes a major change in the historical approach of national highway policy is that of the 85 percent monetary floor which a State receive back in light of its contributions of the highway trust fund.

While I am hesitant in making this change, I can understand the concerns of those States which traditionally have contributed more to the fund than they have received back in apportionments. I am willing to set the 85-percent level but will not agree to any increases in that floor. We are administering a national program that is based on the needs of the system as a whole which precludes every State receiving back the exact amount it contributes. The Nation as a whole benefits from this nationwide system that extends over heavily and sparsely populated areas alike.

I have commented on this before Mr. President, but I would like to reiterate the point that we need to separate the highway trust fund for the unified

budget process. The trust fund is a dedicated fund whose moneys are collected from those that use the system. This money should be spent for the purpose it was collected and should not be caught up in the often political, partisan maneuverings surrounding the national budget. I am pleased that my colleagues have agreed with me that the trust fund balance should be spent down.

Nor should these moneys, collected from highway users, be diverted to nonhighway purposes. I am very concerned over the mass transit diversion advanced by the administration and the House. This is an attack on the user fee concept. Certainly no one will deny that mass transit has substantial needs, but diversion of money from highway programs does little to solve localized mass transit problems. It is nothing more than an improper and ill-advised transfer of money. It will not solve mass transit problems but rather temporarily subsidize mass transit use until another increased infusion of funds is needed. I cannot support such poor public policy, a policy which refuses to address the core issue of mass transit problems in urban areas. I have been unsuccessful in deleting this diversion to date, but I will continue to seek its end. In the alternative, I wholeheartedly support what this body did in allowing one-half of 1 percent States complete flexibility in the use of their mass transit shares.

Mr. President, at this time I want to go on record as opposing any changes that would extend Davis-Bacon provisions to areas covered by this legislation to which the Davis-Bacon does not now apply. I think my feelings were summarized very well by a December 10, Washington Post editorial that stated:

> While creating new jobs is not the purpose or likely effect of this legislation, every effort should be made to get as many jobs out of the program as possible. The best way to do it would have been to amend the Davis-Bacon Act, which as currently applied, significantly increases wage costs on many construction projects. Instead, the bill would actually make the situation worse by extending Davis-Bacon requirements to repair work now primarily done by small contractors who pay lower wages. It means that perhaps 40,000 fewer jobs will be created each year. If the unions try to tell you that Davis-Bacon doesn't drive up wages, ask them why they are pressing so hard to extend it.

Mr. President, a major part of the overall legislation is that which deals with increases in highway user fees. This is a difficult issue. One which requires the weighing of choices and consideration of often conflicting needs and wishes. In this regard I must state that I have some concern over the taxing provisions advanced by the administration and the House.

I have pointed out both upon introduction of the authorizing legislation and during committee markup that one of the most important uses of our roads and highways is the movement of interstate commerce. National highway policy must provide for the efficient and economic carriage of goods.

Ninety percent our Nation's goods and services travel by road at one time or another. The vast bulk of this commerce if carried by trucks traveling inter-and intrastate. We must provide an efficient, fair, and economic framework for their carrying of goods. This requires establishing a fair system of taxation to be placed upon the trucking industry which requires their paying a fair share based upon highway usage yet allows the industry the capability to compete with other modes of freight transportation on an equal basis.

I am confident that the levels of taxation at which the Senate arrived are far more equitable and practical than those contained in either the House or administration bills. Again, our purpose must be to arrive at a fair level of taxation while providing for the continued viability of an industry so important to our national well-being.

Because of this I have felt it necessary to insist that whatever taxes are placed on the trucking industry, they be phased in over a period of time. This might not be necessary for the large national carriers, but there are many small regional carriers in my State and the West which would be unduly burdened by a single large increase. They could not absorb such an increase and remain in business. I for one do not feel that putting people out of business is in anyone's best interest. I think the phase-in provided for in the Senate language will greatly lessen the impact of any tax increase on small and independent truckers.

We have included exemptions for certain categories of farm vehicles and other vehicles which have minimum impact on our roads and highways.

In addition to a fair taxing system, it is my position that we must allow for the economic carriage of goods.

The Senate has acted toward this end. During markup of the authorizing legislation I am pleased that the committee voted in favor of my amendment to set a national uniform 80,000 pound weight standard. Additionally, the amendment provided for a clarification of the grandfather clause and allows the States to determine what their grandfather provisions provide for.

These weight changes will be joined with size increases which I have also worked for. Trucks will be allowed to run with 102 inch width trailers instead of less productive 96 inch width trailers. Trucks hauling cargo will also be allowed to take advantage of new length configurations that will greatly increase their productivity and ability to compete.

Mr. President, I feel that overall, this is a good and much needed bill. It is my hope that we might speedily pass this bill in order that we may be about the business of building and maintaining our Nation's highways and roads.

Mr. STEVENS. Will the Senator from North Carolina yield to me for a question?

Mr. EAST. I yield without relinquishing my right, of course, to reclaim the floor. I yield for the purpose of a question to the Senator from Alaska.

The PRESIDING OFFICER. The Senator may yield for a question.

Mr. STEVENS. I ask my good friend, for the purpose of dealing with the fact that we have staff here that has not had much sleep and we have to go into a conference, I hope, soon, on a continuing resolution, if he would tell us how long he thinks he would be speaking on the matters he is speaking on now which are delaying us from getting to third reading and getting the conference report printed so that we might go to conference on the continuing resolution.

The Senator is addressing the highway bill and we are quite anxious, Members of the House are coming back in the morning to meet with us at 10 o'clock, and we thought we would have these documents printed. We cannot do that unless we can get to third reading and pass this bill.

Could the Senator tell us how much longer he might be speaking on the continuing resolution?

Mr. EAST. Well, the Senator asks a fair question. I certainly do not want to speak any longer than I need to make what I think are very important and valid points. My concern is that, after we go to third reading on the continuing resolution, then here comes the gas tax and we are going to be in a whole new phase of the lame-duck.

If I do not raise it now and press my case and make my point, I will not get another chance. It will be over for me and I know it and you know it. What I am saying is, I will keep my comments pertinent and I will keep them pertaining to what I think are the weaknesses in the direction of which we are going.

Mr. STEVENS. If the Senator would yield just for one more question, again, I am just trying to make my point. Does the Senator realize that once we go to third reading the Senator could still make his speech but, meanwhile, we could be printing the bill? It would not be subject to any further amendments.

Mr. EAST. I am concerned if we do that, have I not then set the parliamentary stage for the resurrection of the gas tax?

Do I run the risk of doing that or do I have assurance that the gas tax would not be resurrected? Where would we stand on that?

Mr. STEVENS. Would the Senator permit me, without losing his right to the floor, to make a parliamentary inquiry of the Chair?

Mr. EAST. Yes. I want it fully understood that I am not relinquishing the floor. I am merely relinquishing for the purposes of questions or parliamentary inquiries.

Mr. STEVENS. I thank the Senator from North Carolina.

I ask the Chair. Does the fact that this bill, the continuing resolution, the fact that it remains in second reading, does that have anything to do with the continued right of the Senator to debate? My understanding is he could debate after third reading, could he not?

The PRESIDING OFFICER. Debate is in order after third reading.

Mr. STEVENS. Would the Senator lose any right, other than the right to offer amendments to the continuing resolution itself, by allowing us to go to third reading and, thereby cutting off the right of any further amendments to the continuing resolution and allowing us to print it and getting it ready for conference? Would he lose any right other than offering an amendment to the continuing resolution if we permit it to go to third reading?

The PRESIDING OFFICER. Third reading precludes amendments, but debate is in order, both before and after third reading.

Mr. STEVENS. I did not know if the Senator from North Carolina heard that response. Could the Senator from North Carolina hear the response to my inquiry? The Senator would lose no right as far as continuing to make any speech he wants or his right to continue to delay the final passage of the continuing resolution if it went into third reading, other than the right to offer amendments to the continuing resolution itself. If it went to third reading we could print the documents, we could get people ready for the conference which ultimately will come on the continuing resolution.

This Senator right now is concerned with the continuing resolution and the mechanics of getting it to conference as our chairman is, I am sure.

We would like to get to third reading so that we know what we are dealing with and can start talking to Members of the House about the continuing resolution.

The only right that the Senator would lose would be the right to offer amendments.

My next question would be, Does the Senator intend to offer any amendments to the continuing resolution that we have not been notified of?

Mr. EAST. That is a concern I have that I would lose the right for any amendments on the continuing resolution and obviously after third reading, and I do not know at this point if I am prepared to lose that right because I am afraid that then we would begin to move into a parliamentary posture where we are about to resurrect the gas tax.

Mr. STEVENS. If the Senator has this right without losing the right to the floor, again if I may address the Senator's question without his losing his right to the floor, we have surveyed the whole Senate and over a period of 2 days and did not understand there were any other amendments to the continuing resolution and, therefore, I have to say we are caught sort of unawares. If there are other amendments to the continuing resolution, we have no knowledge of those. And we have documents ready to go to the printers we hope by midnight so that we can be in conference tomorrow.

If the Senator does have amendments to the continuing resolution, would the Senator favor those of us who are going to be dealing with the question of going to conference to let us know as soon as he can what those amendments will be and whether or not we are going to see further amendments offered to this continuing resolution here this evening?

Mr. EAST. Well, as I understand it, there are other Senators who may still have amendments they will want to offer to the continuing resolution.

Mr. STEVENS. Will the Senator do this for me if I may ask the Senator to yield without losing his right to the floor with the understanding that he will be recognized immediately after a quorum? Would the Senator, without losing any rights he has now, agree to put in a quorum call so we might discuss this, the whole procedural question here of the continuing resolution and how we handle documents?

Mr. EAST. If I might offer this——

Mr. STEVENS. I assure the Senator he will be recognized when we come in from the quorum. As a matter of fact, it is just to run the clock a little further, I would say to the Senator, but we would like to be able to discuss with him the parliamentary problem, not the parliamentary problem, the procedural problem in handling this continuing resolution in terms of printing.

Would the Senator permit a quorum call? He will not lost any rights. I ask unanimous consent he does not lose any rights, be recognized and not a quorum charged against him.

Mr. EAST. If I understand the Senator correctly now, that in accepting what the Senator is proposing to enter into a quorum call whereby we might discuss this at greater length, that I am not——

Mr. STEVENS. I ask that the quorum call be called off by the Senator alone at his request; the quorum call can come off without any unanimous consent. He can call off the quorum call when he wants. We want to discuss with him the problems of getting this bill printed. Would he do that for us?

Mr. EAST. In other words, we are going to be in parliamentary neutral with no one being in a position to alter, change, or modify, or in any way jeopardize my rights to reclaim the floor and pick up precisely where I am right now. Is that the kind of agreement we are entering into?

Mr. STEVENS. I ask unanimous consent that that be the agreement we enter into.

The PRESIDING OFFICER. Is there objection?

Mr. EAST. I would be willing to accept on those terms and I shall cease and desist until we may pursue that.

Mr. PRYOR. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Arkansas reserves the right to object.

Mr. PRYOR. Senator RANDOLPH, of course, is the senior Democrat on the floor.

Mr. STEVENS. May I assure the Senator his right will not be inconvenienced, either.

Mr. PRYOR. I am concerned also that other party members seem not to be on the floor. I think that before we enter into any agreement like that, I would certainly have to seek their counsel and advice.

Mr. RANDOLPH. I do not propose to speak for the Democratic Party.

The PRESIDING OFFICER. Is there objection?

Mr. RANDOLPH. I am sorry.

The PRESIDING OFFICER. Does the Senator from West Virginia object?

Mr. STEVENS. I made a unanimous-consent request we be permitted to have a quorum call under those circumstances. It will come off immediately at anyone's request that is present on the floor if you wish to put it that way.

Mr. PRYOR. Is it the understanding of the Senator from Alaska with the Senator from North Carolina that he will have the opportunity to engage in this discussion after the quorum call was put back into effect?

Mr. STEVENS. He has the same rights he has now, Senator, and you will have the same rights you have now, exactly.

Mr. RANDOLPH. I have no objection.

Mr. PRYOR. I do not think I have any rights now. I do not think any of us have.

Mr. STEVENS. You are right. Only the Senator from North Carolina.

The PRESIDING OFFICER. Is there objection to the request?

Mr. PRYOR. May I ask him one.

Mr. President, would the Senator from North Carolina yield? I just want to ask him this question. These are fine Senators and personal friends.

My son has a wrestling match in about 20 minutes in Bethesda and we have had 54 rollcall votes this week and I have made all of them and I want to be in perfect attendance the whole week.

Now, could I go to that wrestling match and be sure I am not going to miss any votes? What is the situation? Would someone advise me? That is my main interest.

Mr. EAST. How long a period of time would the Senator take?

Mr. DURENBERGER. It depends on how good the kid is.

Mr. PRYOR. I imagine about time to go over to Bethesda and get back. It will probably be around midnight, I imagine.

I do not want to take the time of the Senate but I am somewhat concerned about this arrangement being made and we might have a very short delay here.

The PRESIDING OFFICER. Is there objection to the unanimous consent?

Mr. PRYOR. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. EAST. Mr. President, as I understand the parliamentary inquiry, we do not have unanimous-consent order.

The PRESIDING OFFICER. The Senator is correct.

If I may interrupt——

Mr. EAST. I just would like to——

The PRESIDING OFFICER. If I may interrupt the Senator for just a moment, the Chair would like to ask the gallery not to enter into our debate. We appreciate that members of the gallery are deeply interested as we all are in the debate but clearly the rules of the Senate preclude that kind of participation and I would advise the gallery to watch respectfully and the Senator from North Carolina is now recognized.

Mr. RANDOLPH addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. RANDOLPH. Mr. President, will the able Senator from North Carolina yield to me?

Mr. EAST. I will yield to the Senator from West Virginia for the purposes of making a question. Was that what the Senator was doing?

Mr. RANDOLPH. To discuss the matter of the validity of the highway bill.

The PRESIDING OFFICER. The Senator may yield for a question.

Mr. DOLE. Are we on the highway bill?

Mr. EAST. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. EAST. I may only yield for purposes of a question, is that correct?

The PRESIDING OFFICER. That is correct.

Mr. EAST. I will happily yield then as I understand the Parliamentarian saying I can only yield for purposes of a question. I am not in a position to yield to the Senator except if we have a unanimous-consent request can we do that. I will not mind allowing the Senator from West Virginia to elaborate beyond the question provided that in so doing I do not jeopardize my right to the floor and come back to that immediately following his remarks and pick up where I currently am, namely, I have the floor.

The PRESIDING OFFICER. The Senator would need to ask for a unanimous-consent request.

Mr. EAST. I would be willing to allow the Senator from West Virginia to make such a unanimous-consent request, and I would not object to it, and we could proceed to let him state his point, and then I, in due course, of course, under that unanimous-consent agreement reclaim the floor.

The PRESIDING OFFICER. The Senator from North Carolina must institute the question. He has the floor.

Mr. EAST. Well, I would ask unanimous consent that the distinguished Senator from West Virginia be allowed to have the floor. How long does the Senator say he would like to have it?

Mr. RANDOLPH. Mr. President, in reply to my colleague I am going to take some of the statements that he made that I believe are at variance sometime 100 percent with the facts, and I cannot just ask the question. I will naturally have to develop the statement to indicate why I believe the Senator from New York is wrong in the value of the highway and the gas tax or user fee to carry forward the necessary repairing, not new construction, of the bridges, the roads, of the United States.

Mr. EAST. Mr. President, I would be happy to make a unanimous-consent request that the Senator from West Virginia be allowed to speak for a specified period of time and as a part of that unanimous-consent request then of course that I would be able to reclaim the floor at the end of his remarks. I think that the only way this request would be workable if he could specify some reasonable timeframe, 5 minutes or 10 minutes.

Mr. RANDOLPH. Mr. President, I do not want to be misunderstood, but my colleague from North Carolina in discussing highways moved into at least 10 other areas, and I have documented them here, that have no direct bearing on the matter of the highway and the gas tax to pay for such a program of repair and reconstruction.

So I only want to address my remarks to the statements that I believe are in error, completely in error, about the value of the highway system and the need for the reconstruction of it at the present time.

Mr. EAST. I fear, Mr. President, I run the risk of losing my right to the floor if I persist in letting the Senator pursue the line of inquiry that he is pursuing.

I repeat again then, after having done that, that it occurs to me but to move on and continue my comments on why I have reservations about this gas tax.

What I am asking the Senator to do is to specify a period of time which he would like.

Mr. STEVENS. Will the Senator yield for the purpose of renewing the unanimous-consent request without losing his right to the floor?

Mr. EAST. Pardon?

Mr. STEVENS. Will the Senator yield to me again for the purpose of making a unanimous-consent request for a quorum call without losing his right to the floor, any rights by virtue of yielding to me?

Mr. EAST. I yield.

Mr. STEVENS. I ask unanimous consent that the Senator yield under those terms.

Mr. EAST. I yield for submitting a unanimous-consent request with the understanding that in so doing I am not losing my right to the floor.

The PRESIDING OFFICER. Is there objection?

Mr. RANDOLPH. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH. I object. I am ready for the quorum call but I am wondering whether it would not be best to provide me 5 minutes to answer those statements that were made which are not correct, in my opinion, in reference to the pending measure, the highway and gas tax bill.

Mr. EAST. I should like to then submit a unanimous-consent request to the Chair that the Senator from West Virginia be allowed to speak for a period not exceeding 5 minutes, and at the conclusion of that period of time I reclaim my right to the floor that I currently have. That is the unanimous-consent proposal that I would like to submit to my colleague at this time.

Mr. STEVENS. Reserving the right to object, would the Senator add to that that we can have the quorum call so that we can confer after the Senator speaks?

Mr. RANDOLPH. Mr. President, I want to know exactly now where we stand in reference to parliamentary procedure.

The PRESIDING OFFICER. The Chair will attempt to state the re-

quest: That the Senator from West Virginia be allowed to speak for 5 minutes, and that the Senator from North Carolina retain the floor but that immediately after the speech by the Senator from West Virginia a quorum call will ensue without the rights of the Senator from North Carolina being lost in that situation.

Mr. STEVENS. And the quorum call may be called off by the Senator without unanimous consent.

The PRESIDING OFFICER. And a quorum call may be used to regain the floor.

Mr. EAST. And also that the two-speech rule would be waived in this case. I would want that to be a part of the unanimous-consent request.

Mr. STEVENS. Mr. President, that is implicit in my request, that he not lose any rights that he has now.

The PRESIDING OFFICER. Even unanimous consent cannot affect the calling off of a quorum call. It is a constitutional right.

Mr. STEVENS. Very well. The rights would be affected. I withdraw the request.

The PRESIDING OFFICER. The request is withdrawn. The Senator from North Carolina has the floor.

Mr. SIMPSON. Mr. President, I just have a question I would like to direct to the Senator from North Carolina, if I may.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EAST. Is the unanimous-consent request of the Senator from Alaska something we can stitch together now? Where standeth thou?

The PRESIDING OFFICER. It was withdrawn. The unanimous-consent request was withdrawn, and the Senator from Wyoming is now addressing a question to the Senator. The Senator has the floor.

Mr. EAST. Without relinquishing my right to the floor, I will yield to the Senator from Wyoming for a question, yes.

Mr. SIMPSON addressed the Chair.

Mr. EAST. Yes.

Mr. SIMPSON. Is the Senator aware that the issue is not the gas tax or the gas bill or highways; the issue now is that the Government will close its doors at 7 a.m. on Monday morning unless you, sir, cease and desist in the activities that you are engaged in?

We have the chairman of the Appropriations Committee (Mr. HATFIELD) who has now labored hard and long, finished his efforts, and listened to Senators rattle amendments off the wall that would stagger a hog. We have watched all that go on and now we are ready to go to the final proceedings so that this Govenrment can continue.

I would ask you how, sir, you will defend the issue when you alone will be responsible for shutting down the Government at 7 a.m. when they come to work or do not come to work Monday morning? That is the issue. It cannot be avoided; unless you release whatever you are doing, you and your colleagues will have occasioned that result.

Mr. EAST. Senator, in answer to your question, first of all, I was asked earlier by the Senator from New Hampshire if I was following the President. I told him of my great admiration of the President. I know Ronald Reagan said he will not hesitate to close down the Government if he has to veto this continuing resolution, and that would be praised by the Senator from New Hampshire, and I presume by you and others, as showing great leadership, the fact that he is willing to stand for what he thinks is right as regards Federal spending, even if it means closing down the Federal Government. And I know a lot of people in North Carolina that would think if you closed down the Federal Government, it would probably be an enormous contribution to the well being of the country.

I do not mean to make light of the question, but if you are saying to me, do I feel that there is something immoral and unethical, that I feel a heavy burden slowly resting upon my shoulders as regards that I may personally be responsible for closing down the Federal Government, my answer is in the negative. I do not. The President has already indicated his willingness to do it.

What I am suggesting is I feel it appropriate and proper that I be able to make what I think are very critical points about a wrong turn that we have taken in the road.

I sensed as we got further down the road there was less and less understanding, less and less perspective as to where we were.

No; I do not feel that way—I greatly respect the Senator, but I have been through enough since I have been here—that some way or another if I do not do thus or this, I am going to feel this enormous burden about having closed down the Government. I do not feel that way, no, to be candid with you.

Mr. SIMPSON. Let me ask another question, and this is sincerely offered. Is there a way——

Mr. EAST. Excuse me. I would like for the Chair to understand that I am yielding solely for the purposes of a question.

Mr. SIMPSON. Yes.

Is there a way that you and your counsel and advisers could sit down with the leadership and determine how we are to release this continuing resolution for the work that has to be done for this country? Whether you agree or think that the idea of shutting the Government down is a good idea or bad idea, will you present us with the alternative as to how we may proceed and the Appropriations Committee may proceed and we may finish our work so that we may go into the conference that is so necessary that may take days. Please share that with us. And that is not an attempt to embarrass or be smart aleck. I would sincerely like to know what you can do to assist us in seeing that the continuing resolution leaves this body. I will assist you in taking the floor, continuing whatever you wish to do with your delay tactics, cloture, whatever it may be, because right now we have a situation where we are protecting a minority within a minority within a minority of this body. The whole reason for the procedures we have in this place is simply to give that minority the opportunity to express their views, clearly and thoroughly. That has passed. And now, again, is there a way—and I would be glad to participate in those deliberations—where you can release the continuing resolution from this body so that we can get on with whatever you have in mind with your gas tax information?

Mr. EAST. I would like to make it clear, I yielded for purposes of a question. I am not yielding the floor to the Senator.

Let me respond with a question. Could the Senator guarantee me or would he be willing to make the effort to guarantee me that the gas tax measure will not be resurrected if I did agree to a third reading so that we can get the continuing resolution over to where it belongs? Could he give me that assurance?

Mr. SIMPSON. Mr. President——

Mr. EAST. This is the concern that I have. And again I would yield to the Senator for purposes of a question.

Mr. SIMPSON and Mr. RANDOLPH addressed the Chair.

Mr. SIMPSON. The assistant majority leader may have a unanimous request to propound that may solve that.

I can only, in response to your question, submit that for myself, I would assist you in seeing that what rights you think you have now and do have would be preserved as long as we can get about the business of the country.

Mr. RANDOLPH addressed the Chair.

Mr. STEVENS. Mr. President, will the Senator yield to me for the purpose of making another unanimous-consent request, with the understanding that he will not lose the floor or in any way be jeopardized as far as his current rights are concerned?

Mr. EAST. I would be happy to entertain the request. Before I do, I would like to make one point of response to the distinguished Senator from Wyoming.

I have been on the Senate floor where other able and distinguished colleagues, for causes they felt very

strongly about, did not hesitate to stand firm and plant the flag. I see the distinguished Senator over here from Connecticut (Mr. WEICKER) for whom I have the greatest admiration, one of the great mavericks in the U.S. Senate. I have seen him be willing to stand his ground, and I disagree with Senator WEICKER probably 99 percent of the time.

I have seen the distinguished Senator from Oregon, Senator PACKWOOD, also stand his ground. I have seen others. I disagreed with them on those issues but I respected their right under the rules of this body to stand firm. They were looked upon as great mavericks, great independent thinkers. That is good. I admire them.

I sense the heat. That is all right. I sense the heat. I think it is eminently fair because you cannot accuse me of having been an obstructionist in my brief tenure in the Senate. I finally came upon that issue that is we are at the wrong place at the wrong time and about to do the wrong thing, and I am standing firm on it. That is all I am doing.

If certain colleagues find that troublesome and disconcerting, and they are uncomfortable with it, I understand that. I respect it. But I have seen other leaders in the Senate—I am simply responding to the Senator from Wyoming who is some way or other suggesting that I am out of character in this body to be standing firm on something I feel strongly about.

Mr. SIMPSON. Mr. President, the Senator from Wyoming never expressed that. The Senator from Wyoming——

Mr. EAST. The Senator did say I might be a minority but then a minority within a minority within a minority, meaning that I was an obstructionist. I have seen other examples. I mentioned the distinguished Senator from Connecticut. They were willing to stand up and that is all I am doing.

The PRESIDING OFFICER. The Chair will advise Senators that they are not to engage in colloquy without addressing the Chair.

Mr. RANDOLPH. I have addressed the Chair on every occasion.

The PRESIDING OFFICER. The Senate will be in order. The Senator from North Carolina has the floor.

Mr. EAST. I have the floor and I would like to briefly plead my case to the Chair. I appreciate the frustration of the Chair.

I yielded to the distinguished Senator from Wyoming for a question and he was somewhat publicly implying here that what I was doing was a little bit out of character for this very August body. I am simply responding so that I might show on the public record I do not think that is true, I do not think it is accurate, I do not think it is quite fair.

I am simply standing on my right as a Senator on an issue and a matter I feel strongly about. I fear that if I do not at this point stand firmly and strongly on it, that in very short order after third reading of the current bill that is before us, we are going to be back on the gas tax. I finally decided in my own mind if I felt that was not a good idea, this might be a good time to raise it.

All I have been trying to do with my colleagues, and I appreciate their indulgence, is to get a little perspective here as to how in the world we ever got to this point in the lameduck.

I think there are an awful lot of Senators around here who feel the same way. We came back, again, to deal with appropriations bills. We came back to deal with the continuing resolution. We have dealt with just about everything else under the Sun except those things at the tail end, and we are now under all this pressure to get out. I wish to get out, too.

Mr. RANDOLPH. Mr. President——

Mr. EAST. I refuse, Mr. President, to let it be implied that some way or another I am the one who has been dilatory, that I am the one who is obstructing.

I have not said a thing for days around here except in the most limited and appropriate way.

Mr. RANDOLPH. Mr. President——

Mr. EAST. Finally I reached the point where I thought if I am going to defend the interests of the people of my State and what I think are be best interests of the people of the United States, this might be a good time to raise it, because once we get past third reading, it is over. You know and I know. I will admit, yes, that is what I am doing.

I would like to respond in that context and then I will yield for the unanimous-consent request. We can follow that, and I want to come back to the floor.

I want to respond to the points the Senator from Idaho raises, about would not the good citizens of North Carolina benefit from this bill, and my answer to that would be, no, they would not benefit from it. I do not think the good citizens of this country will benefit from it. Again, this is the only time I have to raise it.

I thought we had it set aside, that it did not work, we were not going to invoke cloture, and we were never going to take it up in the lameduck anyway.

This country would go right on if we took it up in January, would it not? We could make it S. 1. Do you think any roads or highways or bridges are going to be built between now and when we come back in January? No.

Anyway, we could go on ad nauseam about that end of it.

I do not think what I am doing is out of character. I did not get us out in this ditch. I did not get us into this late hour bog-down where we are. I simply have finally reached the point where I thought I ought to call attention to the fact that we have gone the wrong road, we were in a ditch. We are now about to finish up the continuing resolution, to get that done, to go home. We came here to do what we were sent here to do, to get the continuing resolution and some of these appropriations bills out that we did not do.

But now I know and you know that I am faced with the prospect, and you are, too, of getting back on the gas tax. Why not get back on S. 995? Look at all the other things we can get back on. Why are we going to get back on those? I cannot understand it.

All I am asking is, as one Senator, that we stick to the agenda for which we came, let us get that done and let us go home. What is obstructionist or dilatory or ill-advised about that? I do not think anything. That is all I am doing, Mr. President.

I will yield for a question from the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, is it in order for me now to give a question to my colleague?

The PRESIDING OFFICER. The Senator has yielded for a question.

Mr. RANDOLPH. I make no reference to the past 15 or 20 minutes. I only wanted approximately 3, 4, or 5 minutes to state correctly the situation as it is in reference to the deteriorating road and bridge system in this country.

Mr. EAST. Again, Mr. President, I do not wish to break in but I am yielding for a question. I want to make that crystal clear. I do not want to lose my right to the floor.

Mr. RANDOLPH. I do not want my colleague to lose his right to the floor.

The PRESIDING OFFICER. If the Senator yields for a question and allows a statement to be made, he jeopardizes his right to the floor.

Mr. EAST. Then I want to make as clear as I can under God's heaven that if you are tying to allow people to break in and break up my discussion here it is a very critical matter. I am all of a sudden confronted with a ruling by the Chair that I have lost my right to the floor. If I am going to in any way, shape, or form run that risk, I am not going to do it. I am willing to yield for a question. I have done that. I will do the best I can to answer.

Mr. DOLE. Will the Senator from North Carolina yield for a parliamentary inquiry without losing his right to the floor?

Mr. EAST. Yes; I will yield for a parliamentary inquiry with the understanding I will not lose my right to the floor.

Mr. DOLE. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER (Mr. WARNER). The Senator will state it.

Mr. DOLE. Could the Senator from North Carolina yield to another Senator by unanimous consent for 5 or 10 minutes without losing his right to the floor?

The PRESIDING OFFICER. That is a Senator's privilege.

Mr. DOLE. If the Senator from West Virginia wants to speak for 15 minutes, it is within his right to yield to the Senator for 15 minutes, is that correct?

The PRESIDING OFFICER. If there is no objection.

Mr. EAST. That is what I attempted to get earlier, to get a specific time from him that he would utilize, 5 or 10 minutes. As I recall, perhaps the distinguished Senator from Arkansas objected to that, or someone did, so that went down the lonely road and we lost sight of it.

If that is being resurrected, the Senator from West Virginia has now left the floor, but if he would like to come back, I would put a unanimous-consent request for that, that I would be glad to relinquish the floor to him for a specified period so that he would respond, at which time it would be part of the unanimous-consent agreement that I would be able to reclaim the floor.

But I get back to my fundamental concern that I not lose my right to the floor under any unanimous-consent agreement. I hope the Senate will not entertain a request of that kind from the Senator from West Virginia.

Mr. DOLE. Will the Senator yield for one question?.

Mr. EAST. I will yield to the Senator from Kansas, yes.

Mr. DOLE. As I understand the Senator from North Carolina, and I will not quarrel with his point of view, if someone stands up and says they were not going to take up the gas tax, then we could all go home, is that correct?

Mr. EAST. I would be deeply relieved.

Mr. DOLE. So would we.

[Laughter in the galleries.]

Mr. STEVENS. Mr. President, this is no laughing matter. I ask that the Chair caution the galleries that we are not here for a response from the galleries.

The PRESIDING OFFICER. The Chair makes that observation.

Mr. EAST. If the question from the distinguished Senator from Kansas is, would I feel greatly relieved to have an understanding once we had finished the amending process and had gone to a third reading of the continuing resolution that I could have full assurance that we would not be back upon the gas tax by some sort of parliamentary maneuver or proposal, I would be very enthused about that possibility. I think it is a bad thing to be passing at this late hour in the lameduck session.

Mr. DOLE. I thank the Senator.

Mr. SIMPSON. Mr. President, this is the same question I posed. It is not submitted in the spirit of levity or attempts at good humor.

Mr. EAST. I would yield for a question to the Senator from Wyoming. I presume that is what he is asking me, for a question.

Mr. SIMPSON. Just a question, please.

Mr. EAST. I yield to the Senator for a question with the full understanding that I do not lose the floor after having heard his question.

Mr. SIMPSON. Are you of a bent to sit down with those of any particular faith in this body to discuss how you will preserve your rights to do what you think you need to do with regard to the tax bill, but allow the continuing resolution to leave this body so that the chairman of the Appropriations Committee and his vast staff can get to work to prepare for the conference committee and then a conference committee report which must come? Is there a propensity on your part to wish to see that result? Or do you wish and will you continue to hold the continuing resolution hostage for the purpose of feeling that you will get rolled when we finish dealing with it?

Mr. EAST. Well, as I understand the question of the Senator from Wyoming, I am apprehensive that if I did acquiesce and say—I cannot speak for all Senators. There may be some other Senators who have amendments to offer. But let us assume there are no other amendments to be offered. If the question is, to me, do I feel apprehensive that if we go to third reading and the matter is then concluded on this, I will be faced with a movement to resurrect the gas tax—yes, I am troubled with that.

Mr. SIMPSON. Then, Mr. President, may I ask another question?

Is it possible for you to accommodate a request that the compilation and the printing of the continuing resolution go forward on that basis—still, of course, protecting your position where you are right now?

Mr. EAST. Well, again, the difficulty is that if we acquiesce in that, then I will certainly forgo, as well as every other Senator would forgo their right to offer an amendment to the continuing resolution. I am not quite sure I am fully prepared to do that. I certainly, of course, could not speak for my other colleagues who would be forgoing their right.

Mr. SIMPSON. Mr. President, it might be an impossible parliamentary move, but I am saying if there were a way to accommodate the compilation of the continuing resolution so it could proceed, whether you wish to make further amendments or not would not be the issue. At least you know that we would not have gone to a third reading final rollcall vote. I would think any time before that step, you are fully protected.

Is that not something you could concur in?

Mr. EAST. Well, the Senator proposes an interesting proposition. I would want to take a few minutes to reflect on that more thoroughly because of the parliamentary implications in terms of the amending processes and whether that would jeopardize rights that I might wish to exercise in the amending process. I have known, of course, other Senators—Senators certainly would concede, I assume, it is a rather unusual request, that we proceed with printing prior to the third reading. It strikes me as a rather bad precedent. I am not quite sure at what point, Senator, I am prepared to enter into a unanimous-consent agreement to that effect. I would like to think about it.

Mr. SIMPSON. Mr. President, I appreciate that and I appreciate the Senator's problem.

I thank you for your response.

Mr. PRYOR addressed the Chair.

Mr. EAST. I will yield to the Senator from Arkansas for a question with the full understanding that I do not lose my right to the floor.

Mr. PRYOR. Mr. President, let me propose this suggestion to the distinguished Senator from North Carolina. We have a situation here that I hope we can work out. I believe some communication with the distinguished Senator might be helpful at this time, that we might discuss this matter. I can only assume that the Senator is fearful of losing the floor. Is that correct?

Mr. EAST. The Senator has enormous fear about that possibility. So I want to make sure, if I can, that what I am doing is yielding to the extent that the rules of this body will allow me to yield, namely, for purposes of a question; but that it be fully understood that I am not yielding the floor. I want to claim this floor and keep it. But I would yield for purposes of a question as the rules of the Senate will allow me to do.

Mr. PRYOR. I am about to ask you a question.

Mr. EAST. Yes.

Mr. PRYOR. Would you accept some sort of a compromise like this? I can say to you and I can speak for the entirety of our side of the aisle and I think every person in this body: No one is trying to extract from the Senator from North Carolina his rights under the rules of this body. I want you to know that.

Second, would it be a possible compromise to this dilemma for you to temporarily deputize someone to speak as an agent, or to hold the floor for you as an agent, for a matter of 10 minutes, possibly, giving you our honor that you will not be lessened in

your rights? We might engage in maybe a speech about some other subject—maybe Christmas or something pleasant—and hold the floor in behalf of the Senator from North Carolina or someone that you choose, in order that there might be some communication.

Mr. STEVENS. Mr. President, will the Senator permit me to ask a question right at this point?

Mr. PRYOR. I will be happy to.

Mr. STEVENS. Would the Senator have any problem if I just asked unanimous consent that we recess for 15 minutes, with your having the right to be recognized when you come back and you not lose any rights by the recess? You would have the right the minute we came back in to have recognition without losing any of your rights.

Mr. EAST. I would be willing to entertain the unanimous-consent request that we recess for a period of 15 minutes, with the understanding that at the conclusion of that period, I would reclaim my right to the floor.

Mr. STEVENS. Would you yield to me for that purpose without losing any rights?

Mr. EAST. I shall yield to the Senator for the purpose of submitting that unanimous-consent request with the full understanding that, in so yielding for the purpose of his submitting the request, I do not jeopardize my right to the floor and that, once that unanimous-consent request is put into operation, at the conclusion of the 15-minute period, I will reclaim my right to the floor, yes. Under those circumstances, I am willing to accede.

Mr. STEVENS. Mr. President, I make that unanimous-consent request precisely as the Senator from North Carolina entertains it and on that basis, I ask unanimous consent to stand in recess for 15 minutes and when we return, the Senator from North Carolina shall be recognized under the conditions and with the protections that he himself outlined.

The PRESIDING OFFICER. Is there objection? Without objection, the Senate stands in recess until the hour of 10 minutes to 11.

Whereupon, the Senate, at 10:35 p.m., recessed for 15 minutes.

Thereupon, at 11:50 p.m., the Senate reconvened when called to order by the Presiding Officer (Mr. WARNER).

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. EAST. Mr. President, I shall at this point continue my discussion of this matter of the dilemma we face here this evening in terms of the continuing resolution and more particularly my concern about this resurrection of the gas tax bill.

I began to underscore this matter of perspective of it. I indicated where I was troubled with the merits of it and the tax policies it represented, and it seemed to me clearly not on the agenda for the lameduck session.

I wish to clarify. It has never been, was not my intention to obstruct a fair and orderly consideration of this matter. But I felt that obligation had been met.

Cloture vote failed. We were pressed for time. It had not been on the agenda to begin with. And like other measures that cloture votes fail to succeed upon we dropped them and we moved on.

At some point my desire not to obstruct consideration of this measure or any other measure, S. 995, or anything else, I did not want to do it. I did not intend to do it. But I think with this measure, and I have not obstructed it, we had the cloture votes and they failed. I am just troubled that having gone through all of that and having done that there seems to be no end to the resourcefulness to try to resurrect it. And therein lieth my concern.

Mr. President, in continuing my comments here upon the gas tax, my distinguished colleague from Idaho prior to our recess had raised some interesting points about would not this gas tax benefit the State of North Carolina and hence I should show greater enthusiasm for it than I am, and of course, I have the deepest affection for the junior Senator from Idaho.

But I point out to him on the question he raised and I wish to come back to that and answer it that he thinks this bill is a good idea and he talked about it is an equitable formula.

Of course, Idaho and a number of Western States are donee States. They do not contribute in as much as they get back. So naturally they think it is a pretty good idea. I suppose I would, too. Some States get back a tremendous amount of money for the dollar they put into it.

North Carolina historically under the Federal gas tax has gotten 74 cents back on the dollar. We have tied last with Oklahoma and Texas for the donor State that suffers the most.

Under this new formula that has been worked out under the new gas tax bill you take that 20 percent of the so-called users fee, which it is not, and you take it off and you use it for mass transit. We end up getting, according to our calculations, based upon gas consumption in North Carolina last year, back 68 cents on the dollar.

In my response to the distinguished Senator from Idaho I pointed out to a citizen of North Carolina today probably the more prudent thing for us to do is simply levy our own State tax if we want to. We can get back 100 cents on the dollar and then we will not have Davis-Bacon to contend with and we could do a whale of a lot of highway construction and bridge repair primarily and secondary in North Carolina, help the farmers, help trucking, and help tourism. We are a donor State.

And representing the State of North Carolina I could not in good conscience say to the citizens of my State: "This is a good bargain. You ought to be willing to put in a dollar and get 66 cents back to help improve the roads of our State."

I could say to them, "If you think you want to improve the roads of our State and the bridges and the highways if you are going to have to add 5 cents of tax on a gallon of gas, why don't you just keep it here in North Carolina and do it?"

I would much rather have to sell that proposition to them than this.

So that would be my response to the distinguished Senator from Idaho as to why a Senator from North Carolina has a lack of enthusiasm for this measure.

I have no objection to trying to improve and repair the roads, the highways, and the bridges in America. The best way to do that is to revitalize the economy of this country through soundly conceived programs, get the country moving again, get it traveling again, and that is what will expand the tax base and allow us to have infinitely more money available to do the very thing that the bill purports to do, namely, to help the highways, the bridges, and the roads.

You are going to run the risk here of killing the goose that laid the golden egg. You finally tax something so heavily people stop using it. So the revenue it produces gets smaller and smaller.

Certainly people understand that tax policy. And I notice some people have said they wish the tax were even higher as a conservation measure. Remember John Anderson ran on a program of 50 cents a gallon.

I do not recall anybody jumping on that political bandwagon. And the idea was it would reduce the consumption of gas and hence was a good thing.

Any increase in the tax on something you run the risk of less and less consumption of it. That is why I opposed the cigarette tax.

You make it so punitive, onerous, and burdensome people stop using the product. So you have less money available from it. That is elementary tax policy economics, is it not?

(Mr. ROTH assumed the chair.)

Mr. EAST. Mr. President, we have already through high gasoline prices and high taxes forced people into smaller cars, even smaller cars, less and less consumption. There is less revenue available. This is precisely why we are in the bind we are in now. We have reduced the tax base from whence cometh the revenue to repair the bridges, the roads, and the highways in America.

The best way to increase revenue for road repair and expansion would be to encourage the purchase of gasoline, of automobiles, of trucks, of getting moving carrying people, airplanes flying people, buses carrying people. They would have to hire a lot of people to help do that, and they would have to get more gas. You would build up the revenue funds. Then you could get back to having a first class highway system.

We built a first class highway system in this country when gas was cheap. Now, some way or other we have in our mind the more expensive we make gasoline, the more money we will have available to fix the roads and expand them.

I do not see where that is sound tax policy. So I do not disagree with the goal that the distinguished Senator from Idaho raised, namely, would not I like to do something for the roads and the bridges and the highways of North Carolina? Well, of course I would. I would like to do it for the whole country.

I am simply saying this is the wrong path to follow to accomplish that end. That is why I raised this point.

Mr. HAYAKAWA. Will the distinguished Senator from North Carolina yield for a question without surrendering his right to the floor?

Mr. EAST. I will yield for the purpose of a question from the distinguished Senator from California, understanding that I do not lose my right to the floor.

Mr. HAYAKAWA. That is the understanding.

Mr. EAST. I would like to make it clear, Mr. President, I am willing to yield to the Senator from California for a question with the understanding I am not losing my right to the floor.

Mr. HAYAKAWA. It is so understood.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. HAYAKAWA. I thank the Chair.

Does the Senator from North Carolina not believe in the Democratic process? Does he not believe in the intelligence and integrity of his colleagues in this body? Does he so distrust us all that he is unwilling to permit us to continue about our business, complete it so that we my rejoin our families doing what other people who are not Senators look upon as a holiday season? Is he so distrustful of the wisdom of his colleagues that he is certain that if he yielded the floor the stupid or conniving or corrupt people will pass a gas tax bill that will restroy the economy of the Nation? Has he no trust, no confidence in the wisdom and integrity of his colleagues that he says he holds in high esteem? Is this why the Senator from North Carolina is willing to permit the Government of the United States to be shut down next Monday morning to the disruption and dismay of hundreds of milions of people who work and whose lives and livelihood are dependent upon the operation of that Government? Does the Senator from North Carolina believe that his own wisdom is so great that no opinions——

Mr. STEVENS. Mr. President, may we have order? I am not sure the Senator from North Carolina hears the question.

The PRESIDING OFFICER. Will the Senator withhold?

Mr. HAYAKAWA. This is a question.

The PRESIDING OFFICER. The Senate will please be in order. Those Senators who want to engage in a conversation will withdraw from the Chamber.

Mr. HAYAKAWA. Does the Senator from North Carolina believe that his own wisdom is so great that no opinions on this matter, on this floor matter but his own? If such is the case, why does he remain a member of a legislative body so stupid or corrupt as to be willing to discuss a 5-cent-a-gallon gasoline tax? Why does he demean himself by asssociating himself with clods and peasants and idiots like us?

I will be grateful if the distinguished Senator from North Carolina would give us one reason.

I thank the Chair.

Mr. STEVENS. Point of order, Mr. President.

Mr. EAST addressed the Chair.

Mr. STEVENS. I ask that I be permitted to make this point of order without the Senator losing any right to the floor.

Mr. EAST. Under those conditions, I will relinquish the floor.

Mr. STEVENS. Is it not true that there is a rule in the Senate that one Senator may not impute the motives of another Senator? Is it not rule XIX, something along there?

The PRESIDING OFFICER. Under rule XIX, paragraph 2:

> No Senator in debate shall, directly or indirectly, by any form of words impute to another Senator or to other Senators any conduct or motive unworthy or unbecoming a Senator.

Mr. STEVENS. I thank the Chair.

The PRESIDING OFFICER. Under the previous order, the Senator from North Carolina will be recognized.

Mr. EAST. Mr. President, I appreciate the assistance from the acting majority leader. I would like to say as regards the question raised and asked by the distinguished Senator from California that as he is aware I was a professor of political science before my election to the Senate, and I taught courses in American Government and other matters relating to the so-called science of politics, which, as we all know, is more art than science, but that is another problem.

Yes, I like to feel I understand the democratic process. We serve here in the Senate in what is alleged to be the greatest deliberative body in the world. We also know under our Constitution that the Senate can make its own rules, and it has made them. One of the rules of the Senate, which is a product itself of the democratic process, is that when one individual has gained the floor——

The PRESIDING OFFICER. Will the Senator please withhold so that we can get order in the Chamber?

All extraneous conversations will please cease. Anyone who wants to engage in such will please leave the Chamber. The Senator from North Carolina is entitled to be heard.

Mr. EAST. I thank the Chair. I was elaborating on the point that the democratic process is alive and well in the Senate. I respect it. Under our Constitution, a democratic Constitution, we have the right to set our own rules, and we have set them.

One of the rules of this body that existed long before I came was that when an individual Senator obtained the floor, he could speak on matters before him.

Now, one of the reasons, one of the rationale for this rule, which may appear odd to the press or the public or indeed our own Members, is it allows for perhaps too much individual autonomy. Perhaps it does and perhaps the Senate in its infinite wisdom in the future ought to change it. But the reason they have had the rule historically, I would remind the distinguished Senator from California, is the feeling that one risk you run in a democratic society where majority rules is they act in great haste at late hours and make mistakes.

That is why we allow the filibuster. That is why it takes 60 votes to overcome it, so that we will not do things that are hasty and ill-advised. That is exactly why that rule exists. It is a product of the democratic society.

There is an appreciation. I have seen so many other Senators in this body avail themselves of it where they feel strongly about something. They get up and they speak against it. They may be in a minority, but the feeling is, in a democratic society not to let the majority go too fast too far at late hours and make mistakes. In order to prevent that, we have the rule produced under democratic procedures whereby Senators can address matters, obtain the floor and address matters at some length.

That is all I am doing. With all due respect to the Senator from California and others, I have been here not long but I have been here long enough to know that other colleagues have availed themselves of this right. I have

personally respected it. I have never come out on the Senate floor and attacked it, nor have I personally in the cloakroom nor anywhere else implied that they were doing anything else other than what they were entitled to do under the rules and they were taking an eminently honorable and proper position.

With all due respect to my distinguished colleagues in this body—and I revere every one of them, all 99 of them—I will not be in any way intimidated with the idea that some way or other by utilizing the rules of this body, as everybody does from time to time, for an infinite variety of causes, that some way or other I am doing something out of character that has not been done before. No; I am not. It has been done before. It has been done and it will be done after I am gone and every Member of this Chamber is gone, because there is a feeling in this body—and getting back to the Senator from California, whether it is consistent with democratic political theory; yes, it is. The Senate so thinks it is under its current rules in order to make sure——

Mr. FORD. Will the Senator yield?

Mr. EAST [continuing]. What the majority does is not imprudent, is not ill-advised, is not done in a spirit of passion at a late hour.

Mr. FORD. Will the Senator yield without losing his right to the floor?

Mr. EAST. I will yield for the purpose of a question in one moment.

That is the spirit in which I am making my stand here as regards the tax bill. I would like for the record to show that; no, I do not share the sentiments of the Senator from California that some way or other what I am doing is contrary to the democratic process. It is wholly consistent with it. It is a product of it, and every freshman political science professor in America can tell you that. If you cannot, then he ought not to be teaching.

I will yield to the Senator from Kentucky for the purposes of a question, again with the full understanding that I will not be yielding the floor.

The PRESIDING OFFICER. Is the Senator making a unanimous-consent request?

Mr. EAST. I have said that I would yield for a question, that I am willing——

Mr. FORD. I ask unanimous consent that the Senator may yield for a question without losing his right to the floor.

Mr. EAST. Again, as a safeguard, I want to be certain that I am yielding for a question without losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kentucky? If not, without objection it is so ordered.

Mr. FORD. I ask the distinguished Senator from North Carolina: I have heard you and I respect your position, that you in no way intend to defeat the continuing resolution. That is No. 1. What your problem is is the so-called gasoline tax bill.

Mr. EAST. I am concerned that after we complete our agenda on the continuing resolution, which was the primary purpose of the lameduck, that and the appropriation measures, a few of which we passed—that was the primary purpose in coming back—I am concerned that after those matters are completed that we will, at a late hour, impose upon the American people a gas tax that has already failed to get before this Chamber because they could not invoke cloture.

Mr. FORD. Senator, the point I am trying to make, and I am not as eloquent as you are nor am I a professor, is: The continuing resolution is vital to this country. As I see it, we are impeding the continuing resolution, upon which the Government runs. I wonder if you can reach within yourself to tell this body that you do not have any reason whatsoever to impede the conclusion of the continuing resolution; that if we could get to some point where the continuing resolution could be accomplished, that you could continue your opposition to the 5-cent tax on gasoline, would you be amenable to that?

Mr. EAST. Senator, candidly, in a practical matter if I relinquished on that request as you have put it, what leverage I have dissipates. Again, under the rules of this Chamber, individual Members or groups thereof, sometimes majorities or sometimes minorities, are able to obtain leverage to discuss the matter or give serious thought upon it, and if they do not have it, it is difficult to get someone's attention. The continuing resolution is, frankly, the only vehicle or instrument at this point which stands in the way of our returning to a matter that I think had a fair shot and it failed cloture. It could have been pulled down. Other measures that failed cloture were pulled down. I had seen that to be a very common practice in this body with the very distinguished majority leader for whom I have the greatest admiration, simply saying, "We have tried, we have failed, we must now move on." But for some reason or other the gas tax, which one thinks maybe had been laid to rest because of the failure to impose cloture, and it was never on the agenda of the lameduck anyway, keeps cropping up again and again and again. I had indicated to people originally, others, that I had no intention of throwing myself on the railroad track and obstructing the orderly consideration of this measure. That was never my intent or purpose. But I think it got a fair shot. It got a fair shot like all of these other measures did. I acquiesced in that, when they could not do it.

I have seen it happen with other issues time and time again. Finally the point will be made, "We have tried. We have failed, gentlemen, and we must move on to other things."

I cannot for the life of me find out what is sacrosanct about the gas tax.

Mr. FORD. I am not worried about the gas tax. I am worried about the continuing resolution. You just said you would not lay yourself down on the track in front of that train. But what you are doing is laying yourself down on the track for the good of this country. What I am asking you to do is to yield on the continuing resolution and go back to the gas tax. You can have that bill and do anything you want to with it. I want the country run. That is what I want. You get off the track and let us do our will here.

Mr. EAST. I can tell you another man who is going to face that same kind of decision if he threatens to veto. He has already said that if this continuing resolution is not sound economic policy, he will veto it, and he will be berated by Members of the Senate and the highest reaches of the national conscience for obstructing the very thing you are talking about. But Ronald Reagan will probably be admired, at least by many people, as standing his ground and that that is good leadership. So all I am doing here, in an infinitely more modest way, is trying to make the point that I think we will be going the wrong way with the gas tax. I cannot deal with a moral or ethical plain. I am even more out of character than he might be. Certainly, he has more right to do that than I do.

That is the spirit, Senator, though you raise a valid point. The continuing resolution is a part of the whole fabric of the process of the Senate and the executive branch. The President has said he would veto it. All we have here is one sole Senator saying he is uncomfortable with the fact that if this continuing resolution goes through third reading, is accepted, then immediately we will be confronted with the gas tax proposal. I think it is ill-advised.

I am willing to let the Government go on its way if we can drop the gas tax, just as the President said he would be willing to let the continuing resolution go on its way provided it does not break the budget.

Again, in terms of the moral or ethical difference between those two postures, I do not quite understand what the difference is. In other words, we are both exercising rights and prerogatives either under the Constitution or the rules of the U.S. Senate.

That, Senator, is the way in which I raise my concern. I would be happy to entertain from any source a unanimous-consent request that might

stitch together a proposal that would give some relief to my concerns as well as allow the continuing resolution to pass through. We can resolve all of these things in an orderly way. But to this point I have not heard that.

I would simply offer to this body a willingness to accept the continuing resolution, with the amendments that have been accepted, and we could go to third reading.

Mr. RANDOLPH. Mr. President, can we have order in the Chamber?

The PRESIDING OFFICER. The Senator from North Carolina is entitled to be heard. Those Senators or staff people engaged in conversations will please remove themselves from the Chamber.

Mr. RANDOLPH. Mr. President, may I ask a question of the able Senator from North Carolina?

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. EAST. I would be happy to answer a question. Before doing it, in response to the Senator from Kentucky, I would simply turn the table on him, on the people here, and simply argue the other way around, that by insisting upon the gasoline tax they are making it impossible to complete the continuing resolution because the junior Senator from North Carolina would like to have the gas tax brought down before we proceed with it.

One can always argue these things from one perspective or another. I am no more obstructing the continuing resolution going through to an orderly end by asking that we pull down the gas tax than the other side is in saying, "We have to have the gas tax or we just cannot go along with it." I do not know who in the world is holding up the continuing resolution. I guess you could argue that both ways in a metaphysical sense, but I will not accept the proposition that some way or other my posture is a bit less ethical, a bit less moral, and a bit less understanding of the democratic process than those of the other side.

This is true because the rules of this body, the greatest deliberative body in the world, were brought about through the democratic process and have allowed me the prerogative to do what I am doing. That is all I am doing, no more or no less. It is exactly what the President of the United State is saying he will do under the Constitution with the veto power. He will be berated, but I will admire the President if he vetoes this continuing resolution because it goes beyond what he thinks is the proper point.

I am simply saying I think before we get off the continuing resolution, I would like to know what road we are going down next. I gather the road we are going to go down is the gas tax road. We have already been down it. Cloture was not invoked. I do not think it is a good idea. I have finally reached the point where I thought we ought to stand some ground and say it publicly and say it in a strong, loud, clear voice. It had its shot; it has failed. It is not good tax policy. I do not think it is.

I have already said so amply this evening.

This was the time and the place to take the stand and say that the rules of the Senate allow me to take it. I see absolutely nothing out of character in terms of how this body normally functions and what the rules allow an individual Senator to do.

I shall be happy to listen to any of my colleagues say, "Senator EAST, you are some way or other violating the rules, the protocol, the decorum, the civility, the honor, the dignity of the U.S. Senate," and I do not think anyone down deep in their hearts can say that. I am simply doing what other Senators have done since I have been here, long before, and will be doing long after—avail themselves of the rules and, in this case, yes, standing firm and saying, "Gentlemen, I think what you want to do is ill advised."

I think the gas tax is ill advised and this is the best place to get the Senate's attention to drive that point home. Does that make it immoral, unethical, contrary to our rules? No; it does not. You know that and I know it. It has been done, it will be done in the future, and I am doing it tonight. And however this turns out, tonight or tomorrow, I will go home with a good conscience that I fought the good fight, I kept the faith, but I lost. But I will not be in a position where I do not sleep well with the feeling, "John, some way or other, you violated the ethical norms of the U.S. Senate."

No; I did not. I simply availed myself of the rules as people have been doing in this body since its founding.

Mr. DOMENICI. Will the distinguished Senator yield for a question without losing his right to the floor?

Mr. EAST. I shall yield to the Senator from New Mexico with the understanding that I will not lose my right to the floor; I yield for a question.

The PRESIDING OFFICER. Is that a request?

Mr. DOMENICI. I so request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. I ask my good friend from North Carolina, you do not mean to imply that we could pass the gas tax jobs bill in violation of the rules of the Senate, do you?

Mr. EAST. No, I do not mean to do that. I am simply saying, Senator, that I am availing myself of the rules of the Senate to try to see——

Mr. DOMENICI. We could not pass that bill any way other than under the rules of the Senate, could we?

Mr. EAST. Pardon?

Mr. DOMENICI. We could not pass the gas tax jobs bill other than pursuant to the rules of the Senate, could we?

Mr. EAST. Of course not, Senator.

Mr. DOMENICI. I thank the Senator.

Mr. EAST. No, they could not, Senator, any more than they could, of course, pass the continuing resolution.

As I have indicated to my colleagues, and I would like to restate the proposition, I would be happy to entertain a unanimous-consent agreement or some sort of arrangement whereby my deep concerns and the concerns, I suspect, of a good strong minority of this body, might be integrated into the democratic process. And then we could proceed to an orderly conclusion of this matter.

Ideally, of course, I would like to see the gas tax brought down and we finish up with the continuing resolution and go on. As I say, I think that would be an eminently fair position in view of the fact that it was not on the agenda to begin with. It got a fair shot like all these other measures we were talking about earlier, and it failed. It failed to get cloture. But for some reason or other, it is to be resurrected for special treatment. I do not know why it deserves special treatment, any more than Radio Marti or S. 995—I have forgotten all the ones we failed to invoke cloture on. They were pulled down.

I saw it done in the last period, this last period this great group met prior to the last recess. As I recall, there were a number of issues there, so-called social issues and others. It does not make any difference. All of them are social issues relating to society and government and politics. I am simply saying they got their fair shot. We could not impose cloture, so we pulled them down, and we moved on.

I think those were in circumstances where they had maybe even more reason not to do that, because it was not lameduck, it was not decided we would come back for a very narrow range of operation; namely, in this case, appropriations and continuing resolution.

All of a sudden, the laundry list grew and a number of issues could not survive because we could not impose cloture, so they were pulled down, one after another. It is only the gas tax that keeps coming back again and again and again.

As I say, from the outset, my purpose has not been to obstruct the orderly consideration of any of these matters, but this one, all of a sudden, has been converted into some sort of preferred position. I finally concluded in my own mind that it has gone as far as it needed to go. Enough was enough. It was getting undue treat-

ment. It was not fair treatment in the lameduck, as opposed to the other issues. Too much attention, too much priority.

Again, the more fundamental question is, I think it is a bad proposal.

Mr. BAKER. Mr President, will the Senator consider yielding to me for the purpose of three unanimous-consent requests, which I do not think he would find objectionable, with the understanding that he does not lose his right to the floor?

Mr. EAST. I would be happy to yield for a unanimous-consent request from the majority leader.

Mr. BAKER. I thank the Senator.

UNANIMOUS-CONSENT REQUEST

Mr. BAKER. Mr. President, there are three things I would like to clear at this time, presuming to believe that at some point we are doing to finish the continuing resolution and get on with the highway bill. There are two or three matters that ought to be taken care of before we move from one to the other. I believe the requests I am about to make have been cleared on both sides.

First, Mr. President, I ask unanimous consent that on the completion of the consideration and disposition of the continuing resolution, the Senate turn briefly to the consideration of the conference report to accompany H.R. 7356, the Interior appropriations bill. I ask unanimous consent that there be a time limitation of 10 minutes, equally divided, with control in the usual form on the conference report and any amendments in disagreement or amendments thereto which may be presented.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, would the distinguished floor leader include in that request that no amendments be in order to any amendments in disagreement?

Mr. BAKER. The distinguished chairman of the Committee on the Interior is not here. I shall do that with the understanding that if he has any technical corrections to make in that, we would vitiate that order.

Mr. ROBERT C. BYRD. That only those would be in order?

Mr. BAKER. Yes, Mr. President, I include that in my request, that no amendments to the items in disagreement would be in order.

Before we conclude, I must say to the distinguished minority leader I have to include in that request that this order could be vitiated at the request of the distinguished chairman.

Mr. ROBERT C. BYRD. Would the Senator include that the time limitation he set out would be overall?

Mr. BAKER. Yes, it would be overall, equally divided, and would encompass debate on any items in disagreement. I understand that is agreeable to the distinguished chairman of the committee.

I put the request without the condition, Mr. President.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. EAST. Mr. President, wait. When the Chair says without—I am reserving the right to object. I am trying to get the full swing of the unanimous-consent request. I am reserving the right to object. I am not fully clear what it is we are doing right now.

Mr. BAKER. Let me say to the distinguished Senator from North Carolina what I am doing is, first of all, being an optimist. That is hoping that at some point, we are going to finish consideration of the continuing resolution.

The request was that after we finish the continuing resolution, rather than automatically going to the highway bill, which is the present state of affairs and nothing has changed under the previous arrangement, that instead, we would go first to an Interior appropriations conference report and have a 10-minute time limitation and dispose of that matter.

Mr. President, I shall now propose an addendum to the request that, after we dispose of the Interior appropriations conference report, we go to another measure, also from the Interior Committee, Calendar 1007, H.R. 5161, the West Virginia National Forest bill; that on that bill, only one amendment would be in order, that amendment to be offered by the distinguished junior Senator from West Virginia; that there be 5 minutes of debate equally divided on that amendment; and that no amendment will be in order to the Byrd amendment; that after the disposition of the Byrd amendment, there be 3 minutes of debate on the bill equally divided and it shall not be subject to further amendment; that after the expiration of the time for the amendment, a vote will occur on the amendment without intervening motion, point of order, or further debate; that at the conclusion of time for debate on the bill, the Senate will proceed to vote on the bill without further amendment, motion, or point of order being in order.

Mr. ROBERT C. BYRD. And that if any motion to reconsider is made, and it will be made, there be no time for debate thereon.

Mr. BAKER. I include that in the request, Mr. President.

The PRESIDING OFFICER. Is there objection?

Mr. EAST. Mr. President, reserving the right to object, would it be a part of this unanimous-consent agreement that the conference reports that we would be taking up after—does the majority leader propose that it would be open to debate?

Mr. BAKER. No, Mr. President, the Interior appropriations conference report under this formulation would have 10 minutes for debate. H.R. 5161 would have a total of 8 minutes, 5 minutes on an amendment and 3 minutes on the bill.

Mr. EAST. Would the majority leader be willing to consider the proposition that as long as those conference reports are debatable, we could complete the CR right now and debate those debatable items?

Mr. BAKER. I am sorry, Mr. President, I was not following. Was the Senator asking am I ready to finish the CR?

Mr. EAST. What I was saying, Senator, is that I would be willing to allow proceeding with the CR and orderly conclusion of the CR provided that the unanimous-consent agreement does not preclude debate on the conference reports that we will subsequently be entertaining prior to consideration of the gas tax.

Mr. BAKER. Mr. President, let me say to my friend from North Carolina that I understand, I believe, what he is about. I do not presume to put an unfair interpretation on his request or rather extensive remarks that he has made at this late hour in the evening. I rather surmise that his objective is to keep from turning to the consideration of the highway bill. There is no secret about that. And I think the Senator from North Carolina would freely acknowledge that is the purpose involved.

If we do not put the time limit on these items that I have just requested, I am afraid it would have the effect of simply transferring his debate, extensive as it may be, from this measure over to those two measures.

Mr. President, let me say this, with no disrespect intended whatever, I believe I can get to the highway bill and I believe I can do it after the CR is completed or before the CR is completed. I think I could do it right now.

I think, Mr. President, that there is no doubt, from a procedural standpoint, that at some point I will be able to make a motion to reconsider on the cloture vote on the Baker substitute to the highway bill. I think that is so whether it occurs now or at 12:01 or at noon tomorrow, or Monday, Tuesday, Wednesday, or whatever it is. I think they are qualified.

I think, as well, Mr. President, that the way the matter is left right now, assuming I can gain recognition—and I would not try to do that at this moment, because the Senator has kindly yielded to me under a consent agreement that reserves his right to the floor—but, at some point, I believe I could get recognized in my own right. I believe when that happens that I could bring back the highway

bill with the simple call for the regular order. I believe I could do that.

So, Mr. President, I suggest that there is no practical way that we can use this debate or a filibuster on these two items to keep us finally from getting to the highway bill. I do not want to be harsh and I am certainly not threatening the Senator by saying there are ways to do it, but I do not intend to do that right now. I do not.

Let me tell you what I would like to do, instead. I would like to get these two unanimous-consent agreements. I would like to get another unanimous-consent agreement—and I will put it right now, and the Chair can reserve on that under the previous reservation of the Senator from North Carolina.

I ask unanimous consent that the time for the convening of the Senate be changed tomorrow from 6 p.m. to 2 p.m.

Mr. President, do not put the question now, but include all three of them in a single request which you can put in a moment.

What I would like to do is this: I would either like to go on with the CR tonight, which is preferable, and get it out of the way so that we can go ahead and get it engrossed officially and get our conferees in position tomorrow to go to conference with the hope that we can get it to the House tomorrow afternoon and at 4 p.m. they can take it up and send it to the Senate tomorrow afternoon somewhat later. That is the schedule. We are already late, but this is a good arrangement.

But if the Senator will not let me do that, if he feels that he must go forward at this time, rather than try to gain recognition and call for regular order, which would displace this bill and get me instantly on the highway bill, what I would propose to do, instead, is to request the Secretary of the Senate—I may say I have already done this—to go forward with the engrossment of this bill, notwithstanding that we have not reached third reading. Now, I suppose that means if there are any further amendments to this bill that the engrossment would have to be changed before it becomes official. But I have requested the Secretary of the Senate to go forward with that and he has agreed to do so under the authority which the Senate has given him under previous orders.

In addition to that, Mr. President, I have requested the distinguished chairman of the Appropriations Committee to assume that we are going to get a bill and, notwithstanding that, even in the morning at 10 o'clock when he wants to go to conference, that he may not officially be able to do so, but he will still have an engrossed document—it will not be officially engrossed, but he will have a paper—and he will be able to begin informally meeting with his counterparts in the House.

Having put that motion, Mr. President, I would be inclined to say that the Senator from North Carolina and I can stay here all night and at some point or other we will be able to resolve this issue.

I would encourage other Senators to stay if they wish, but I certainly will not insist that they do so.

So, Mr. President, what I hope the Senator will do is permit us to go on with the disposition of CR. We were close to third reading. I hope the Senator will let me have these three unanimous-consent agreements which are routine and in the nature of trying to take care of the orderly business of the Senate in a responsible way, and that we can go out after we get on the highway bill after third reading and final passage, after we get on the highway bill, after we have our two votes, the two votes would be on the motion to reconsider and on cloture, and then go out until 2 o'clock tomorrow afternoon. That is what I would like to do.

But, Mr. President, I cannot do that unless the Senator from North Carolina is either willing to agree to that or unless we sit here and look at each other until we have an opportunity to conclude this thing. I really urge the Senator from North Carolina to consider that we need to do that.

Mr. President, before the Senator responds, could I inquire of the Chair, in the unanimous-consent request that I propounded, I include a time limitation on the conference report and any amendments in disagreement to be included in the overall 10-minute time total, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, there are many other procedural ramifications that I could go through, but what it finally boils down to is at some point we have to get on with the business at hand.

I admire the Senator from North Carolina more than I can possibly describe. I urge that he consider that we have a major responsibility to try to pass this continuing resolution and to go on with the business at hand.

I understand painfully how much he is opposed to the highway bill. But I hope he understands how committed I am to pass it.

Now, I have described to him some of the ways that we can reach that bill. I hope he will agree that at least we ought to go on and finish the continuing resolution this evening.

Mr. EAST. Well, of course, I note my great affection for the majority leader and the difficulty he finds himself in in attempting to move matters on.

I have been told by a number of Senators this evening that I run the risk, as the President does if he vetoes the CR, of bringing the Government to a halt, whatever relative merits or demerits there may be in doing that. And there are, conceivably, I suppose, some merit. I do not mean to make light of the point.

However, I have been told repeatedly that what we have got to do is get the CR through. And I agree. That is why we came here, to get the CR through. And yet it is the gas tax that has haunted the session.

Now, if what we all agree upon is to get the CR through, and I agree with that, all I am asking is—and I will relinquish and let us get the CR through—that I can debate those conference reports. I do not see why we cannot separate the conference reports and the gas tax from the CR.

My concern, I say to the majority leader, is that the other side insists they have to be considered together. I am simply saying: Why can we not sever them? Particularly in views of the fact the most important thing is the CR, and that is why we came back here to begin with. Why do not I have just as much right to insist that they are together as the other side?

I think we have reached one point of agreement. The CR is the top priority item. Now, let us get that out of the way and everything else that we will be taking up is debatable, for example, the conference reports.

With my deep respect for the majority leader—and I greatly regret at this late hour I find myself in the awkard, unenviable, unhappy position here of arguing with a man for whom I have the deepest affection and admiration. I voted for him when I first came in here as majority leader, and I will vote for him in January. This is probably the most painful part of what I am doing is standing up publicly, or sitting here publicly, having to disagree with him—I will not accept that unanimous-consent request unless there is the provision in it that I can debate the conference report.

If so, we will have accomplished all we agreed on, the major thing we wanted; namely, to get the continuing resolution through. Then we have the conference reports we can debate, and at the proper point we could consider where that would leave us with the gas tax. But all of these are being considered a part of an overall agreement.

Mr. BAKER. Mr. President, if the Senator will yield to me again without losing his right to the floor and on the same conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. At some point, this will conclude. I do not see any point in anybody else staying around here unless they particularly want to. If we need to proceed to third reading or take some other measure, I will notify my Cloak Room, and I assume the mi-

nority leader will notify his. I would suggest everybody go home.

Mr. ROBERT C. BYRD. Will the majority leader yield?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. Will the distinguished Senator from North Carolina object to the request pertaining to my bill?

Mr. BAKER. Mr. President, let me break them out one by one.

Would the Senator agree to the unanimous-consent request, first, that we change the time for convening from 6 o'clock to 2 o'clock tomorrow afternoon?

Mr. EAST. I am sorry. Would the majority leader repeat?

Mr. BAKER. Yes. I have three requests that I made en bloc. Let me work back through them one at a time and see what we can get.

Would the Senator have any objection to my request that we change the convening time from 6 p.m. tomorrow to 2 p.m. tomorrow?

Mr. EAST. I would rather stand firm on the 6 o'clock hour.

Mr. BAKER. Very well.

Mr. President, let me ask this question. Would the Senator be kind enough to agree to the time limitation on either one of these measures whenever it is taken up?

Mr. EAST. As long as one was debatable.

Mr. BAKER. Yes.

Mr. President, in all fairness to the Senator, he should understand the way I put it now. I might or might not call them up between the continuing resolution and the highway bill. What I wish to do is get the time limitations because we have to dispose of those items.

Mr. EAST. I wish the debatable one, of course, to be brought up prior to the gas tax.

I am trying to find some area here by which we can release the continuing resolution for final conclusion and disposition and not forgo my opportunities via the process of debate to get around the gas tax in due course.

Mr. BAKER. Mr. President, I do not really think I need to prolong it. The Senator understands me and I understand him and I respect his point of view and, as he said, I believe he respects mine. At some point I suspect we will be able to do some of these things, maybe all of these things.

And I intend to persist in an effort to try to regularize the proceedings of the Senate. But right now I will not try to do so by displacing this measure and going to the highway bill. Instead I will say again to my friend, the minority leader, that I intend to do these things.

Mr. ROBERT C. BYRD. With the Senator's rights to the floor being protected, may I ask the majority leader if he would propound the request on my bill, the amendment which has been agreed to on all sides, that we take up the bill, immediately offer the amendment, and we have a vote thereon—it can be by voice—that we have no more than 3 minutes on the bill and the amendment following the action on the finalizing on the continuing resolution.

Mr. BAKER. I am willing to do this now if the Senator wishes me to put the request at this moment.

Mr. ROBERT C. BYRD. I mean if he would put the request now, and immediately following we acted on this continuing resolution.

Mr. BAKER. If the Senator will permit we might have a better chance if we did it right this minute. But, Mr. President, I will do as the minority leader requests.

Mr. President, could I inquire of the Senator from North Carolina would he consider the unanimous-consent request in respect to H.R. 5161, the West Virginia National Forest bill under the arrangement that I outlined, that is to say with the time agreement to follow on after the continuing resolution and before the highway bill. I do not now include the Interior appropriations conference report, only the single measure that I spoke of.

That would still leave another measure that I might or might not call up in between, but I will say to the Senate that at some point we have to do that conference report, and I intend to do so.

Would the Senator permit me to have that time agreement on the West Virginia National Forest bill?

Mr. EAST. Mr. President, reserving the right to object, is there some other measure that we might consider taking up, a private relief bill or other matter other than the one currently being proposed, in all due respect to the minority leader?

Mr. ROBERT C. BYRD. Let me respond to that.

Mr. BAKER. I yield to the minority leader.

Mr. ROBERT C. BYRD. Mr. President, with the Senator's rights protected, may I say that we on this side of the aisle are ready to vote now on the third reading, we are ready to vote now on the passage of the continuing resolution. The majority leader knows that. We are ready to vote now on the highway gas tax bill. I am not saying we will all support it. I for one may not vote for it, but we are ready to vote on it up or down. This side is ready to vote on both those measures, and we are ready to proceed with the vote on cloture on the Baker substitute at the moment that the distinguished majority leader decides that he wants to make the motion and we will give him enough votes to make the cloture on that one.

My little pitiful 3 minutes are not going to prejudice the distinguished Senator from North Carolina one iota in what he seeks to do.

Mr. EAST. I propose then since, of course, I wish to accommodate the very distinguished minority leader as far as the unanimous-consent agreement. There would be two dimensions to it: One, that we would promptly and quickly dispose of his measure, which I would want to do out of great courtesy, respect, and admiration for him, and the second dimension of the unanimous-consent agreement would be that we would also then be entertaining a measure that was debatable.

It seems to me that way we protect the rights of the Senator and the understandable wishes of the distinguished minority leader that his measure out of courtesy and respect for him will be promptly disposed of, yet at the same time I am not asked to jeopardize my position in terms of no longer having a debatable matter before the Senate. Would the distinguished minority leader be willing to acquiesce in that? That way we can dispose of his measure and then we would have a debatable measure to which we could then at that time return and upon conclusion of that then we could come back to this question of the conference report.

Mr. ROBERT C. BYRD. Mr. President, the distinguished Senator from North Carolina has asked me a question. By disposing of my little bill, which would only take 3 minutes, the Senator is not being deprived of his opportunity to continue to debate the continuing resolution. That is what he has been debating. He would not be deprived of that. And at such time as the majority leader goes to the highway bill, the distinguished Senator from North Carolina would not be deprived of his right to debate on that measure. If cloture is invoked he would have 1 hour.

This little bill only takes 3 minutes unless there is a rollcall vote on it and it takes nothing away from the Senator from North Carolina. As a matter of fact, he will get a chance to rest a little bit following the action on my little bill and then he can continue his debate on the continuing resolution.

We are ready on our side to vote on the continuing resolution now and ready to vote on the gas tax bill right now.

I hope he will not object to my minuscule request, and I do not make many requests, and the Senator from North Carolina may someday have a little bill that he is very interested in that I might be able to help him with.

Mr. EAST. Mr. President, at least for the time being until I can reflect on the distinguished minority leader's request, I object.

It is certainly my intention to afford him every courtesy that he is entitled to, not only in his very prominent role as minority leader, but as the very distinguished Senator from West Virgin-

ia. But I wish to take the opportunity to reflect at a little greater length on what it is he is proposing to me in terms of the disposition of his measure, and I wish it to be understood in asking for a bit more additional time to consider his unanimous-consent request that I do it not in any way to be understood as a personal affront to him but simply so I might have ample time as an individual Senator to reflect and make sure that I fully understood where that leaves me procedurally.

So I wish for it to be understood that my hesitation in agreeing at this point must not be understood as some way or other a slight upon the distinguished minority leader. I am simply asking his indulgence as a fellow Senator to allow me to make sure in my own thinking and in my own analysis, if I were to agree to that, that I am not jeopardizing the position that I am currently in; namely, one, retaining the floor and, two, that I do not thereby lessen the posture I am in as regards the consideration of the gas tax.

So it is in that spirit solely that I wish an opportunity to reflect upon his request.

Mr. McCLURE.. Will the Senator from North Carolina yield without losing his right to the floor under the previous stated conditions?

Mr. EAST. For a question.

Mr. McCLURE.. Would the Senator be satisfied to grant the request of the distinguished majority leader on behalf of the minority leader if he is convinced that following that action he is in precisely the same condition he is in now, no better, no worse, precisely the same.

Mr. ROBERT C. BYRD. And it would not be counted as a second speech.

Mr. McCLURE.. And let me say to the Senator from North Carolina it is my belief and I think it would be correct—we can propound a parliamentary inquiry to that effect—that if the unanimous-consent agreement that has been sought here with respect to the West Virginia bill is granted, that bill is considered, passed, and finished, he goes back to where he is and he will be in precisely the same situation that he is in now.

Reserving the right to object, I will be willing to do that because of my great affection and admiration to the minority leader. I would simply like it to be understood I am giving up a right, namely, to debate that measure that he is offering, but I give up that right because of my deep affection and admiration for him, and then coupled with that the full understanding that I have not jeopardized the position in any way, shape or form that I am in currently. I am doing it solely and strictly in the spirit of allowing the distinguished minority leader to dispose of a measure that means a great deal to him personally.

Mr. BAKER, Mr. President, will the Senator yield to me for the purpose of making that request, then, without losing his right to the floor and under the conditions previously stated?

Mr. EAST. Yes, I would be happy to hear that request.

Mr. BAKER. Very well.

Mr. President, I ask unanimous consent that the pending measure be temporarily laid aside and that the Senate proceed now to the consideration of Calendar Order 1007, H.R. 5161, the West Virginia National Forest bill, on which there will be a time agreement as follows:

Five minutes on an amendment to be offered by the distinguished Senator from West Virginia. I further ask unanimous consent that no amendments to that amendment will be in order.

I ask unanimous consent, Mr. President, that no point of order be in order against the amendment or against the measure.

I ask unanimous consent that there be 3 minutes of debate equally divided on the bill itself.

I ask unanimous consent that after the expiration of the time for the yielding of the time for debate on the amendment, the Senate proceed to vote on the amendment and that no motion, no point of order, no further debate will be in order; at the expiration of the time for debate on the bill or the yielding back of that time, Mr. President, I make the same condition on the bill itself, that is to say, no point of order, no further amendment and no further debate; the Senate will proceed then to debate on that measure.

At the conclusion of the considerationof this measure, I ask unanimous consent that the Senate then return, as it would anyway, to the consideration of the pending measure, the continuing resolution, and that the Senator from North Carolina be again recognized, the interruption not be considered as a second speech for the purpose of the rule and that nothing occurring in the interim shall be deemed to affect his right to the floor or his standing to continue with the debate on which he has engaged.

Mr. ROBERT C. BYRD. May I have one element?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. That there be no time for debate on the motion to reconsider.

Mr. BAKER. Yes, I include that.

Mr. EAST. Reserving the right to object, Mr. Leader, as I understand it, certainly it would be considered a part of this unanimous-consent agreement that any amendment that might be considered to the bill of the distinguished minority leader would not be the gas tax bill.

Mr. BAKER. Mr. President, it will not. I ask unanimous consent that no bill relating to highways, potholes, or—to the highway bill will be in order to the West Virginia wilderness bill.

Mr. LONG. Will the Senator yield? Reserving the right to object, can we agree that no amendment will be in order?

Mr. BAKER. I did that, except that one, and he wants to make sure the amendment of Senator BYRD is not the highway bill. It would tickle me to death if it were, but I know it is not.

The PRESIDING OFFICER (Mr. MURKOWSKI). Is there objection?

The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator.

[The following proceedings occurred after midnight:]

DESIGNATION OF CERTAIN MONONGAHELA NATIONAL FOREST LANDS

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5161) to designate certain lands in the Monongahela National Forest, West Virginia, as wilderness; and to designate management of certain lands for uses other than wilderness.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

There being no objection, the Senate proceeded to consider the bill (H.R. 5161), which had been reported from the Committee on Energy and Natural Resources with an amendment to strike out all after the enacting clause, and insert the following:

DESIGNATION OF WILDERNESS AREAS

SECTION 1. In furtherance of the purposes of the Wilderness Act, the following lands are hereby designated as wilderness, and therefore, as components of the National Wilderness Preservation System—

(1) certain lands in the Monogahela National Forest, West Virginia, which comprise approximately thirty-five thousand six hundred acres, as generally depicted on a map entitled "Cranberry Wilderness—Proposed", dated May 1982, and which shall be known as the Cranberry Wilderness: *Provided*, That for purposes of the Act of July 14, 1955 (69 Stat. 322) as amended, the Cranberry Wilderness may be reclassified only by Act of Congress enacted after the date of enactment of this Act;

(2) certain lands in the Monongahela National Forest, West Virginia, which comprise approximately six thousand one hundred acres, as generally depicted on a map entitled "Laurel Fork North Wilderness—Proposed", dated November 1981, and which shall be known as the Laurel Fork North Wilderness; and

(3) certain lands in the Monongahela National Forest, West Virginia, which comprise approximately six thousand one hundred acres, as generally depicted on a map enti-

tled "Laurel Fork South Wilderness—Proposed", dated November 1981, and which shall be known as the Laurel Fork South Wilderness.

MAPS AND DESCRIPTIONS

SEC. 2. As soon as practicable after the provisions of this Act take effect, the Secretary of Agriculture shall file maps and legal descriptions of each wilderness area designated by this Act with the Committee on Interior and Insular Affairs and the Committee on Agriculture of the House of Representatives and the Committees on Energy and Natural Resources and Agriculture, Nutrition, and Forestry of the United States Senate, and each such map and legal description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal descriptions and maps may be made. Each such map and legal description shall be on file and available for public inspection in the office of the Chief, United States Forest Service, Department of Agriculture.

ADMINISTRATION OF WILDERNESS

SEC. 3. Subject to valid existing rights, each wilderness area designated by this Act shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness: *Provided,* That any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of the relevant provision of this Act.

DISPOSITION OF VALID EXISTING RIGHTS

SEC. 4. (a) The Secretary of the Interior (hereinafter in this Act referred to as "the Secretary"), in consultation with the Secretary of Agriculture, shall acquire:

(1) all nonfederally owned coal deposits and other mineral interests and rights within the boundaries of the Cranberry Wilderness; and

(2) coal deposits and mineral interests and rights outside the boundaries of the Cranberry Wilderness which are—

(A) contiguous to the deposits, mineral interests, and rights referred to in paragraph (1) and owned by the person or entity which owns the deposits, interests, and rights referred to in paragraph (1); or

(B) economically accessible only through the exercise of rights held within the wilderness.

(b) For purposes of carrying out the acquisition required under subsection (a), not later than three months after the date of enactment of this Act, the Secretary shall initiate negotiations with the owner of the coal deposits or other mineral interests and rights within the Cranberry Wilderness.

(c)(1) The Secretary shall conduct such coal or mineral evaluations with respect to the coal or other mineral interests or rights within the Cranberry Wilderness as may be necessary to determine fair market value. The fair market value of any rights as may exist shall be determined without reference to any restriction on access or use which may result from designation of the area as a wilderness. In determining fair market value the Secretary may contract with the owner to perform any necessary exploratory drilling or other evaluation work and may compensate the owner therefor through payment of money or as an addition to the monetary credit under this Act. Where the Secretary conducts such evaluations, he shall provide the owner with all data available to the Secretary as a result of the evaluations.

(2) Within one year of the date of enactment of this Act, the Secretary, in consultation with the owner shall determine the present fair market value of coal deposits and mineral interests and rights.

(A) The determinations of fair market value shall be based on the replacement cost of the unmined recoverable coal deposits and mineral interests and rights in the ground, taking into account comparable sales recoverable minerals of comparable nature in the ground in the eastern United States, costs of compliance with all applicable Federal, State, and local laws and regulations, including reclamation and restoration of the land (including wetlands) and other costs normally incurred in the mining of such minerals.

(B) Upon voluntary surrender and relinquishment by the owner of all nonfederally owned coal deposits and other mineral interests and rights in the Cranberry Wilderness, the Secretary shall extend to the owner, its successors and assigns, a monetary credit to be used against that portion of payment, bonus payments, rental or royalty payments paid into the Treasury of the United States and retained by the Federal Government on any mineral, oil, or gas lease or other Federal property competitively won or otherwise held by the applicant, its successors, or assigns. The monetary credit may be transferred or sold at any time by the owner to any other party with all the rights of the owner to the credit, and after such transfer, the owner shall notify the Secretary. In lieu of the monetary credits described above, the Secretary may, at his sole option, purchase the mineral rights referred to above.

(C) Monetary credits authorized pursuant to this subsection shall be based on the fair market value of the owner's mineral interests as determined pursuant to subsection (c) of this section. Such credit shall be used over a period of years with not more than ten percent of the credit to be used in any one year.

(d) In the event the Secretary and the owner cannot agree on fair market value within one year of the date of enactment of this Act, either the Secretary or the owner shall have the right to petition the United States Claims Court for determination of fair market value in accordance with the standards set forth in this subsection, and said Court shall have jurisdiction to make said determination which shall be binding on all parties for purposes of this Act subject to the right of appeal.

(e) Effective October 1, 1983, there are hereby authorized to be appropriated such sums as may be necessary to establish the value of the nonfederally owned mineral interests or rights lying within the Cranberry Wilderness area. Effective October 1, 1983, there are hereby authorized to be appropriated such sums as are necessary to carry out the other provisions of this Act: *Provided,* That no payment shall be effective except to the extent or in such amounts as are provided in advance in Appropriation Acts.

(f) Exploration activities, including core drilling and use of mechanized ground equipment, shall be allowed in the Cranberry Wilderness designated by this Act to determine the value of the nonfederally owned mineral resources therein, under such reasonable stipulations and conditions as may be imposed by the Secretary of Agriculture.

OTHER PROVISIONS

SEC. 5. (a) The Congress finds that—

(1) the Department of Agriculture has completed the second Roadless Area Review and Evaluation program (RARE II); and

(2) the Congress has made its own review and examination of National Forest System roadless areas in the State of West Virginia and of the environmental impacts associated with alternative allocations of such areas.

(b) On the basis of such review, the Congress hereby determines and directs that—

(1) without passing on the question of the legal and factual sufficiency of the RARE II final environmental statement (dated January 1979) with respect to National Forest System lands in States other than West Virginia, such statement shall not be subject to judicial review with respect to National Forest System lands in the State of West Virginia;

(2) with respect to the National Forest System lands in the State of West Virginia which were reviewed by the Department of Agriculture in the second roadless area review and evaluation (RARE II), that review and evaluation shall be deemed for the purposes of the initial land management plans required for such lands by the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976 to be an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System and the Department of Agriculture shall not be required to review the wilderness option prior to the revision of the initial plans and in no case prior to the date established by law for completion of the initial planning cycle;

(3) areas in the State of West Virginia reviewed in such final environmental statement and not designated as wilderness by this Act need not be managed for the purpose of protecting their suitability for wilderness designation pending revision of the initial plans; and

(4) unless expressly authorized by Congress the Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of national forest system lands in the State of West Virginia for the purposes of determining their suitability for inclusion in the National Wilderness Preservation System.

UP AMENDMENT NO. 1565

Mr. ROBERT C. BYRD. Mr. President, on behalf of myself and my distinguished senior colleague (Mr. RANDOLPH), I send to the desk an amendment and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes an amendment numbered 1565:

Insert at the proper place in the bill the following:

Notwithstanding any other provision of law, there is hereby authorized to be appropriated from the Treasury to the Secretary of Agriculture after September 30, 1983, up to $2,200,000, to be paid to Pocahontas County and Webster County, West Virginia; such sum in compensation for property tax revenues and other taxes or payments foregone by the aforementioned counties as a consequence of the acquisition of the nonfederally owned coal deposits and other min-

eral interests and rights within the boundaries of the Cranberry Wilderness as authorized in section (4) and notwithstanding any other provision of law, there is hereby authorized to be appropriated from the Treasury such amounts as may be necessary for annual payments to be made to all units of local governments to compensate such units of local government for property tax revenues and other taxes or payments foregone as a result of the establishment of any Federal wilderness area.

Mr. ROBERT C. BYRD. Mr. President, I am pleased that the Senate is able to consider the West Virginia wilderness bill. This legislation designates three areas in West Virginia as Federal wilderness. The areas to be established as wilderness include the Cranberry region and the north and south forks of the Laurel River.

The Cranberry wilderness designated by this bill, comprising 35,600 acres, becomes the largest Federal wilderness east of the Mississippi River. Each of the Laurel fork wilderness areas contains 6,100 acres. The wilderness values of these lands are outstanding.

The Laurel forks are adjacent to well-known gasfields and have some potential for containing producible quantities of natural gas.

It is the Cranberry area, however, that has by far the greatest mineral resources underlying it. According to the Bureau of Mines and the U.S. Geological Survey, there are at least 18.5 million minable tons of premium-grade coking coal under the area—a low-volatility, low-ash, low-sulfur fuel that is one of the finest coals in the world.

The coal is found in seams averaging more than 70 centimeters in thickness. It is recoverable by underground mining methods. Even underground mining would involve disturbances in the fragile surface of the Cranberry area.

The two West Virginia counties in which the Cranberry area is located are in poor economic condition. The unemployment rate in Webster County, W. Va.—which contains the main access to the coal under the area—was an astronomical 24.2 percent in October of this year.

While the unemployment rate in Pocahontas County, W. Va., was 8.2 percent in October 1982, the county contains almost no significant industrial facilities and has a relatively small labor force. The increase in economic activity that would accompany development of the Cranberry's mineral resources is badly needed in both counties. Yet that development is not possible under the wilderness designation.

In addition to the creation of jobs, mineral development would increase the counties' tax base by a substantial amount. An active mining operation would pay taxes to the counties.

While the Federal Government owns the surface of the Cranberry area, the subsurface mineral rights are primarily held by private owners. These owners pay property taxes to the Pocahontas and Webster Counties governments on an annual basis. Designation of the Cranberry area as wilderness would have the effect of making the coal reserves extremely difficult, if not impossible, to mine The revenues currently going to the counties in the form of property taxes would soon cease.

For that reason, a consensus has formed in favor of just compensation for the people in the region immediately affected by the Cranberry Wilderness. I have stated that such compensation is one part of a fair solution to this complicated situation.

I will shortly introduce an amendment on behalf of myself and my able colleague, Mr. RANDOLPH to the bill that authorizes the Secretary of Agriculture to make a payment to Pocahontas and Webster Counties of up to $2.2 million. This payment would be in compensation for property tax revenues lost, and other taxes or payments forgone by the counties as a result of the wilderness designation and the acquisition of non-federally owned mineral deposits within the Cranberry area.

The compensation formula is based on an assessment of the economically minable coal reserves, at a rate of 10 cents per ton; a conservative estimate of one-half of the average lease rate for oil and gas properties in the area, at $3 per acre; and a calculation of property taxes forgone.

Property taxes in West Virginia are expected to increase in the next few years as a result of a new, statewide property assessment. The West Virginia Legislature may also be involved with property tax assessments, Under the terms of one question on the general election ballot last November, the taxes on the privately owned mineral reserves under part of the Cranberry could increase from $27,000 per year to more than $162,000 per year. Given this large potential increase in assessments, I believe that just compensation could best be accomplished this year by the Congress.

I want to recognize the efforts of two West Virginians in particular for their contributions to this legislation. Mr. Larry George, wilderness chairman of the West Virginia Highlands Conservancy, and Mr. Walter Helmick, president of the Pocahontas County Commission, have provided valuable counsel in connection with this matter.

I extend my thanks to Senator BAKER for his assistance and cooperation on this bill. I thank the distinguished chairman and ranking member of the Energy and Natural Resources Committee, Senators MCCLURE and JACKSON, for their help. I commend the chairman of the Subcommittee on Public Lands and Reserved Water, Senator WALLOP, for his efforts on this legislation. I especially thank Senator FORD for his assistance in the committee.

I urge the adoption of my amendment and passage of the bill.

Mr. President, may I say that this matter has been thoroughly discussed on both sides of the aisle. It is cleared and has been the subject of discussion for several days. The distinguished Senator from Idaho (Mr. MCCLURE) may proceed.

I yield back the remainder of my time.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, the Senator from West Virginia is correct. This matter has been heard by the Energy Committee. It has been fully discussed and reported by that committee.

The amendment which the minority leader has now offered has been discussed on this side of the aisle. We have no objection to the adoption of the amendment. We urge the adoption of the bill as amended.

Mr. RANDOLPH addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I yield 1 minute of my time to Mr. RANDOLPH.

Mr. RANDOLPH. I thank my able minority leader. He has done a very splendid job in connection with this matter.

The PRESIDING OFFICER. Senators will please refrain from conversation.

The Senator from West Virginia.

Mr. RANDOLPH. Mr. President, it is a privilege to join my able colleague from West Virginia (Mr. ROBERT C. BYRD) in support of H.R. 5161, a bill to designate certain lands in the Monongahela National Forest in West Virginia, as wilderness. This legislation provides for the inclusion of three U.S. Forest Service RARE II study areas in our State in the National Wilderness Preservation System. The bill would protect 35,600 acres of the Cranberry Backcountry located in Pocahontas and Webster Counties, W. Va., plus 12,200 acres along the Laurel Fork River in Randolph County, W. Va. These beautiful mountain areas have been recommended for wilderness designation by the U.S. Department of Agriculture and encompass the finest of West Virginia's natural lands. They include the most pristine and unique wild territory remaining in the Appalachian Mountains.

The Cranberry Backcountry has long been a valuable and highly utilized recreation area. It has been closed to motorized access since 1936, resulting in the preservation of its wil-

derness character. The Williams and Cranberry Rivers in the Cranberry area are nationally acclaimed as trout streams and over 170,000 man-days of trout fishing were spent there last year. Hunters, anglers, and hikers from throughout the eastern United States are attracted to the area. The Cranberry is synonymous with natural beauty.

Development of the area is incompatible with the recreational and esthetic values. This has been made obvious by public reaction to clear-cutting activities by the Forest Service, a legislative moratorium on the issuance of mining permits in the study area—which moratorium has expired—and the decision by the administration to prohibit all coal mining activity in the Cranberry Backcountry.

The greatest threat to the Cranberry wilderness lies in the 32,500 acres of privately owned coal underlying the area. The mining of this coal would prohibit wilderness designation. H.R. 5161 resolves the controversy surrounding the Cranberry Backcountry. It provides that upon voluntary surrender and relinquishment by the owner of all nonfederally owned coal deposits and other mineral interests and rights in the Cranberry Wilderness, the Secretary of the Interior shall extend to the owner, its successor and assigns, a monetary credit. This credit is to be used against that portion of payment, bonus payments, rental or royalty payments paid into the Treasury of the United States and retained by the Federal Government on any mineral, oil, or gas lease or other Federal property competitively won or otherwise held by the applicant, its successors, or assigns.

In making decisions relating to the use of resources, there is almost always a price to pay for known benefits. In terms of coal reserves, approximately two-tenths of 1 percent of West Virginia's similar coal reserves would be forfeited. We would also forfeit the opportunity to harvest less than 1 percent of our annual timber production.

There is very strong and persuasive support in West Virginia for H.R. 5161. But, we are also concerned about mineral rights compensation issues and taxes foregone by the local governments if mineral development of the area is prohibited through wilderness designation.

Our major concern with H.R. 5161, as passed by the House on June 14, 1982, and ordered favorably reported, with amendments, by the Committee on Energy and Natural Resources on December 7, 1982, is that it does not authorize compensation to Pocahontas and Webster Counties for tax revenue which would be foregone as a result of Federal acquisition of the privately owned mineral rights in the area. The amendment which I am cosponsoring with Senator ROBERT C. BYRD authorizes the Secretary of Agriculture to make a payment of up to $2,200,000 to the counties for this purpose. This compensation figure is based on a proposal developed by county officials, utilizing a Federal analysis of the minable coal reserves and their value, and the value of oil and gas reserves.

In order to insure that Pocahontas and Webster Counties, W. Va., are not unfairly disadvantaged by wilderness designation of the Cranberry area, I hope this amendment will be adopted by the Senate.

We in West Virginia have been blessed by nature with vast mineral and forest resources. Almost all of these resources are available for development. We are asking here, today, that a very small portion of these assets be set aside and maintained in their natural state. The Cranberry is an important recreational asset and will provide other important values such as watershed protection, providing for genetic diversity and wildlife habitat if it remains a wilderness. The Cranberry provides habitat for species dependent on large undeveloped areas—black bear and wild turkey, for example—in addition to many other species. Its rivers provide large quantities of clear water. It would serve as an undisturbed area against which the results of management could be measured.

Mr. President, I urge the passage of H.R. 5161 with a compensation amendment and express my further appreciation to my able colleague (Mr. Robert C. BYRD) for his successful effort in bringing this measure to the Senate.

I commend the chairman and members of the Committee on Energy and Natural Resources for their cooperation and diligent attention to this vital bill.

I especially thank Senators MCCLURE and JACKSON, the chairman and ranking minority member of the committee, and Senator WALLOP, the chairman of the committee's Public Lands and Reserved Water Subcommittee.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia.

Mr. ROBERT C. BYRD. I yield back my time on the amendment and on the bill.

The amendment (UP No. 1565) was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MCCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be offered, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the committee amendment, as amended, was agreed to.

Mr. MCCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, has the bill passed?

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 5161) was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. RANDOLPH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader. I thank the distinguished Senator from Idaho (Mr. MCCLURE), and I thank Mr. EAST, who comes from a State whose motto is: Esse quam videri.

I happen to know the motto because I was born there.

ORDER OF BUSINESS

(During the consideration of the foregoing bill, the following proceedings occurred:)

Mr. MCCLURE. Mr. President, will the Senator yield just one moment further?

Mr. ROBERT C. BYRD. I yield.

Mr. MCCLURE. addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

APPOINTMENT OF CONFEREES AND ANNOUNCEMENT OF CONFERENCE AT 10 A.M. TOMORROW ON CONTINUING APPROPRIATIONS

Mr. MCCLURE. Mr. President, the distinguished Senator from Oregon (Mr. HATFIELD), the chairman of the Appropriations Committee, has asked me to announce at this time and in this interval that the members of the Appropriations Committee who serve on the conference on the continuing resolution will meet at 10 o'clock tomorrow morning in S. 207.

Mr. STENNIS. Mr. President, will the Senator yield to me?

Mr. BAKER. Will the Senator yield to me for just a second?

Mr. ROBERT C. BYRD. Yes; I yield.

Mr. BAKER. Mr. President, for the benefit of all Senators, but in particular a request of our most distinguished colleague, the senior Senator from Mississippi, let me say again that I see no need for Senators to remain here, and I urge them to go home, if they care to do that, and I will be here, as will a few others, to attend to the business of the Senate as long as that is required.

Mr. DIXON. What time do we come back?

Mr. BAKER. Mr. President, the order now is for 6 o'clock tomorrow night. I will make an effort to change that, and I put Senators on notice that we may convene at 2 o'clock tomorrow; that I expect to do that. So they should be on notice that the convening hour will be 2 o'clock tomorrow even though I do not yet have that order.

Mr. STENNIS. Have the conferees been announced?

Mr. BAKER. Mr. President, I ask the distinguished Senator from Oregon if he will name now the people that he will nominate to be conferees.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. The following will be nominated at the appropriate time: Mr. STEVENS, Mr. WEICKER, Mr. MCCLURE, Mr. GARN, Mr. SCHMITT, Mr. COCHRAN, Mr. ANDREWS, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. MATTINGLY, Mr. RUDMAN, Mr. SPECTER, Mr. PROXMIRE, Mr. STENNIS, Mr. INOUYE, Mr. HOLLINGS, Mr. EAGLETON, Mr. CHILES, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. BURDICK, Mr. LEAHY, Mr. SASSER, Mr. DECONCINI, Mr. BUMPERS, and myself.

Mr. BAKER. And yourself. I thank the Senator for yielding.

FURTHER CONTINUING APPROPRIATIONS, 1983

The Senate resumed consideration of the joint resolution.

Mr. BAKER. Mr. President, I do not see the Senator from North Carolina has yet returned to the floor. Therefore, I am going to suggest the absence of a quorum, with the understanding that it will in no way interfere with the rerecognition of the Senator from North Carolina.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. As I understand, Mr. President, under the order previously entered, the Chair will recognize the Senator from North Carolina.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EAST. I thank the Chair.

Mr. President, I had hoped that at some point we could move matters in the direction we could all agree they ought to go and reach an agreement. But if I might, Mr. President, for purposes of the record, I would clarify that, lest there by any misunderstanding, I have no objection to an orderly disposal of the CR, the continuing resolution. Again, that was the purpose of the lameduck. It is not I, I would submit, but perhaps others who are holding the continuing resolution hostage to the gas tax. I resist the notion that it is I who is doing that.

One thing we have all agreed upon is how imperative it is to move the continuing resolution through this Chamber. Then we could return to the consideration of whatever other matters we wish to take up.

So no one is upset, including myself, with the fact that we ought to try to resolve the continuing resolution.

Again, I have reiterated repeatedly, Mr. President, that my concern is precisely that, that we have cluttered up the agenda to such an extent and such a point we could not in an orderly way dispose of the continuing resolution.

Again I repeat, that was the purpose of the lameduck. Even more importantly, we had hoped that the appropriations bills would have been disposed of. That is what we ultimately ought to be doing. They are even more important than the continuing resolution.

The continuing resolution is simply an acknowledgment, a confession, that we could not so order our affairs in a sufficient way as an institution, not reflecting upon any individual or any leadership, to dispose of the appropriations bills. This is a chronic problem the Senate faces.

So the continuing resolution is really a 4-second load. That is why it was proposed initially by the distinguished chairman of the Appropriations Committee that that ought to be our focus during the lameduck.

When I was down in North Carolina over the recess, I heard repeatedly on the news there would be a very limited agenda during lameduck. Most Senators did not want a lameduck. And, having decided there would be one, it was agreed that the agenda would be a very limited one; to wit, and again I repeat, appropriations bills and the continuing resolution.

We did get some of the appropriations bills through, and that was a plus. We can get the continuing resolution through and that is a plus. We can declare victory. That is what we came for. It was a short session, modest, prior to Christmas. We have a new Congress coming in 26 new Members of the House and several new Members here in the Senate. Let them grapple with the new agenda, whether it is S. 995 or Radio Marti, perhaps, or gas taxes, ad infinitum. We agreed that we had done about all we could do; hence the lameduck should not be looked upon as a great avenue and window of potential in terms of a large, extensive agenda. Again, I think that has been my purpose this evening in taking this time and indulging the patience of my colleagues, trying to put this all in perspective, first in terms of the question of schedule and why we are here and the purpose of the lameduck; then second, to question the wisdom of this gas tax.

I think every Senator will acknowledge that in the closing period of any session, there is this mad rush to get certain things through. That is probably where we do our poorest job in terms of reflection and deliberation and consideration. I fear that is happening with this every important piece of legislation. I would like to clarify that.

It is not in opposition to an ultimately orderly disposition of this issue or any other. I am just concerned about the time and the place and the hour, whether we do not do a discredit to ourselves and potentially to the American people by moving this through in a hurried, late-hour form. It may come to pass that we will. I appreciate that, ultimately, this body will work its will, and it should. It should ultimately work its will. All I am doing is availing myself of the currently existing rules to make sure that on this particular measure, which is going to have a great impact upon the American economy and upon the American taxpayer, what we are doing is wise and deliberated and well considered. I do not think it is. I do not think it is to the country as a whole.

I was sent here by the good people of North Carolina to do the best I could to represent their best interests. I do not think it is in their best interests to do this. All I have done is avail myself of the rules of the Senate established long before I came here and that will still be here long after I leave to make the point.

If ultimately, I have made that point and the U.S. Congress in its infinite wisdom determines that, no, we shall have a gas tax—it shall be imposed upon the American people, it does make sense; yes, even in a time of recession, yes, even though regressive, yes, even though violative of the normal use of user fees, yes, even though it is not a jobs creation bill but basically a jobs transfer bill, yes, we shall proceed in spite of that, we shall proceed in spite of the fact that certain of our States suffer poorly, such

as North Carolina; yes, even in spite of that, we shall continue—then so be it.

As I reflect back, Mr. President, upon the mandate of 1980, the year I was elected, I tell you, I campaigned on the notion that the best way to help the private and public sectors in this country would be to revitalize the private sector.

Mr. President, I would like to request order in the Chamber so that I may proceed with my analysis of this matter.

The PRESIDING OFFICER. The Senate will come to order.

Mr. EAST. As I was saying, Mr. President, I might note the distinguished Presiding Officer at this time, the distinguished junior Senator from Alaska (Mr. MURKOWSKI), was elected at the same time I was. I do not mean to tell him or any other of my distinguished freshman colleagues what the mandate was when we got here. As I understand it in North Carolina, it was not to increase taxes; it was to hold the line and ultimately try to reduce them. It was to gain control of Federal spending, which was spinning out of control; it was to restore the defense credibility of this country and try to restore a sense of resolve and purpose in American foreign policy, which many people felt was absent. That is the mandate I was elected to.

The citizens of North Carolina did not send me up here to sit idly by and watch the growth of Federal spending continue, the rate of growth, then to try to cope with the anemic economy that that growth represents by increasing taxes.

So I keep coming back to the point I was making earlier in the evening, and I suspect many Senators here share this: How did we get to the point where, here we are, a week before Christmas at 12:30 in the morning, after the elections of 1980, debating whether we ought not to increase taxes on the American people? If somebody had told me on the night of November 5, 1980, when I had won the election in North Carolina, that I would be up here acquiescing in greater taxes upon my citizenry, such as the gas tax and others, that that is what I would be doing in less than 2 years or in approximately 2 years, I would have said, "Oh, no, I won't, because that isn't the mandate. The mandate was clearly to go another way."

I fear we are not doing that. So I would add that perspective to what I think the American people are asking us to do.

As I have heard this debate on the gas tax over recent days and weeks, I have been told that there is a great deal of enthusiasm for it in this country. That certainly is contrary to the mail I have been getting on it. I would like to submit that if you went out and checked with people in the country as a whole, that make it work, that drive the cars, that have to commute, run the farms, drive the trucks, run the motels—all the myriad jobs that Americans have that are so dependent upon the automobile and gasoline—if you had told them, asked them what they thought about increasing the tax on gasoline by 5 cents a gallon, I do not think they would think it was a good idea. I think the idea sprang full blown within the confines of Washington, D.C., and perhaps, once again, we have fallen victim to the most fatal malady in this business of American politics.

Mr. STEVENS addressed the Chair.

Mr. EAST. I am speaking and have the floor, Mr. President. And I was continuing my line of reasoning here that I felt that the mandate upon which I was elected, and many others here, was not this one, and I was adding I do not think the American people have changed today. I may be out of touch. If so, I will find out in due course.

But the people of the State of North Carolina sent me here to do the very best job I could in representing them. And if I honestly felt that I could serve them by sitting here this evening and remaining silent on this issue, I would have done so. But I did not and I have taken my stand under the rules of this Senate and I deeply regret whatever inconvenience I have caused my colleagues.

But it occurs to me the problem was not candidly mine but the fact that the lameduck was some way or other converted into a forum for the consideration of a whole range of proposals, a whole laundry list of measures that we, alternately, bogged ourselves down in. Then, as time moved on, we finally decided we would get to the CR.

But the gas tax measure, as all of a number of measures we have taken up, was given a fair shake. They tried to invoke cloture on these other measures and when that failed they were pulled down. And I think I have been true to my word—some may think I have not—when I indicated that I did not intend to unduly obstruct the consideration of any measure and certainly above all of this. And I did not have a high profile on it. I was not active on it. I had indicated, in the most gentle and civil and reserved ways several days ago in a 13-minute brief presentation, my unhappiness of the gas tax. So I honored that request, that desire to see things move through as orderly as they could.

And there were other measures I was deeply interested in too—Radio Marti, other matters. A lot of people wanted to resolve S. 995, the contributions bill, very important to a lot of businesses. That could not survive the vote to invoke cloture, so it was pulled down.

So we had a very orderly procedure here to some point whereby those measures that were extraneous to appropriations and the continuing resolution were given their fair shot. Could they survivie a cloture vote? If they could not, they were pulled down and we moved on to the primary business why we came here. And the sole one that has been singled out for special treatment was this one. And it was at that point that I felt my obligation not to, if you will, delay or obstruct and end it. But now we were into an area of preferred treatment, special treatment—no matter what, it would go through. No, not 995; no, not Radio Marti; no, not this issue; no, not that issue; but this one. This one had to go through. I do not know why the preferred treatment there. Fair shake, fair shot, yes; but fair treatment? It is at that line I felt personally relieved from the obligation to allow it to be brought up again for consideration by this body.

So, procedurally, I do not think we had any real due process, we did not have any equal treatment under our rules. If it were a minor matter, I would have acquiesced. But I considered it a major matter—tax policies, very important, very fundamental, very profound impact.

When there had been the failure to impose cloture, there was an indication that a strong minority of Senators felt this was not a good idea. I think that should have been accepted. And it was to that point that I had not made an undue effort to challenge that. But it has been, subsequent to that, this effort to keep bringing it back as though it was imperative, absolutely imperative, that this measure be passed—even more imperative than the continuing resolution, again which was the purpose of the lameduck session to begin with.

So I may have my critics who feel that some way or other this is dilatory or obstructionist, but I do not think it is. It is consistent with the rules of this great body. It is consistent with the whole purpose of the lameduck. And, again, I come back to my fundamental concern that substantively it is not wise for the American economy and the American people at this time.

And I fear a point that has not been made, Mr. President, that if this measure goes through—and many people look upon it as a jobs bill. I submit it is not. Jobs transfer, maybe, at best—it is going to send a very bad signal to the private sector in this country that we are moving back into the old posture of bigger taxes, bigger spending, more will come later, meaning then in other areas the potential for greater deficits, greater interest rates, and we will have come full circle.

Is this a good signal to send, in other words, that the Congress now feels

that it cannot control Federal spending and cannot control the rate of growth, it cannot control the entitlement programs, it cannot in any way, shape, or form affect the decisions of the Federal Reserve System as regards interest rates? So we are simply back to the old scheme of taxing and, yes, spending, and, yes, deficits ultimately, and, yes, high interest rates, and we will have come full circle. That is, Mr. President, my point about the perspective and the mandate of 1980.

I remember, when President Reagan was sworn in, we had an inflation rate of 12.4 percent; crime rate, 21.5. All of that a product of what? Yes, uncontrolled growth and Federal spending, too much philosophy of the past, of tax and tax and spend and spend. And now we were moving into a new era of American politics and tax policy, not repudiating the past 40 years and the good things that were done then, not repudiating the New Deal period when the distinguished Senator from West Virginia first came here, not repudiating all of the contributions of the Great Society.

No one is asking that we return to the past. That is reckless. What we were trying to do is to correct, to retrench, gain control of the rate of growth, get these things under control, consolidate, prune. That is what we are trying to do. We are a responsible posture.

I think inherent in that meant again get control of the rate of growth of Federal spending, restore the integrity of the social security program, try to make sure that the food stamp program as vital as it was needed and was not abused, and we tried to work on that with limited success, and so it went.

That was the mandate, getting the rate of growth of Federal spending under control. I do not know of anyone who really has questioned that on either side of the aisle. That was our purpose in coming, to get control.

It was not to tax. In fact last year we reduced the tax rates. Everyone thought that was a good thing. It would put more money into the hands of the consumers, more money into the hands of the working people of this country. Those at the lower end of the economic scale would have more to spend as consumers. Those at the higher end of the economic scale would be able to save more and accumulate more to invest in capital formation and growth and development. That would be a healthy thing.

And we did that on both sides of the aisle with great glee last year.

But now I have the uneasy feeling that we are slipping back into the old ways of when in doubt tax, spend, a new program, not to get control of Federal spending.

I think we have allowed the Federal Reserve Board, with all due respect to Mr. Volcker and others, to drive interest rates to incredible heights, that plunged us into this recession and made it infinitely deeper than it needed to be. And this recession started in the areas of construction, automobiles, had a ripple effect through the whole economy into a very deep recession.

So we are trying to get out from this recession, and I submit that the prognosis and the prescription is the same: weak economy. How do you get out from it? You grow, control the growth of spending and get interest rates down, get interest rates down by controlling the growth of Federal spending, getting the Federal Reserve System to have a more realistic interest rate policy, which it has very belatedly.

That was the goal. That was the need. That was the responsibility. That was the mandate.

Those things seemed to have drifted away a bit. We have not as well as we should have controlled the growth of Federal spending.

The Federal Reserve has continued along the path of unrealistic high interest rates and so the economy is anemic. So we say, "Oh, we have to do something." It is the old story, do something, anything. So what do we do? What do you think about a gas tax on the American people? Oh, that is a good idea. We will take that money and build bridges, roads, and highways and repair them.

Well, I would simply say to my distinguished colleagues I did not feel in 1980 after the election that is what I was sent here for. I have tried to this point to be as fair, as responsible as I can to listen to the arguments, and I find I just came to the point after having let this thing try to survive, be beat down with a cloture vote, acquiesced in that, did not put up much fight then, but we had finally reached a point where it was getting this special treatment under our rules.

All of a sudden it seemed to be almost an article of faith here. We had to have a gas tax. It gets back to where I had started this whole debate. It is easy to happen to people. You lose perspective. And often in life we think to ourselves maybe individually or collectively as a part of an organization or entity how did we get here? What in the world are we doing here at this point in time and this place debating this particular measure?

I do not know. I am deeply troubled with it, deeply frustrated.

I finally thought to myself, well, the good citizens of my State would probably say, "Well, John, if that is the way you feel why don't you speak up and say something about it and not only do you represent the people of North Carolina, but you are a U.S. Senator. You might even be expressing to some degree aspirations of the country as a whole and concerns."

I finally decided in my own conscience I had been patient, I had acquiesced. I allowed the effort to be made to push this through. It had been given a fair chance as all the other things had but yet it kept springing up with new life. It would not die.

I do not think any particular proposal deserves to be pushed just ad nauseum and ad infinitum until finally you break the spirit of people and they simply accept it.

Now we may eventually as a body, as an entity be moving that way. But I suppose I shall have the consolation that one day as an epithet on my stone it will say, "East opposed the gas tax of 1982" and that there would not be any way that anyone could misunderstand that. And I do it just not to oppose this tax, per se, but for what I fear is a new trend, a new desire to move back into the old patterns of taxing and spending, rather than to the fundamentals, the basics, the first principles of getting control of the growth of Federal spending, trying to lessen taxes not increase them, thereby helping to contribute to an atmosphere that will see the downward spiral of interest rates which everyone agrees would be the single greatest recharger of the economy of the United States and of North Carolina.

That was the purpose for which I was sent here and I suspect I like to think or hope that certainly the good freshmen class of 1980.

So, Mr. President, we find ourselves here in the wee hours of the morning taking up a matter that might appear on first blush to be rather inconsequential, insignificant,

Yet I think it has far-reaching implications in terms of the well-being of this country and the economic well-being of this country.

I do hope, Mr. President, that as our colleagues go home this morning and reflect on this matter that they will return and decide whether or not they genuinely want to proceed to this matter and genuinely want to pass it into law as their final Christmas present I guess to the American people.

That, Mr. President, is about where we are, and I again feel that I should express my regret, indeed perhaps even apologize to my colleagues and to the staff and to others, for having injected this, I suppose, relatively unhappy note into the yuletide season. But we could all be home enjoying the yuletide season with our families and loved ones, where most Americans should be at this time of year, if we had not laden the lameduck with all this excess baggage, even having done that, giving them their due as far as they can survive cloture, and when we

could not we pulled them down, and we moved on except this one.

I was willing to accord it equal treatment under the law, and I did, and I honored that. But I will confess for those who may feel I have been duplicitous in some way or other that I felt when it was elevated to a preferred status that under all events, under all circumstances, that no stone would be unturned procedurally and otherwise to see that this measure passed and at that point I felt my obligation not to unduly object, I was relieved of that obligation. I no longer felt honorbound to it, and I felt then a very strong feeling of a deep personal and institutional responsbility, yes, I will confess, obviously to move into a rather high profile position, and to question whether the lameduck had not finally gone awry pretty badly and whether we were not about on the threshold of just out of sheer fatigue pressing upon the American people an incredibly important measure, namely increasing their gas tax.

As I have said repeatedly this evening in terms of this motivation, it is not necessarily just the tax itself—it is another tax, we are always putting taxes on things, and if we could we should not be doing it, but we always are, and it seemed to me to be symptomatic, symbolic, in fact, that we were now moving back into the old ways, the old ways that precisely brought us to a weakening economy with over 10-percent unemployment.

The way you are going to get that unemployment figure down is to get interest rates down, to get deficits down; to get more money back into the hands of the American consumer; to encourage and reward creativity, productivity, capital formation, investment, and growth; to get control of the rate of Federal spending, those are the the things that will revitalize the American economy. Those are the things that will put people back to work in construction, where we are already getting some positive signs there; put people back to buying automobiles, and we are getting some positive signs there. They led us into the recession, they can lead us out.

What we need to do is to focus our attention upon controlling the rate of Federal spending, helping in that way to get interest rates down and encouraging the Federal Reserve System to have a responsible interest rate policy.

I repeatedly talked to individual Senators and I have felt uniformly—I have not talked to everyone—they agreed with that, yes, that was the need; yes, that is right, control the growth of Federal spending, get interest rates down, get more money back into the hands of the individual consumer, to encourage and reward creativity, productivity, capital formation, investment, and growth. That is the way you solve unemployment in a real way.

You create jobs all across the spectrum. You just do not transfer them, you just do not have a shell game. It is not just cosmetic.

Sure, sometimes the argument goes here that it will look good, it will show we are trying to do something, make the American people think we are not just sitting here doing nothing. Well, I submit in terms of the things that needed to be done to genuinely restore the health of the economy, we can be doing better, let me put it that way, and I think it is putting it charitably, but I, for the life of me, do not see that we ought to give the highest priority to increasing taxes on necessities, taxes of regressive nature in time of recession.

Mr. President, I certainly was not sent here to do that. I repeat again and again that I finally decided in my own mind, in my own conscience, having honored the obligation not to obstruct unduly the imposition of cloture, and I did not, that when that failed I had a new phase, and I had a strong, deep feeling inside of me that the time had now come to avail myself of the opportunity under the rules of that great body to plant a flag and to say, "Let us stop and let us think about what we are doing." That is the spirit in which I have done it, and I hope it will be understood in that spirit.

Several Senators have questioned my motivation this evening, and I deeply appreciated the acting majority leader coming to my defense. I have seen other distinguished colleagues, as I noted earlier this evening, in this Chamber take the floor on issues I did not like. They felt strongly about those things, and they stood their ground. Sometimes they won, and sometimes they lost, but they stood their ground.

So, Mr. President, again I hope I am not misunderstood in my motivation, in my purpose, in my desire, and I do not expect to do this often in my Senate career, but I feel that—I felt that—I had reached the point that now it was appropriate to do it.

Mr. President, I would like to raise a point of order that a quorum is not present and ask for a ruling of the Chair.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EAST. Mr. President, I asked for a ruling of the Chair. I did not ask for a quorum call. I asked for a ruling of the Chair on a point of order as to whether a quorum was present.

The PRESIDING OFFICER. Debate is not in order during a quorum call.

Mr. RUDMAN. Mr. President, as the acting majority leader, I seek recognition of the Chair.

Mr. EAST. Mr. President, there has been no answer on the quorum call, and I was raising a point of order, and I clearly stated a point of order.

The PRESIDING OFFICER. There does not have to be a response in a quorum call.

Mr. EAST addressed the Chair.

The PRESIDING OFFICER. This is not a vote and debate is not in order.

Mr. EAST. I was raising a point of order——

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. RUDMAN. Mr. President, as the acting majority leader——

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. EAST addressed the Chair.

Mr. RUDMAN. As the acting majority leader, I seek recognition and now ask for third reading.

Mr. EAST addressed the Chair.

The PRESIDING OFFICER. The only purpose for which a Senator can be recognized——

Mr. RUDMAN and Mr. EAST addressed the Chair.

Mr. RUDMAN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. The quorum call is suspended——

Mr. RUDMAN. Mr. President, I ask for third reading.

Mr. EAST. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will call the roll.

Mr. EAST. Mr. President, no one has answered the quorum call.

The PRESIDING OFFICER. No one is required to answer for a quorum call.

Mr. EAST. Mr. President, I raise a point of order.

The PRESIDING OFFICER. A quorum call begins——

Mr. EAST. When I raised the point of order, the clerk had not begun the rollcall.

Mr. DOLE. Regular order.

Mr. EAST. I think the Parliamentarian, when I raised the point of order, was not here, and I directed it to the Chair. I expressly stated it was a point of order.

The PRESIDING OFFICER. The Parliamentarian responded to the point of order.

Mr. EAST. I did not ask for a quorum call. I did not say I suggest the absence of a quorum call. I said I had a point of order.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk resumed the call of the roll.

Mr. EAST. I said I had a point of order, and I raised that point of order and I deserve a ruling from the Chair on that point.

The PRESIDING OFFICER. The Chair will refer to page 842 of the Senate procedure:

A quorum call begins when a Senator suggests the absence of a quorum and the Chair directs the clerk to call the roll.

Mr. EAST addressed the Chair.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk resumed the call of the roll.

Mr. EAST. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. A parliamentary inquiry is not in order during a quorum call.

Mr. EAST. I did not suggest the absence of a quorum. I said point of order.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

Mr. BAKER. Madam President, in the course of the last while—that is hardly adequate—we have conducted steps of consultations with the distinguished Senator from North Carolina, with a number of other Senators, searching for a way to serve his legitimate interest, the leadership interests and those who feel that we must move on with both the matters before us.

It would appear that we have a unanimous-consent agreement that accommodates that purpose and to which I believe there is no objection by those I have discussed it with.

I believe I am authorized to say that the substance of this has been conveyed to the distinguished minority leader whose representative is on the floor in the person of the acting minority leader.

I shall state the request now, Madam President, for consideration of the Senate.

UNANIMOUS-CONSENT AGREEMENT

ORDER OF PROCEDURE

Mr. BAKER. Madam President, I ask unanimous consent that the continuing resolution House Joint Resolution 631 be advanced to third reading at this time.

I also ask unanimous consent that a vote occur on final passage of the continuing resolution at 2:15 p.m. on Sunday, December 19, and that paragraph 4 of rule XII be waived, and that there be no time for debate on the motion to reconsider and that following the disposition of House Joint Resolution 631 no action occur on H.R. 6211 until the hour of 5:45 p.m.

I ask unanimous consent that when the Senate convenes later today that it convene at 2 p.m.

I ask unanimous consent that at 6 p.m. today the Senate proceed to vote on the motion to invoke cloture on amendment No. 4998, which is the Baker substitute.

I also ask unanimous consent that at any time during the consideration of H.R. 6211, even if the Senate is operating under the provision of rule XXII, it be in order for the majority leader, after consulation with the minority leader, to lay before the Senate the continuing resolution conference report under a 4-hour overall time agreement which will include any amendments in disagreement.

I also ask unanimous consent that no amendment be in order to any amendment in disagreement if either the majority leader or the minority leader shall object thereto.

Madam President, that is the request.

The PRESIDING OFFICER. Is there objection?

Mr. EAST. Madam President, reserving the right to object, for the point of clarification, if I could have just a moment, I want to clarify something in my thinking.

Mr. BAKER. Madam President, while the Senator is conferring let me make one correction to the request. I believe I said no action would be available on H.R. 6211 until 5:45 p.m. It should be 6 p.m.

Mr. HELMS. Madam President, while Senator EAST is pondering this proposal, may I ask——

Mr. EAST. Excuse me. I am sorry. The Senator may proceed.

Mr. HELMS. May I ask the majority leader what happened to PIK in this?

Mr. BAKER. Yes, Madam President. May I say that the time between the passage of the continuing resolution, the vote on which will occur at 2:15, and the time when we have the vote on the cloture motion on further debate on the substitute on the gas tax bill that time of approximately 4 hours or a little less is available for other matters.

The two matters that I have in mind to ask the Senate to consider are the PIK measure and the nuclear waste bill assuming that both are available and can be reached.

I have not asked unanimous consent that the Senate turn to those items but we provided that time spot so that we could do that and it is my intention to try to dispose of those items in that timeframe tomorrow.

Mr. HELMS. Very well. I thank the majority leader.

Mr. BAKER. If I may add another, the Interior conference report I also intend to do during that period and that is the reason for the window of time between the two actions.

The PRESIDING OFFICER. Is there objection?

Mr. WALLOP. Madam President, reserving the right to object, and I will wait until the Senator from North Carolina has spoken.

Mr. EAST. Am I correct that the amendments in disagreement that might be considered to pertain, of course, only to the continuing resolution conference report; is that the understanding?

Mr. BAKER. Yes.

Mr. WALLOP. Madam President, I ask the majority leader if there is anything specifically sacrosanct about the hour of 2:15 p.m. for the vote? For what reason, if we are going to do other things in that intervening 4-hour period—is there any reason that we could not have the vote at, say, 3:15 p.m.? I have a son coming in on an airplane and there are a lot of other people doing it. I just want to know if there is something very specifically about 2:15 p.m.

Mr. BAKER. Madam President, I see the color draining from the face of our friend from Idaho who wants to take up the nuclear waste bill and deepened breath taken by my friend from North Carolina, the esteemed Senator. They want as much time as we can get them.

Mr. WALLOP. Why can they not do that?

Mr. GARN. Madam President, if the Senator will yield, this is one of those things we can all get into if we shift it to 3:15 p.m. That is when my daughter arrives. So I only make a point that everyone has a problem and I understand and I do not expect to get there to pick up my daughter either.

Mr. BAKER. Let me say I think honestly with a 3:15 p.m. plane to meet that the Senator is likely——

Mr. WALLOP. He has a 3:15 p.m. plane to meet; I have a 2 p.m. plane.

Mr. GARN. The Senator has a 2 p.m. plane.

I will try to get back in a hurry.

Mr. WALLOP. My guess is that the Senator from Utah will meet his daughter and make the vote. I will probably meet my son and miss the vote.

Mr. BAKER. Let me see, there is another vote at 2:15 p.m.

Mr. WALLOP. There is scarcely any way one can get here from Dulles Airport in 15 minutes, even given the protection the majority leader is able to provide.

Mr. BAKER. Neither this majority leader nor his wife was aware of it. She has the tickets.

Mr. WALLOP. I do not register an objection, only a thought.

Mr. BAKER. I thank the Senator.

Mr. HELMS. If I can help, my daughter is not to fly into Washington.

Mr. JEPSEN. Mr. President, will the Senator yield for a question?

Mr. BAKER. Yes.

Mr. JEPSEN. The vote at 2:15 p.m., is that the yea and nay vote? Have they been ordered?

Mr. BAKER. Let me see, the yeas and nays on the continuing resolution have been ordered, is that correct?

The PRESIDING OFFICER. Yes.

Mr. JEPSEN. Is that the final vote?

Mr. BAKER. Yes; that is final passage.

Mr. JEPSEN. Is there third reading?

Mr. BAKER. If this is granted that third reading will have been accomplished.

Mr. JEPSEN. One further question, then at 6 o'clock tonight there is another vote?

Mr. BAKER. Yes. The vote at 6 p.m. will be on cloture against further debate on the Baker substitute to the highway bill.

Mr. JEPSEN. Have the yeas and nays been ordered on that?

Mr. BAKER. The yeas and nays are automatic under the rules.

Mr. JEPSEN. Automatic?

Mr. BAKER. Right.

Mr. JEPSEN. Then are there any other votes scheduled under this arrangement? Is there any time certain arrangement under this arrangement?

Mr. BAKER. No; there are no arrangements for votes at times certain. However, I would say to the Senator that there is a possibility of votes both on PIK and on nuclear waste, and the window of time between these two actions and the possibility of votes postcloture after 6 p.m.; and also there is a time agreement included here for the disposition of the conference report and any amendments in disagreement that accompany it.

Mr. JEPSEN. Could the Senator give his best estimate or guess as to whether that conference report on the continuing resolution would then be voted on sometime on Sunday?

Mr. BAKER. Yes.

Mr. JEPSEN. Or today?

Mr. BAKER. Yes, Madam president, I do think that. I think we will get the conference report Sunday. I talked to the distinguished chairman of the Appropriations Committee about 15 minutes ago to get his best estimate on when the conferees might be able to transmit the documents to the House, and the House acts first. My guess is that it will be late afternoon or early evening before the House receives the conference documents, and somewhat later than that before the Senate does. But I fully expect we will be able to finish action on the conference report sometime later Sunday.

Mr. JEPSEN. Madam President, is it the intent of the majority leader then to continue with debate, with the intention of bringing it to a close and voting on the gas tax bill tomorrow?

Mr. BAKER. Madam President, I say to my friend from Iowa that I would very much like to do that, but I believe that matter has been discussed with the Senator from North Carolina, and I believe he indicates he would not be agreeable to that, and I understand that.

Mr. JEPSEN. I would advise the majority leader that this Senator will—and I advise my friend from North Carolina, respectfully—this Senator will do everything within his knowledge of the rules and any other person's knowledge of the rules that I can find to bring that to a vote tomorrow.

Mr. BAKER. May I say to my friend from Iowa, it is also my intention to dispose of the highway bill tomorrow, and I believe we can.

Mr. JEPSEN. I hope so. The Christmas week is here and families are here or on their way, and it would be good for everybody to get that done, and I appreciate what the majority leader has said.

Mr. BAKER. I thank the Senator.

The PRESIDING OFFICER. Hearing no objection to the unanimous-consent agreement of the majority leader, it is so ordered, and the clerk will now go to third reading of House Joint Resolution 631.

The question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time. The bill was read the third time.

(The following statements were delivered during the day and are printed at this point for continuity:)

A TRIBUTE TO TWO GREAT FORMER SENATORS

Mr. HEFLIN. Madam President, as the senior Senator from Alabama, I rise today to pay tribute to two great Alabamians and Americans. On December 29, 1982, former U.S. Senator Lister Hill will celebrate his 88th birthday. A little more than a week earlier, on December 20, former U.S. Senator John Sparkman will clebrate his 83rd birthday.

These two distinguished gentlemen have served their State and country well for a great part of this century. I would like to take just a few moments here to pay tribute to the contributions that each of these men made to our Nation, for the people of my State of Alabama do feel a sense of genuine pride to have been represented by each of these statesmen, in both the U.S. Senate and the House of Representatives.

SENATOR LISTER HILL

Lister Hill first came to Congress in 1923; he would remain until 1969. During his 46 years of distinguished and dedicated public service, he served Alabama for 15 years in the House of Representatives, and for the final 31 here in the Senate.

Senator Hill's record of accomplishments is awesome. He was the master architect of numerous landmark pieces of legislation, in fact, over 60 pieces of legislation dealing with the areas of health and education alone became law under his direct authorship.

In a listing of Senator Hill's legislative accomplishments, the landmarks are numerous, and well known. At the top of the list must be his important work in the fields of health and medical research. It would be difficult to find anyone, at any point in our history, who has done as much for the health of his fellow men as has Lister Hill.

Senator Hill did not come by his interest in health legislation by accident. His father, the late Dr. L. L. Hill of Montgomery, gave his son the name of the famed British surgeon Joseph Lister. A brilliant surgeon, Dr. Hill performed the first successful suture of the human heart in America.

Of the many outstanding health programs which bear Senator Hill's name, perhaps the one to which the most importance is attached is the Hospital and Health Center Construction Act, popularly known as the Hill-Burton Act. More than 10,000 general hospitals, mental health hospitals, tuberculosis sanitoriums, crippled children's clinics, and other medical facilities have been built under this program.

The Hill-Burton Act is, of course, not the only health related program that Senator Hill has initiated. Another particularly crucial one was the act establishing the National Library of Medicine, which has since become the greatest and most valuable medical library in the world. For his contributions to the National Institutes of Health, with which we are all familiar, there now stands a fitting monument—the Lister Hill National Center for Biomedical Communications, located in Bethesda, Md.

SENATOR JOHN SPARKMAN

I am particularly honored to say a few words today about former Senator John Sparkman, for it is his seat here in the Senate that I now hold. My wife and I have been privileged to have a close personal relationship with the Sparkmans over the years. In fact, John Sparkman served as campaign manager for my wife's grandfather, the Honorable Archie H. Carmichael, when he was elected to Congress; Senator Sparkman later succeeded him as a Member of Congress.

My distinguished predecessor first came to Washington from Alabama in 1937. He served in the House of Representatives until 1946, and then moved over to this Chamber, where he remained until his retirement in 1979.

Senator Sparkman's leadership became apparent early in his life, as a student at the University of Alabama. There he served as both president of the student body, and as editor of the school's newspaper. This was, however, by no means the last evidence of his outstanding leadership capabilities.

Indeed, Senator Sparkman was so well respected, and had such confidence entrusted in him by the people of Alabama that, in 1946, he achieved

a feat perhaps unprecedented in American history. In that year, simultaneously, and I mean on the same day and on the very same ballot, he was elected to both the U.S. Senate and the House of Representatives.

It was also a testimonial to his widely respected abilities that he was chosen, in 1952, to serve the Democratic Party, and Presidential nominee Adlai Stevenson, as the party's nominee for the office of Vice President.

If Senator Lister Hill is most well-known for his statesmanship in the field of health, then Senator Sparkman's field of expertise was housing.

For several years, he served as chairman of the Senate Committee on Banking, Housing and Urban Affairs. During his terms as chairman, Senator Sparkman certainly distinguished himself as one of America's leading experts on housing and financial matters.

Just as the countless hospitals across our Nation are a tribute to Senator Hill, so are the thousands upon thousands of homes built under Federal rural housing programs, built largely because of John Sparkman's leadership, dedication, and commitment, a fitting and proper tribute to Senator Sparkman.

Madam President, I do not, for even one brief moment, want it to seem that these two renowned statesmen were each one-issue legislators, so to speak. Their leadership and legislative skills reached far beyond such parameters.

Working together, the two Senators garnered many diverse accomplishments. A good example is their outstanding work in water resource development. During their times in Washington, the Tennessee Valley Authority, of which we all know the massive benefits, was created and developed. Additionally, such projects as the Coosa-Alabama Waterway, the Tennessee-Tombigbee Waterway, the Chattahoochee River system, the Warrior-Tombigbee River system, and the Port of Mobile were brought to varying levels of fruition.

Alabama is indeed a very lucky State, and the people of Alabama truly fortunate, to have two such fine public servants as Senator Lister Hill and Senator John Sparkman. Their leadership and expertise led to a great many benefits for their constituents back in Alabama.

I feel privileged to have had the opportunity to know these two statesmen. I must admit, however, that their accomplishments have certainly made my task of living up to being a Senator from Alabama a very difficult one.

I congratulate both Senator Hill and Senator Sparkman on the occasion of their birthdays. Along with all other Alabamians, I hope they celebrate many, many more.

Thank you, Madam President.

U.S. TROOPS IN BEIRUT

Mr. PERCY. Madam President, a force of 1,200 U.S. marines has been stationed in Beirut, Lebanon for nearly 3 months as part of a multinational effort to restore stability in the wake of the tragic events of September. To be precise, November 28 marked the 60th day of this operation by U.S. Armed Forces equipped for combat. Under the war powers resolution of 1973, 60 days marks the limit of the President's authority to maintain U.S. Armed Forces in a foreign country if they have been introduced into actual hostilities or, as the resolution says, "where imminent involvement in hostilities is clearly indicated by the circumstances." Beyond this emergency period, the resolution provides that the President must have specific authorization from Congress to continue combat operations, except for a limited extension of time if needed to insure a safe disengagement.

The authority of Congress to insist on such a role is founded on several provisions of the Constitution, including its enumerated powers to declare war, to maintain and to make rules for the Armed Forces and to provide for "the common defense." The Founding Fathers clearly intended that decisions regarding the use of force should be made jointly by the President and Congress and gave the legislative branch the authority to establish such statutory mechanisms as might be "necessary and proper" to the execution of that joint responsibility. The war powers resolution was a conscientious and constructive effort to provide a procedural framework to accomplish this objective under the changed circumstances of modern diplomacy and warfare. But the resolution is not a magic solution to the practical difficulties of interbranch collaboration, nor is it a formula for resolving all questions of constitutional authority regarding the commitment of troops abroad. The circumstances of the current Beirut operation are only the latest case in point.

At the outset of the current operation in Beirut, the second of its kind in 2 months, I expressed my view that the risk of hostilities involving U.S. troops was serious enough to trigger the 60-day time limit of the war powers resolution. The ranking minority member of the Foreign Relations Committee, Senator CLAIBORNE PELL, joined me in advising the President to submit his report to Congress under section 4(a)(1) which includes the 60-day limitation. Our concern was, in part, to avoid a situation in which American marines were being killed in an operation which the Congress had no formal part in approving. Other Members of Congress expressed similar concerns about the serious risks of combat. I also expressed at the time my strong support for the operation itself, and emphasized the importance of our efforts to restore the authority and confidence of the central government in Lebanon.

In his report to Congress on September 29, President Reagan did not cite a particular section of the war powers resolution. He did make clear, however, that he did not consider the threshold of "imminent hostilities" as having been met. I think the President and his advisers made this determination carefully and in good faith, not simply to bypass the 60-day limit in the resolution. The situation required a difficult judgment call, a call with—as I openly acknowledged at the time—it was the President's initial responsibility to make.

Since that time, as the war powers resolution is structured, the ball has been in our court. Any Member of Congress who opposed the Beirut operation and believed that it was a situation of imminent hostilities, could take advantage of the resolution's procedure for ordering the withdrawal of U.S. forces—irrespective of the 60-day time frame—by concurrent resolution. No one has yet done so. Those Members, like myself, who support the present operation, waited to see whether our initial concerns about serious hostilities involving U.S. forces would be realized. If we had continued to believe that the operation could only be viewed as one of actual or imminent hostilities, our responsibility would have been to introduce a resolution extending the President's authority to keep the Marines in Beirut for an additional period of time. The war powers resolution provides an expedited procedure for the consideration of such a resolution and any Member of Congress can institute this process.

However, I concluded during the congressional recess, after following the situation in Lebanon carefully, that such an authorizing resolution was not called for. The President's original hope of avoiding involvement in hostilities has so far been realized. No doubt, the absence of serious hostilities involved a significant amount of good luck, but it is nevertheless a credit to the skill and restraint of all the parties involved.

Nevertheless, the absence of hostilities during the initial 60 days of the Beirut operation does not mean that Congress has no further responsibilities in the matter. If, at any time, our Marines do become engaged in hostilities, the war powers resolution provides a procedure for Congress to consider the situation and, if both the House and Senate conclude that there is inadequate justification for further U.S. involvement, to direct the withdrawal of U.S. forces by concurrent resolution. Therefore, Congress has a continuing responsibility to follow the developments in Lebanon very careful-

ly and to consult closely with the President and his advisers regarding our future policy toward that country. The Committee on Foreign Relations on December 1 held an informative and helpful hearing with Acting Secretary of State Kenneth Dam to maintain this process, and we were further briefed on the status of negotiations by Ambassador Habib last Friday.

The responsibilities of Congress are not limited, however, to situations of actual or clearly imminent hostilities. The long-term commitment of U.S. Armed Forces abroad is a matter for joint decision by the President and the Congress. In sending U.S. marines back into Lebanon along with contingents from France and Italy, the President was responding to an obvious emergency prompted by the murder of the Lebanese President and hundreds of Palestinian civilians. Since then, our troops have performed admirably in assisting the Lebanese Government and its Armed Forces to regain control in and around the capitol and reduce the dangers of further violence there. I can testify to this as I visited with many of them just a few months ago while in Beirut.

But this mission was clearly meant to be limited in both scope and time; in fact until recently, administration officials reportedly expressed the hope that U.S. forces would be withdrawn from Lebanon by the end of the year. That objective certainly can no longer be met, and without further progress on a broader agreement involving the withdrawal of foreign forces from Lebanon, the longer term need for the presence of U.S. Armed Forces is uncertain. It may be that as part of the withdrawal arrangement, U.S. troops will need to play a continuing role in a broader multinational peacekeeping arrangement. I think the Congresses will continue to support such a mission as part of an overall arrangement to restore prosperity and stability to that crucial part of the Middle East. It is difficult to see how a broader framework for peace in the Middle East can be accomplished without a more stable Lebanaon.

However, it is also my view that the President should not undertake such a longer term commitment of U.S. forces to Lebanon without clear congressional approval. The indefinite presence of U.S. combat forces in Lebanon would amount to a major security commitment to that country by the United States, whether or not there is a prospect of actual or imminent hostilities. The establishment of such commitments is not a matter addressed by the war powers resolution as such, but it has been a subject of continuing concerns by the Congress during the postwar era and was the subject of the national commitments resolution passed by the Senate a decade ago. That resolution stated the Senate's view that the establishment of a national commitment, including the use of U.S. Armed Forces in a foreign country, should only be made by means of a treaty involving Senate approval or joint action of the House and Senate. Thus far in the Lebanon operation, Congress has not participated in either manner. Therefore, once the administration knows what longer term arrangement is possible there, I would expect it to come to Congress to explain its plans and to seek appropriate congressional approval, perhaps in the form of a joint resolution such as that passed by Congress a year ago to provide the authority and the funds for the multinational force and observers (MFO) in the Sinai. I do not think it would be appropriate on constitutional grounds, or wise on political grounds, to continue an indefinite U.S. troop presence in Lebanon without congressional approval. Congress should and will share the responsibility with the executive branch.

Madam President, as a result of concerns expressed on this point by a number of committee members, the committee agreed yesterday to send a letter to the President explaining our view that the longterm or expanded commitment of U.S. Armed Forces to Lebanon should only be undertaken with the authorization of Congress. I ask unanimous consent that the text of that letter appear in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., December 15, 1982.

DEAR MR. PRESIDENT: As Members of the Senate Foreign Relations Committee, we have a particular concern for the situation in Lebanon and a particular responsibility under the War Powers Resolution with respect to the commitment of United States Armed Forces abroad. We are convinced that it is in the national interest of the United States to work toward a stable and independent Lebanon as part of a broader peace settlement in the Middle East. We also recognize that the current Multinational Force in Lebanon has played a constructive role in preventing further violence in and around Beirut and that the U.S. Marine component of that force has performed admirably under difficult circumstances.

In reintroducing United States Armed Forces into Lebanon on September 29, you reported under the War Powers Resolution that there was "no intention or expectation that U.S. Armed Forces will become involved in hostilities". Individual members of Congress, including members of our Committee, have disagreed with your assessment of the risks inherent in the Beirut operation and, therefore, with your interpretation of the War Powers Resolution in this case. No member has chosen to contest the issue through Congressional action at this time. Under the procedures set out in the War Powers Resolution, Congress reserves the ability to direct the removal of such forces at any time they are engaged in hostilities if it should determine that the circumstances no longer justify a U.S. military presence.

As the Beirut operation continues, and as discussions proceed regarding its possible extension or expansion, we want to ensure that the Congress has an adequate opportunity to consider the full implications of any extended commitment of U.S. forces and to fulfill its responsibilities in this area. We recognize the difficulties in developing longer-term proposals for such a multinational force until the negotiations for the departure of all foreign forces have progressed. However, we would expect Congress to be involved at the earliest possible stage in the development of such proposals and that formal Congressional authorization would be sought before undertaking long-term or expanded commitments or extending indefinitely the present level of operations.

In the longer term, it may be appropriate to consider more general legislation to clarify the respective roles of the President and the Congress in undertaking the commitment of U.S. armed forces to such operations. We look forward to further discussions with you and the members of your Administration in the exercise of our joint responsibilities in this area.

Sincerely,

Charles H. Percy, Richard G. Lugar, Nancy Landon Kassebaum, Paul E. Tsongas, S. I. Hayakawa, John Glenn, Charles McC. Mathias, Jr., Claiborne Pell, J. R. Biden, Jr., Larry Pressler, Edward Zorinsky, Chistopher J. Dodd, Paul Sarbanes, and Rudy Boschwitz.

DEPUTY SECRETARY KENNETH DAM

Mr. PERCY. Madam President, the new Deputy Secretary of State, Kenneth Dam, has received high praise for his work to date with Secretary George Shultz. That is not surprising to those who knew Ken Dam as the highly successful provost at the University of Chicago or in earlier administration assignments. As I have often said, a strong foreign policy requires a strong national defense and this, in turn, depends on a strong economy. To this cause, Kenneth Dam promises to contribute not only his expertise in National Security matter but also his extensive knowledge of the international monetary system, trade and energy policy, and foreign affairs.

I commend a recent Chicago Tribune article on Kenneth Dam to my colleagues, and ask that it appear at this point in the RECORD.

The article referred to follows:

[From the Chicago Tribune, Dec. 15, 1982]

CHICAGO'S MAN IN STATE DEPARTMENT

(By Thomas R. Mullaney)

Shortly after the announcement of George Shultz's appointment as secretary of state last summer, a professor at the University of Chicago Business School told his colleagues, "Well there goes Ken Dam."

When Shultz announced last July that Dam, the provost at the University of Chicago and an expert on international trade, international monetary economics and energy, was to replace veteran diplomat Walter Stoessel, Shultz provided a significant insight into his own character and the tenor of his term in office. The clear mes-

sage is that economic policy will be the cornerstone of American foreign policy in the foreseeable future.

For readers wondering what a university provost knows about managing foreign policy, the speculation is understandable but unnecessary. Kenneth Dam is no stranger to either Washington or foreign affairs.

Dam was Shultz's top assistant when Shultz headed the Office of Management and Budget in 1970 and also served as executive director of the Council on Economic Policy in the Nixon administration. The two men forged a close personal friendship that has continued beyond public service. In 1977, they coauthored a cogent analysis of policymaking, "Economic Policy Beyond the Headlines" (W. W. Norton).

Dam may not be a professional diplomat but he has the mien and polish of one: He was a top official in the Chicago Council on Foreign Relations, he is a respected legal scholar who enjoys the public arena, and he was known at Chicago for having good political instincts.

Early reports concluded that because Dam and Shultz had worked together at the university and OMB, Dam must be a clone of his mentor. While the job of deputy secretary is to be the secretary's "alter ego," and the two men mesh in philosophy and temperment, the judgment strikes me as unfair, for Dam brings unique abilities to the No. 2 post in the State Department.

He gives the department international legal expertise that is not duplicated by Shultz or anyone else within the policymaking circle.

Dam also brings with him a deep knowledge of the international monetary system. And his expertise is not solely economic or legal; while at OMB, he served as assistant director for national security and international affairs.

In their book both men spoke of statecraft in a passage with clear relevance to current reality. "Since World War II," they wrote, "we have witnessed an almost continuous concern with organizational aspects of foreign policy . . . More recently, organizational aspects of the triangular relation of the State Department the Defense Department and the National Security Council have generated oceans of ink. The coordination issue is perennial."

One reason for the smooth execution of statecraft in recent months, particularly during the tense Lebanese crisis, is that Weinberger and Shultz work together, and that Shultz is highly regarded by both the White House aides and National Security head, William Clark.

Since joining the State Department, the Shultz/Dam diplomacy has taken on the tangle in Beirut. As this flashpoint moves off the diplomatic front-burner, international economic concerns are occupying much attention. In the current, worldwide recessionary climate, talk of protective tariffs, bilateral trade monopolies and trade wars is reaching clamorous proportions. The free market forces at State (including W. Allen Wallis, the new under secretary for economic affairs and Shultz's predecessor as dean at the University of Chicago Business School) will not look favorably upon such pressures.

Shultz, Dam and Wallis will turn their sights toward improving the free market functioning of a creaky international monetary system, which is still suffering withdrawal pangs from the 1971 ending of a fixed gold standard. American promises made at the Versailles summit conference earlier this year to stay out of the market and prevent a "dirty float" will be tested.

Dam stands a good opportunity to be a strong shadow Secretary of State. He is no stranger to Washington, and he knows that the very best will be required of him in these difficult times for American statecraft. The times demand it, and George Shultz would settle for nothing less.

GEORGE H. MILLER OF ILLINOIS

Mr. PERCY. Madam President, earlier this month a distinguished resident of my State, Mr. George H. Miller, was elected President of the National Association of Towns and Townships. I have known George Miller for many years. His untiring service as executive director of the township officials of Illinois makes him well qualified for this position of national prominence.

As many of my colleagues know, the National Association of Towns and Townships is a nonprofit membership organization offering technical assistance, educational services, and public policy support to local government officials from more than 13,000 small communities across the country. As the voice of small town America in our Nation's Capital, NATaT is a highly respected organization.

Having lived under township government all my life, I can attest personally that this form of government is as vital today as it was in 1620 when it was first brought to these shores from England. To this day township government reflects the values of our Founding Fathers.

George Miller reflects these values. He will be a strong and effective leader and I look forward to continuing our strong working relationship.

COLLECTION OF DEBTS BY THE GOVERNMENT

Mr. PERCY. Madam President, this week the Office of Management and Budget announced that the Government collected over $2 billion more in defaulted debts in fiscal year 1982 than in the previous fiscal year. This outstanding achievement is one more milestone in what I consider to be the most successful Government management reform initiative I have witnessed in my 16 years in the U.S. Senate.

Now, following passage of the debt collection legislation in October, I am confident that collections will be even greater in fiscal years 1983 and beyond. Let delinquent debtors beware: Uncle Sam is no longer a soft touch. We now have the tools to collect these debts, and we will collect them. I should add that there are some individuals who are facing financial hardships in these difficult economic times, and the legislation I sponsored does take these problems into consideration. However, for those who can pay, but are not paying, it is time to get the word out that the Government is serious about collecting. These are loans, not gifts.

Madam President, this week I met with the President's own special task force of debt collection officials from over a dozen Federal agencies. Their tremendous work in the area of debt collection has contributed to the administration's outstanding record over the past 2 years. I would like to recognize them in the RECORD.

They are: Cora Beve, Treasury; Bob Ford, Justice; John Franke, Agriculture; David Nathan, Commerce; Emanuel Rosen, Treasury; Kurt Christiansen, AID; Marshall Ryan, Energy; William Kendig, Interior; Roger Feldman, State; Karen Lee, Transportation; Dick Hastings, Education; Dale Sopper, Health and Human Services; John Pressely, Veteran's Administration; Ted Britton, Housing and Urban Development; and Earl Chambers, Small Business Administration.

I would also like to congratulate OMB Director Dave Stockman for his help, and recognize Hal Steinberg, Jerry Bridges, Joe Wright, and Lynn Skolnick of his staff.

ROUTINE MORNING BUSINESS

(During the day routine morning business was transacted and additional statements were submitted for the RECORD, as follows:)

MESSAGES FROM THE HOUSE

At 1:08 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6946) to amend title 18 of the United States Code to provide penalties for certain false identification related crimes.

The message also announced that the House has passed the following joint resolution, with an amendment, in which it requests the concurrence of the Senate:

S.J. Res. 260. Joint resolution to designate the period commencing January 1, 1983, and ending December 31, 1983, as the "Tricentennial Anniversary Year of German Settlement in America."

The message also announced that the House has passed the following bills and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 7336. An act to make certain technical amendments to improve implementation of the Education Consolidation and Improvement Act of 1981;

H.R. 7410. An act to amend title 13, United States Code, to transfer responsibility for the quarterly financial report from

the Federal Trade Commission to the Secretary of Commerce, and for other purposes.

H.R. 7423. An act to recognize the organization known as Former Members of Congress;

H.J. Res. 459. Joint resolution authorizing the President to proclaim May 13, 1983, as "American Indian Day";

H.J. Res. 619. Joint resolution designating January 17, 1983, as "Public Employees Appreciation Day"; and

H.J. Res. 630. Joint resolution to commemorate the one hundred and fiftieth anniversary of the founding of Greene County, Mo.

At 4:39 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the Senate amendment to the House amendment to the Senate amendment to the bill (H.R. 5121) to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes, with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7356) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 3, 7, 9, 15, 18, 20, 25, 30, 95, 105, 110, 114, 115, 120, 125, 143, and agrees thereto; and it recedes from its disagreement to the amendments of the Senate numbered 10, 36, 40, 42, 43, 46, 58, 62, 74, 76, 84, 87, 88, 90, 96, 97, 98, 100, 102, 104, 111, 112, 116, 122, 123, 136, 137, 141, 153, 154, 155, and 156 to the bill, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message further announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 7439. An act to improve programs for the stabilization of agricultural prices and production, and for other purposes.

At 5:45 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the bill (H.R. 5536) to authorize the Secretary of the Interior to engage in a feasibility study of water resource development and for other purposes in the Central Platte Valley, Nebr., with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House insists upon its disagreement to the amendments of the Senate numbered 2, 3, and 4 to the bill (H.R. 7093) to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income; it insists upon its amendment to the amendment of the Senate numbered 1 to the bill, agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ROSTENKOWSKI, Mr. PICKLE, Mr. JACOBS, Mr. GEPHARDT, Mr. SHANNON, Mr. ARCHER, Mr. GRADISON, and Mr. MARTIN of North Carolina as managers of the conference on the part of the House.

The message further announced that the House disagrees to the amendments of the Senate to the bill (H.R. 5002) to improve fishery conservation and management; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ANDERSON, Mr. BREAUX, Mr. STUDDS, Mr. SNYDER, and Mr. FORSYTHE as managers of the conference on the part of the House.

The message also announced that the House insists upon its amendment to the amendment of the Senate to the text of the bill (H.R. 5470) to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness, disagreed to by the Senate; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ROSTENKOWSKI, Mr. GIBBONS, Mr. PICKLE, Mr. DUNCAN, and Mr. FRENZEL as managers of the conference on the part of the Senate.

The message further announced that the House agrees to the amendment of the Senate to the amendment of the House to the bill (S. 2355) to amend the Communications Act of 1934 to provide that persons with impaired hearing are insured reasonable access to telephone service.

The message also announced that the House has passed the following bill, without amendment:

S. 3113. An act to make minor and technical amendments to the Job Training Partnership Act.

HOUSE JOINT RESOLUTIONS REFERRED

The following joint resolutions were read the first and second times by unanimous consent, and referred as indicated:

H.J. Res. 619. Joint resolution designating January 17, 1983, as "Public Employees Appreciation Day"; to the Committee on the Judiciary.

H.J. Res. 630. Joint resolution to commemorate the one hundred and fiftieth anniversary of the founding of Greene County, Mo.; to the Committee on the Judiciary.

HOUSE BILL PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 7439. An act to improve programs for the stabilization of agricultural prices and production, and for other purposes.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, December 18, 1982, he had presented to the President of the United States the following enrolled bill:

S. 823. An act to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. COHEN, from the committee of conference:

Report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2623) to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes (Rept. No. 97-688).

By Mr. COHEN, from the Select Committee on Indian Affairs, without amendment:

S. 2931. A bill to provide for the disposition of funds appropriated to pay a judgment in favor of the Cowlitz Tribe of Indians in Indian Claims Commission docket numbered 218 and for other purposes (Rept. No. 97-689).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. GRASSLEY:

S. 3115. A bill to establish the annual rate of pay for Members of Congress at the rate of pay paid for Members on the date of enactment of this act; to provide that any adjustment of the annual rates of pay of Members of Congress based on pay comparability adjustments in the rates of pay under the general schedule shall take effect only if the Congress approves, within a certain period, by recorded vote such adjustment of Members' annual rates of pay; to defer such adjustment and any change in Members' annual rates of pay under section 225 of the Federal Salary Act of 1967 until March 1 after the date on which such adjustment of change is approved by Congress, and for other purposes; to the Committee on Governmental Affairs.

By Mr. MATHIAS (for himself and Mr. HART):

S. 3116. A bill to allow businesses to jointly perform research and develoment; to the Committee on the Judiciary.

By. Mr. MATHIAS:

S. 3117. A bill to amend title 17 of the United States Code to protect semiconductor chips and masks against unauthorized

duplication, and for other purposes; to the Committee on the Judiciary.

By Mr. PRESSLER:

S. 3118. A bill entitled the "Non-Immigrant Visa Waiver Act of 1982; to the Committee on the Judiciary.

By Mr. PRYOR:

S. 3119. A bill to extend until October 1, 1988, the authority for advances to the migratory bird conservation fund; to the Committee on Environment and Public Works.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GRASSLEY:

S. 3115. A bill to establish the annual rate of pay for Members of Congress at the rate of pay paid for Members on the date of enactment of this act; to provide that any adjustment of the annual rates of pay of Members of Congress based on pay comparability adjustments in the rates of pay under the General Schedule shall take effect only if the Congress approves, within a certain period, by recorded vote such adjustment of Members' annual rates of pay; to defer such adjustment and any change in Members' annual rates of pay under section 225 of the Federal Salary Act of 1967 until March 1 after the date on which such adjustment or change is approved by the Congress; to provide that any proposal to appropriate funds for Members' pay be considered separately from any proposal to appropriate funds for any other purpose, and for other purposes; to the Committee on Governmental Affairs.

CONGRESSIONAL PAY

Mr. GRASSLEY. Mr. President, since I began serving in the Congress in 1975, there are few issues which have raised the ire of the American public as passionately and as frequently as congressional pay raises. It is unfortunate that the pay raise issue has sparked such criticism, however. The inability of the Members of this body to deal with this issue in a responsible and direct way has justified the public indignation leveled at this institution.

Americans have become weary of moralizing by Congress about budget balancing and inflation fighting, while Members repeatedly attempt to escape any personal pain necessitated by fiscal restraint. Americans are disgusted by the amazing innovation displayed by Members of this body through their legislative maneuvering to pad their own pockets.

In 1967, Congress attempted to distance itself from the pay controversy by establishing the Commission for Executive, Legislative, and Judicial Salaries, which was to meet every 4 years to determine recommendations for congressional pay adjustments. The very first Commission recommended a salary increase of $20,000. The Congress, however, modestly allowed only a $12,500 raise, a 42-percent increase.

In further efforts to defuse the pay issue, congressional leaders in 1975 secretly consulted with the administration to draft legislation to provide an automatic annual salary increase without a rollcall vote. Under this legislation, the Executive Salary Cost-of-Living Adjustment Act, the President's recommendation for cost-of-living raises for Federal employees becomes effective for Members of Congress, unless either House adopts a resolution of disapproval within 30 calendar days.

As a Member of the House of Representatives at the time, I remember distinctly the enactment of this measure, as well as the public outcry which followed. The Senate attached this mechansim for automatic pay increases to a minor House-passed Postal Service bill. On July 30, 1975, when the bill returned to the House for final approval, the House leadership attempted to obtain its passage by unanimous consent and with no debate. I objected and forced a rollcall vote. The measure, however, was still carried by a 214–213 margin. Thus, I learned in my first year in Washington the penchant of Congress for taking its pay hikes through the back door.

As recently as last year, Congress adopted a so-called minor procedural change in how it provides these annual pay increases. Congress established a permanent appropriation for its automatic salary raises, eliminating the need to even appropriate the funds on an annual basis. Furthermore, the language in this measure, Public Law 97–51, is so ambiguous that it could be interpreted to mean that deferred pay adjustments can be accrued and accepted at a later date, perhaps when it is more politically expedient to take them.

This dilemma has surfaced recently in the controversy as to whether Congress would receive a 4- or 27-percent pay adjustment if the current pay cap were allowed to expire. In the last 8 years, Congress has voted to deny itself all but two of the annual cost-of-living adjustments recommended by the President under the 1975 act. These deferred adjustments, however, have accrued over the years and represent a 27-percent increase over the current congressional salary level. Despite the fact that actual pay has remained basically frozen, the statutory or legal rate of Member compensation has continued to rise by Presidential pay directives to a level of $77,500. Recent attention to this question has given further rise to public suspicion about Congress self-serving actions.

I feel that change is urgently needed in the process by which Members can increase their own compensation out of the Federal coffers. Therefore, I am introducing legislation which will effectively eliminate the mechanism for automatic increases by requiring specific rollcall votes for any increase in congressional salaries. Members' pay would have to be considered separately from other legislative issues and any approved increase would be deferred until the next legislative session. My intention is to block recurring efforts to sneak through pay increases as sleeper provisions in major bills or through voice—unrecorded—votes. Furthermore, my bill establishes as the legal rate of congressional pay the current salary level paid to Members on the date of enactment of the measure. This provision would eliminate the potential for Members to accept accumulated pay increases which have been deferred.

My legislation would assure that legislation providing an increase in pay for Members of Congress be a matter of public record. It would encourage honest and open debate and provide that any salary adjustment would be easily understood by Members and public alike. It would mandate a direct, straightforward approach to a problem which has long plagued the Congress. Additionally, it would demonstrate that this body has no double standard between actions it takes for others and action it takes for itself.

Mr. President, I ask unanimous consent that the text of my legislation be printed in the RECORD as follows:

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3115

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Congressional Pay Reform Act of 1982".

SEC. 2. (a) For the purpose of this section, the term "Member" means each individual referred to in section 601(a)(1)(A) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31(1)(A)) other than individual described in section 601(a)(1) (B) or (C) of such Act.

(b) Notwithstanding any other provision of law (expect as provided in subsection (c)), the annual rate of pay payable for a Member, the Speaker of the House of Representatives, the President pro tempore of the Senate, the majority or minority leader of the Senate, or the majority or minority leader of the House of Representatives shall be the annual rate of pay actually payable for such office, respectively, on the date of enactment of this Act under all applicable law.

(c) Each annual rate of pay established by subsection (a) shall remain in effect until superseded by a law enacted after the date of enactment of this Act, by action pursuant to section 225 of the Federal Salary Act of 1967 (81 Stat. 642; 2 U.S.C. 351 et seq.), or by action pursuant to section 601(a)(2) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31(2)).

SEC. 3. (a)(1) Paragraph (2) of section 601(a) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31(2)) is amended to read as follows:

"(2)(A) Whenever an adjustment in the rates of pay under the General Schedule

takes effect under section 5305 of title 5, United States Code, and the Congress agrees to a concurrent resolution under subparagraph (B) before March 1 next following the effective date of such adjustment, each annual rate referred to in paragraph (1) shall be adjusted, effective such March 1, by an amount, rounded to the nearest multiple of $100 (or if midway between multiples of $100, to the next higher multiple of $100), equal to the percentage of such annual rate which corresponds to the overall average percentage (as set forth in the report transmitted to the Congress under section 5305 of title 5) of such adjustment in the rates of pay under the General Schedule.

"(B)(i) An adjustment made under subparagraph (A) of this paragraph shall take effect only if a concurrent resolution is agreed to by both Houses of the Congress approving such adjustment. The vote of each House on the concurrent resolution shall be recorded so as to reflect the vote of each Member thereon.

"(ii) The revisions of subsections (d), (e), (f), (g), (h), (i), (j), and (k) of section 5305 of title 5, United States Code, shall apply in the case of any concurrent resolution referred to in clause (i) of this subparagraph.

"(C) For purposes of this paragraph, the term 'concurrent resolution' means only a concurrent resolution the matter after the resolving clause of which is as follows: 'That, pursuant to subparagraph (B) of section 601(a)(2) of the Legislative Reorganization Act of 1946, the Congress approves the adjustment under subparagraph (A) of such section based of the adjustment under section 5305 of title 5, United States Code, in the rates of pay under the General Schedule taking effect during the fiscal year .', the blank space therein being filled with the appropriate year.".

(2) Section 601(a) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31) is further amended by adding at the end thereof the following new paragraph:

"(3) Any change in the rates of pay approved under Section 225(i)(1) of the Federal Salary Act of 1967 (2 U.S.C. 359(1)) for positions referred to in paragraph (1) of this subsection shall take effect on—

"(A) March 1 next following the date on which the President transmitted to the Congress under Section 225(h) of such Act (2 U.S.C. 358) the recommendations that are so approved; or

"(B) if later, the date prescribed by the President under section 225(i)(2) of such Act (2 U.S.C. 359(2).".

(b) The third sentence of section 225(i)(1) of the Federal Salary Act of 1967 (2 U.S.C. 359(1)) is amended to read as follows: "If both Houses approve by majority vote the recommendations pertaining to the offices and positions described in any such subparagraph, the recommendations shall take effect—

"(A) as provided in section 601(a)(3) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31(3)) in the case of any office or position described in subparagraph (A) (other than the Vice President); and

"(B) at the beginning of the first pay period which begins after the thirtieth day following the approval of the recommendation by the second House to approve the recommendation in the case of the Vice President or any office or position described in subparagraph (B), (C), or (D).".

SEC. 4. (a) It shall not be in order in either the House of Representatives or the Senate to consider any bill or joint resolution carrying an appropriation, or a limitation on appropriations, for compensation of Members of the Congress for any fiscal year if such bill or joint resolution carries an appropriation, or a limitation on appropriations, for any other purpose.

(b) The provisions of subsection (a) of this section are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and, as such, such provisions shall be considered as part of the rules of each House, respectively, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to that House) at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

(c) For purposes of this section, the term "Member of the Congress" means any person who holds the office of Senator, Member of the House of Representatives, Delegate to the House of Representatives, Resident Commissioner from Puerto Rico, President pro tempore of the Senate, majority or minority leader of the Senate or the House of Representatives, or the Speaker of the House of Representatives.

By Mr. MATHIAS (for himself and Mr. HART):

S. 3116. A bill to allow businesses to jointly perform research and development; to the Committee on the Judiciary.

JOINT RESEARCH AND DEVELOPMENT ACT OF 1982

● Mr. MATHIAS. Mr. President, today I join with Senator HART to introduce a bill to encourage greater research and development by American business. Over those last 20 years, our country's R&D expenditures declined by one-fifth as a share of the GNP, while Japan increased its share by one-third. During the period from 1962 to 1980, the growth of Japan's trade balance in high technology products far outpaced that of the United States.

I am aware that in some cases it is fruitul for several different companies to engage in independent research in the same area. However, in the competitive marketplace for high technology industries worldwide, U.S. companies are losing ground to their overseas competitors, and the lack of opportunities for joint R&D activities have been a significant factor in this trend. For example, with the sanction of its Government, the Japanese semiconductor industry has formed a very large scale information technology project, known as VLSI, which pools the talents and capital of all the major Japanese high-tech firms. Other areas where Japanese industries practice joint research include: Biotechnologies, health care network systems, community energy systems, and investigation into new metallic alloys. In recent years, Japan has also launched joint research projects concentrating on software technologies, an area where the United States has traditionally held the lead.

Because of the capital-intensive nature of research and development, many U.S. firms have trouble funding R&D at the levels necessary to keep the United States competitive in world markets. U.S. companies also generally carry out their R&D in isolation, causing wasteful, duplicative use of scarce capital and other resources. By contrast, the Government of Japan through subsidies and other channels concentrates available resources in the most promising research efforts, and encourages cooperative R&D projects among companies, particularly in high-technology fields.

To encourage pooling of scarce resources, the Justice Department in 1972 developed the business review procedure. Under the BRP, companies submit a description of a proposed joint venture to the Department and get back a preliminary, tentative assessment of its legality under our antitrust laws. This imprimatur would alleviate the chilling effect that the threat of private treble damage suits otherwise has on businesses that want to engage in joint ventures. Despite its good intentions, the procedure has never given business executives enough certainty to justify the outlay of millions of dollars in joint research. Since its inception, it has gone virtually unused: Only 24 applications for clearance were received between 1972 and 1981.

Earlier in this Congress, I cosponsored S. 2717, a bill that would prevent the Justice Department from retroactively prosecuting a joint venture that it had previously approved. Since then, my talks with people involved in the high technology sector have led me to conclude that a more far-reaching solution would be appropriate. What I propose is to replace the business review procedure with a set of objective standards for organizing joint research and development ventures. If the business executives meet these standards, their joint venture would enjoy a presumption of lawfulness. The standards for this self-certification would require that:

The project be research-oriented and not involve manufacturing and marketing, and that the cost and risk be sufficient to justify a group approach;

It not involve acquisitions by one of the participants of the assets of another;

The venture be generally open to all firms on an equivalent basis, with no limitations on access; and

A U.S. firm may not participate in a venture if it accounts for 25 percent of the worldwide industry sales of a given product during the preceding 3 years and would cause the collective sales of all the participants in the group to exceed 50 percent of the worldwide

market, and if the proposed R&D program relates to that product, unless the Department of Commerce authorizes such participation as critical to the success of the program and in the national interest.

The notification provision requires that the Justice Department be informed of a venture under the provisions of this bill, and receive a detailed description of the research and development program contemplated and a statement explaining its compliance with the self-certification standards set out in the bill. The bill also provides that the Justice Department may at any time conduct an investigation to insure that a joint venture complies with the standards.

Senator HART and I are introducing the bill at this late date without any illusions about its chances of enactment in the 97th Congress. But we think it is important to draw attention to this serious problem. We hope to attract cosponsors and reintroduce it in the next Congress and then arrange for early hearings. I urge all my colleagues to join our effort to make U.S. industry more competitive in world technology markets.

I ask unanimous consent that the text of the bill appear in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3116

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Joint Research and Development Ventures Act of 1982".

FINDINGS AND PURPOSE

SECTION 1. The Congress finds that—

(a) research and development are major factors in the growth and productivity improvement of U.S. industry and of the national economy;

(b) many firms are unable to undertake the levels of research and development necessary for the United States to remain competitive in global markets because of the capital intensive nature of research and development programs and the chronic shortage of trained scientific and engineering personnel;

(c) the expense and personnel requirements of carrying on a sufficiently broad spectrum of research and development programs is prohibitive for many businesses;

(d) a firm's or an industry's ability to commit capital to research and development ventures of potential national importance is often dependent upon such firms or industries being able to share the risks which such projects often entail;

(e) such risks to U.S. firms have been greatly magnified by reason of activities by foreign governments in selectively subsidizing, sponsoring cooperation of industry members, or otherwise coordinating industrial research and development programs to enhance the positions of foreign firms in the United States and global markets;

(f) the role of research and development, as well as the prohibitive expenses, resource shortages, and increasing risks in its performance, prevail across the entire spectrum of United States industries;

(g) there are genuine pro-competitive benefits of cooperative research and development programs in that new knowledge, information, base technologies and products are brought forward; and

(h) the uncertainty of interpretation and enforcement of present antitrust law discourages cooperative research and development, often where cooperative activity would foster innovation and enhance competiton.

SEC. 2. The purposes of this act are to—

(a) encourage business concerns to undertake and obtain the benefits of research and development in order to strengthen the national economy and the international competitive position of the United States and to provide the technology to support superior weapons systems for the national defense;

(b) increase the productivity of United States industry by enhancing the availability and use of efficient advanced new technologies;

(c) encourage greater use of joint research and development ventures by the private sector as a means of augmenting the total amount of research and development performed as well as increasing the diversity of research;

(d) provide immunity under the antitrust laws of the United States or any State to any qualified joint research and development venture, and to any participant in such venture; and

(e) enhance competition by enabling participants, and non-participants on reasonable terms, to have access to and use base technologies that would not come into being expect by joint effort.

DEFINITIONS

SEC. 3. For purposes of the Act—

(a) the term "antitrust laws" shall have the meaning given it in subsection (a) of the first section of the Clayton Act (15 U.S.C. 12(a)), except that the term shall include section 5 of the Federal Trade Commission Act (15 U.S.C. 45) to the extent that section 5 applies to unfair methods of competition,

(b) the term "research and development program" means a program for—

(1) theoretical analysis, exploration, or experimentation, or

(2) the extension of investigative findings and theories of a scientific or technical nature into practical application for experimental and pilot demonstration purposes, up to the stage of industrial application, including the production, testing and licensing of models, devices, equipment, materials, and processes.

The conduct of such a program may include joint action such as: The establishment of facilities for the conduct of research, the application of noncoercive standards incident to research, the collecting and exchange of information pertinent to research, the conduct of research on a protected and proprietary basis, the prosecution of applications for patents, the granting of patent and know-how licenses, and the establishment of corporations or other entities to exploit patents and know-how.

(c) the term "qualified joint research and development venture" means an association, corporation or other multi-firm enterprise established to carry out cooperative research and development programs which meet the criteria established in sections 4 and 5 of this Act.

(d) The term "State" shall have the meaning given it in section 4G of the Clayton Act (915 U.S.C. 15g).

(e) A "United States firm" is a company or other entity controlled by United States firms or citizens, but shall also include entities controlled by a foreign firm or citizens if that nation provides access to participation in joint research and development efforts to United States firms and citizens operating in that nation equivalent to such access provided domestic firms in such nation.

(f) The term "product" includes any goods or services that are considered by purchasers to be similar by reason of their characteristics, price or use.

QUALIFIED VENTURES

SEC. 4. To be qualified, a joint research and development venture must include the following characteristics—

(a) Participation—

(1) Any United States firm desiring to participate in the venture, or any of its research and development programs, shall be permitted to participate upon the same terms applicable to other firms participating to the same degree.

(2) The research and development programs to be undertaken by a venture shall, to the extent practical, be individually identified and defined, and the contributions required for a firm's participation in but one program separately identified.

(3) A firm desiring to participate in fewer than all of the research and development programs undertaken by a venture shall be entitled to do so, but may be required to pay a proportional share of the venture's common expenses.

(4) a. If a United States firm participating in a venture accounts for twenty-five percent of total worldwide industry sales of a product during any of the preceding three years (as determined by the Department of Commerce of the United States—hereafter "the Department") and its participation in a research and development program to be undertaken by that venture would cause the combined share of all program participants' sales of the product to exceed fifty percent of total worldwide industry sales of such product during any of such years (as determined by the Department), the firm's participation in that program shall be conditioned upon an affirmative finding by the Department that:

The results of such a program are not likely to be directly applicable to the future production of such a product or

such participation is critical to the success of the program and is in the national interest.

b. In exercising this authority, the Department may issue guidelines describing:

procedures to employ in requesting such a finding;

information to be submitted in support of such a request; and

circumstances under which it may issue such findings.

c. Information submitted by any firm in connection with the submission of such a request or the issuance of such a finding shall be exempt from disclosure under section 552 of title 5, United States Code.

(b) Activities—

(1) The venture's sole activity shall be the operation of one or more research and development programs, including but not limited to research and development programs participated in by universities.

(2) A participant in a venture, or any program undertaken by it, shall not be subject to—

any restrictions on its own individual research and development activities;

any obligations to provide to the venture results from its previous or future research and development; or

any restrictions on its exploitation of the inventions resulting from the venture's research and development.

except that a participant may agree to—

provide, for a reasonable compensation, access to such previous or future individual research and development as is necessary for the venture to undertake its activities;

abstain for a reasonable period of time from the individual disclosure of the results of the venture's research and development;

assign employees to the venture to engage in research and development or technology transfer activities; or

undertake on behalf of the venture a particular aspect of the venture's research and development.

(3) No research and development program shall be undertaken which projects a completion date in excess of ten years from its inception.

(c) Organization—

(1) The venture may take any legal form, but the documentation establishing it shall include provisions meeting the requirements of this section of the Act.

(2) Ultimate authority for the management of the venture shall be vested in a management board, which shall consist of—

one representative of each participant in the venture;

at least three United States citizen representatives of nonparticipants, which representatives may be from the U.S. academic community, nonprofit organizations, public agencies or other firms.

(3) The management board shall include among its activities—

selection of the chief executive of the venture;

establishment of criteria for the selection of research and development programs, and the selection of such programs;

allocation of any common costs among research and development programs;

subject to the provisions of subparagraph (a) of this Section, establishment of criteria for the admission of additional venture participants as well as the withdrawal of existing participants; and

subject to the provisions of subparagraph (d) of this Section, establishment of criteria for the licensing of venture technology, and the approval of any such licenses.

(4) In choosing to initiate or terminate research and development programs, the management board may take into account—

the importance of the program to the U.S. economy or defense;

the long run needs of the U.S. industries represented by the venture's participants;

the specific needs of participant firms, including the risks and costs for individual firms to undertake the program; and

the educational and intellectual value of the program.

(5) In establishing criteria for the admission or withdrawal of participants, the management board may—

require firms to participate in at least one of the venture's research and development programs;

require commitments to participate in a program for a reasonable minimum period of time, not to exceed three years;

impose reasonable catch-up charges for firms desiring to participate in a preexisting program;

discipline firms that fail to perform their obligations to the venture, by providing for their expulsion from the venture, the forfeiture of any payments to the venture, and/or the denial of any right or interest in the assets, including technology, of the venture.

(6) In establishing criteria for the licensing of venture technology, the management board shall, in implementing section 4(d)(5) of this Act, seek to encourage the widest possible dissemination of the venture's technology, but shall give due regard to the risks assumed and resources expended by participants in the program that created the technology.

(d) Technology Transfer—

(1) All inventions and useful know-how developed in the course of a research and development program must be promptly reported to the participant firms.

(2) Applications for patents on patentable inventions shall be made by the venture on behalf of program participants and the venture shall retain title to all inventions, patents and know-how.

(3) Any firm that is a participant in a program at the time an invention or know-how is discovered or developed shall at such time be entitled to irrevocable, non-exclusive, and equivalent licenses to all patents and know-how.

(4) Participants in a program may be rewarded in a manner which bears an equitable relationship to the risks each assumed, including—

exclusive access to the technology for up to three years;

royalty-free licenses or licenses at royalty rates which reflect the risks assumed and resources expended; and

a share of any royalties collected from nonparticipants in the program.

(5) No later than three years after the participants in a program receive such licenses, licenses shall be made available by the venture to any other United States firm on such terms as the participants in the program may establish, provided that such terms shall be reviewed by the non-participant members of the management board of the venture, and a majority thereof shall affirm that the terms are reasonable, fair and non-discriminatory in light of the risks assumed and resources expended by the participants.

(6) In order to encourage the availability to and use by small businesses of developed technology, licenses to program participants or other United States firms, as provided for in subsections (3) and (5) of this section, shall be conclusively presumed to be equivalent or nondiscriminatory if their provisions with respect to royalties are, to the extent reasonably possible, volume or usage based.

(7) The venture shall collect any royalties on behalf of the participants in a program, and may retain such proportion of the revenues as may be agreed to by the participants.

NOTIFICATION

SEC. 5. (a) To be qualified, a joint research and development venture shall cause the Attorney General and the Department to be notified of the formation of such venture. The notification shall be in a form prescribed by the Department, shall be available to any United States citizen on request pursuant to section 552 of title 5, United States Code, and shall include the following:

(1) an identification of the parties to the venture;

(2) a description of each research and development program to be undertaken by the venture, including its projected duration;

(3) an identification of the participants in each such program;

(4) any agreements pertaining to or describing the venture of any of its programs; and

(5) a statement of compliance with the criteria set forth in section 4 of this Act, executed by an officer of the venture and each program participant.

(b) A qualified venture shall annually cause to be submitted to the Attorney General and the Department a report, in such form and at such time as they may require, that updates where necessary the information required by section 5(a).

IMMUNITY FOR QUALIFIED VENTURES

SEC. 6. With respect to any qualified joint research and development venture, and any research and development program which it undertakes—

(a) Neither the venture or its employees, nor any of its participants nor their employees, shall be subject to a civil or criminal action for a violation of the antitrust laws or a violation of any State law similar to the antitrust laws if the venture satisfies the characteristics set forth in section 4, and a notice is filed pursuant to section 5, of this Act.

(b) If, with respect to any claim brought by a person under the antitrust laws against the venture, its employees, the participants, or their employees, the court finds that the violation alleged arises from conduct undertaken in connection with the operation of a joint research and development venture, and—

(1) the venture was formed and operated in conformance with the characteristics set forth in section 4 of this Act, or

(2) the conduct alleged to violate the antitrust laws does not violate the antitrust laws,

the court shall award to the person or persons against whom the claim is brought the cost of suit attributable to defending against the claim, including a reasonable attorney's fee.

(c) None of the participants in a joint research and development venture, nor the venture, shall be liable under section 16 of the Clayton Act with respect to threatened loss or damage by a violation of the antitrust laws if the threatened loss or damage arises from conduct undertaken in connection with the operation of a qualified joint research and development venture.

INVESTIGATION/DISSOLUTION OF VENTURES

SEC. 7. (a) Notwithstanding section 6 of this Act, a venture may be investigated at any time by the Attorney General for the purpose of:

(1) determining that the parties to the venture submitted correct information in the notification filed under section 5 of this Act; or

(2) determining that such venture, as well as the research and development programs it has undertaken, satisfy and continue to satisfy the requirements of section 4 of this Act.

(b) In the event the Attorney General undertakes an investigation, all parties to the venture or research and development program that is the subject of the investigation shall be given notice thereof in writing. The Attorney General shall conduct his investigation in conformance with procedures to be established by him pursuant to section 553 of title 5, United States Code, and, for purposes of section 4(a)(4), the Attorney General shall adopt any determinations made by the Department of Commerce. If the Attorney General determines after the

conclusion of such investigation that a venture or program does not comply with the requirements of this Act, he shall give written notice of such determination, which notice shall:

(1) include a statement of the circumstances underlying, and the reasons in support of, the determination; and

(2) state with specificity any actions required in order for the venture and/or program to come into compliance.

(c) If the venture and/or program fails to take the actions specified by the Attorney General within sixty days, he shall commence an action in the United States District Court for the District of Columbia to dissolve the offending venture and/or programs.

(d) In the event the district court finds that the venture and/or program is in violation of the requirements of section 4 and/or 5 of this Act, such court shall order the dissolution of such venture and/or program.

(e) Any party aggrieved by the determination of the district court may, within 30 days of such determination, seek review by the court of appeals on the grounds that such determination is erroneous.

(f) Information generated in the course of any investigation or court action, or submitted by any person in connection therewith, shall be exempt from disclosure under section 552 of title 5, United States Code.

(g) Neither a determination by the Attorney General pursuant to subsection 7 (a) and (b), or by the district court or court of appeals pursuant to subsections 7(d) or 7(e), nor any statements, opinions or recommednations issued in connection therewith, shall be admissible in evidence in any administrative or judicial proceedings in support of any claim under the antitrust laws.

EFFECTIVE DATE

SEC. 8. This title shall take effect on the date of the enactment of this Act and shall apply to any joint research and development venture established prior to its enactment that satisfies its provisions.●

SEMICONDUCTOR CHIP PROTECTION ACT OF 1982

By Mr. MATHIAS:

S. 3117. A bill to amend title 17 of the United States Code to protect semiconductor chips and masks against unauthorized duplication, and for other purposes; to the Committee on the Judiciary.

● Mr. MATHIAS. Mr. President, today I introduce a bill to extend the copyright laws to protect semiconductor chip designs. A semiconductor chip is a system of transistors etched onto the face of a small silicon wafer, typically no larger than a quarter of an inch square. Chips touch our lives in many ways. They make possible all of our modern gadgets—microwave ovens TV sets, refrigerators, high-fi stereo equipment, computers, and automobile engine controls. High technology firms spend many years and large sums of money developing new layout designs for the chips, in order to concentrate the maximum electronic versatility into the smallest possible space.

The men and women who spend weeks and months designing these chips, and their companies, have suffered seriously from chip piracy, where a parasite firm buys a chip on the open market, takes it apart to learn its design, then duplicates it and undersells the originating company, which has to recoup all its research and development costs.

The technology of chip manufacturing prevents the design from being hidden from competitors as a trade secret. A patent can protect the electronic circuitry used in the chip, but not the design of the chip. My bill would protect the research and development investment of the engineers and the companies that produce the new chip designs. It does so by giving them copyright protection for a period of 10 years. In order to protect unwitting purchasers of pirated chips, the bill includes a compulsory license provision allowing them to continue using the infringing chip by paying a royalty to the copyright owner.

During the 97th Congress, I have often addressed this body on the need to modify our intellectual property laws to keep pace with the miracles of space age communications. Semiconductor chips are a prime example of a technological marvel, critical to our progress in many fields, that faces a serious threat from the inadequate protection of the current law against what amounts to theft. The ingenuity of an age that has produced such remarkable tools should be able to devise the laws to protect them.

I ask unanimous consent that the text of the bill appear in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3117

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Semiconductor Chip Protection Act of 1982."

DEFINITIONS

SEC. 2. Section 101 of Title 17 of the United States Code is amended by adding at the end thereof the following:

"A 'semiconductor chip product' is the final or intermediate form of a product—

"(1) having two or more layers of metallic, insulating, or semiconductor material, deposited on or etched away from a piece of semiconductor material in accordance with a predetermined pattern;

"(2) intended to perform electronic circuitry functions; and

"(3) that is a writing or a discovery, or the manufacture, use, or distribution of which is in or affects commerce.

"A 'mask work' is a series of related images—

"(1) having the predetermined, three-dimensional pattern of metallic, insulating, or semiconductor material present or removed from the layers of a semiconductor chip product; and

"(2) in which series the relation of the images to one another is that each image has the pattern of the surface of one form of the semiconductor chip product.

"A 'mask' is a substantially two-dimensional partially transparent and partially opaque sheet. A mask embodies a mask work if the pattern of transparent and opaque portions of the mask is substantially similar to the pattern of one of the images of the mask work. Masks and mask works shall not be deemed pictorial, graphic, or sculptural works.

"As used in sections 109(a), 401, 405, 406, 501(a), 503, 506 509, and 602 of this title, 'copy' includes a semiconductor chip product that is subject to the exclusive rights described in section 106."

SUBJECT MATTER OF COPYRIGHT

SEC. 3. Section 102(a) of title 17 of the United States Code is amended—

(1) by adding after paragraph (5) the following:

"(6) mask works;"; and

(2) by redesignating paragraphs (6) and (7) as paragraphs (7) and (8), respectively.

EXCLUSIVE RIGHTS

SEC. 4. Section 106 of title 17 of the United States Code is amended—

(1) by striking out "and" at the end of paragraph (4);

(2) by striking out the period at the end of paragraph (5) and inserting "; and" in lieu thereof; and

(3) adding at the end thereof the following:

"(6) in the case of mask works—

"(A) to embody the mask work in a mask;

"(B) to distribute a mask embodying the mask work;

"(C) to use a mask embodying the mask work to make a semiconductor chip product;

"(D) in the manufacture of a semiconductor chip product, substantially to reproduce, by optical, electronic, or other means, images of the mask work on material intended to be part of the semiconductor chip product; and

"(E) to distribute or use a semiconductor chip product made as described in subclause (C) or (D) of clause (6) of this section.".

LIMITATION ON EXCLUSIVE RIGHTS AS TO MASKS

SEC. 5. (a) Chapter 1 of title 17 of the United States Code is amended by adding at the end the following:

"SEC. 119. SCOPE OF EXCLUSIVE RIGHTS: COMPULSORY LICENSING WITH RESPECT TO MASK WORKS.

"(a) In the case of mask works, the exclusive rights provided by section 106 are subject to compulsory licensing under the conditions specified by this section.

"(b) The owner of a copyright on a mask work shall be required to grant a compulsory license under the copyright, to any applicant therefor, on the following terms and conditions, and in the following circumstances:

"(1) The applicant has purchased semiconductor chip products made or distributed in violation of the owner's exclusive rights under section 106.

"(2) When the applicant first purchased such semiconductor chip product (hereinafter in this section referred to as the 'infringing product'), the applicant did not have actual knowledge that or reasonable grounds to believe that the infringing product was an infringing product (hereinafter in this section referred to as 'having notice of infringement').

"(3) The applicant, before having notice of infringement, committed substantial funds to the use of the infringing product; the applicant would suffer substantial out-of-pocket losses (other than the difference in price between the infringing product and a noninfringing product) if denied the use of the infringing product; and it would be

inequitable in the circumstances not to permit the applicant to continue the use or proposed use of the infringing product.

"(4) The applicant offers, subject to the applicant's rights, if any, under section 501(e) of this title, to pay the copyright owner a reasonable royalty for infringing products.

"(5) The royalty shall be for each unit of the infringing product distributed or used by the applicant after having notice of infringement.

"(6) The license shall be one to make, have made (but only if the copyright owner and the owner's licensees, if any, are unable to supply the applicant at a reasonable price), use, and distribute the infringing product, for substantially the same purposes that gave rise to the applicant's right to a compulsory license, throughout the United States, for the life of the copyright, revocable only for failure to make timely payment of royalties.".

(b) The sectional analysis at the beginning of chapter 1 of title 17 is amended by adding the following:

"119. Scope of exclusive rights: Compulsory licensing with respect to mask works.".

DURATION OF COPYRIGHT

SEC. 6. Section 302 of title 17 of the United States Code is hereby amended by adding at the end thereof the following:

"(f) MASKS.—Copyright in mask works endures for a term of ten years from the first authorized—

"(1) distribution;

"(2) use in a commercial product; or

"(3) manufacture in commercial quantities

of semiconductor chip products made as described in subclause (C) or (D) of clause 6 of section 106 of this title.".

INNOCENT INFRINGEMENT

SEC. 7. Section 501 of title 17 of the United States Code is amended by adding at the end thereof the following:

"(e) Notwithstanding the other provisions of this chapter, a purchaser of a semiconductor chip product who purchased it in good faith, without having notice of infringement (as that term is used in section 119 of this title), shall not be liable as an infringer or otherwise be liable or subject to remedies under this chapter with respect to the use or distribution of units of such semiconductor chip product that occurred before such purchaser had notice of infringement.".

IMPOUNDING AND SEIZURE

SEC. 8. Sections 503(a), 503(b), and 509(a) of title 17 of the United States Code are each amended by inserting "masks," after "film negatives," each place it appears.

EFFECTIVE DATE

SEC. 9. The amendments made by this Act shall take effect 90 days after the date of enactment of this Act, but shall not apply to—

(1) semiconductor chip products manufactured in the United States or imported into the United States before the effective date;

(2) masks made in the United States or imported into the United States before the effective date;

(3) semiconductor chip products manufactured in the United States by means of masks described in paragraph (2) of this section.●

By Mr. PRESSLER:

S. 3118. A bill entitled the "Nonimmigrant Visa Waiver Act of 1982; to the Committee on the Judiciary.

NONIMMIGRANT VISA WAIVER ACT OF 1982

● Mr. PRESSLER. Mr. President, I am today offering an original measure which I hope my colleagues will be able to approve. The bill deals with the nonimmigrant visa waiver system which has been promoted by the Department of State for a number of years.

I want to stress the fact that this bill is identical to a section of S. 2222, the immigration reform bill passed by the Senate this past summer. The visa waiver provision of S. 2222, which I amended on the Senate floor last August, is a modest proposal to reform and improve our current visa laws and regulations as they pertain to nonimmigrant visitors to the United States. The proposal would permit visitors from certain low-risk countries to travel to the United States solely on their passports, as is the case with virtually every other nation on Earth. Temporary visas would no longer be required by these people, such as visitors from Western Europe.

The administration, and specifically the State Department, strongly support this program. This was demonstrated during testimony on the visa waiver system which was given at a September 22, 1982, hearing before my Subcommittee on Business, Trade, and Tourism.

The only reason I am now offering this proposal as a separate piece of legislation is that the immigration reform bill, S. 2222, has apparently died in the House of Representatives. While I greatly regret this outcome, I am hopeful that we might salvage this one very progressive program from that piece of legislation.

Our current visa system requires all foreign travelers to obtain a visa from the U.S. Embassy in their country before coming to the United States. Due to the explosive growth of travel to this country over the past decade, this has resulted in our Embassies being flooded with visa applications. The backlog in some Embassies, most notably that in Great Britain, has resulted in delays of 4 to 6 weeks for visa applications to be processed. As you can imagine, this is very disruptive to the travel plans of British tourists and business people. There is also evidence that it is sometimes such a discouraging factor that it results in a loss of foreign tourists. During hearings which I conducted on this issue we received testimony that we could be losing several hundred million dollars in foreign trade income annually because of the negative influence of the visa requirement.

The bill which I am offering today would help reduce the visa backlog and would increase our foreign trade income from foreign tourism.

The Senate has already passed it once this Congress in the exact form I am offering it in now. Passage of this measure will not be a new step for the 97th Congress, simply a reaffirmation of a position already taken.

For all these reasons, I ask that my colleagues join me in support of this bill and that we work quickly for its enactment prior to the conclusion of our efforts during the 97th Congress.●

By Mr. PRYOR:

S. 3119. A bill to extend until October 1, 1988, the authority for advances to the migratory bird conservation fund; to the Committee on Environment and Public Works.

ADVANCES TO THE MIGRATORY BIRD CONSERVATION FUND

Mr. PRYOR. Mr. President, the legislation I am introducing today is a simple extension of existing law, the Wetlands Loan Act. The authority of the Federal Government to lend money to the Migratory Bird Conservation Fund for the purpose of acquisition of wetlands habitat will expire on September 30, 1983. This legislation simply extends that authority until September 30, 1988.

Mr. President, when I accepted nomination to the Migratory Bird Conservation Commission 2 years ago, I made a commitment to do whatever I could to help this country preserve one of its most valuable resources, its waterfowl habitat—the wetlands. Today the U.S. Fish and Wildlife Service estimates that these wetlands are disappearing at the rate of approximately 300,000 acres a year, due primarily to commercial development and farming. Secretary of Interior, James Watt, may not be nationally recognized as a conservationist, but he has become so alarmed at this tragic loss, and at the projections for future losses, that he has taken immediate action. He has formed a task force composed of largely nongovernmental people to seek answers and make recommendations for saving the wetlands that we have left. Governor Fob James of Alabama has agreed to head this task force, which has assumed the title of POWDR—Protect Out Wetland and Duck Resources.

Mr. President, the Fish and Wildlife Service has indentified 1.6 million acres of wetlands habitat that they say must be protected by 1986. Of that amount only 336,000 acres have been protected, and at current prices it will take an additional $700 to $800 million to acquire or protect the remainder through environmental easements. There can be no doubt that current methods of protection will not be enough to do the job, and this loan authority will not be enough by a long shot.

But we must take this first step. The Wetlands Loan Act has been with us since 1961. It is a revolving loan account whereby the Congress appropriates money to be lent for advanced

purchases of habitat. The loan is repaid by revenues generated through the sale of Federal duck stamps. In essence, the people with the first and primary interest in our migratory waterfowl, our hunters, are financing this preservation effort. I like the spirit of the idea that the user pays. But, Mr. President, we all have an interest in wetlands preservation. The habitat that we are preserving is habitat for a lot more than ducks and geese. In the ecological chain, wetlands—the plant life and aquatic life that it supports—is the first link.

Duck stamp revenues are projected at $16 million annually. If we allow this loan authority to lapse, 75 percent or $12 million of duck stamp money annually would have to go toward repaying the loan, leaving only $4 million annually to continue purchasing and preserving this habitat. We simply cannot, at this time, allow the effort to falter. I hope that we will eventually reach the point where our acquisition efforts have come to fruition, and the desperation of this situation will relax. For now, we cannot relax.

Mr. President, this bill does not change existing authorities, it is not controversial, and it has broad public support. Similar legislation has been introduced in the House. I believe our Chairman on the Migratory Bird Conservation Commission, Mr. Watt, will support it.

I realize that too little time remains for approval of this legislation in 1982, but I want to put my colleagues in the Senate on notice of my intention to reintroduce this measure when Congress reconvenes in 1983. I hope that this legislation will receive early consideration and approval by Congress next year.

I ask unanimous consent that the text of the bill be printed in the RECORD following my remarks:

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3119

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first section of the Act entitled "An Act to promote the conservation of migratory waterfowl by the acquisition of wetlands and other essential waterfowl habitat, and for other purposes", approved October 4, 1961 (16 U.S.C. 715k-3), is amended by striking out "September 30, 1983," and inserting in lieu thereof "September 30, 1988,".

SEC. 2. Section 3 of such Act of October 4, 1961 (16 U.S.C. 715k-5), is amended by striking out "October 1, 1983," each place it appears therein and inserting in lieu thereof "October 1, 1988,".

ADDITIONAL COSPONSORS

S. 2909

At the request of Mr. DODD, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 2009, a bill to authorize financial assistance for a continuing education program to secondary school science and mathematics teachers designed to increase their competency and to assist them to qualify for certification, and for other purposes.

S. 3047

At the request of Mr. KASTEN, the names of the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Georgia (Mr. MATTINGLY) were added as cosponsors of S. 3047, a bill to repeal the withholding of tax from interest and dividends and to require statements to be filed by the taxpayer with respect to interest, dividends, and patronage dividends.

SENATE RESOLUTION 516

At the request of Mr. GRASSLEY, the names of the Senator from Texas (Mr. BENTSEN), the Senator from Minnesota (Mr. BOSCHWITZ), and the Senator from Georgia (Mr. MATTINGLY) were added as cosponsors of Senate Resolution 516, a resolution expressing the sense of the Senate on urging Presidential action pursuant to section 103 of the Revenue Act of 1971, 26 U.S.C., section 48(a)(7)(D) to disqualify certain Japanese manufactured, numerically controlled machine tools from the U.S. investment tax credit.

AMENDMENTS SUBMITTED FOR PRINTING

SURFACE TRANSPORTATION ACT OF 1982

AMENDMENTS NOS. 5622 AND 5626

(Ordered to be printed and lie on the table.)

Mr. PACKWOOD submitted five amendments intended to be proposed by him the amendment No. 4998 proposed by Mr. BAKER to the bill (H.R. 6211) to authorize appropriations for the construction of certain highways in accordance with the title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

AMENDMENT NO. 5627

(Ordered to be printed and lie on the table.)

Mr. PACKWOOD submitted an amendment intended to be proposed by him to the amendment No. 4977 proposed by Mr. PACKWOOD to the bill H.R. 6211 supra.

AMENDMENT NO. 5628

(Ordered to be printed and lie on the table.)

Mr. ROTH (for himself and Mr. GRASSLEY) submitted an amendment intended to be proposed by them to the amendment No. 4998 proposed by Mr. BAKER to the bill H.R. 6211 supra.

ADDITIONAL STATEMENTS

SOUTH AFRICA'S ATTACK AGAINST LESOTHO

● Mr. KENNEDY. Mr. President, I wish to express my strong protest against South Africa's aggressive attack against the sovereign nation of Lesotho. On December 9 approximately 100 South African commandos crossed over the border into Lesotho and carried out sweeping raids on the homes of South African exiles who had sought refuge there. Forty-two people were brutally murdered and their residences destroyed by bazookas, grenades, and incendiary devices. Those killed, according to the Lesotho Government, were South African refugees—duly registered with the local authorities and the U.N. High Commission of Refugees—as well as innocent citizens of Lesotho caught in the crossfire of the attack or murdered in their own homes, which the South African Defense Force had apparently mistakenly identified as housing South African refugees.

I applaud the U.N. Security Council's unanimous condemnation of South Africa for this "premeditated, aggressive" raid. The resolution branded it a "flagrant violation of the sovereignty and territorial integrity" of Lesotho, reaffirmed Lesotho's right to give sanctuary to refugees from South Africa, and demanded that South Africa pay "full and adequate compensation for the damage to life and property." This strong statement by the Security Council represented the minimum tolerable response by the world community to South Africa's attack.

It was right for the administration to cast its vote in favor of this U.N. resolution. Our country could have done no less in the face of this gross affront to international decency, humanity, and the most fundamental human rights. But a single vote against an isolated incident in a continuing pattern of unacceptable South African behavior is not enough. Indeed, we should be concerned that the administration's policy of "constructive engagement" with South Africa has contributed to a false sense of confidence on the part of that country's racist government that it can give full rein to its most brutal impulses without risking serious censure by the United States. Our Nation must take an unswerving stand against oppression and aggression by South Africa, and make clear that outrages of this kind are intolerable in today's world.

The South African sense of insecurity which underlies raids such as that into Lesotho is directly related to mounting frustration against the apartheid system. Apartheid circumscribes every facet of existence for blacks in South Africa—denying them

all significant political rights, imposing near-total segregation in the routine of daily life, and perpetuating gross economic disparities between income levels and social services for the privileged white elite and the dispossessed black majority.

I would also like to draw the attention of my colleagues to the analysis of South Africa's social and political predicament in Robert S. MacNamara's extremely thoughtful October 21 address to the University of the Witwatersrand in Johannesburg. He argues that South Africa's racist policies warrant international concern because, "unless they are fundamentally redesigned they will eventually lead to a catastrophic racial conflict that will have serious ramifications throughout the Western World, and most especially in the United States."

Robert MacNamara urges the South African authorities to pursue a peacefully negotiated political alternative in South Africa while there is still time to avoid a violent conflagration. In his view, such a negotiated settlement would necessarily have to assure South African blacks full participation in genuine political power, while protecting the whites against a winner-take-all form of majority rule.

Mr. MacNamara urges that the United States should recognize that black nationalism in South Africa is "a struggle whose eventual success can at most only be delayed—and at immense cost—but clearly not permanently denied."

It is not enough for us to condemn individual South African abuses at home or attacks abroad. The United States must not fail to make clear our abhorrence of the entire system of racial apartheid which gives rise to these incidents. We here in Congress must insure that our country's full influence is brought squarely to bear in the cause of racial justice for South Africa and peace and progress for all the independent nations of southern Africa whose security and sovereignty is presently threatened so directly by the festering tension nourished by the system of apartheid.

I ask that the complete text of Mr. MacNamara's important address may be printed in the RECORD at the conclusion of my remarks.

The address follows:

THE ROAD AHEAD

(An address by Robert S. McNamara, to the University of The Witwatersrand, Johannesburg, South Africa, October 21, 1982)

I. INTRODUCTION [1]

I am deeply honored and grateful to have been invited to deliver the Chancellor's Lecture at this extraordinary and courageous university.

I am honored not only because it puts me in the distinguished company of the former lecturers in this triennial series, but also because the event itself commemorates so important a principle—academic freedom—and so steadfast a stand on the part of this university against the unwarranted limitation of its legitimate autonomy, including insistence on its right to select students and faculty without interference by government.

And I am grateful because it affords me the opportunity to discuss candidly and freely with you—from this unique podium—some of the mutual concerns that we in the United States share with many in South Africa over the current trend of events here.

A beloved American poet, Robert Frost, wrote:

Two roads diverged in a wood,
And I, I took the one less travelled by,
And that has made all the difference.

What I want to say to you—and through this occasion to my own countrymen in America—is that I believe that South Africa today does face two roads to the future, and that your choice of the road to follow will "make all the difference" both to your nation and to mine. I want to take a look down those two roads this evening and suggests that both you and we choose the one "less travelled by."

Now, you may well wonder why I single out South Africa's apartheid for special attention in a world in which arbitrary rule, political assassinations, kidnappings, jailings of dissidents, and torture are commonplace. And you may well ask why I feel it appropriate for a United States citizen to speak to you about what many South Africans consider purely an internal matter.

Henry Kissinger, as Secretary of State, answered that question in part in a speech he made in Zambia in 1976. He said: "The world community's concern with South Africa is not merely that racial discrimination exists there. What is unique is the extent to which racial discrimination has been institutionalized, enshrined in law, and made all pervasive."

But beyond that very valid point, there is—in my view—the sobering fact that South Africa's racial policies warrant international concern because I believe that unless they are fundamentally redesigned they will eventually lead to a catastrophic racial conflict that will have serious ramifications throughout the Western world, and most especially in the United States.

Frustration is clearly festering among young blacks [2] within South Africa. Many have already left the country to join liberation movements. Many more will do so in the future. And if a rising tide of violence engulfs both whites and blacks in South Africa—and, particularly if the Soviet Union chooses to help wage a war of liberation directly, or by proxy, against the white regime—then the United States will be confronted with a very dangerous set of dilemmas in trying to decide how to react.

Many Americans—both blacks and whites—will have intense personal feelings about the issues. Strong conflicting pressures to support one side or the other will emerge. The resulting debate could quickly mobilize African political and economic pressures against America. It could divide the United States from its European allies. And it surely would lead to bitter and divisive debate within the United States itself.

To put it bluntly, if South Africa fails to deal justly and effectively with its own internal racial problem, that failure will not only result in immense damage to your society, but it will impose heavy economic, military, and political penalties on other societies in the Western world as well, and particularly on the United States.

Bear in mind that I speak as a white American. Bear in mind that I speak to you as one who has witnessed the staggering costs my own country has had to pay because of its century of delay in moving to end our shameful discrimination toward black Americans. That tragic delay was without question the most serious mistake in our entire history, and the hard truth is that all Americans will continue to pay a heavy price for it for decades to come.

What, then, I would like to do this evening is:

Describe apartheid as an outsider sees it today;

Examine the Government's programs for dealing with it in the future;

Express a judgment on the internal and external reaction to that program; and

Consider the actions, internally and externally, which might be taken to lead to a different outcome.

II. THE SITUATION TODAY

First, then, let me describe how an outsider sees the situation today: what we in the United States believe to be the major elements of the apartheid policy, and what we understand are the Government's plans for the future.

The Race Classification Laws, the Influx Control Laws, the Land Laws, the Group Areas Acts, and the Homelands Policy are the building blocks from which the present apparatus of apartheid has been constructed.

Apartheid, then, rests on the following foundations:

The Population Registration Act of 1950 requires that every person be classified as White, Colored, Asian, or Black African. A person's political, civil, economic, and social rights hinge on this classification.

The "Homelands", including those designated as independent, comprise 13% of South Africa's geographical region. The land in these areas is poor, and the economies stagnant. And yet all black Africans—comprising 70% of the population of the country—are assigned to these areas as citizens, no matter where they may actually live. Thus, out of a total of 21 million black Africans, 11 million are resident in the Homelands; and 10 million, including perhaps two million males who are separated from their families, are "temporary residents" in the "white areas."

The Land Laws prohibit black Africans both from owning land outside the Homelands, and except in rare instances, from living outside the Homelands unless employed by whites.

The Influx Control Laws regulate the movement of blacks throughout South Africa by requiring that every black over the age of 16 be fingerprinted and carry a "Pass" Book containing the individual's identity card and employment record. A policeman may ask a black to produce his

[1] I am indebted to the former British Prime Minister, Mr. Edward Heath, who spoke on the subject of South Africa at the Opening Session of the International Political Prospects Conference, Johannesburg, August 31, 1981; to Mr. Alan Pifer, President of the Carnegie Corporation, who delivered the Commemoration Day Lecture at the University of Witwatersrand, Johannesburg, October 14, 1981; and to The Study Commission on U.S. Policy Towards Southern Africa, whose report, sponsored by the Rockefeller Foundation, was published in May 1981, for material which I have used in this statement.

[2] Unless otherwise indicated, the word blacks in this text refers to Asians, Colored, and black Africans living in South Africa.

"Pass" at any time, and failure to do so is a criminal offense.

The apartheid laws are enforced by powers granted under the Internal Security Act of 1982 which consolidates the provisions of earlier legislation. The Act—through restraints on the press, restrictions of civil liberties, and limitations on political activity—enables the Government, without recourse to the Courts, to silence anyone who poses a challenge to the regime.

The Security Laws were strengthened during the 1960's and 1970's by statutes enacting a series of tough pre-trial and preventive-detention measures. These laws place both whites and blacks in jeopardy of losing their personal freedom if they speak out against injustice.

In addition to detention, there is the penalty of "banning." A banned person loses the opportunity for normal employment, and for communication with friends and associates. Banning procedures are totally arbitrary.

This structure of restrictive laws, and arbitrary enforcement power, supports the following basic elements of the apartheid policy.

Denial of political rights:

Blacks are excluded from all significant forms of participation in South Africa's political system. They have no authorized voice, they are not even allowed to join political parties containing white members. Legislative power is vested in the 177 member parliament. The House of Assembly is chosen by whites (who total 4.8 million out of a population of 29 million) and restricted to whites. The executive power is held by the Prime Minister, the leader of the majority party of the parliament. Parliament is supreme and no court may invalidate its acts.

Segregation in the routine of daily life:

Segregation in lavatories, restaurants, railway cars, buses, swimming pools, and other public facilities is the rule. There is no legal obligation to provide comparable separate facilities for all racial groups. Although there has been some relaxation of segregation in recent years, "separate and unequal" treatment remains both legally accepted and widely practiced.

Gross economic disparities between whites and blacks:

The Homelands contain more than one-third of South Africa's population, but produce less than 5% of the country's goods and services. The apartheid laws limiting the residence and movement of Africans have led to the development of a migrant labor system in which some 60% of the men employed in the modern urban sector are migrants. They live in squalid, overcrowded barracks, without permanent resident rights for themselves or even temporary residence rights for their wives and children.

Race very largely determines the job a person holds. In 1977, fewer than 1 of every 100 unskilled workers was white, and fewer than 1 of every 200 company managers was black. There has been a conscious effort over the years to channel black labor to where it will benefit the whites, and to raise barriers against it where it seems to compete with whites. The gap between white and black incomes is enormous: income per capita for whites is 10 to 12 times that of blacks.

Discrimination in the distribution of social services:

The education available to blacks is vastly inferior to that for whites. In 1981 the pupil teacher ratio for black Africans was more than twice that for whites. The preparation of black teachers is generally poor. There is a shortage of 8,000 classrooms in black areas. In 1979 the Government spent $940 on the education of each white child, versus $90 on each black African child. Although black Africans outnumber whites 4½ to 1 in South Africa, white University graduates outnumbered black Africans 75 to 1.

Housing policy maintains the separation of the races, and preserves the existing structure of inequality. More than in any other country in the world, where one lives is determined by law. The Native Urban Areas Act of 1948 established compulsory residence for urban blacks in separate areas ("locations") on the outer edge of white areas, and regulated the entry of blacks into the cities. A housing shortage of crisis proportions exists—there is a shortage of 206,000 homes for blacks, almost none for whites. The average home in Soweto has 520 square feet, only 6% have baths, 13% indoor toilets. and 20% electricity. The housing shortage has led to squatter settlements of tim shanties without heat, sewerage, or electricity in which a population of over 1 million dwell.
